Introduction

Knowing the history of iconic male fashion designers will allow future professionals, and those who have already been in this field for some time, to recognize those avant-garde and ahead-of-their-time garments that have marked a milestone in the sector, and that can become a source of inspiration to innovate from advanced knowledge in an industry that is fundamental in society. This TECH program aims to provide relevant information that is essential to understand how fashion has evolved and what has been the contribution of the main male names.

“

Studying the collections of great fashion designers will allow you to acquire higher training to create your own designs”

Although the fashion industry seems to be directed by women and intended mainly for them, more and more men are aware of the new trends, to achieve innovative and attractive looks for their day to day. However, in addition, among the great figures of design, since its origins, there have been male names that have understood the beauty of the human being and have made their own contribution to complement the body with those pieces that have set trends, becoming essential in the closets of the trendiest.

For this reason, TECH has designed this Postgraduate Certificate in History of the Masters of Fashion, with emphasis on the era in which they developed professionally and the most successful contributions to the industry. Thus, the study of the works of the great artists of fashion, such as Jacques Doucet, Balenciaga, Dior, Lagerfeld or Yves Saint Laurent is the strong point of this innovative program, which shows a complete biography of each of them.

In this way, TECH aims to meet the high specialization objective demanded by fashion designers, who are looking for high-quality programs to increase their training to offer garments that will become indispensable in any closet. And, to achieve this goal, it offers students a cutting-edge program adapted to the latest developments in the industry, with an absolutely current curriculum developed by experienced professionals willing to put all their knowledge at the disposal of their students. It should be noted that, being a 100% online Postgraduate Certificate, students will not be conditioned by fixed schedules or the need to move to another physical location, but will be able to access all the contents at any time of the day, balancing their work and personal life with their academic one.

This **Postgraduate Certificate in History of Iconic Male Fashion Designers** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ Practical cases presented by experts in fashion
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where the self-assessment process can be carried out to improve learning
- ◆ Its special emphasis on the study of the great fashion icons
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

To know the history of fashion is to know the history of the great designers. In this program, you will find the most relevant information for you to enter a highly competitive sector”

“

This 100% online program will be indispensable to improve your knowledge in a comfortable way”

TECH offers you the most innovative teaching methodology in the current landscape.

Sign up for this program and get unlimited access to its content.

The program's teaching staff includes professionals from the fashion industry, who contribute with their work experience, as well as renowned specialists from leading companies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow professionals to learn in a contextual and situated learning environment, i.e., a simulated environment that will provide immersive specialization for real situations.

The design of this program focuses on Problem-Based Learning, by means of which professionals must try to solve the different professional practice situations that are presented to them throughout the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Objectives

The Postgraduate Certificate in History of Iconic Male Fashion Designers is aimed at facilitating the performance of professionals to acquire and learn the main developments in this field, which will allow them to perform their daily work with the highest quality and professionalism. This way, they will be better able to develop successfully in a booming sector.

A photograph of a modern interior space, possibly a museum or gallery, featuring a glowing white sign that reads 'ior'. The background is dark with some lights. The image is overlaid with large teal geometric shapes: a dark teal triangle in the top right and a lighter teal triangle in the middle right, both pointing towards the center. The bottom left corner is white.

03

Structure and Content

The content of this Postgraduate Certificate covers, in a structured way, all the areas of knowledge that fashion professionals need to know in-depth, including the most interesting developments and latest advances in the sector. A high-quality study that will allow students to compete with solvency and sufficient capacity in a highly competitive industry. To this end, the syllabus has been designed by professionals with extensive experience, who have captured all their expertise in a program that will be indispensable in the curriculum of professionals of the 21st century.

A photograph of a Karl Lagerfeld store sign. The sign is dark with the brand name 'KARL LAGERFELD' in large, white, bold, sans-serif capital letters. The 'K' is stylized with a silhouette of a dog's head. The sign is mounted on a building facade. Below the sign, a person in a white jacket is visible inside the store, and clothing racks are partially visible through the glass entrance.

 - 1.10.2. Context
 - 1.10.3. Works and Contributions

“

Know the leading male fashion designers and become inspired to make history with your designs”

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Certificate in History of Iconic Male Fashion Designers guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.
