# Introduction to the Program

Modeling and Simulation have become key tools in the field of Aesthetic Medicine, offering practitioners new ways to visualize and predict treatment outcomes. For example, the advancement of 3D technologies and the analysis of facial and body data has allowed aesthetic procedures to be more personalized and effective. In this scenario, specialists require a solid understanding of how digital simulations can predict the effects of aesthetic procedures, from rejuvenation treatments to surgical interventions. With this in mind, TECH presents a pioneering university program focused on the most innovative techniques of Modeling and Simulation in Aesthetic Medicine.

“

*Thanks to this 100% online Postgraduate Certificate, you will handle the most sophisticated Modeling and Simulation methods to predict the results of treatments in Aesthetic Medicine”*

The implementation of Modeling and Simulation in Aesthetic Medicine is gaining more and more relevance as a fundamental tool to improve clinical outcomes. In the same vein, advanced simulation techniques allow practitioners to evaluate and predict the impact of procedures on the patient's facial and body anatomy. Therefore, it is essential that professionals have a comprehensive view on how digital simulations can facilitate the planning of plastic surgery treatments, facial rejuvenation and body contouring, contributing to the customization and optimization of therapies.

In this context, TECH launches a cutting-edge Postgraduate Certificate in Modeling and Simulation in Aesthetic Medicine. Designed by references in this area, the academic itinerary will delve into subjects ranging from the basics of Artificial Intelligence or the use of specialized software in the anticipation of facial changes in rejuvenation therapies to 3D body reconstruction methods to simulate aesthetic touch-ups. In line with this, the teaching materials will provide experts with the keys to get the most out of computer programs such as VASER Shape, which will enable them to appreciate the results of abdominal, hip or thigh liposuction operations. As a result, graduates will develop advanced clinical skills to apply Modeling and Simulation techniques with efficiency and precision, improving both the planning and the execution of different aesthetic procedures.

On the other hand, regarding the methodology of the university program, TECH relies on a 100% online Virtual Campus and the disruptive Relearning system, designed so that students do not have to memorize concepts and can incorporate them into their practice through gradual and organic reiteration. Also, a variety of complementary materials are implemented, such as detailed videos, interactive summaries and other multimedia resources. In addition, the teaching staff is composed of specialists with extensive research experience in the field of Modeling and Simulation in Aesthetic Medicine.

This **Postgraduate Certificate in Modeling and Simulation in Aesthetic Medicine** contains the most complete and up-to-date educational program on the market. Its most notable features are:

- ♦ The development of case studies presented by experts in Artificial Intelligence applied to Aesthetic Medicine
- ♦ The graphic, schematic and eminently practical contents with which it is conceived gather scientific and practical information on those disciplines that are indispensable for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*You will be able to generate accurate simulations to predict the effects of aesthetic interventions on facial and body tissues"*

“

*You will be able to identify possible risks and complications in aesthetic procedures using modeling techniques”*

*You will be highly qualified to present simulation results in a clear and understandable way.*

*The Relearning system applied by TECH in its programs reduces the long hours of study so frequent in other teaching methods.*

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the course. For this purpose, students will be assisted by an innovative interactive video system created by renowned experts.

02

# Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs, available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it has a huge faculty of more than 6,000 professors of the highest international prestige.

“

*Study at the largest online university in the world and ensure your professional success. The future begins at TECH”*

### The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

### The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

### The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

### The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

### A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

#### The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

#### Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

#### Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

#### The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

# 03

# Syllabus

This undergraduate program will provide an in-depth focus on the use of advanced technologies in the healthcare field. Throughout the curriculum, you will explore the use of cutting-edge software to simulate facial transformations, predict outcomes of procedures such as mammoplasty, and project in real time the effects of treatments such as Botox injection. In addition, techniques for facial symmetry analysis, rejuvenation treatment planning and volume assessment in body contouring will be analyzed. This will ensure that graduates master Artificial Intelligence tools, thus improving the accuracy of their aesthetic procedures.

“

*You will master state-of-the-art software  
in the Modeling and Simulation of  
aesthetic interventions”*

