# Introduction

International cooperation must focus on compliance with environmental law, so that the development of certain regions does not involve damage to the environment. In this context, educational work is fundamental, since it is essential to educate citizens from an early age, to respect nature. This program aims to prepare teachers in the field of Cooperation and Environmental Law so that they can develop professionally with all the guarantees of success.

“

*Knowing the main tools of environmental law will allow us to fight for the benefit of sustainability. Don't think twice and give your profession a boost"*

International aid and cooperation organizations have become increasingly important in the last decades, favored by the increase in investments and, therefore, the greater capacity to work in the regions with the greatest needs.

Working in the field of international cooperation is a way of helping the neediest regions. This work can be carried out in different sectors: social, economic, educational, etc., but it is always advisable that it be done from an environmental perspective, focusing on environmental law, achieving progress in the regions by taking advantage of existing natural resources.

In this Postgraduate Certificate, the teaching professional will learn about organizations dedicated to field work in international development cooperation: their history, their evolution, the main characteristics of this type of organizations. In this way, the management mode of these organizations, their working methods, legislation, and commitments to the most important areas of work, such as sustainable development, will be learned.

This program combines basic knowledge in international cooperation and development applied to the field of teaching, tools that allow the development worker to seek to improve the performance of their functions in those fields that people and communities demand, orienting them to change and focusing them on the present situation through the tools and resources of cooperation.

In addition, as this is a 100% online program, the teachers will be able to balance the study of this Postgraduate Certificate with the rest of their daily obligations, choosing at all times where and when to study. A high-level specialization that will take these professionals to the highest level in their field.

This **Postgraduate Certificate in Cooperation and Environmental Law** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Case studies presented by experts in international cooperation of the peoples of the world
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Latest developments in Cooperation and Environmental Law

- ♦ Emphasis on innovative methodologies in International Cooperation
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*A high-level educational program created by the best experts in the field, which will allow you to achieve professional success"*

“

*This Postgraduate Certificate is the best investment you can make in selecting a refresher program for two reasons: In addition to updating your knowledge in Cooperation and Environmental Law, you will obtain a Postgraduate Certificate from TECH Technological University”*

It includes, in its faculty, professionals belonging to the field of international cooperation, who bring to this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the specialist will be assisted by an innovative interactive video system developed by renowned and experienced experts in Cooperation and Environmental Law.

*Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.*

*We offer you the most complete Postgraduate Certificate with the best teaching methodology.*

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

**Classes**

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

**Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
