Introduction to the Program

In the 21st century, where the cult of image has become an essential value in society, the focus on Fashion and exclusive designs is increasingly attracting men, who demand innovative products tailored to their tastes and needs. In fact, a study by the International Monetary Fund estimates that the global Men's Fashion market will exceed \$570 billion in the coming years, driven by a more informed and demanding consumer. This is how this innovative university program from TECH arises, offering key content to stand out in a highly competitive sector. All of this is delivered through a 100% online and innovative methodology.

“

*A comprehensive and 100% online program,
exclusive to TECH, with an international
perspective supported by our membership
with The Design Society”*

Men's Fashion Design has undergone a remarkable transformation in recent decades. An increasing number of men are opting for bold, sophisticated, and innovative garments that allow them to stand out both professionally and personally. In response to this evolution, professionals in the sector must stay at the forefront and master the technical, aesthetic, and historical aspects of men's fashion. From fabrics and patterns to colors and graphic details, every element influences the perception of design and its acceptance within an increasingly demanding market.

Aware of these needs, TECH has developed this Professional Master's Degree, which will delve into the most relevant aspects of men's fashion design. Through a comprehensive curriculum created by experts with extensive experience in the field, students will be provided with rigorous theoretical content along with practical tools for immediate application. Moreover, professionals will explore the fundamentals of design, artistic drawing, specialized pattern making, and textile sustainability criteria.

Additionally, the academic journey will be delivered in a 100% online format, allowing students to organize their study time autonomously. Thanks to this flexibility, students will be able to progress through the content at their own pace without sacrificing their work or personal commitments. The Relearning methodology will also ensure effective and dynamic learning, moving away from traditional memorization methods.

Thanks to TECH's membership with **The Design Society (DS)**, students will become part of a global community dedicated to design and its study. They will have access to open-access publications and be able to participate in collaborative events. Additionally, the membership supports the maintenance of the society and its platforms, facilitating interaction and access to specialized resources for professional development in design.

This **Professional Master's Degree in Men's Fashion Design** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of practical case studies presented by experts in Men's Fashion Design
- ♦ The graphic, schematic, and eminently practical content is designed to provide scientific and practical information on the essential disciplines for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in Men's Fashion Design
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

You will learn to take anatomical measurements with precision and use them to create professional patterns adapted to the male body"

“

You will master the most innovative techniques in pattern making, sewing, and draping to create men's garments”

The teaching staff includes professionals from the field of Men's Fashion Design, who bring their work experience to this program, as well as recognized specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will analyze consumer behavior and trends in the men's fashion market to design products that meet current needs.

A curriculum based on the disruptive Relearning system, which will make the assimilation of complex concepts quick and flexible.

You will deepen your understanding of Men's Fashion Design, comprehending its historical, social, and cultural particularities”

04

Teaching Objectives

The main objective of this Professional Master's Degree is to facilitate the learning of designers, particularly those who wish to specialize in the men's fashion sector. In this way, students will learn the key techniques and tools for design, drawing, pattern making, and garment construction. Graduates will be prepared to create innovative and sustainable designs that captivate the public and align with current trends.

“

You will master cutting-edge digital tools to optimize Men's Fashion Design, including pattern making software”

General Objectives

- ♦ Understand the historical and cultural evolution of men's fashion to contextualize its current expressions
- ♦ Analyze the typologies, morphologies, and needs of the male body applied to garment design
- ♦ Apply advanced pattern-making and garment construction techniques adapted to contemporary men's fashion
- ♦ Design men's fashion collections with aesthetic, functional, and commercial criteria
- ♦ Develop skills in illustration, technical drawing, and visual representation of men's garments
- ♦ Utilize digital tools and textile technologies to optimize design and production processes
- ♦ Evaluate suitable textile materials for constructing men's garments based on their function and aesthetics
- ♦ Integrate sustainability concepts at every stage of the design and production of men's fashion
- ♦ Manage men's fashion design projects from research through to the final presentation
- ♦ Communicate men's fashion proposals through portfolios, editorials, lookbooks, and fashion shows

Specific Objectives

Module 1. Fundamentals and Introduction to Design

- ♦ Understand the foundations of design, as well as the key figures, styles, and movements that have shaped Men's Fashion
- ♦ Connect and correlate the different areas of design, fields of application, and professional branches
- ♦ Choose appropriate project methodologies for each case
- ♦ Understand the ideation, creativity, and experimentation processes, and learn how to apply them to projects

Module 2. Pattern Making and Garment Construction

- ♦ Understand the development and representation of a pattern
- ♦ Learn to independently create any type of pattern
- ♦ Learn the fundamentals of sewing
- ♦ Distinguish the types of tools and machinery used in garment manufacturing
- ♦ Identify textile materials and their primary uses
- ♦ Develop practical research methods for the creative creation of garments

Module 3. Photography

- ♦ Understand the basics of photographic cameras
- ♦ Learn photo development and editing software
- ♦ Master the basic vocabulary and concepts of visual and audiovisual language
- ♦ Critically analyze images of different types

Module 4. Fashion Illustration

- ♦ Understand human anatomy and its main characteristics in order to represent it in fashion figures
- ♦ Analyze and distinguish the most important areas of the human body in fashion figure illustration
- ♦ Differentiate graphic-plastic techniques in fashion illustration
- ♦ Find your personal style in fashion figures as a signature identity of the fashion designer

