01
Introduction

Behavior modification requires a series of interventions by the educator with the student, since it requires an interactive process full of sessions with which to establish a professional relationship and respond to the different problems that subject the minor. To achieve the task, professional educators must update their knowledge and techniques in the different practical processes, so TECH offers this 100% online, innovative and effective program, which can be taken at your preferred time and without the need to attend an on-site class.
This program is a great opportunity for you to update your knowledge of behavior modification in youth"

The modification of behavior means for many cases a positive change in attitude, so that in the long run represents a general change in the environment, improving the coexistence with different sectors that at the time were affected. When a modification in the behavior of the young person is generated, the family, their friends and their own social environment in general will be benefited and the young person will be calmer in turn.

This is why, through this Postgraduate Certificate, teaching professionals will be able to respond to the problems they encounter with their students when they show signs of change in their behavior, in addition to identifying relevant techniques and updates in procedures for the development of their professional career.

It is a 100% online, intensive and effective program that will provide up-to-date information, techniques and procedures. In addition, the qualification will have a teaching staff of the highest quality, which, from their knowledge, designed a versed and rigorous content full of audiovisual material, practical exercises and verified information from previous processes. A great opportunity that TECH offers to professionals who wish to add this qualification to their experience while balancing their work and/or personal responsibilities.

This **Postgraduate Certificate in Behavior Modification** contains the most complete and up-to-date educational program on the market. The most important features include:

- Practical cases presented by experts in Psychology
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Take this program and identify the main techniques and procedures for behavior modification in young people"

A program designed to meet the current needs of the education sector, where you can access first-hand information for your professional career.

Download the content of the program and strengthen your skills to face the problems of today's young people.

"*Learn the best behavior modification techniques to solve adversities that may arise in the workplace*"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow professionals to learn in a contextual and situated learning environment, i.e., a simulated environment that will provide immersive education programmed to prepare in real situations.

The design of this program focuses on Problem-Based Learning, by means of which professionals must try to solve the different professional practice situations that are presented to them throughout the academic year. For this purpose, students will be assisted by an innovative interactive video system developed by renowned experts.

02

Access a complete program in which you will be able to update your knowledge in the benefit of behavior to apply it in your educational methods"

03
Structure and Content

The content of this program was designed by TECH, together with its teaching staff, in order to provide professionals with topics of interest and recent updates on techniques and procedures of Behavior Modification. It is a demanding program, which seeks to enhance the capabilities of educators when they have to do their field work and work with the psychology of their students. Therefore, students will be able to download the content of the program and review it as many times as they wish to strengthen their knowledge.

" *A program of educational excellence that is made to meet your most demanding standards, updating your knowledge for behavior modification*"

Module 1. Behaviour Modification

A Postgraduate Certificate that will allow you to apply the latest strategies in behavioral assessment in patients at the childhood and adolescence stage"

04
Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**
This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.
Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they w have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

Scientific Evidence

Optimal Decision

European Guidelines

Educational Community

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

"Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.

2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.

3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.

4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.
This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.
