# 01 Introduction

Changes in social movements also affect the design and trends used in different projects. Thanks to this it is possible to look back and see the evolution in the use of different materials, textiles and chromatic ranges that have been used up to now. In today's contemporary space, especially post covid, the individual seeks harmony between the physical, emotional and mental. The interior designer can work on all these aspects in this complete program designed by TECH and its team of design experts. It is a 100% online program with which you can work on the new needs of the client through a new, dynamic and current specialization that will increase your chances of success in this sector.

“

*If you are looking to master the design of contemporary space through a program that adapts to your needs and those of the market, this option is the best you will find"*

Trends related to interior design applied to contemporary space have taken a 180° turn, especially after the pandemic. People are now looking for homes with large and bright outdoor spaces and has generated the need to incorporate outdoor elements to small homes that lack this type of outdoor spaces. This is a sector that is constantly evolving, although what always comes first is the customer's needs.

In this sense, TECH has developed a Postgraduate Certificate in Space Planning in Contemporary Interior Design distributed over 6 weeks and includes 150 hours of the best theoretical, practical and additional content so that the interior design specialist can delve into the newest and most successful professional strategies that are having more success in the current market.

The syllabus begins with a comprehensive overview of the anthropological and psychological foundations of design, and then focuses on interior space and new needs. It also places special emphasis on the aesthetics of space and the planning of interiors not only for private homes, but also for cultural and commercial environments. Finally, it analyzes the protagonist brands and reference designers, to culminate by delving into current trends and post covid retail.

It is, therefore, a unique educational opportunity to take a 100% online program designed by experts in the sector with a long and extensive career in the management of interior design projects. In addition, the program includes detailed videos, images, research articles and complementary readings with which the graduate will be able to delve into each aspect of the syllabus in a completely personalized way and based on their educational requirements.

This **Postgraduate Certificate in Space Planning in Contemporary Interior Design** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ The development of practical cases presented by experts in Design and Architecture
- ◆ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning.
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

“*Privacy and the rethinking of the living space are the new challenges of Interior Design. With this program, you will be able to work on their attributes to create projects that surprise and enchant*”

“ *You will have access to a catalog of specialists of the Interior Design frame of reference*”

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

*You will also work on perfecting your skills in Interior Design for commercial and cultural spaces.*

*A program that delves into the aesthetics of space: form, color, texture and order applicable to transformation and constant change.*

# 02 Objectives

The current need for interior design professionals who meet the demanding requirements of their clients based on today's contemporary trends is what has led TECH to design this Postgraduate Certificate. It is a program that aims to gather the best information that will serve the graduate to specialize in this sector and obtain a broad, up-to-date and comprehensive knowledge that will allow them to create revolutionary, creative projects that unify the harmony between the physical, the emotional and the mental.

“

*If your goal is to become the best interior designer, this Postgraduate Certificate is the first step to achieve it"*

## General Objectives

---

- ◆ Master the psycho-emotional aspects involved in interior design applied to Contemporary Space
- ◆ Allow the graduate to know the most sophisticated and innovative professional tools that will be used in their daily practice

“

*You will be able to capture the identity of your clients through space and semiotics between the cultural and the social”*

## Specific Objectives

---

- ◆ Connect individual identity with aesthetic manifestation through the design of spaces
- ◆ Implement a strategy focused on today's consumers and their needs and habits
- ◆ Apply the concept of liquid reality by learning to manage change
- ◆ Control the projects of the main interior designers by observing their strategies
- ◆ Adapt the project to the multiple ways of conceiving a home that exist today

# 03

# Course Management

It is a real motivation for any graduate to be able to take a program in which the teaching team is made up of professionals in their area of study, as is the case with this Postgraduate Certificate. This is a group of specialists versed in Design and Architecture, with a long and extensive professional career that has led them to direct even international projects. Their experience and quality will be reflected in the syllabus that they themselves have developed, so that the student can acquire the best results from this educational experience.

