Introduction

The school environment is characterized, among other aspects, by the continuous presence of conflicts among students for various reasons. This is a context in which the teaching professional must intervene arduously in order to prevent the situation from worsening. But it is also responsible for working on the prevention of these cases. For this reason, TECH has developed a complete program based solely on conflict resolution, through which the graduate will be able to work on improving their skills for the effective management of such conflict through a 100% online theoretical training and whose syllabus also includes a 120-hour internship in an academic center of reference.

“

Would you like to improve your mediation and conflict resolution skills in a theoretical and practical way? TECH provides you with the perfect program for this, through 1,625 hours of unparalleled training”

Dialogue and mutual empathy are the two pillars that support the prevention and effective management of conflict resolution. In the school environment, the emergence of complex situations involving differences between different students has led to fights that can have serious consequences for the physical and psychological health of those involved. An example of this is the increase in bullying cases in recent years, motivated by the lack of assertive education and the inability of children to manage their behavior, generating an unstable climate in the classroom and interfering in the correct and comfortable development of the victims.

And given the very important role that the teaching professional plays in this type of cases as a mediating agent, TECH has developed a perfect Hybrid Professional Master's Degree so that they can work in a specialized way in the effective resolution of conflicts. It is an academic experience that combines the most exhaustive and innovative theory with practice in an academic center of reference. In addition, they will learn in detail the latest advances related to the management of power struggles, mindfulness in the classroom, ways to express agreements or the different educational styles to motivate assertiveness, being able to share 120 hours with experts through active participation in the day to day classes of different levels.

To this end, the university will make available 1,500 hours of the best theoretical and additional content 100% online so that you can access it from wherever and whenever you want, without limits and from any device with an internet connection. Once passed, you will have access to a 3-week internship where you will have the support of a tutor who will ensure that the objectives for which the program was designed are met. Therefore, this is a unique opportunity to elevate your talent to the maximum through an unparalleled academic experience, complete and at the forefront of teaching for mediation and conflict resolution.

This **Hybrid Professional Master's Degree in Classroom Mediation and Conflict Resolution** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Development of more than 100 case studies presented by teaching professionals in Primary and Early Childhood Education, experts in conflict mediation and effective conflict resolution
- ♦ Its graphic, schematic and eminently practical contents, which are designed to provide technical and assistance information on those teaching disciplines that are essential for professional practice
- ♦ Practice guides on how to deal with different conflict situations in the classroom
- ♦ All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ In addition, you will be able to do an internship in one of the best academic centers in the world

This program's course will give you the keys to effectively end the most common conflicts in the school environment through more dynamic agreement expression techniques"

“

The program includes a specific section dedicated to mindfulness for children, through which you will be able to implement the best strategies to avoid prejudices in your school practice”

In this proposal for a Hybrid Professional Master's Degree, of a professional nature and blended learning modality, the program is aimed at updating education professionals who perform their functions in the current educational environment when conflict situations arise among students. The contents are based on the latest technical evidence and oriented in a didactic way to integrate theoretical knowledge in teaching practice and in the resolution and mediation of complex situations through empathy, effective management of emotions and unconditionality.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional to learn in a contextual and situated learning environment, i.e., a simulated environment that will provide immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

In the Virtual Campus you will find 1,500 hours of theoretical, practical and additional content of the highest quality so that you can perfect your educational skills 100% online.

Would you like to work on unconditionality and fidelity as indispensable resources in Education? In this program you will find the most effective didactic tools for this purpose.

02

Why Study this Hybrid Professional Master's Degree?

Conflict management in the school environment, either with the students themselves or with their family environment is of utmost importance in the work of the teacher. That is why TECH provides in this program, an advanced theoretical framework on educational styles, the different techniques to solve problems and act as a mediator, while combining it with an internship in a prestigious center. In this way, the professional will obtain a much broader vision of Medication and Conflict Resolution in the Classroom, guided by the best specialists in this field.

“

TECH is the only university that offers you the possibility of entering a first class school where you will be able to put into practice the existing techniques and methodologies for conflict resolution”

1. Updating from the Latest Technology Available

New technologies are used daily in the classroom, integrated into teaching methods. But in the resolution of conflicts they are also used to address problems, promote communication and understanding among students. That is why this Hybrid Professional Master's Degree brings teachers closer to digital advances in this field, which will allow them to integrate progress in this field into their daily lives.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

During this academic process, the teaching professional will be accompanied, in the first instance, by real specialists in the management and resolution of conflicts in the classroom. Likewise, during their internship in a top-level educational center, they will be tutored by a teacher who will guide them at all times so that they can obtain the most valuable information on the processes currently used in mediation with students.

