Introduction

Approaching Plato, Socrates, Kant, or Descartes with current perspectives and approaches to philosophy requires a mastery of the social and educational uses of philosophical knowledge. A pedagogical task that should focus on the appropriate content for each educational level. For this reason, this program was created to provide the teacher with the most relevant information on this subject in High School Education. An intensive update of 150 teaching hours on the origins of Western philosophy, its main authors, ethics, and modern philosophy. All in addition, in a 100% online educational format and with multimedia didactic material that can be accessed 24 hours a day, from any electronic device with an Internet connection.

“

This 100% online Postgraduate Certificate will allow you to update your knowledge of Philosophy and Ethical Values in High School Education in just 6 weeks"

Today's teaching professional must continue to transmit to the High School Education students from Plato's Republic , Socrates' main ideas, Kant's Critique of Pure Reason to Niccolo Machiavelli's The Art of War. All this, in addition, with proximity, illustrating such content with the best teaching resources in order to promote critical and analytical thinking in students.

The teacher's deep knowledge of philosophy must be translated into educational programs that are transcendental for the high school students' personal and professional development. Given the depth of the subject and the extensive knowledge on the part of the teacher, it is necessary to update them according to the teaching of each educational level. This Postgraduate Certificate in Disciplinary Training in Philosophy and Ethical Values in High School Education was created with this aim in mind.

A 100% online program that has been designed by an excellent team of professionals with extensive experience in the education sector. In this way, the future teacher will have access to the most relevant information on Philosophy and Ethical Values taught at this school stage.

A 6-week educational itinerary, where you will have the opportunity to update your knowledge on the Greek origins of philosophy, Marxism, science, physical anthropology, or ethics. The professionals can count on multimedia teaching material and a Relearning system, which allows them to update their knowledge without having to invest many hours of study and dedication.

The professionals are, in this way, facing an excellent opportunity to be able to update their knowledge through a flexible Postgraduate Certificate program that is compatible with their daily responsibilities. All you need is an electronic device (cell phone, computer, or tablet) with an Internet connection to be able to view the content hosted on the virtual platform. Therefore, without classes with fixed schedules and distributing the teaching load according to their needs, the teacher will be able to progress in the educational sector.

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise. These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides
