# Introduction

La Dental Care is essential in Patient with Endocrine Pathology and Special Situations in Women. Prevention and treatment of periodontal disease and other oral conditions are vital to minimize the associated risks. In addition, it is important that patients receive regular dental care and take preventive measures to maintain good health. For this reason, TECH has designed a degree that allows the student to maximize their knowledge on aspects such as Diabetes Mellitus, General Medical Complications, Parathyroid Pathology, Oral Health Care in the Breastfeeding Woman, or Secondary Adrenal Insufficiency, among others. All this, thanks to a 100% online modality and with the most dynamic and practical multimedia materials in the academic market.

“

*Take the opportunity and acquire new skills on Dental Management of the Patient with Endocrine Pathology in a 100% online modality"*

Dental care is crucial in patients with endocrine pathology and special situations in women. Prevention and treatment of periodontal disease and other oral complications are essential to minimize the risk of complications related to these diseases and hormonal changes. Therefore, it is essential that patients with endocrine pathology and women in special situations receive regular dental care and treatment to prevent and treat oral complications.

For this reason, TECH has designed a Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women with which it seeks to provide students with the necessary skills to be able to perform their work as specialists, with the highest possible efficiency and quality. Thus, throughout this program, aspects such as Types of Diabetes, General Medical Complications, Dental Management of the Hypothyroid Patient, Secondary Adrenal Insufficiency or Oral Health Care in the Breastfeeding Woman will be addressed.

And all this, through a comfortable 100% online mode that allows the student to organize their schedules and their studies, combining them with their other work and interests of the day to day. In addition, this degree has the most complete theoretical and practical materials on the market, which facilitates the student's study process and allows them to achieve their goals in a short period of time.

This **Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Dental Care in the Patient with Endocrine Pathology Patients and Special Situations in Woman
- ♦ The graphic, schematic and practical contents of the program provide Sports and practical information on those disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*Become an expert in Dental Management of Pregnant Women in just a few weeks and with total freedom of organization"*

“

*Become a successful professional in one of the most promising areas of Dentistry, thanks to TECH and the most innovative didactic materials"*

*Access the content from the first day and from any device with internet connection, whether it is a tablet, cell phone or computer.*

*Delve into the essential aspects of Dental Care, from the comfort of your home and at the time of day of your choice.*

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

# 02 Objectives

The final objective of this Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women is for the student to acquire an accurate update of their knowledge in this area. An update that will allow the student to work with the highest possible quality and efficiency. All this, thanks to TECH and a 100% online modality that gives total freedom of organization and schedules to the student.

“

*Delve into aspects such as Adverse Pregnancy Events Associated with Oral Health, from the comfort of your own home and without the need for travel of any kind"*

## General Objectives

---

- ♦ Update knowledge on the identification of pathologies that may affect the normal development of dental treatment
- ♦ Analyze pathologies that may hinder dental treatment
- ♦ Define the pharmacological guidelines for patients
- ♦ Define and analyze the basic and advanced aspects that define the actions to be taken in case of the main urgent and emergent conditions in a dental office
- ♦ Address the most common medical complications in patients
- ♦ Provide updated recommendations based on scientific evidence for an adequate dental approach to patients
- ♦ Identify the main Oral characteristics of Patients
- ♦ Update knowledge on the medical conditions and medication necessary
- ♦ Deepen in the main complications derived from the different medical pathologies
- ♦ Delve into the possible interactions derived from the medical pathology in the dental setting

## Specific Objectives

---

- ◆ Identify the medical complications of Diabetes Mellitus in relation to dental treatment
- ◆ Establish the existing association according to the scientific literature between Diabetes and Periodontal Disease and vice versa, and with other oral pathologies
- ◆ Present a protocol for dental care in patients with Diabetes Mellitus
- ◆ Identify the medical complications of hyper or hypothyroidism in relation to dental treatment
- ◆ Present a protocol for dental care in patients with hyper or hypothyroidism
- ◆ Specify in which situations we can detect a possible adrenal insufficiency due to taking exogenous corticoids
- ◆ Present a protocol for dental care in patients taking high doses of corticosteroids
- ◆ Identify the systemic complications associated with being pregnant or breastfeeding in relation to dental treatment
- ◆ Present a protocol for dental care for pregnant and lactating women

*Overcome your most demanding goals thanks to a unique program with the most complete theoretical and practical materials in the academic market"*

# 03

# Course Management

In its constant search to provide a degree of the highest quality and usefulness, TECH has selected professionals specialized in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women Pathology as part of this teaching staff, who have been in charge of the design of the most advanced contents. Thus, students will learn from the best the keys to their professional development in a field that adapts to new technologies and the latest advances in the market.