3. Entering top-notch professional environments

TECH carries out a rigorous selection process of all the professionals who teach its programs, as well as the centers where students carry out internships. In this way, the graduate will have the guarantee of obtaining the most exhaustive knowledge from the best specialists in Mediation and Conflict Resolution in the Classroom. In this way, they will be able to integrate the most efficient methods to successfully solve any problem in their educational center.

4. Combining the Best Theory with State-of-the-Art Practice

Currently there are many programs focused on theory, but few bring the professional closer to a complete academic experience, where advanced knowledge is combined with intensive practice. For this reason, TECH has decided with this Hybrid Professional Master's Degree to offer a global learning experience that brings the teaching professional closer to real situations in which they will have to develop successfully in their daily teaching practice.

5. Expanding the Boundaries of Knowledge

This academic institution opens a range of possibilities with the completion of this Hybrid Professional Master's Degree. Students will have at their disposal an excellent teaching team specialized in Mediation and Conflict Resolution, which will accompany them throughout the academic journey, showing them the different techniques and methods used. This knowledge can be applied in the center where you perform your current duties or in any other prestigious educational center. An excellent opportunity that only TECH offers.

You will have full practical immersion at the center of your choice"

03

Objectives

Conflict resolution in the classroom is an area that any teaching professional should master, since it is very common that during classes problems are generated among students. For this reason, the objective of this program is none other than to provide the teaching professional with the information and resources to effectively master this type of situations, which will allow them not only to increase their quality, but also to contribute to the creation of a favorable climate for teaching through the effective management of the disparities that may arise between children without reaching greater evils.

Clinical Internship

The highlight of this program is undoubtedly the internship. Once the theoretical period is over, the graduate will have access to 120 hours in an academic center of the highest level, where they will become part of a team of educators versed in mediation and conflict resolution in the current educational context. In this way, you will not only be able to apply the strategies developed in the syllabus, but you will also have the opportunity to improve your teaching practice through the guidance of the best professionals, who will share with you their successful strategies for arbitration and effective cooperation in complex situations.

“

During the 120 hours of internship you will be able to delve into the different games played by top level professionals to learn how to mediate conflicts in a playful way”

For the design of this program's internship, TECH has worked intensively with a team of professionals in the educational area, who have determined that 120 hours are perfect for the graduate to perfect his or her professional skills, as well as to apply the most innovative pedagogical strategies for mediation and conflict resolution. In this way, it offers students the possibility of accessing a reference school on the international scene in which they can actively participate in the children's daily lives.

This is a unique opportunity to be part of a team of professionals of the highest level for 3 weeks, allowing you to learn from their techniques and their guidelines for action in different situations, contributing to the creation of an optimal climate for teaching. In addition, you will be able to make use of the main academic tools to design innovative and multidisciplinary methods and strategies to work, for example, on the validation of emotions and the discovery of feelings through the practice of assertiveness and empathy, among other aspects.

You will also have the support of a tutor at all times, who will ensure that all the objectives for which this program was designed are met. In this way, the graduate will be able to access his or her course with peace of mind and with the certainty that, after passing it, he or she will have managed to perfect his or her skills in mediation and conflict resolution in a guaranteed manner.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of physical therapy (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
Communication methods in conflict in the classroom	Carry out actions that promote the correct management of students' emotions
	Use online resources to work on basic needs and emotions
	Apply communication techniques that promote empathy among students
	Develop activities that promote self-esteem and dialogue in the classroom
Conflict analysis in the classroom	Conduct an assessment to provide a psychological analysis in various situations
	Define preventive measures to avoid possible problems
	Elaborate a diagnosis of the performance and the actors involved in order to avoid problems in the school development
	Analyze the multiple options for reaching consensus or negotiation in the face of conflict
Processes of mediation and conflict resolution in the classroom	Design an action plan to improve training performance and other psychological skills
	Support in mediation, through different techniques and dynamics applicable to conflict resolution
	To carry out group dynamics in order to solve problems among students
	Apply the technique of dramatic play to solve conflicts with students
Techniques for expressing agreement	Support the improvement of school climate and coexistence
	Develop actions where non-violent communication is used
	Actively listen to those involved in mediation to extract an analysis and be able to use the best communication techniques for conflict resolution
	Work on assertive communication with students

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions for Practical Training

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Hybrid Professional Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Methodology

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
