Introduction

Virtual learning, which provides greater flexibility of study and adaptability to the individual circumstances of each person, is increasingly in demand by students. To successfully deliver this type of teaching, teachers must have a high level of mastery of digital teaching tools that allow them to successfully transmit knowledge to students. Because of this, TECH has opted to create this degree, which trains teachers to increase their skills in the use of ICT, social networks and forums as learning strategies. In addition, they will do so in an exclusively practical way, spending 120 hours in a high-level technological educational center to develop their professional skills to the maximum.

Manage, with this Practical Training, the digital didactic tools that will allow you to successfully teach virtual classes”

The popularization and development of new technologies has fully impacted the educational field. Along these lines, e-learning has positioned itself in recent years as an educational model that is highly sought after by students to study without the need to leave their own homes. Likewise, in face-to-face classes, it is increasingly common to use computers, interactive applications or videos to help students acquire knowledge in an effective and entertaining way. Therefore, the profile of a teacher with extensive skills in Digital Education, e-Learning and Social Networks is increasingly requested by academic institutions to meet the current demands of the sector.

For this reason, TECH has opted to design this program, which provides students with an excellent specialization in this required field of teaching through a 100% practical experience. Integrated in an educational environment positioned at the forefront of technology, you will master the most efficient didactic methodologies for virtual teaching or use games as a strategy to promote learning. You will also use school management platforms to perform tasks such as communicating with students, monitoring attendance, and conducting assessments.

In order to address all the doubts that may arise during the internship period and to receive guidance that will allow them to acquire the best digital skills, the teacher will be accompanied at all times by a tutor designated specifically for them. In this way, TECH ensures that the student assimilates a series of skills that will be fully applicable in their professional experiences.

02

Why Study an Internship Program?

In the field of education, it is relevant to know the methodologies and didactic tools that allow to carry out a first level digital teaching, but it is essential to know how to apply them daily in the classroom. For this reason, TECH has focused its efforts on creating this Practical Training, a program that provides the student with a 3-week experience in a prestigious educational center. Through it, you will acquire the best technological skills oriented to the world of teaching and will position yourself as a teacher adapted to the needs of the 21st century.

TECH gives you the opportunity to increase your skills in Digital Education, e-Learning and Social Networks through a practical experience in a prestigious academic center”

1. Updating from the Latest Technology Available

Education has undergone a remarkable evolution in recent years thanks to the emergence of new technologies and digital tools that have completely changed the way in which classes are taught. Therefore, with the idea that the student masters these methodological advances in an eminently practical way, TECH has created this program.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

Throughout their practical experience, students will be integrated into a work team made up of teachers with extensive digital and technological skills. As a result, you will be able to acquire the best skills in the field and incorporate them into your educational practice to improve the learning process of your students.

3. Entering first-class Communication Management environments

TECH offers the possibility of carrying out this Practical Training in educational centers that have the most advanced technologies. Therefore, the student will enjoy an unparalleled professional experience that will allow them to develop their skills in Digital Education, e-Learning and Social Networks to the maximum.

4. Putting the acquired knowledge into daily practice from the very first moment

In the educational landscape, academic programs tend to focus exclusively on theory, leaving aside the practical applicability of the knowledge acquired by the student. This fact has motivated TECH to create this innovative degree, which allows teachers to spend 3 weeks in a prestigious educational center to develop skills that will be very useful in their professional life.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility to carry out this Practical Training in leading international educational centers. In this way, teachers will be able to learn alongside professors who have developed their educational functions in first-class academic environments.

You will have full practical immersion at the center of your choice"

03

Objectives

The design of this Practical Training has been carried out with the premise of providing teachers with the best skills in e-Learning and the use of technology for educational purposes. Through this program, you will learn to use ICT to manage and plan your tasks as well as to impart knowledge to your students, and you will be prepared to carry out first-class virtual teaching.

General Objectives

- Master the new tools and technologies applied to teaching
- To provide virtual teaching with the highest quality standards

*A unique training experience,
key and decisive to boost your
professional development”*

Specific Objectives

- ♦ How to implement ICT in the classroom and manage its different applications
- ♦ Interact through chats Cone teachers and students to solve problems and doubts
- ♦ You will learn to use the tools offered by Google G Suite for Education
- ♦ Identify new teaching methodologies and master their implementation process in the classroom
- ♦ Using YouTube, Facebook, Twitter or Instagram as a teaching tool
- ♦ Assessing the impact of social networks on student learning
- ♦ Using Apple tools for management, content creation and evaluation
- ♦ Knowing how to manage a technological innovation project in Education
- ♦ Carry out numerous planning tasks through specialized plant management platforms

Take this practical training course and learn how to get the most out of platforms such as YouTube, Facebook, Twitter or Instagram”

04

Educational Plan

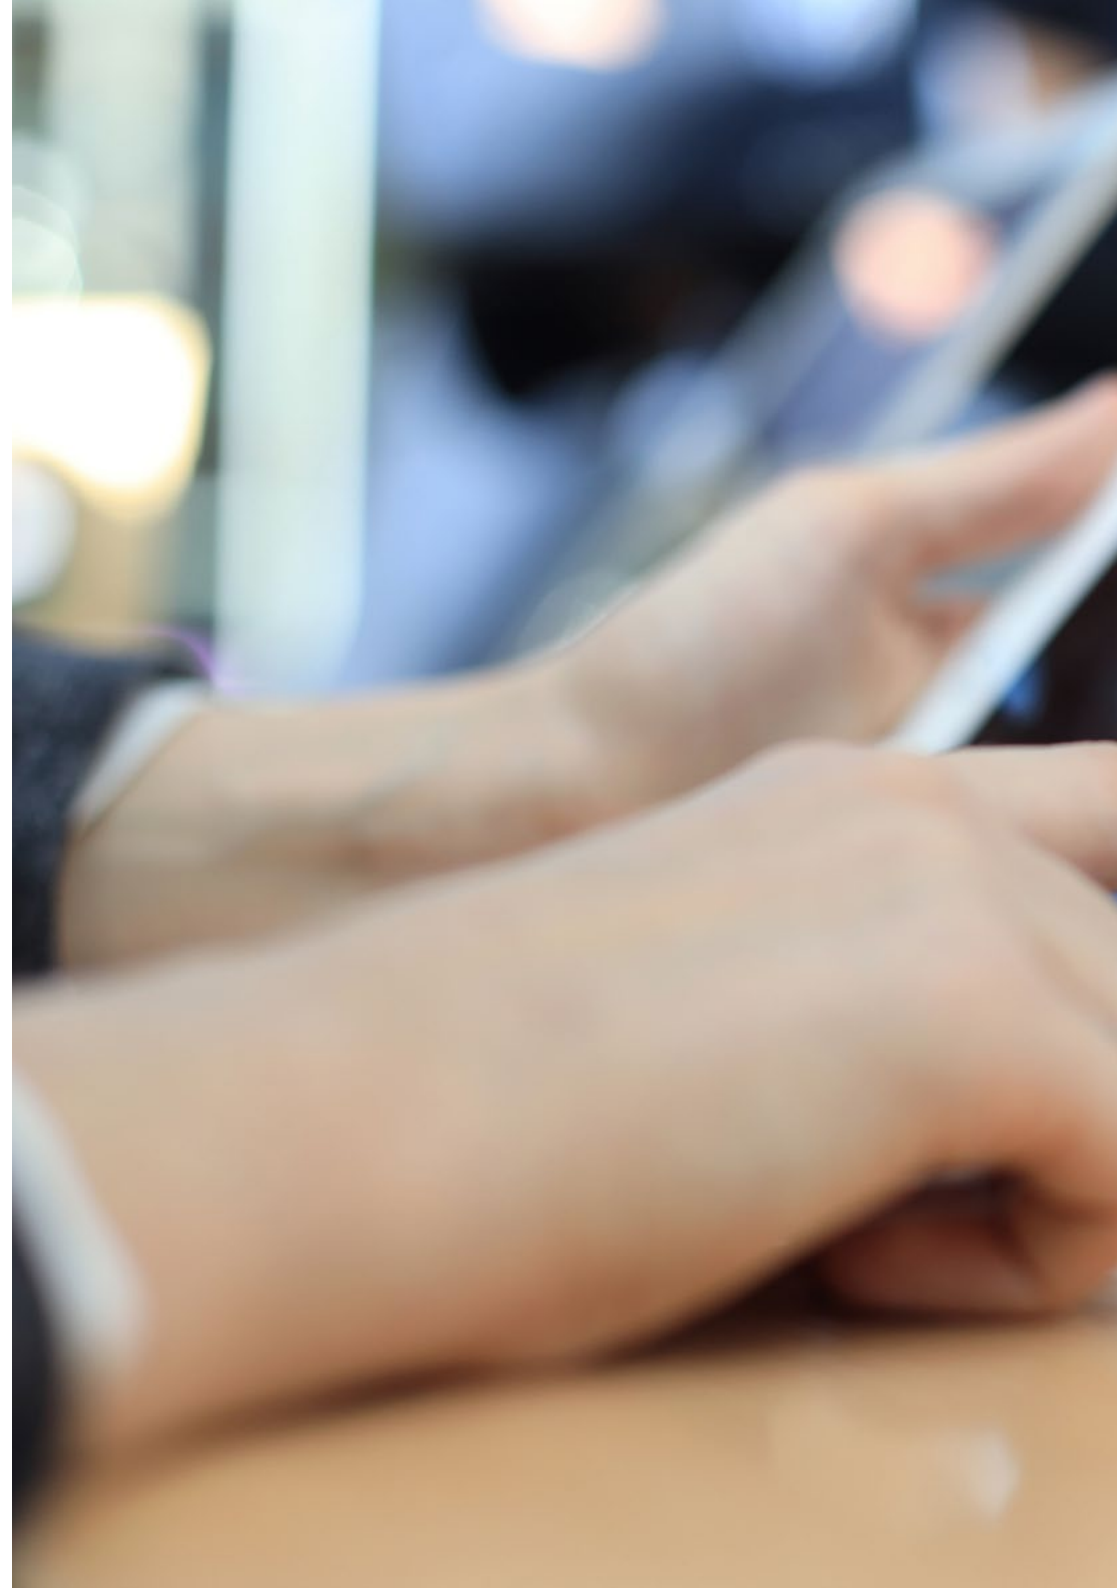

The Practical Training in Digital Education, e-Learning and Social Networks consists of a 3-week stay in a high-level educational center, with 8 consecutive hours from Monday to Friday with a teacher who will act as a tutor. Through this experience, the student will assimilate the keys and the best didactic strategies to impart virtual learning with maximum solvency, acquiring skills that will position them as a highly accurate teacher in the era of digitalization.

In this training proposal, of a completely practical nature, the activities are aimed at the development and improvement of the skills necessary for teaching in a virtual environment, and are oriented to the specific training for the exercise of the activity, in an educational center positioned at the digital vanguard.

Consequently, this program is an excellent ally to improve and develop the student's digital and technological capabilities, providing them with the skills required to deliver virtual education and optimize student learning.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for teaching practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
