01 Introduction

It is impossible to understand the modern market without a good Marketing strategy, and it is even more unlikely that a company can be founded without a good foundation in Digital Marketing. Digital consumption is in full swing, with more and more people losing prejudices and fears when it comes to online buying, meaning that experts in Digital Marketing are in high demand. With this program, students are guaranteed to expand their knowledge of design and gain complementary digital skills, which will contribute towards an effective online marketing strategy.

“

You have so much talent; you just need to learn how to let the world know so they can appreciate it"

It is becoming more and more common for any type of purchase or transaction to be made over the Internet. The public is becoming more familiar with online sales platforms and the emergence of new Start-ups that streamline these processes has only accelerated the general acceptance of this more convenient and faster way of shopping.

In this context, many companies have tentatively started to build their online image and sales platforms, while many others see the need to update their platforms and adapt them to new technologies. This is where the role of the digital Marketing strategist comes into play, the person who guides companies in this task and helps them to develop an effective strategy with which to open up to the new digital environment.

After completing this Postgraduate Certificate in Digital Marketing Strategy, students will be able to identify target audiences; understand the analytics and metrics used in digital marketing; know about the different options for promoting a brand and assessing the effectiveness of actions taken, in addition to other tools and skills that are essential for all Digital Marketing experts.

They will gain a whole series of skills applicable to any sector of innovation and design, where good online planning that showcases the great talent and creativity of designers becomes even more crucial.

This **Postgraduate Certificate in Digital Marketing Strategy** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ Provision of market research skills, strategic vision, digital and co-creation methodologies
- ◆ Provision of the necessary knowledge to effectively manage any online Marketing campaign or action
- ◆ Practical cases which show how to apply the acquired knowledge in a realistic setting
- ◆ Instruction on how to organize and plan tasks, taking advantage of available resources to tackle them in precise time frames
- ◆ Instruction on how to apply creativity to the world of Marketing to stand out from the competition
- ◆ Possess the tools to analyze the economic, social and cultural realities in which the creative industries develop and transform today

Be the person in charge of developing online sales strategies for your company and learn how to reach the target audience"

“

Think about the great advertising campaigns you've seen on the internet that have inspired you. The time has come for you to start creating them"