“

*In the Virtual Classroom, you will be able to discuss with the teaching staff and your colleagues about the trends that are dominating in different parts of the world"*

## Structure and Content

TECH's success lies in offering great programs in terms of quality and level of education, but in which the teaching load has been considerably reduced. This is possible thanks to the use of the most avant-garde and effective teaching methodology, Relearning, and the exhaustiveness with which the teaching team chooses the information, based on their experience and the latest developments in the sector. In addition, the convenient 100% online format allows this university to include hours of the best additional material for graduates to delve into the syllabus in a personalized way and adapted to their educational and professional requirements.

“

*You will have real case simulations so you can put into practice your skills and the most cutting-edge Interior Design tools”*

## Module 1. Contemporary Space

- 1.1. Design for Living
  - 1.1.1. Relationship between Spaces and People
  - 1.1.2. Anthropological Principles
  - 1.1.3. Psychological Foundations of Design (In Focus: Biophilic Design)
- 1.2. Human-Centered Design
  - 1.2.1. Design Thinking
  - 1.2.2. Co-Creation Spaces
  - 1.2.3. Conceptualization
- 1.3. The Interior Space
  - 1.3.1. Privacy
  - 1.3.2. New Needs
  - 1.3.3. Rethinking Living Space
- 1.4. Analysis of Contemporary Space
  - 1.4.1. Evolution of Space Design
  - 1.4.2. Designers and Frame of Reference for Interior Design
  - 1.4.3. Fundamentals of Space Design
- 1.5. Interior Design
  - 1.5.1. Homes
  - 1.5.2. Commercial Spaces
  - 1.5.3. Cultural Spaces
- 1.6. Aesthetics of Space
  - 1.6.1. Shape, Color and Texture
  - 1.6.2. Space and Order
  - 1.6.3. Transformation and Constant Change
- 1.7. Sociology of Space
  - 1.7.1. Semiotics
  - 1.7.2. Cultural Aspects
  - 1.7.3. Identity through Space
- 1.8. Current Social Movements.
  - 1.8.1. New Urban Tribes
  - 1.8.2. Social Change
  - 1.8.3. Contemporary Space: "Liquid Spaces"

- 1.9. Designers and Brands
  - 1.9.1. Leading Brands in Interior Design
  - 1.9.2. Interior Designers of Reference
  - 1.9.3. Reinventing Retail Design
- 1.10. Trends in Interior Design
  - 1.10.1. Drivers of Change
  - 1.10.2. New Trends in Retail Post Covid
  - 1.10.3. Current and Contemporary Space

“

*Don't think twice and opt for a program that will help you become one of the best interior designers in the country thanks to your exhaustive knowledge of the most avant-garde contemporary trends and strategies"*

