Introduction

Aesthetic medicine has experienced tremendous growth in recent years, causing other disciplines to integrate many of its techniques into their daily work. Thus, dentistry is one of the areas that has incorporated numerous aesthetic procedures in response to the current high demand for these treatments. Thus, the physicians need an update on the fundamental principles of this clinical field,, and this program offers it by providing them with an internship in a reference health center, where they can come into contact with patients in a 100% real environment , and always with the accompaniment of specialists from the hospital itself.

A unique opportunity to expand your career as a dentist specializing in Aesthetic Medicine"

Cosmetic dentistry is an increasingly demanded specialty because people are changing their consumption habits and adapting to new patterns and profiles of personal care. The advantages of advances in science and technological resources available in this 21st century, have awakened a greater interest in dental health and aim to the new canons of beauty.

In this sense, TECH at the forefront of education has developed this program that incorporates in a practical and face-to-face way the main advances in the field of aesthetic medicine applied to dentistry. Techniques related to dermal fillers, plasma rich in growth factors or botulinum toxin will be at your fingertips in this hands-on training.

A unique opportunity to see first hand the most advanced procedures from the hands of great experts. As well as learning how to handle the equipment involved in each of the activities of Comprehensive Aesthetic Medicine for Dentists.

It will be an on-site stay of 3 weeks, where the professionals will have an assigned tutor and a multidisciplinary team at his disposal for the most effective learning. In this way, they will be able to learn the latest procedures in this field, being able to integrate them in their own work immediately at the end of the program.

02

Why Study an Internship Program?

Dentists who develop their careers in the digital era must keep themselves updated and trained to keep up with the demands of a population that is more informed and up to date with new medical techniques and procedures. Broadening their perspective on the methodology used by other professionals will help them to improve their daily clinical practice and aim for success. In this sense, having the opportunity to develop practical training in a prestigious dental clinic opens a range of possibilities to improve patient service. With this eminently practical TECH program, the dental professionals will be able to incorporate new activities to their practice, handle the latest technology equipment and test the effectiveness of new generation materials and resources. During 3 weeks of intensive training from Monday to Friday with 8-hour workdays, you will join a multidisciplinary team of specialists who will support you in achieving your goals. Undoubtedly, a unique opportunity to acquire knowledge without borders.

Update your repertoire of dental clinical services with this practical program in Comprehensive Aesthetic Medicine for Dentists"

1. Updating from the latest technology available

Aesthetic medicine is evolving by leaps and bounds and is becoming less and less invasive. The latest treatments and resources in the dental health field must be known by all dentists today. Therefore, sharing an on-site stay in a prestigious clinical center will raise your resume profile and encourage you to improve your professional qualities.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

As a professional it is important to share spaces for knowledge exchange and learning with other specialists. To learn aesthetic medicine in dentistry, this Internship Program will provide the right environment for the professionals who chooses to improve their skills and competencies. To do this, TECH will assign a tutor who will accompany you throughout the process, so the students will never be alone.

3. Entering First-Class Clinical Environments

TECH, aware of the importance of dental health for people today, has carefully selected some centers specialized in Aesthetic Dental Medicine. In order for the student of this practical program to find the most advanced resources and procedures to learn from and thus improve their daily clinical practice.

4. Putting the acquired knowledge into daily practice from the very first moment

The professionals nowadays lacks time for all the agenda and goals they set for themselves, so they often leave aside the most important part, which is their training. For this reason, TECH has designed a new 3-week on-site, 100% practical teaching model, which facilitates the learning and implementation of new competencies in terms of the service offered. In this case, it offers the dentists to be updated in terms of the most advanced techniques in Aesthetic Medicine and thus become a reference in their environment.

5. Expanding the Boundaries of Knowledge

With TECH there are no borders to learn. Wherever you are, you can meet your training goals. If you are one of those who bet on innovation, TECH offers you this eminently practical program in Comprehensive Aesthetic Medicine for Dentists with prestigious centers of national or international reference according to your possibilities. The aim is for you to broaden your perspectives and bet on success.

You will have full practical immersion at the center of your choice"

03

Objectives

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this educational entity undertakes to take out civil liability insurance to cover any eventuality that may arise during the internship during the stay at the internship center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCES: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.
