01 Introduction

Computer-guided surgery offers professionals millimetric precision in the execution of the technique, while transmitting maximum safety to the patient who requires surgery. This is one of the latest advances, but in recent years, innovation has led to improvements in both equipment and techniques. Thus, and in order to offer a practical update of knowledge in implantology and oral surgery, TECH has created this program, which brings the professional closer to the latest advances, through a stay in a clinical center of reference and with the best professionals in this area. This way, the professional will be able to keep up to date in a first class environment.

Incorporate into your daily practice the most relevant advances in the area of Implantology and Oral Surgery thanks to a distinctive and unique practical experience"

The latest advances, especially in technology, in the field of dentistry have led to greater precision, reduced recovery times, greater comfort in interventions and innovation in techniques. All this, in turn, translates into greater safety and peace of mind for patients.

This progress can also be transferred to Implantology and Oral Surgery, a field where biomaterials and the improvement of procedures have optimized the obtained results. In view of this reality, dental professionals need to update their knowledge in practice. This is the reason for the creation of this Practical Training, which will take place in a prestigious center.

It is a face-to-face stay in a first class clinical environment, where the professional will spend 3 weeks updating his skills and abilities. In a process, moreover, where you will not be alone, as you will have a specialist from the center at your side, who will guide you during this period so that you can successfully achieve your practical updating objectives.

Enjoy an intensive 3-week stay in a reputable center and get up to date on the latest clinical procedures to achieve professional growth"

02

Why Study an Internship Program?

Postgraduate education must go far beyond providing an academic update. And that is why TECH has designed a Internship Program, which focuses from the first moment on the update through the realization of activities, by the professional. This will be possible thanks to the immersion in a prestigious clinical center, which will take you throughout 3 intensive weeks to check the most advanced techniques used by the most cutting-edge technology. This will allow you to integrate recent advances in Implantology and Oral Surgery into your daily practice. In addition, during this process, the dentist will not be alone, as they will always be supervised by a specialist from this center with extensive experience in this field. All this is a guarantee of being able to obtain a direct and real update, which responds to the real needs of dentists in this field.

TECH offers you the possibility of entering into real clinical environments and maximum demand to deepen, with the help of the best specialists, in the latest advances in Implantology and Oral Surgery"

1. Update from the latest technology available

The area of Implantology and Oral Surgery has managed to perfect processes and techniques, thanks to advances in the technological devices and materials used for this purpose. This, in turn, improves treatments and patient recovery. For this reason, and with the aim of bringing the specialist closer to this technology, TECH presents this Internship Program with which the professional will enter a cutting-edge clinical environment, accessing the latest technology in this field.

2. Gain in-depth knowledge from the experience of top specialists

The professional who enters this program will be surrounded, from the first moment, by real specialists in the performance of implants and oral surgery. This during the entire practical period, where they will also have a specifically designated tutor, who will take them to check the most effective techniques used in the field of Implantology and Oral Surgery, as well as the procedures used in a leading clinical center.

3. Enter first-class clinical environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the area of Implantology and Oral Surgery. In this way, they will be able to directly apply the most recent advances in this area and integrate them into their daily practice in the most effective way.

4. Putting the acquired knowledge into daily practice from the very first moment

In this program TECH abandons pure theory to focus on facilitating a practice that will lead the professional to obtain a complete and real update in the area of Implantology and Oral Surgery. A 100% practical model, in a real clinical scenario and with the care of patients who require the intervention of specialists in this field. All this in an intensive 3-week stay with the best dental professionals.

5. Expand the boundaries of knowledge

TECH offers the possibility of doing this Internship Program, not only in national, but also in international centers. This way, the specialist will be able to immerse themselves in an excellent environment, which will allow them to expand their frontiers alongside dentists who have practiced their profession in leading clinical centers. An excellent opportunity that only this academic institution offers.

You will have full practical immersion at the center of your choice"

03 Objectives

The objective of this Internship Program is to function as a bridge between the already consolidated knowledge of the professional and the challenges they must face in the field of Implantology and Oral Surgery. In this way, the professional will be able to keep up to date with the most recent technical and technological advances, through a practical experience that is unique in the current academic panorama.

General Objectives

- ◆ Master the processes and instruments used in the field of Implantology and Oral Surgery
- ◆ Incorporate into daily work the most effective methods and techniques in the approach to patients requiring implants
- ◆ Update the pharmacological knowledge used in oral surgery interventions