## Module 1. Modeling and Simulation in Aesthetic Medicine

- 1.1. Procedure Simulation with Artificial Intelligence
  - 1.1.1. 3D Simulation of Facial Changes in Rejuvenation Procedures (Crisalix)
  - 1.1.2. Modeling Dermal Fillers Results and Lip Adjustments (Modiface)
  - 1.1.3. Visualization of Body Aesthetic Surgery Results (MirrorMe3D)
  - 1.1.4. Real-Time Projection of Botox and Fillers Results (TouchMD)
- 1.2. Creating 3D Patient Models
  - 1.2.1. Generating 3D Facial Models from Photographs (FaceGen)
  - 1.2.2. 3D Body Scanning and Reconstruction for Aesthetic Simulation (Artec Eva)
  - 1.2.3. Integration of Anatomical Data into 3D Models (Materialise Mimics)
  - 1.2.4. Realistic Skin Modeling and Texturing in Facial Reconstructions (ZBrush)
- 1.3. Simulation of Plastic Surgery Outcomes
  - 1.3.1. Simulation of Rhinoplasties with Modeling of Bone Structures (Rhinomodel)
  - 1.3.2. Projection of Results in Mammoplasty and Other Body Procedures (VECTRA 3D)
  - 1.3.3. Prediction of Changes in Post-Surgery Facial Symmetry (Geomagic Freeform)
  - 1.3.4. Visualization of Facelift and Facelift Results (Canfield Scientific)
- 1.4. Scar Reduction and Skin Regeneration Simulation
  - 1.4.1. Simulation of Dermal Regeneration in Laser Treatments (Canfield VECTRA)
  - 1.4.2. Prediction of Scar Evolution with AI Algorithms (DermaCompare)
  - 1.4.3. Modeling the Effects of Chemical Peels in Skin Regeneration (SkinIO)
  - 1.4.4. Projection of Results in Advanced Healing Treatments (Medgadget SkinAI)
- 1.5. Projection of Results in Rejuvenation Therapies
  - 1.5.1. Modeling the Effects of Expression Line Reduction (DeepFaceLab)
  - 1.5.2. Simulation of Radiofrequency Therapies and Their Impact on Firmness (Visage Technologies)
  - 1.5.3. Prediction of Results in Laser Resurfacing Procedures (Syneron Candela eTwo)
  - 1.5.4. Visualization of the Effect of Intense Pulsed Light (IPL) Treatments (3D LifeViz)
- 1.6. Facial Symmetry Analysis
  - 1.6.1. Evaluation of Facial Proportions by Means of Reference Points (Face++)
  - 1.6.2. Real-Time Symmetry Measurement for Aesthetic Procedures (Dlib)
  - 1.6.3. Analysis of Facial Proportions in Harmonization Procedures (MorphoStudio)
  - 1.6.4. Comparison of Symmetry before and after Aesthetic Treatments (MediCapture)

- 
- 1.7. Volume Evaluation in Body Contouring
    - 1.7.1. Volumetric Measurement in Liposuction and Contouring Simulation (3D Sculptor)
    - 1.7.2. Analysis of Volume Changes in Buttock Augmentation Procedures (Sculpt My Body)
    - 1.7.3. Post-Lifting Body Contouring Evaluation (Virtual Surgical Planning)
    - 1.7.4. Prediction of Volume Changes in Non-Invasive Body Contouring (CoolSculpting Virtual Consult)
  - 1.8. Simulation of Hair Treatments
    - 1.8.1. Visualization of Results in Hair Transplantation (HairMetrix)
    - 1.8.2. Projection of Hair Growth in PRP Treatments (TruScalp AI)
    - 1.8.3. Simulation of Hair Loss and Density in Alopecia (Keeps AI)
    - 1.8.4. Evaluation of the Effects of Mesotherapy Treatments on Hair (HairDX)
  - 1.9. Simulation for Body Weight Reduction
    - 1.9.1. Projection of Results of Reductive and Shaping Treatments (Weight Loss Predictor)
    - 1.9.2. Analysis of Body Changes in Cryolipolysis Procedures (SculpSure Consult)
    - 1.9.3. Simulation of Volume Reduction in Ultrasonic Cavitation (UltraShape AI)
    - 1.9.4. Visualization of Body Radiofrequency Treatment Results (InMode BodyTite)
  - 1.10. Modeling of Liposuction Procedures
    - 1.10.1. 3D Simulation of Abdominal Liposuction Procedure Results (VASER Shape)
    - 1.10.2. Evaluation of Changes in Hips and Thighs after Liposuction (Body FX)
    - 1.10.3. Modeling of Fat Reduction in Small and Targeted Areas (LipoAI)
    - 1.10.4. Visualization of Laser-Assisted Liposuction Results (SmartLipo Triplex)

“ You will be able to adapt aesthetic procedures to the individual characteristics of each patient, thus improving patient satisfaction”

04

# Teaching Objectives

Through this very complete TECH Postgraduate Certificate, professionals will manage the most innovative strategies to incorporate Modeling and Simulation technologies in the aesthetic practice. Also, graduates will acquire advanced skills to use 3D tools and specialized software in the analysis of facial symmetry and prediction of surgical results. With this knowledge, physicians will be able to personalize treatments, improve the effectiveness of interventions and increase precision in therapeutic procedures.