# 05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

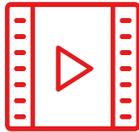

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

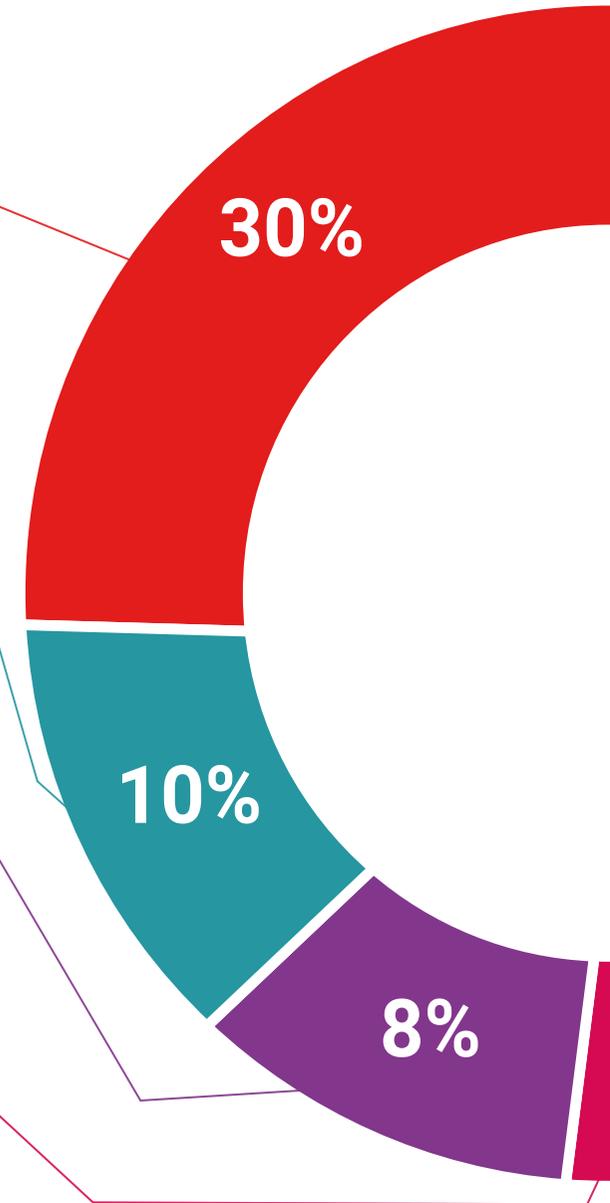

### Practising Skills and Abilities

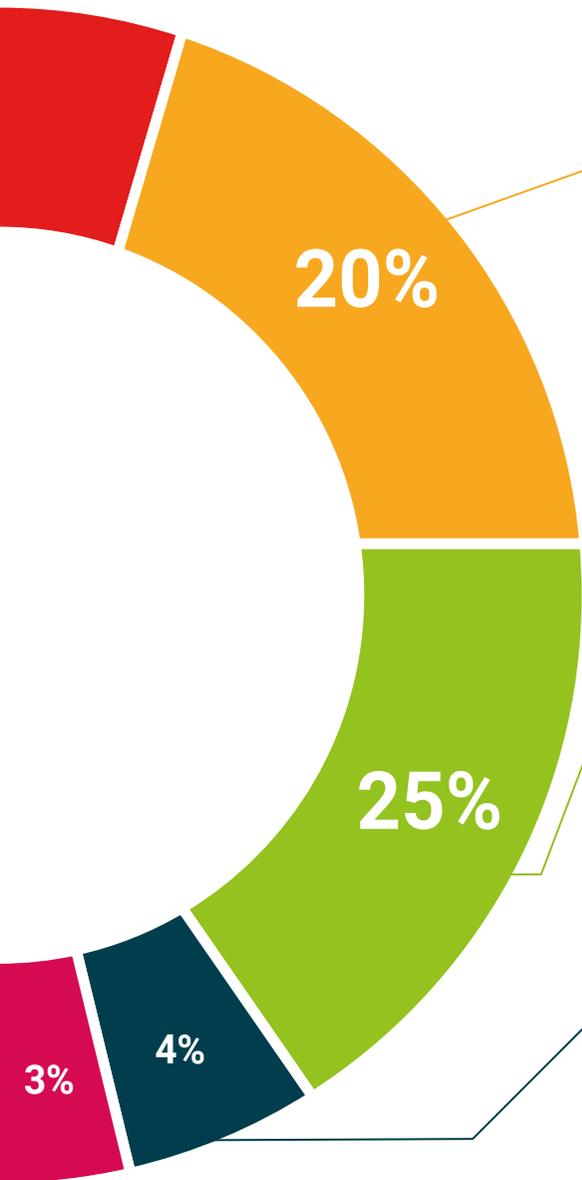

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

# 06 Certificate

The Postgraduate Certificate in Space Planning in Contemporary Interior Design guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program  
and receive your university qualification  
without having to travel or fill out  
laborious paperwork”*

This **Postgraduate Certificate in Space Planning in Contemporary Interior Design** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery\*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Space Planning in Contemporary Interior Design**

Official N° of hours: **150 h.**

\*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
