01 Introduction

In a diverse world, where the individuality and needs of each student are recognized and valued, Therapeutic Pedagogy has become a fundamental pillar. It not only addresses learning difficulties or disabilities, but also highlights the emotional, social and cognitive demands of children and adolescents. It also seeks to ensure equal opportunities with a more inclusive and quality education. For this reason, TECH has created this program, in which, for 3 weeks, the professionals will be integrated into a highly trained team, in order to be equipped with the most innovative learning strategies, as well as with the latest technological advances. Likewise, the intensive face-to-face stay is supported by the guidance of a specialized tutor.

“

You will incorporate in your daily practice the most relevant advances in the area of Therapeutic Pedagogy, thanks to a distinctive, unique and intensive practical experience”

Therapeutic Pedagogy has become the fundamental core of today's educational environment, where diversity in the classroom is increasingly evident. By personalizing teaching, this discipline promotes an inclusive environment that celebrates individual differences, allowing all students to reach their full educational potential and actively participate in their learning process.

This adaptation and specific attention, not only benefits those who require additional support, but also enriches the educational experience for all, creating a more supportive, equitable and enriching environment. And as the best way to perfect these skills is through practice, TECH has designed a program consisting of a 120-hour stay in a reference educational center in the field of Therapeutic Pedagogy.

Throughout 3 weeks, the graduates will be part of a team of specialists of the highest level, with whom they will work actively in the management of students with special needs, either by some kind of cognitive, sensory, physical disorder or problems in their social environment or learning difficulties.

In this way, you will be able to acquire not only the most effective teaching procedures, but you will also implement in your practice the skills to recognize and value the uniqueness of each student, adapting pedagogical strategies to optimize their academic, social and emotional development. In this way, you will participate in a program that will elevate your pedagogical talents to the highest level.

During the stay, you will have the support of an assistant tutor, who will ensure that all the requirements for which this Internship Program has been designed are met. Based on this, the professional will work with total guarantee in the handling of the most innovative educational technology, as well as in the use of the pedagogical and therapeutic techniques that have had the best results to date.

With this program you will carry out your internship in a specialized educational center, equipped with state-of-the-art technology and together with recognized professionals in Therapeutic Pedagogy"

02

Why Study an Internship Program?

Professionals in Therapeutic Pedagogy must investigate new teaching techniques that help them manage diversity in the classroom and effectively involve students in the teaching process. To achieve this, it is not enough just to offer theoretical content, it is necessary to provide the tools to put everything into practice. For this reason, TECH has created this innovative training that encourages students to address different learning styles, as well as adapt their educational approach to promote progress and inclusion. During 3 intensive weeks, the pedagogues will acquire practical tools and disruptive methodologies, supported by experienced professionals in the field.

TECH is the only university that offers you the possibility to get into real educational environments to deepen, from the hand of the best professionals, in the latest techniques in Therapeutic Pedagogy"

1. Updating from the Latest Technology Available

In recent years, therapeutic pedagogy has experienced remarkable technological advances. The integration of digital platforms and specialized applications, for example, have allowed educators to further customize the teaching process, offering interactive and adaptive resources that fit different learning styles. For this reason, TECH presents this Internship Program, with which the professionals will enter a cutting-edge environment, accessing the latest technology in this field.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

The large team of professionals that will accompany the specialists throughout the practical period is a first-class and an unprecedented guarantee of updating. With a specifically appointed tutor, the graduates will be able to deal with real students in a cutting-edge environment, which will allow them to incorporate in his daily practice the most effective procedures and tools in Therapeutic Pedagogy.

3. Entering first-class Communication Management environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialists will be guaranteed access to a prestigious educational environment in the area of therapeutic pedagogy. In this way, they will be able to check the day to day of a demanding, rigorous and exhaustive work area, always applying the best techniques in therapeutic learning to your work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

The academic market is plagued by teaching programs that are poorly adapted to the daily work of the specialist and that require long teaching hours, often not very compatible with personal and professional life. TECH offers a new learning model, 100% practical, which allows you to put yourself at the forefront of innovative procedures in the field of Therapeutic Pedagogy and, best of all, bring it to professional practice in just 3 weeks.

5. Opening the door to new opportunities

From the adaptation of traditional teaching methods, to the integration of new technologies and digital tools in Therapeutic Pedagogy, pedagogical strategies have been customized and adjusted to meet the individual needs of each student. The Internship Program and the exchange of experiences will offer the professionals new opportunities to refine their methods, making a difference in the educational experience of those who require a more personalized approach.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

The main objective of this Internship Program is that the professionals acquire the knowledge and skills to develop their functions as pedagogues and therapists in an exclusively practical way, through a stay designed with the maximum academic rigor, under the guidance of recognized professionals in a specialized center, of the highest educational quality and with the most innovative technology.

