tech 06 | Introduction

The use of Machine Learning in *Email Marketing* helps professionals design more effective and personalized advertising campaigns. This leads to higher conversion rates, implying greater retention by consumers. In addition, this smart technology serves to predict future customer behavior, such as the probability of cancellation of goods or services. In this way, experts can take proactive measures to avoid losses or other related problems.

Aware of its importance, TECH develops an innovative program aimed at individualizing and automating campaigns. The syllabus will delve into multiple resources to optimize communication processes with users, including Virtual Assistants. Also, the syllabus will delve into ethical considerations to ensure a responsible use of Artificial Intelligence in the generation of content such as videos or texts. The program will also offer exhaustive analysis of success stories in information production through Cognitive Computing. Even the teaching materials will delve into future trends in this area so that graduates develop innovative proposals with which to raise their professional horizons.

To consolidate all this content, TECH follows a modern methodology 100% online, which allows professionals to complete their knowledge update without the need to make uncomfortable daily trips to study centers. On the other hand, students will have at their disposal excellent teaching materials present in a variety of textual and multimedia formats (highlighting readings, explanatory videos, infographics or assessment exercises). Thanks to this, you will enjoy a fully enjoyable and individualized learning. This will enable specialists to take advantage of the wide range of opportunities offered by a constantly evolving technology sector.

This Postgraduate Diploma in Management and Execution of Optimized Digital Marketing Strategies using Artificial Intelligence contains the most complete and upto-date program on the market. The most important features include:

- The development of case studies presented by experts in Artificial Intelligence in Marketing and Communication
- The graphic, schematic and eminently practical content of the system provides complete and practical information on those disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

You will take into account during their procedures the feelings of customers thanks to the analysis of their feedbacks on platforms such as Facebook or X"

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will generate advanced texts through Artificial Intelligence, for later publication in both blogs and social media.

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

tech 10 | Objectives

General Objectives

- Understand the fundamentals of how AI is transforming Digital Marketing strategies
- Develop, integrate and manage chatbots and virtual assistants to improve customer interactions
- Delve into the automation and optimization of online ad buying through programmatic advertising with Al
- Interpret large volumes of data for strategic decision making in Digital Marketing
- Apply AI to email marketing strategies for personalization and campaign automation
- Explore emerging trends in AI for Digital Marketing and understand their potential impact on the industry

Access a flexible university program, without fixed schedules and with a content available 24 hours a day"

Specific Objectives

Module 1. Artificial Intelligence in Digital Marketing Strategies

- Perform Digital Marketing transformation processes with Al
- Control the most advanced tools of Machine Learning for customer communication
- Personalize users' experiences on websites and social media
- Develop chatbots and virtual assistants in Digital Marketing

Module 2. Content Generation with Al

- Master AI systems for SEO and SEM optimization
- Execute Predictive Analytics and using Big Data in Digital Marketing
- Use Email Marketing for Personalization and Automation in Campaigns
- Analyze future trends in AI for Digital Marketing

Module 3. Automation and Optimization of Marketing Processes with AI

- Develop Marketing Automation Processes with Al
- Optimize Advertising Campaigns through Machine Learning
- Optimize advertising campaigns through Machine Learning
- Analyze sentiment with AI on social networks, leveraging customer feedback

tech 14 | Course Management

Management

Dr. Peralta Martín-Palomino, Arturo

- CEO and CTO at Prometeus Global Solutions
- CTO at Korporate Technologies
- CTO at AI Shephers GmbH
- Consultant and Strategic Business Advisor at Alliance Medical
- Director of Design and Development at DocPath
- Ph.D. in Psychology from the University of Castilla La Mancha
- Ph.D. in Economics, Business and Finance from the Camilo José Cela University
- Ph.D. in Psychology from University of Castilla La Mancha
- Professional Master's Degree in Executive MBA by the Isabel I University
- Professional Master's Degree in Sales and Marketing Management, Isabel I University
- Expert Master's Degree in Big Data by Hadoop Training
- Professional Master's Degree in Advanced Information Technologies from the University of Castilla La Mancha
- Member of: SMILE Research Group

Mr. Sánchez Mansilla, Rodrigo

- Specialist in Digital Marketing
- Digital Advisor at Al Shepherds GmbH
- Digital Account Manager at Kill Draper
- Head of Digital at Kuarere
- Digital Marketing Manager at Arconi Solutions, Deltoid Energy and Brinergy Tech
- Founder and National Sales and Marketing Manager
- Professional Master's Degree in Digital Marketing (MDM) from The Power Business School
- Bachelor in Business Administration (BBA) from the University of Buenos Aires