“

*You will handle advanced tools to measure the results of aesthetic treatments, facilitating informed decision making”*

## General Objectives

---

- ♦ Develop advanced skills in the collection, cleaning and structuring of clinical and aesthetic data, ensuring the quality of the information
- ♦ Create and train predictive models based on Artificial Intelligence, able to anticipate aesthetic treatment results with high precision and personalization
- ♦ Manage specialized 3D simulation software to project potential outcomes of therapies
- ♦ Implement AI algorithms to improve accuracy in factors such as skin anomaly detection, sun damage assessment or skin texture
- ♦ Design clinical protocols tailored to the individual characteristics of each patient; taking into account their clinical data, environmental factors, and lifestyle
- ♦ Apply techniques for anonymization, encryption and ethical management of sensitive data
- ♦ Develop strategies to assess and adjust treatments based on the evolution of individuals, using visualization and predictive analytics tools
- ♦ Use synthetic data to train Artificial Intelligence models, extending predictive capabilities and respecting patients' privacy
- ♦ Adopt emerging Artificial Intelligence techniques to adjust and continuously improve therapeutic plans
- ♦ Be able to lead innovation projects, applying advanced technological knowledge to transform the Aesthetic Medicine sector

### Specific Objectives

---

- ♦ Gain proficiency in three-dimensional simulation of aesthetic procedures, from facial rejuvenation to body contouring
- ♦ Generate realistic 3D models based on anatomical data and individual patient characteristics
- ♦ Visualize real-time projections of non-invasive and surgical treatments, enhancing aesthetic planning
- ♦ Implement analysis of parameters such as facial symmetry, body volume and skin regeneration to optimize results

*You will achieve your objectives thanks to TECH's teaching tools, including explanatory videos and interactive summaries"*

05

# Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

*TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”*

## The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes  
(which you might not be able to attend)”*

### The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

## Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

## Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

## A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

*The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"*

### The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

### The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

*Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.*

*You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.*

As such, the best educational materials, thoroughly prepared, will be available in this program:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

#### Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

#### Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge. This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06

# Teaching Staff

TECH's main premise is to make available to anyone the most complete and renewed university programs in the academic panorama. For this reason, it carries out a rigorous process to constitute its teaching staff. As a result, this Postgraduate Certificate has brought together the leading specialists in the field of Modeling and Simulation in Aesthetic Medicine. This has enabled them to develop a wide range of teaching materials characterized by their high quality and full applicability to the demands of today's labor market. Consequently, graduates will enjoy an immersive experience that will increase their professional prospects.

“

*You will have access to an academic itinerary made up of authentic references in Modeling and Simulation in Aesthetic Medicine”*

## Management

### **Dr. Peralta Martín-Palomino, Arturo**

- CEO and CTO at Prometheus Global Solutions
- CTO at Korporate Technologies
- CTO at AI Shepherds GmbH
- Consultant and Strategic Business Advisor at Alliance Medical
- Director of Design and Development at DocPath
- Doctorate in Psychology from the University of Castilla La Mancha
- Doctorate in Economics, Business and Finance from the Camilo José Cela University
- Doctorate in Psychology from University of Castilla La Mancha
- Master's Degree in Executive MBA from the Isabel I University
- Master's Degree in Sales and Marketing Management from the Isabel I University
- Expert Master's Degree in Big Data by Hadoop Training
- Master's Degree in Advanced Information Technologies from the University of Castilla La Mancha
- Member of: SMILE Research Group

## Professors

### Mr. Popescu Radu, Daniel Vasile

- ♦ Independent Specialist in Pharmacology, Nutrition and Dietetics
- ♦ Freelance Producer of Didactic and Scientific Content
- ♦ Nutritionist and Community Dietitian
- ♦ Community Pharmacist
- ♦ Researcher
- ♦ Master's Degree in Nutrition and Health from the Open University of Catalonia
- ♦ Master's Degree in Psychopharmacology from the University of Valencia
- ♦ Pharmacist from the Complutense University of Madrid
- ♦ Nutritionist-Dietitian by the European University Miguel de Cervantes

### Mr. Del Rey Sánchez, Alejandro

- ♦ Degree in Industrial Organization Engineering
- ♦ Certification in Big Data and Business Analytics
- ♦ Certification in Microsoft Excel Advanced, VBA, KPI and DAX
- ♦ Certification in CIS Telecommunication and Information Systems

### Ms. Del Rey, Cristina

- ♦ Talent Management Administrator at Securitas Seguridad España, S.L.  
Extracurricular Activities Center Coordinator
- ♦ Support classes and pedagogical interventions with Primary and Secondary Education students
- ♦ Postgraduate in Development, Delivery and Tutoring of e-Learning Training Actions
- ♦ Postgraduate in Early Childhood Care
- ♦ Degree in Pedagogy from the Complutense University of Madrid

07

# Certificate

This Postgraduate Certificate in Modeling and Simulation in Aesthetic Medicine guarantees, in addition to the most rigorous and up-to-date program, access to an Postgraduate Certificate diploma issued by TECH Global University.

“

*Successfully complete this program and  
receive your university qualification without  
having to travel or fill out laborious paperwork”*

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Modeling and Simulation in Aesthetic Medicine** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University**, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