Social networks in teaching	Create and manage a Facebook page and LinkedIn profile to share resources and news with students
	Designing educational infographics for Instagram
	Create a YouTube channel to disseminate knowledge to students
Technological Data Science in the Classroom	Create and share a blog using platforms such as WordPress or Blogger to share information with students
	Develop an interactive lesson using a digital whiteboard and a stylus educational software
	Using mobile devices to record and edit an educational video
	Create and manage a virtual course using online learning platforms e-learning platforms
Innovation and Emerging Methodologies	Implement the Flipped Classroom methodology in the classroom
	Design a gamification project to encourage motivation and promote student learning and promote student learning
	Creating an immersive learning experience using Augmented Reality of Augmented Reality
Educational management and planning with ICT	Manage grades and class attendance using school management platforms
	Set up a digital calendar to plan and organize homework and school events
	Communicate with peers, parents and students through various digital tools

05

Where Can I Do the Internship Program?

TECH has selected an excellent group of centers where the student will be able to carry out this Practical Training. All of them have the best educational technology and are positioned at the digital forefront, so it will be an ideal working environment for the student to develop to the maximum teaching skills of the XXI century.

Do your Practical Training in an educational center with the best digital equipment"

The student will be able to do this program at the following centers:

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Digital Education, e-Learning and Social Networks** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery*.

The diploma issued by TECH will reflect the grade obtained in the test.