Specific Objectives

- ◆ Identify the drugs needed in implant treatment
- ◆ Apply radiological techniques for implantological diagnosis
- ◆ Perform the impression taking of patients with osseointegrated implants and the casting of impressions taken on dental implants
- ◆ Perform occlusal adjustment of implant prostheses
- ◆ Apply membrane-guided bone regeneration and lyophilized bone, as well as the technique of obtaining plasma rich in growth factors
- ◆ Perform surgical techniques for sinus lift, from both a lateral and crestal approach
- ◆ Put to practice immediate post-extraction implantology
- ◆ Perform the technique of bone grafting on the mandibular ramus and symphysis
- ◆ Manage complex and demanding clinical situations whether they are aesthetic or functional
- ◆ Apply surgical techniques to obtain primary stability of an implant
- ◆ Apply your knowledge to single teeth, partial bridges and immediately loaded restorations
- ◆ Perform the necessary occlusal adjustment in immediate loading
- ◆ Diagnose the periodontal alterations that can occur around implants
- ◆ Apply the techniques of soft tissue alveolar ridge augmentation and preprosthetic periodontal surgery
- ◆ Master the mucoperiosteal flap technique, the epithelium and connective tissue free gingival graft technique, pedicle grafting and esthetic periodontal surgery
- ◆ Explain peri-implant maintenance techniques
- ◆ Update the knowledge to wax up the ideal anatomy of the teeth
- ◆ Use the height plates required for prosthetic rehabilitation
- ◆ Apply the necessary techniques for the preparation of working models
- ◆ Describe one- and two-stage surgical procedures and prepare the surgical field and master sterilization protocols

Stay on the cutting edge of the advances that have been developed in preprosthetic periodontal surgery"

04 Educational Plan

This practical program consists of a stay in a prestigious center for three weeks, from Monday to Friday and with consecutive eight-hour days, in which the student will be able to learn the procedures and techniques used in the field of implantology and oral surgery. They will also be able to treat real patients accompanied by a team of professionals with great experience in this field.

In this training proposal, of a completely practical nature, the activities are aimed at developing and perfecting the skills necessary for the provision of dental care. Thus, the student will acquire experience to perform safely in a field in constant development.

TECH thus provides an excellent opportunity to update skills in an outstanding healthcare environment and alongside top-level professionals. This institution thus offers a unique and differentiating experience, with which to improve the skills of professionals in the field of Implantology and Oral Surgery.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees who facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of dentistry (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Module	Practical Activity
Methods diagnostic methods and implant planning	Provide support in the medical evaluation of the surgical patient
	Collaborate in the performance of anesthetic techniques in surgery and implantology
	Perform sedation and general anesthesia
	Assist in the performance of extra- and intraoral examination
	Practice impression techniques in implantology diagnostics
	Perform wax-up techniques and clinical considerations
	Make radiological splints
	Perform radiological diagnostics in implantology: 2D planning and cone beam computed tomography (CBCT)
Basic Surgical Technique and Implantology	Prepare the surgical field taking into account sterilization and premedication protocols and premedication
	Assist in performing incision techniques in implantology
	Assist in the use of drilling technique in implantology: sequential and biological drilling
	Provide support in the performance of suturing techniques
Technique of maxillary sinus elevation	Practice the different surgical alternatives used in implantology
	Contribute to the diagnosis of the maxillary sinus
	Perform sinus elevation with osteotome technique
	Collaborate in minimally invasive sinus elevation by crestal approach: ultrasonic drilling kits and balloon technique
Use of implant prostheses	Provide support in performing sinus lift technique by lateral approach
	Perform impression techniques: open or closed tray impressionists
	Perform removable complete rehabilitations
	Perform fixed complete rehabilitations with hybrid prosthesis and with fixed prosthesis
	Use pink and white aesthetics in oral rehabilitations with dental implants

05

Where Can I Do the Internship Program?

TECH's main goal is to offer professionals a quality practical stay, therefore it provides clinical centers that meet the rigorous selection criteria. This is a guarantee for specialists who wish to access a first class professional environment, where they can develop and improve their skills and abilities in the field of Implantology and Oral Surgery.

“

This is a program that offers you the opportunity to gain access to prestigious clinical centers, where you can carry out an intensive practical stay"

The student will be able to do this program at the following centers:

Dentistry

Clínica Go Gaztambide

Country: Spain City: Madrid

Address: Calle de Gaztambide, 52, bajo derecha, 28015 Madrid

Dental and aesthetic care center

Related internship programs:

- Periodontics and Mucogingival Surgery
- Orthodontics and Dentofacial Orthopedics

Dentistry

Clínica dental Sainz de Baranda 39

Country: Spain City: Madrid

Address: C/ del Alcalde Sainz de Baranda, 39, 28009 Madrid

Specialized general dentistry clinic in prosthetics, dental esthetics and periodontics.

Related internship programs:

- Implantology and Oral Surgery

Dentistry

Rivera Odontólogos

Country: Spain City: Madrid

Address: Calle Puentedeume, Av. los Castillos, 6, Local (esquina, 28925 Alcorcón, Madrid)

Dental clinic specialized in Oral Surgery, Orthodontics, Periodontics and Endodontics.

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the internship program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Implantology and Oral Surgery** contains the most complete and up-to-date program on the professional and academic scene.

After the student has passed the evaluations, they will receive their corresponding TECH Internship Program issued by TECH Technological University via tracked delivery.

The diploma issued by TECH will reflect the grade obtained in the test.