Module 5. History of Clothing

- ♦ Identify the language and expressive resources related to clothing content
- ♦ Choose research and innovation resources to solve questions about the functions, needs, and materials of clothing
- ♦ Demonstrate the interrelation between clothing elements and the humanities
- ♦ Justify contradictions between luxury fashion and ethical values

Module 6. Textile Technology

- ♦ Identify different types of textile fibers
- ♦ Select a textile material for a specific design based on its properties
- ♦ Learn dyeing techniques
- ♦ Master the weaving techniques to apply them in daily work

Module 7. Men's Pattern Making

- ♦ Understand the history of Men's Fashion
- ♦ Develop a well-argued personal viewpoint based on knowledge for the development of Men's Fashion
- ♦ Understand male morphology and its peculiarities
- ♦ Know the most commonly used patterns in Men's Fashion

Module 8. Representation Systems Applied to Fashion

- ♦ Differentiate the professional contexts of technical fashion drawing and understand the utility of its characteristics
- ♦ Learn how to make flat garment drawings
- ♦ Understand how to create flat garment drawings that communicate the characteristics of each design to the pattern maker and the garment constructor
- ♦ Learn how to represent different fashion accessories

Module 9. Fashion Design

- ♦ Understand the different working methodologies applied to fashion design
- ♦ Develop creative procedures to assist in the fashion design process
- ♦ Introduce students to the technical procedures required to execute a fashion project
- ♦ Learn about different media for the diffusion and communication of fashion products
- ♦ Understand the entire process of fashion project development, from start to finish
- ♦ Acquire resources for visual presentation and communication of fashion projects

Module 10. Sustainability in Fashion

- ♦ Understand how today's human lifestyle makes us unsustainable consumers
- ♦ Acquire and incorporate environmental and sustainability criteria into the conception and development phase of design
- ♦ Learn preventive measures to reduce environmental impact
- ♦ Provide students with natural and environmentally respectful sources of inspiration

“

You will design Men's Fashion collections with a defined identity, coherent with the contemporary cultural, social, and commercial context”

Career Opportunities

This university program at TECH represents a unique opportunity for all creatives who wish to refine their talent and build a successful career in the Men's Fashion Design industry. Through an up-to-date curriculum focused on the most innovative techniques, materials, and processes in the sector, graduates of the Postgraduate Master's Degree will enhance their professional profile and access an increasingly competitive and demanding market.

“

Do you want to work as a highly creative expert in Men's Fashion? Achieve this through this university degree"

Graduate Profile

Graduates of this Professional Master's Degree will be highly qualified professionals capable of leading design projects within the Men's Fashion field. They will master the complete process of garment creation: from conceptual ideation and technical drawing to pattern making, garment construction, and visual presentation. Additionally, they will be able to integrate sustainability criteria, historical references, and contemporary trends into their collections. Ultimately, these experts will stand out for their critical thinking and aesthetic innovation, adding unique value to any fashion brand or personal venture.

You will design original, sustainable men's collections aligned with contemporary market tastes.

- ♦ **Creativity and Innovation in Men's Design:** Conceptualize and develop garments that stand out for their style, functionality, and aesthetic value
- ♦ **Technical Mastery of Pattern Making and Garment Construction:** Transform ideas into patterns and garments ready for production
- ♦ **Sustainability in Fashion:** Apply materials and processes that are responsible for both the environment and the industry
- ♦ **Critical Thinking and Cultural Analysis:** Interpret the history of fashion to inspire new concepts with a unique identity

After completing the university program, you will be able to apply your knowledge and skills in the following positions:

- 1. Men's Fashion Designer:** Creator of innovative collections for the male audience, aligned with market trends and the values of each brand.
- 2. Head of Design and Textile Product Development:** In charge of research, conceptualization, and the creation of men's garments, from sketches to final prototypes.
- 3. Creative Director in Men's Fashion Brands:** Leader of design teams, capable of defining the visual identity of the brand while incorporating sustainability, functionality, and style.
- 4. Consultant in Men's Fashion Projects:** Expert advisor in design, pattern making, styling, and visual communication for emerging or established brands.
- 5. Fashion Illustrator or Technical Fashion Drawer:** Responsible for translating ideas into fashion figures, technical sheets, and graphic designs for industrial or creative processes.
- 6. Men's Image Consultant:** Manager of personal style and presentation for individual clients, public figures, or brands, combining knowledge of trends, proportions, and visual language.
- 7. Pattern Maker Specializing in Contemporary Tailoring:** Technical designer focused on the development and transformation of patterns for suits, shirts, pants, and other men's garments.
- 8. Textile Production and Sustainability Manager:** Responsible for implementing environmentally-friendly processes and materials in the creation of men's fashion collections.

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

07 Certificate

The Professional Master's Degree in Men's Fashion Design guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Professional Master's Degree issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Professional Master's Degree in Men's Fashion Design** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This private qualification from **TECH Global University** is a European continuing education and professional development program that guarantees the acquisition of competencies in its area of expertise, providing significant curricular value to the student who successfully completes the program.

TECH is a member of **The Design Society (DS)**, the largest community of leading experts in design science. This membership strengthens its presence in international networks dedicated to the theoretical and practical evolution of design.