Professors

Ms. Parreño Rodríguez, Adelaida

- Technical Developer & Energy Communities Engineer at the University of Murcia
- Manager in Research & Innovation in European Projects at the University of Murcia
- Technical Developer & Energy/Electrical Engineer & Researcher in PHOENIX Project and FLEXUM (ONENET) Project
- Content Creator in Global UC3M Challenge
- Ginés Huertas Martínez Award (2023)
- Professional Master's Degree in Renewable Energies from the Polytechnic University of Cartagena
- Degree in Electrical Engineering (bilingual) from Carlos III University of Madrid

Ms. González Risco, Verónica

- Specialist in Digital Marketing
- Freelance Digital Marketing Consultant
- Product Marketing/International Business Development at UNIR The University on the Internet
- Digital Marketing Specialist at Código Kreativo Comunicación SL
- Professional Master's Degree in Online Marketing and Advertising Management by Indisoft- Upgrade
- Postgraduate Certificate in Business Administration from the University of Almeria

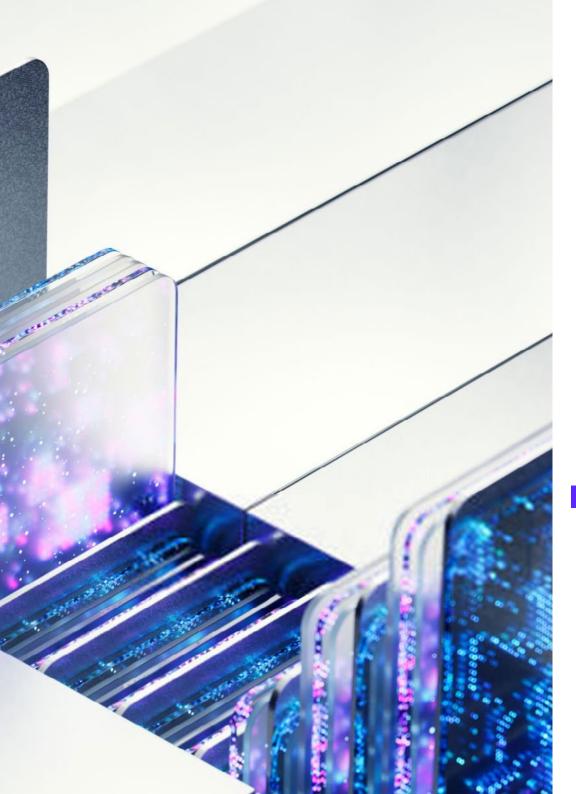

tech 18 | Structure and Content

Module 1. Artificial Intelligence in Digital Marketing Strategies

- 1.1. Digital Marketing Transformation with Al
 - 1.1.1. Introduction to Digital Transformation
 - 1.1.2. Impact on Content Strategy
 - 1.1.3. Automation of Marketing Processes
 - 1.1.4. Customer Experience Development
- 1.2. Al Tools for SEO and SEM
 - 1.2.1. Keyword Optimization with Al
 - 1.2.2. Competition Analysis
 - 1.2.3. Search Trend Prediction
 - 1.2.4. Intelligent Audience Segmentation
- 1.3. Application of AI in Social Media
 - 1.3.1. Sentiment Analysis
 - 1.3.2. Social Trend Detection
 - 1.3.3. Publication Automation
 - 1.3.4. Automated Content Generation
- 1.4. Al Tools for Customer Communication
 - 1.4.1. Personalized Chatbots
 - 1.4.2. Automated E-mail Response Systems
 - 1.4.3. Real-Time Response Optimization
 - 1.4.4. Customer Feedback Analysis
- 1.5. Personalization of the User Experience of Al-enabled Tools and Websites
 - 1.5.1. Personalized Recommendations
 - 1.5.2. User Interface Adaptation
 - 1.5.3. Dynamic Audience Segmentation
 - 1.5.4. Intelligent A/B Testing
- 1.6. Chatbots and Virtual Assistants in Digital Marketing
 - 1.6.1. Proactive Interaction
 - 1.6.2. Multichannel Integration
 - 1.6.3. Contextual Responses
 - 1.6.4. Conversation Analytics

