Introduction to the Program

Teaching English in Primary Education is not just a linguistic matter, but a gateway to new opportunities for future generations. In a world where proficiency in this language is key to academic and professional development, educators need innovative methodologies that enhance meaningful learning. According to the Ministry of Education and Vocational Training, around 30% of primary school students are studying English as a foreign language, highlighting the importance of effective teaching. This program from TECH Global University offers a cutting-edge academic experience, combining advanced didactics, digital tools, and inclusive approaches to transform teaching practices. All of this is delivered through a 100% online, flexible model designed by experts in the educational sector.

“

A comprehensive and 100% online program, exclusive to TECH, with an international perspective supported by our membership with the International Association of Teachers of English as a Foreign Language”

English is one of the fundamental tools in primary education, not only as a linguistic knowledge but also as a gateway to better academic and professional opportunities. However, its teaching requires innovative approaches that go beyond memorization and allow for effective language acquisition.

In this context, the Master's Degree in Teaching English in Primary Education from TECH emerges as a university qualification designed to equip educators and education professionals with advanced strategies, active methodologies, and technological tools applied to learning the English language. Throughout this academic journey, the program delves into the principles of personalized education and general didactics. Additionally, topics such as advanced grammar, phonetics, and the morphosyntax of English allow educators to refine their linguistic competence and teaching abilities. As such, this academic opportunity not only reinforces the theoretical and practical foundations of English didactics but also trains professionals to design and adapt effective educational materials based on the student's needs.

Thanks to its fully online delivery, graduates can advance in their specialization without neglecting their professional responsibilities. With unlimited access to content available 24/7 and based on the Relearning learning method, TECH guarantees efficient, flexible learning tailored to the current demands of the education sector. Additionally, graduates will receive 10 Masterclasses taught by an International Guest Director.

In this way, thanks to TECH's membership in the **International Association of Teachers of English as a Foreign Language (IATEFL)**, graduates will gain access to exclusive resources, international conferences, and professional development opportunities that will enhance their training. Additionally, they will be able to join a global network of English teaching experts, fostering the exchange of experiences and new academic and career opportunities.

This **Master's Degree in Teaching English in Primary Education** contains the most complete and up-to-date university program on the market. Its most notable features are:

- ♦ The development of practical cases presented by experts in Teaching English in Primary Education
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in Teaching English in Primary Education
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will delve into the didactics of English and active methodologies with the innovative tools you will acquire in the exclusive Masterclasses of this university qualification from TECH

“

You will apply innovative methodologies in Teaching English, ensuring dynamic and effective learning”

The program includes a faculty of professionals from the field of Teaching English in Primary Education, who bring their real-world experience into this program, as well as recognized specialists from leading societies and prestigious universities.

Its multimedia content, created with the latest educational technology, will provide professionals with situated and contextualized learning, meaning a simulated environment that offers an immersive study experience designed to prepare you for real-world situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will design didactic strategies adapted to different educational contexts, taking into account cultural and linguistic factors.

With TECH's unique learning system, you will implement effective teaching practices, optimizing English learning in the classroom.

Teaching Objectives

The objective of this Master's Degree in Teaching English in Primary Education is to train education professionals in innovative methodologies for teaching English in primary education. Graduates will develop advanced skills in language didactics, applying strategies based on communication, the use of ICT, and personalized learning. They will also acquire competencies in English grammar, phonetics, and morphosyntax, allowing them to teach with precision and fluency. With comprehensive and updated preparation, they will be ready to transform the teaching-learning process, adapting it to the needs of students in a globalized and digitized environment.

“

You will develop competencies by enhancing the use of digital resources in English teaching, continuously improving your professional practice”

General Objectives

- Apply innovative methodologies in teaching English in primary education to improve language acquisition
- Master personalized education strategies that address the needs and learning styles of each student
- Integrate information and communication technologies (ICT) into English teaching, optimizing the learning process
- Refine English pronunciation and intonation through advanced study of phonetics and phonology
- Develop a deep understanding of grammar, morphosyntax, and semantics of English to teach with greater rigor
- Design attractive and effective teaching materials that facilitate English teaching and learning
- Implement innovative assessment techniques to measure student progress and adapt teaching to their needs
- Promote English teaching in multicultural contexts, considering linguistic and pedagogical factors

Specific Objectives

Module 1. Personalized Education. Anthropological, Philosophical, and Psychological Foundations

- ♦ Analyze the anthropological, philosophical, and psychological foundations that support personalized education
- ♦ Apply teaching strategies adapted to the individual needs of students in learning English

Module 2. Information Technologies Applied to Education

- ♦ Explore the main digital tools that optimize English teaching in the primary classroom
- ♦ Implement technological resources to personalize teaching and improve the learning experience of students

Module 3. General Didactics

- ♦ Identify the key principles of general didactics and their application in teaching English
- ♦ Design teaching strategies based on active methodologies to improve language acquisition

Module 4. Innovation and Improvement of Teaching Practice

- ♦ Apply innovative methodologies to enhance the teaching of English in primary education
- ♦ Evaluate continuous improvement strategies to optimize student performance in language learning

Module 5. Didactics of the English Language

- ♦ Design effective lesson plans based on specialized didactic strategies for teaching English
- ♦ Apply pedagogical techniques to improve oral and written comprehension and production in English

Module 6. *English Grammar*

- ♦ Analyze the grammatical structure of English to strengthen language teaching in the classroom
- ♦ Implement strategies for the progressive and contextualized teaching of grammar in primary education

Module 7. *Phonetics*

- ♦ Study the principles of phonetics and their impact on correct English pronunciation
- ♦ Apply phonetic correction techniques to improve students' fluency and accuracy in oral production

Module 8. *Morphosyntax and Semantics in the English Language*

- ♦ Analyze English morphosyntax and its relevance in linguistic comprehension and production
- ♦ Apply strategies to teach the semantics of English, promoting better acquisition of word meanings and structures

Module 9. *ICT Tools Applied to the Learning of English Language*

- ♦ Explore digital platforms and applications that support English teaching in both virtual and face-to-face environments.
- ♦ Integrate ICT tools into the design of interactive activities that foster student participation and learning.

Module 10. *Advanced Didactics of English Language*

- ♦ Apply advanced didactic strategies to improve the teaching of English in primary education
- ♦ Design innovative teaching materials and activities to optimize the language learning process

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Teaching Staff

The faculty team of this Master's Degree is composed of experts in English language teaching with a distinguished track record in educational innovation and technology applied to language learning. These professionals have led projects in active methodologies, bilingual education, and the development of digital resources for teaching English in primary education. Thanks to their experience, graduates will have access to updated knowledge and cutting-edge strategies that will allow them to optimize their teaching practices and enhance English learning in their students.

“

Specialize with internationally experienced educators, gaining access to the most up-to-date knowledge and methodologies in English teaching”

International Guest Director

Dr. Martin Dewey is a leading international expert in the field of **Applied Linguistics**. His career, linked to the **Teaching of English** as a Second Language, has been developed in different countries such as **Italy, Mexico and the United Kingdom**. He has also led training projects for other teachers based on the prestigious **CELTA** and **DELTA** schemes.

This specialist has also developed his prolific career around the analysis of the **Globalization of English**, as well as its role as a **lingua franca** and **multilingualism**. His studies on these issues provide a holistic and intensive view on the **conceptualization of language** and how knowledge operates through it.

At the same time, he emphasizes the impact for teachers to master these precepts and thus be able to exercise a **critical and innovative pedagogy**.

In these areas, he has published several **publications** and **scientific presentations**. Among his specialized texts is the book *Analyzing English as a Lingua Franca: A Corpus Driven Investigation*. The latter is a collaboration with fellow expert Alessia Cogo. He is also co-author of the *Routledge Handbook of English as a Lingua Franca*.

On the other hand, Dr. Martin Dewey is **Editor-in-Chief** of *The Journal of English as a Lingua Franca*, where he gives a platform of dissemination to other experts for their academic materials. He also runs an academic forum on this field at King's College, London.

At the same time, he is in charge of leading a prestigious **training program** for teachers. He has supervised the progress of several specialists seeking to complete their **doctoral studies**. Among them are promising young teachers from countries such as **Saudi Arabia, Colombia, China, Indonesia, Lebanon, Brazil, South Korea** and others.

Dr. Dewey, Martin

- Director of Applied Linguistics and English Language Teaching at King's College London, United Kingdom
- Editor-in-Chief of The Journal of English as a Lingua Franca
- Specialist in the DELTA and CELTA Initial Training Schemes
- Co-author of *Analyzing English as a Lingua Franca: A Corpus Driven Investigation*
- Doctorate in Philosophy of Language in Education from King's College London
- Member of the Center for Language, Discourse and Communication

Certificate

The Master's Degree in Teaching English in Primary Education guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Master's Degree issued by TECH Global University.

“

*Successfully complete this program and
receive your university qualification without
having to travel or fill out laborious paperwork"*

This private qualification will allow you to obtain **Master's Degree in Teaching English in Primary Education** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (**official bulletin**). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

TECH is a member of the **International Association of Teachers of English as a Foreign Language (IATEFL)**, the leading international association for English language teachers. This membership supports its commitment to educational quality and to training professionals capable of facing the current challenges in language teaching.
