Introduction

The United Nations 2030 Agenda and its Sustainable Development Goals (SDGs) continue to be a central framework to guide international efforts.

In fact, countries around the world have stepped up their financial and technical commitments, with the help of multilateral agencies and NGOs, to address problems such as poverty, inequality, and environmental sustainability. In this context, TECH has developed this program, structured in two different phases. The first covers all the theoretical content completely online, using the innovative Relearning methodology. On the other hand, the second phase includes a practical stay of 3 weeks in a leading institution in the field of International Cooperation.

“

With this Hybrid Master's Degree, you will gain access to solid, practical training that will prepare you to face the challenges of global development with specialized knowledge and skills”

Organizations such as the United Nations and the European Union have significantly increased their investments in sustainable development programs, allocating billions of dollars to projects that promote education, health and access to clean water in vulnerable communities.

Therefore, this Hybrid Master's Degree was created, which will provide an overview of the key concepts and the main obstacles faced by developing communities. In addition, the structures and mechanisms of International Cooperation will be examined, highlighting the policies and strategies of international and governmental organizations.

Furthermore, professionals will be able to plan, implement and evaluate effective projects that promote sustainable development, delving into the importance of education as a driver of change and exploring methods to promote Human and Sustainable Development through educational programs. Humanitarian responses in crisis situations will also be addressed, offering tools for emergency management and cooperation in critical contexts.

Finally, it will provide a solid foundation in the principles and regulations that protect people in conflict and development situations. Students will also be trained in effective communication techniques to promote social change.

In this way, TECH has implemented a comprehensive program that offers all the theoretical part 100% online, allowing graduates to adapt the learning to their personal and work schedules, accessing the teaching materials through any electronic device with Internet connection. Additionally, it is based on the revolutionary Relearning methodology, which emphasizes the repetition of key concepts to improve understanding and assimilation of the contents. Afterwards, the degree will include a 3-week intensive practical internship in a recognized institution.

This **Hybrid Master's Degree in International Cooperation for the Development of Peoples** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Development of more than 100 cases Internship presented by education professionals with expertise in International Development and university professors with extensive experience with development of peoples
- ♦ Their graphic, schematic and eminently practical contents provide essential information on those procedures that are indispensable for professional practice
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Furthermore, you will be able to carry out an internship in one of the best companies

Enroll now and advance in your field of work with a comprehensive program that will allow you to put into practice everything you have learned"

“

You will master the tools necessary to plan, implement and evaluate projects that have a positive impact on the target communities. With all the TECH quality guarantees!"

In this Master's Degree proposal, of a professionalizing nature and blended learning modality, the program is aimed at updating education professionals who develop their functions in projects of International Cooperation for the Development of Peoples, and who require a high level of qualification. The contents are based on the latest scientific evidence, and oriented in a didactic way to integrate theoretical knowledge into educational practice, and the theoretical-practical elements will facilitate the updating of knowledge and allow decision making in patient management.

Thanks to its multimedia content elaborated with the latest educational technology, they will allow the education professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, students will be assisted by an innovative interactive video system created by renowned experts in the field of educational coaching with extensive experience.

You will respond to humanitarian crises, understanding how International Cooperation can alleviate suffering and promote recovery, with the support of the Relearning methodology.

You will analyze the role of non-governmental organizations in promoting solidarity and development at different levels, thanks to the best teaching materials on the academic market.

02

Why Study this Hybrid Master's Degree?

The Hybrid Master's Degree in International Cooperation for the Development of Peoples is a unique opportunity to acquire advanced and specialized training that combines the flexibility of online learning with the richness of practical experience. Indeed, this program has been designed for those who wish to make a tangible difference in the world by addressing global issues such as poverty, inequality and climate change through International Cooperation and sustainable development. In addition, graduates are able to balance their work and personal responsibilities while accessing quality training from experts.

“

This program will allow you to acquire advanced knowledge in International Cooperation, addressing contemporary global challenges such as poverty, inequality and climate change”

1. Updating from the latest technology available

Innovations such as the use of geospatial data and Geographic Information Systems (GIS) enable better planning and resource management in complex environments. In addition, digital platforms facilitate remote collaboration between international teams and community participation, promoting an inclusive and transparent approach. Blockchain technology is used to improve traceability and efficiency in the distribution of resources and funds, ensuring more accurate and secure financial management.

2. Gaining in-depth knowledge from the experience of top specialists

The large team of professionals that will accompany the specialist throughout the practical period is a first-class and an unprecedented guarantee of updating. With a specifically designated tutor, the student will be able to work on real projects in a state-of-the-art environment, which will allow him/her to incorporate into his/her daily practice the most effective procedures in International Cooperation for the Development of Peoples.

3. Entering first-class professional environments

TECH carefully selects all available centers for Internship Programs. As a result, the specialist will have guaranteed access to a prestigious environment in the area of International Cooperation for the Development of Peoples. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Combining the best theory with state-of-the-art practice

The academic market is plagued by teaching programs that are poorly adapted to the daily work of the specialist and that require long teaching hours, often not very compatible with personal and professional life. TECH offers a new learning model, 100% practical, that allows you to get to grips with state-of-the-art procedures in the field of International Cooperation for the Development of Peoples and, best of all, to put it into professional practice in just 3 weeks.

5. Opening the door to new opportunities

Opening the door to new opportunities in International People's Development Cooperation involves exploring and adopting innovative and multidisciplinary approaches to address global challenges more effectively and equitably. It also promotes collaboration among diverse actors, from governments and non-governmental organizations to the private sector and academia, to foster strategic alliances that drive sustainable and scalable solutions. It also involves strengthening local leadership and empowering communities to be active agents in their own development.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

Clinical Internship

After passing the online theoretical period, the program includes a Internship Program period in a reference clinical center. In this way, graduates will have at their disposal the support of a tutor who will accompany them throughout the process, both in the preparation and in the development of the internship and will dedicate 100% of their time.

“

The 3-week intensive practical internship will provide you with valuable field experience, allowing you to apply your theoretical knowledge in a real context”

The Internship Program of this program in International Cooperation for the Development of Peoples consists of a 3-week internship in a prestigious institution, from Monday to Friday, with 8 consecutive hours of practical training with an assistant specialist. In this way, this internship will allow the graduate to work on real projects alongside a team of professionals of reference in the area of International Cooperation, applying the most innovative procedures and tools.

In this totally practical training proposal, the activities are aimed at developing and perfecting the competencies necessary for the provision of International Cooperation services for the Development of Peoples, in areas and conditions with a high level of qualification, and oriented to the specific training for the exercise of the activity. It is, without a doubt, an opportunity to learn by working.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for educational praxis (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and its realization will be subject to the center's own availability and workload, being the proposed activities the following:

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Hybrid Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Hybrid Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Hybrid Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort
and better performance, involving you more in
your specialization, developing a critical mindset,
defending arguments, and contrasting opinions:
a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".