Structure and Content | 19 tech

- 1.7. Programmatic Advertising with Al
 - 1.7.1. Advanced Targeting
 - 1.7.2. Real-Time Optimization
 - 1.7.3. Automatic Bidding
 - 1.7.4. Results Analysis
- 1.8. Predictive Analytics and Big Data in Digital Marketing
 - 1.8.1. Prediction of Market Trends
 - 1.8.2. Advanced Attribution Models
 - 1.8.3. Predictive Audience Segmentation
 - 1.8.4. Sentiment Analysis in Big Data
- 1.9. Al and Email Marketing for Personalization and Automation in Campaigns
 - 1.9.1. Dynamic List Segmentation
 - 1.9.2. Dynamic Content in Emails
 - 1.9.3. Workflow Automation
 - 1.9.4. Open Rate Optimization
- 1.10. Future Trends in Al for Digital Marketing
 - 1.10.1. Advanced Conversational Al
 - 1.10.2. Augmented Reality Integration
 - 1.10.3. Emphasis on Al Ethics
 - 1.10.4. Al in Content Creation

Module 2. Content Generation with Al

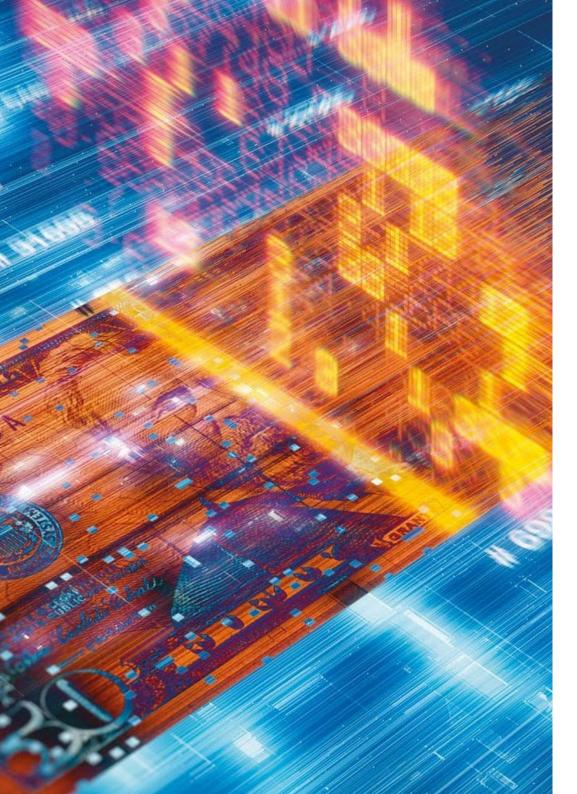

- 2.1. Prompt Engineering in ChatGPT
 - 2.1.1. Improving the Quality of the Generated Content
 - 2.1.2. Strategies to Optimize Model Performance
 - 2.1.3. Designing Effective Prompts
- 2.2. Al Image Generation Tools
 - 2.2.1. Object Recognition and Generation
 - 2.2.2. Applying Custom Styles and Filters to Images
 - 2.2.3. Methods to Improve the Visual Quality of Images

tech 20 | Structure and Content

- 2.3. Creating Videos with Al
 - 2.3.1. Tools to Automate Video Editing
 - 2.3.2. Voice Synthesis and Automatic Dubbing
 - 2.3.3. Techniques for Object Tracking and Animation
- 2.4. Text Generation with AI for Blogging and Social Media
 - 2.4.1. Strategies for Improving SEO Positioning in Generated Content
 - 2.4.2. Using AI to Predict and Generate Content Trends
 - 2.4.3. Creation of Attractive Headlines
- 2.5. Personalizing Content with AI for Different Audiences
 - 2.5.1. Identification and Analysis of Audience Profiles
 - 2.5.2. Dynamic Adaptation of Content according to User Profiles
 - 2.5.3. Predictive Audience Segmentation
- 2.6. Ethical Considerations for the Responsible Use of Al in Content Generation
 - 2.6.1. Transparency in Content Generation
 - 2.6.2. Prevention of Bias and Discrimination in Content Generation
 - 2.6.3. Control and Human Supervision in Generative Processes
- 2.7. Analysis of Successful Cases in Content Generation with Al
 - 2.7.1. Identification of Key Strategies in Successful Cases
 - 2.7.2. Adaptation to Different Sectors
 - 2.7.3. Importance of Collaboration between AI Specialists and Industry Practitioners
- 2.8. Integration of Al-generated Content in Digital Marketing Strategies
 - 2.8.1. Optimization of Advertising Campaigns with Content Generation
 - 2.8.2. User Experience Personalization
 - 2.8.3. Automation of Marketing Processes
- 2.9. Future Trends in the Generation of Content with Al
 - 2.9.1. Advanced and Seamless Integration of Text, Image and Audio
 - 2.9.2. Hyper-personalized Content Generation
 - 2.9.3. Improved AI Development in Emotion Detection
- 2.10. Evaluating and Measuring the Impact of Al-generated Content
 - 2.10.1. Appropriate Metrics to Evaluate the Performance of Generated Content
 - 2.10.2. Measurement of Audience Engagement
 - 2.10.3. Continuous Improvement of Content through Analysis

