Introduction

From an early age it is advisable to introduce sex education in schools so that students are able to understand the changes that occur in their bodies and the way they relate to others. In addition, new technologies have made the consumption of pornography more and more frequent in pre-adolescents. Faced with this reality, it is necessary for teaching professionals to be aware of the latest developments in the field of sexology. In this context, TECH has created this degree, which provides the most advanced and recent syllabus on the gender perspective, new masculinities or the prevention of harassment due to sexual diversity. All this in a 100% online academic format taught by specialists in Sexology, Communication and Psychology.

“

With this Professional Master's Degree you will be able to orient your career as a teacher to the creation of sex education programs at all educational levels”

Studies on the consumption of pornography and adolescence indicate that the viewing age of this type of content is around 12 years old and that 68.2% of them watch it frequently. The ease of access to such material through cell phones and the fact that it is free of charge makes it essential that sex education reaches young people from an early age.

In this way, schools and teaching professionals become a powerful weapon of information on the knowledge of one's own body, methods of prevention of sexually transmitted diseases and the approach to the various existing sexualities. That is why TECH has created this Professional Master's Degree in Sexology, which provides the teacher with a multidisciplinary vision, which will lead in just 12 months to obtain a specialization in this field.

It has an advanced and comprehensive syllabus that will provide the most relevant information on the design, planning and implementation of educational programs aimed at sex education at all educational levels. It also provides all the necessary tools to be able to deal naturally with the main problems related to erotic difficulties or multidisciplinary work carried out with other specialists.

This will be possible thanks to a quality multimedia content, which offers dynamism and a theoretical-practical vision of Sexology. In addition, with the Relearning system, students will be able to reduce the hours of study and memorization so frequent in other academic methods.

The professional is, therefore, faced with an excellent opportunity to progress in the educational sector through a 100% online university qualification that can be accessed whenever and wherever they wish. All they need is an electronic device with an Internet connection to access the most advanced content hosted on the Virtual Campus. In addition, they have the option of being able to distribute the teaching load according to their needs and more easily balance their daily responsibilities with an education that is at the forefront of the academic world.

This **Professional Master's Degree in Sexology** contains the most complete educational program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Psychology and Sexology
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

With this degree you will learn about homophobic bullying and LGBTQ+ affirmative psychology

“

This university qualification will allow you to learn how to work with the gender perspective in childhood, adolescence and adulthood”

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Multimedia pills or specialized readings will accompany you during this academic journey on Sexology and its dissemination in educational centers.

This is a program that will allow you to combine your responsibilities as a teacher with a first-class university education.

02

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Global University School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