“

*The most experienced management and faculty will provide you with the most up-to-date knowledge on Diabetes and Oral Health, preparing you to face the most demanding challenges in this area"*

## Management

### Dr. Gil Montoya, José Antonio

- ♦ General Dentist in private practice
- ♦ Coordinator of the Doctoral Program in Clinical Medicine and Public Health of the University of Granada
- ♦ Director of the Stomatology Department of the University of Granada
- ♦ Head Teacher of Dentistry in Special Patients at the University of Granada
- ♦ Gerodontology Professor at the University of Granada
- ♦ Invited professor of online Masters in Special Patients and Gerodontology
- ♦ Degree in Dentistry from the University of Granada
- ♦ PhD in Dentistry from the University of Granada
- ♦ Master's Degree in Social Gerontology from the University of Granada
- ♦ Master in Health Research Methodology by the Andalusian School of Public Health

# 04

## Structure and Content

The structure and all the didactic resources of this curriculum have been designed by the renowned professionals that make up TECH's team of experts in this area of Odontology. These specialists have used their extensive experience and their most advanced knowledge to create practical and completely updated contents. All this, based on the most efficient teaching methodology, TECH's Relearning.

“

*Master your knowledge of Odontology, thanks to the Didactics most innovative materials and a wide variety of additional content available on the Virtual Campus”*

**Module 1.** Dental Care in Patients with Endocrine Pathology. Special Situations in Women

- 1.1. Diabetes Mellitus
  - 1.1.1. The Concept of Diabetes Mellitus
  - 1.1.2. Types of Diabetes
  - 1.1.3. Medical treatment of Diabetes Mellitus
- 1.2. Medical Complications in Diabetes Mellitus
  - 1.2.1. General medical complications
  - 1.2.2. Medical complications that can affect oral health
  - 1.2.3. Medical complications that can affect dental treatment
- 1.3. Dental management of patients with diabetes mellitus
  - 1.3.1. Caries and periodontal disease control
  - 1.3.2. Dental management protocol of the patient with Diabetes Mellitus
  - 1.3.3. Action in case of hypo- or hyperglycemia in the dental chair
- 1.4. Action in case of hypo- or hyperglycemia in the dental chair
  - 1.4.1. Thyroid pathology: hyperthyroidism and hypothyroidism. Medical considerations
  - 1.4.2. Dental management of the patient with hyperthyroidism
  - 1.4.3. Dental management of the patient with hypothyroidism
- 1.5. Dental management of the patient with parathyroid pathology
  - 1.5.1. Parathyroid Pathology
  - 1.5.2. Oral health-related systemic complications
  - 1.5.3. Dental management of the patient with parathyroid pathology
- 1.6. Dental management of the patient with Cushing's Syndrome/Addison's Disease
  - 1.6.1. Cushing's Syndrome. General Aspects
  - 1.6.2. Addison Disease General Aspects
  - 1.6.3. Dental management of the patient with Cushing's Syndrome/Addison's Disease
- 1.7. Dental management of the patient treatment with Corticoids
  - 1.7.1. Corticosteroids. Indications and Adverse Effects
  - 1.7.2. Secondary Adrenal Gland Insufficiency
  - 1.7.3. Preventive action protocol for a patient with secondary adrenal insufficiency

- 1.8. Physiological Changes during Pregnancy. Oral Health of a Pregnant Woman
  - 1.8.1. General physiological changes in the pregnant woman
  - 1.8.2. Oral physiological and pathological changes in pregnant women
  - 1.8.3. Adverse pregnancy events associated with oral health
- 1.9. Dental management of pregnant women
  - 1.9.1. Radiologic treatment considerations in pregnant women
  - 1.9.2. Pharmacological treatment considerations in pregnant women
  - 1.9.3. General Dental management in pregnant women
- 1.10. Dental management of lactating women
  - 1.10.1. Pharmacological treatment considerations in lactating women
  - 1.10.2. Oral health care in lactating women
  - 1.10.3. Oral health Care in a Newborn

“ Thanks to the most efficient teaching methodology, TECH Relearning, you will be able to acquire new knowledge in a precise and natural way, without spending too much time studying”