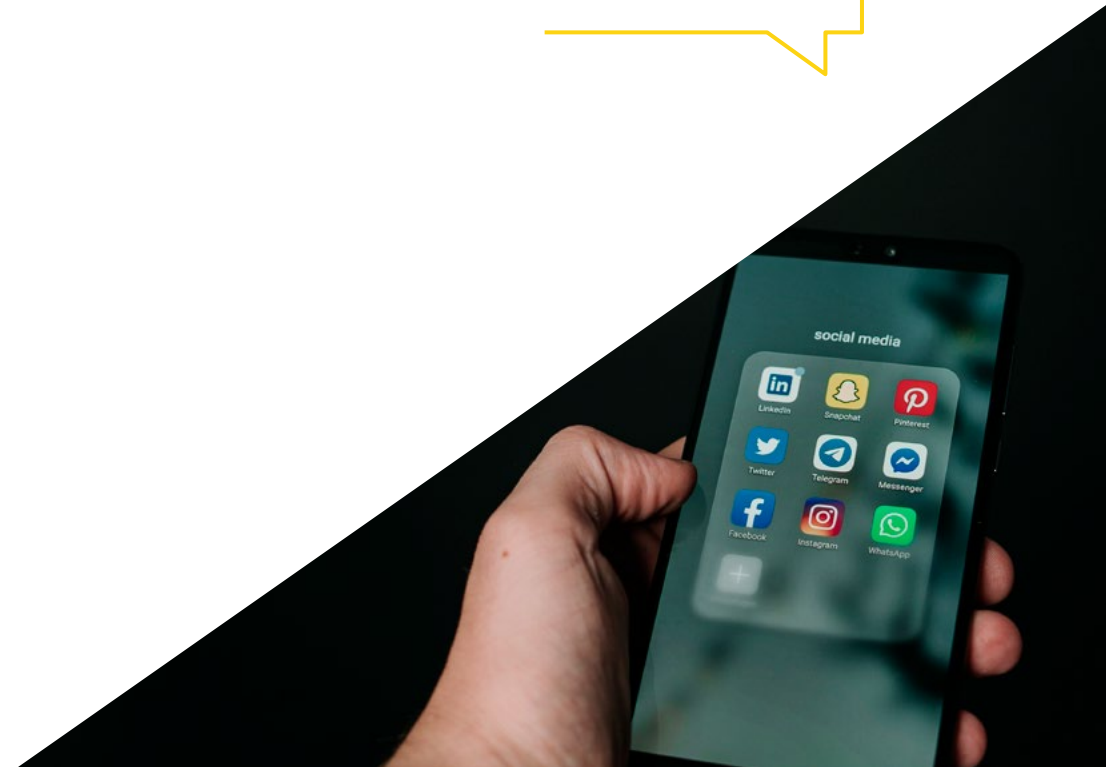

By applying all your creativity to the knowledge acquired on this Postgraduate Certificate you will become known throughout the design sector.

If you feel that your talent lacks an appropriate audience, with this Postgraduate Certificate TECH will teach you how to expand your reach and achieve the recognition you deserve.

The teaching staff is made up of professionals from the sector who bring their experience to this program, in addition to renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning. In other words, a simulated environment that will provide immersive education programmed to prepare for real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

03

Course Management

The teaching team behind this Postgraduate Certificate in Digital Marketing Strategy has vast experience in the field of digital marketing, so that students will feel supported by the best professionals in the sector. At the end of the course, students will be able to start applying all the expertise acquired during the program immediately.

“

With the team of Digital Marketing experts that TECH has assembled, you are guaranteed to learn from the best"

International Guest Director

S. Mark Young is an internationally renowned expert who has focused his research career on the Entertainment Industry. His results have received numerous awards, including the 2020 Lifetime Achievement Award in Accounting and Management from the American Accounting Association. He has also been honored three times for his contributions to the academic literature in these fields.

One of the most outstanding milestones of his career was the publication of the study “Narcissism and Celebrities”, together with Dr. Drew Pinsky. This text compiled direct data on famous personalities from Cinema or Television. In addition, in the article, which would later become a best-selling book, the expert analyzed the narcissistic behaviors of celluloid stars and how these have become normalized in the modern media. At the same time, he addressed the impact of these on contemporary youth.

Also throughout his professional life, Young has delved into organization and concentration in the film industry. Specifically, he has investigated models for predicting the box-office success of major motion pictures. He has also contributed to activity-based accounting and the design of control systems. In particular, he is recognized for his influence in the implementation of effective management based on Balanced Scorecard.

Likewise, academic work has also shaped his professional life, and he has been elected to lead the George Bozanic and Holman G. Hurt Research Chair in Sports and Entertainment Business. He has also lectured and participated in study programs related to Accounting, Journalism and Communications. At the same time, his undergraduate and graduate studies have linked him to prestigious American universities such as Pittsburgh and Ohio.

Dr. Young, S. Mark

- Director of the George Bozanic and Holman G. Hurt Chair in Sports and Entertainment Business
- Official Historian of the University of Southern California Men's Tennis Team
- Academic researcher specializing in the development of predictive models for the motion picture industry
- Co-author of book "Narcissism and Celebrities"
- Ph.D. in Accounting Science from the University of Pittsburgh
- M.S. in Accounting from The Ohio State University
- B.S. in Economics from Oberlin College
- Member of the Center for Excellence in Teaching

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

 - 1.10.1. ROI: the Definition of Return on Investment and ROI vs. ROAS
 - 1.10.2. ROI Optimization
 - 1.10.3. Key Metrics

A syllabus enabling you to become a master of digital marketing and take your designs to uncharted territory”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06 Certificate

This Postgraduate Certificate in Digital Marketing Strategy guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