General Objectives

- ♦ Participate in the student's follow-up
- ♦ Accompany the families or legal guardians in the development of the student
- ♦ Carry out the evaluation and diagnosis of special educational needs
- ♦ Elaborate the adaptations required by students with special educational needs
- ♦ Establish measures in the classroom, school and environment of students with special educational needs, enabling their full inclusion in today's society

Specific Objectives

- ♦ Working with special educational needs
- ♦ Use and adapt tools and materials according to the needs and developmental stages of the student
- ♦ Differentiate the concepts of attention deficit disorder, with and without hyperactivity
- ♦ Recognize the different motor disorders
- ♦ Coordinate teaching teams for the appropriate use of prostheses and other technical aids
- ♦ Delve into autism spectrum disorder, as well as other pervasive and specific developmental disorders
- ♦ Evaluate and treat students suffering from mental disorders
- ♦ Identify the most relevant eye and ear diseases for further evaluation and intervention
- ♦ Recognize communication disorders and their incidence in the developmental stages of the student for intervention
- ♦ Use Information and Communication Technologies (ICT) as a tool in Special Education

This initiative will strengthen your confidence in the practice of Therapeutic Pedagogy, providing you with an impetus to grow both personally and professionally”

04

Educational Plan

The Internship Program in Therapeutic Pedagogy consists of a practical stay in a specialized educational center, lasting 3 weeks, from Monday to Friday with 8 consecutive hours of practical training with an assistant specialist. This placement will allow you to deal with people with real educational problems, always alongside a team of leading professionals in the field of pedagogy, applying the most innovative and specific therapeutic procedures for each case.

In this training proposal, each activity is designed to strengthen and refine the key competencies required for specialized practice in this field. In this way, the professional profile will be enhanced, driving a strong, efficient, and highly competitive performance.

This is undoubtedly a unique opportunity to learn by working in educational centers at the technological forefront, where teaching and various therapies (rehabilitation, study, learning, social integration, etc.) come together to form the main axis of its professionals. This is a new way of understanding and integrating therapeutic pedagogical processes, through centers of reference in the teaching scenario, ideal for carrying out this innovative experience in the improvement of professional skills.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for the Therapeutic Pedagogy practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

You will obtain your training in an institution that will provide you with every opportunity, with a cutting-edge syllabus and a committed team to enhance your development to the fullest"

Module	Practical Activity
Services in Early Care	Intervening in children with early developmental disorders
	Work personal autonomy and participation in daily life activities

You will acquire updated skills, offering a quality service to each student, from the hand of first level specialists"

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Therapeutic Pedagogy and Conflict Resolution** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

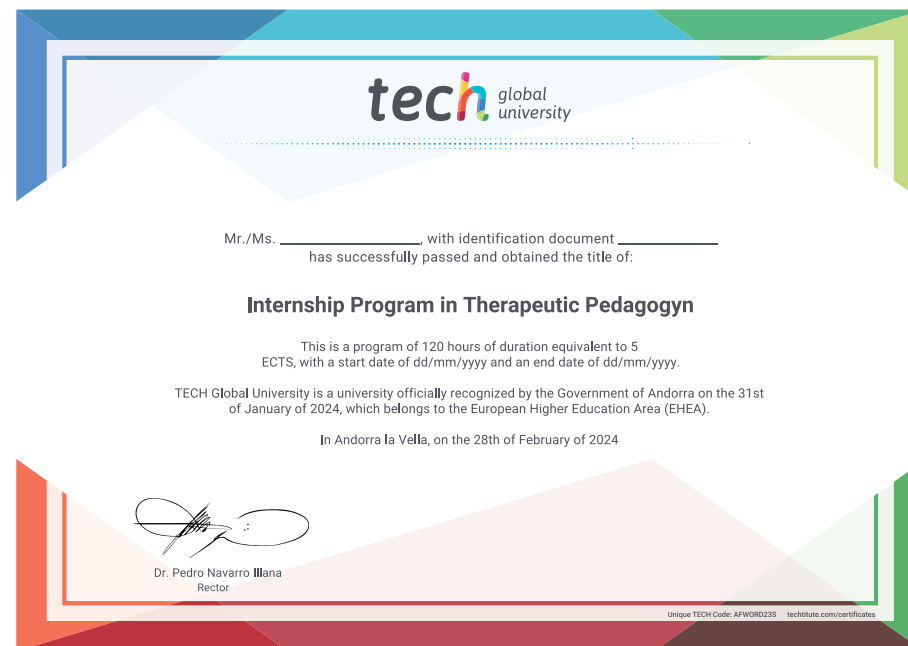

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