# 05

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

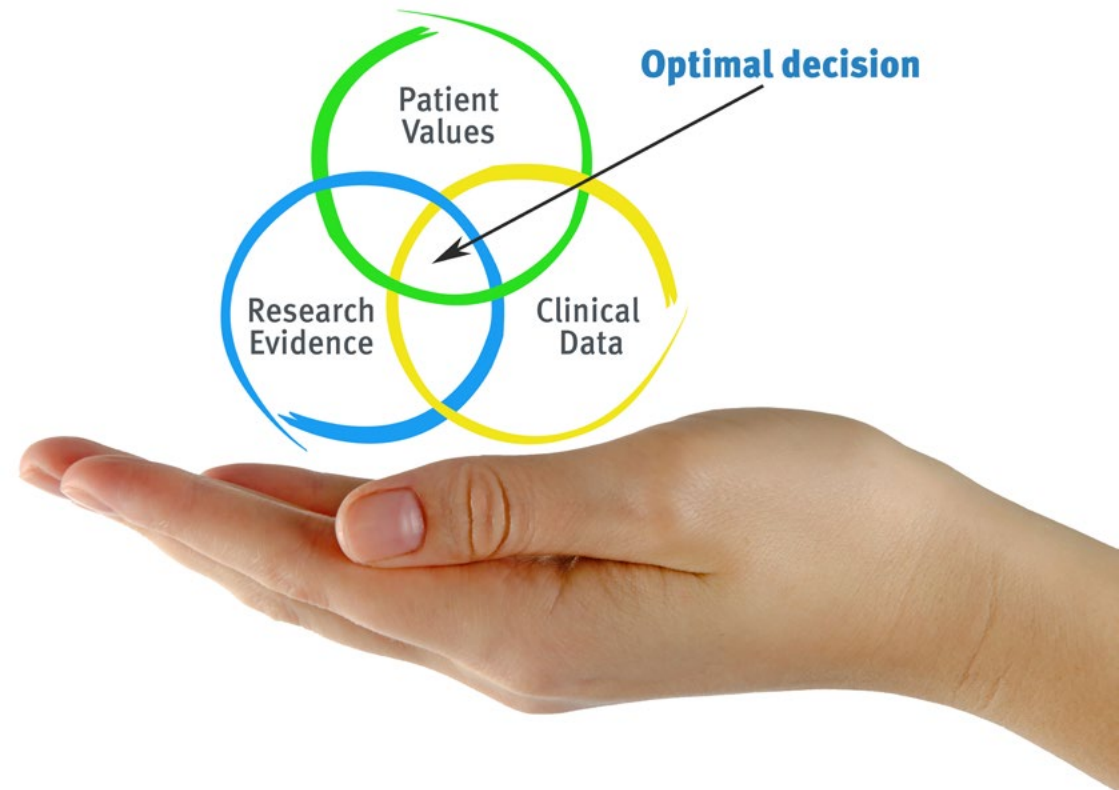

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the dentist's professional practice.

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Dentists who follow this method not only grasp concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

*The student will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 115,000 dentists with unprecedented success, in all specialties regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances, and to the forefront of medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

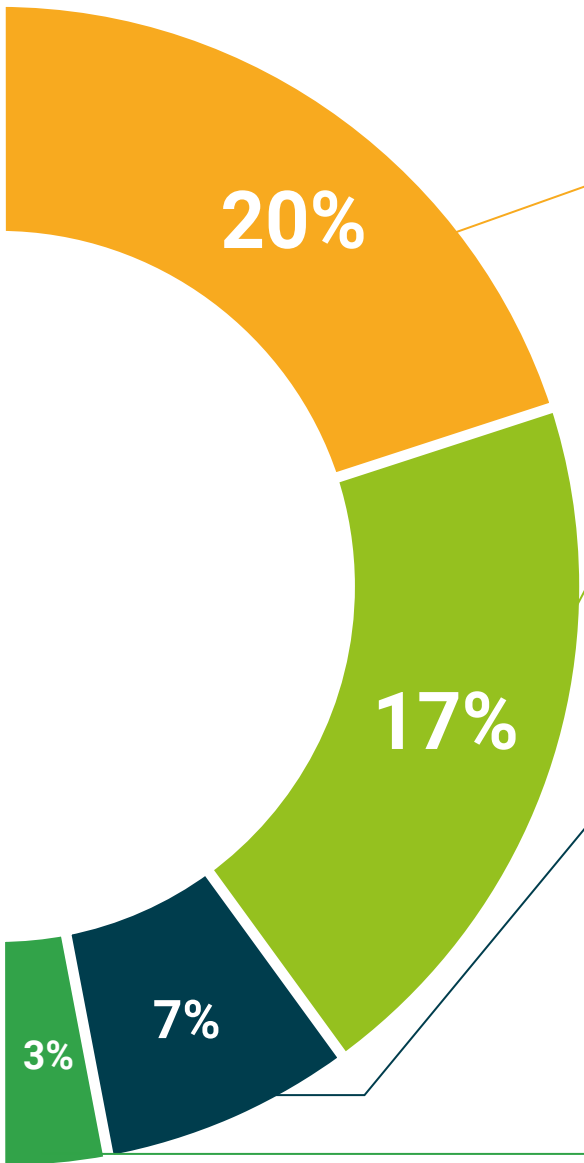

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

**Classes**

There is scientific evidence suggesting that observing third-party experts can be useful.  
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

**Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

# Certificate

The Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”*

This **Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery\*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Dental Care in the Patient with Endocrine Pathology and Special Situations in Women**

Official N° of Hours: **150 h.**

\*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