Module 3. Automation and Optimization of Marketing Processes with Al

- 3.1. Marketing Automation with Al
 - 3.1.1. Al-based Audience Segmentation
 - 3.1.2. Workflow Automation
 - 3.1.3. Continuous Optimization of Online Campaigns
- 3.2. Integration of Data and Platforms in Automated Marketing Strategies
 - 3.2.1. Analysis and Unification of Multichannel Data
 - 3.2.2. Interconnection between Different Marketing Platforms
 - 3.2.3. Real-time Data Updating
- 3.3. Optimization of Advertising Campaigns with Al
 - 3.3.1. Predictive Analysis of Ad Performance
 - 3.3.2. Automatic Personalization of the Advertisement according to the Target Audience
 - 3.3.3. Automatic Budget Adjustment according to Results
- 3.4. Audience Personalization with Al
 - 3.4.1. Content Segmentation and Personalization
 - 3.4.2. Personalized Content Recommendations
 - 3.4.3. Automatic Identification of Homogeneous Audiences or Groups
- 3.5. Automation of Responses to Customers through Al
 - 3.5.1. Chatbots and Machine Learning
 - 3.5.2. Automatic Generation of Responses
 - 3.5.3. Automatic Problem Solving
- 3.6. Al in Email Marketing for Automation and Personalization
 - 3.6.1. Automation of Email Sequences
 - 3.6.2. Dynamic Personalization of Content according to Preferences
 - 3.6.3. Intelligent Segmentation of Mailing Lists
- 3.7. Sentiment Analysis with AI in Social Media and Customer Feedback
 - 3.7.1. Automatic Sentiment Monitoring in Comments
 - 3.7.2. Personalized Responses to Emotions
 - 3.7.3. Predictive Reputation Analytics

Structure and Content | 21 tech

- 3.8. Price and Promotion Optimization with Al
 - 3.8.1. Automatic Price Adjustment based on Predictive Analytics
 - 3.8.2. Automatic Generation of Offers Adapted to User Behavior
 - 3.8.3. Real-time Competitive and Price Analysis
- 3.9. Integration of AI into Existing Marketing Tools
 - 3.9.1. Integration of AI Capabilities with Existing Marketing Platforms
 - 3.9.2. Optimization of Existing Functionalities
 - 3.9.3. Integration with CRM Systems
- 3.10. Trends and Future of Automation with AI in Marketing
 - 3.10.1. Al to Improve User Experience
 - 3.10.2. Predictive Approach to Marketing Decisions
 - 3.10.3. Conversational Advertising

This university program will allow you to fulfill your professional aspirations in just 6 months. What are you waiting for to enroll?"

tech 24 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Information Technology schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 27 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

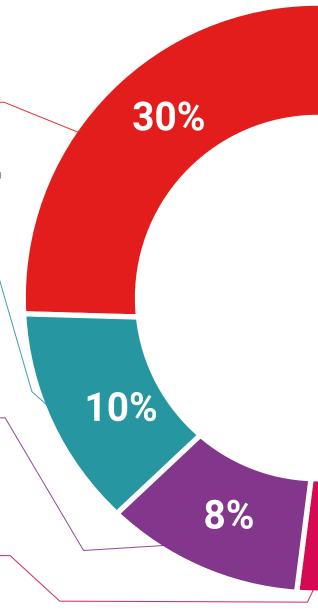

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

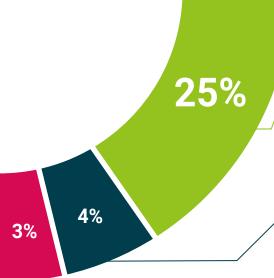

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
