Introduction

Medical pathologies, surgeries, pain, sexual disorders, among other difficulties affect countless people every day when they have sexual encounters, causing a negative impact on their quality of life and interpersonal relationships. In response to the great need for specialized professionals in this area, TECH has designed this program, with the objective of enabling students to acquire specialized knowledge in the field of sexology, as well as the approach and treatment of different erotic difficulties. This program is taught in a 100% online format, with a pedagogical methodology called Relearning, which allows for flexible and effective learning.

“

Thanks to this Postgraduate Certificate you will obtain a complete and specialized training in sexology, so that you can intervene in the treatment of the most frequent erotic difficulties”

Currently, it is estimated that between 20% and 30% of the male and female population experience some type of sexual difficulty throughout their lives, with lack of sexual desire and erectile dysfunction being the most common in men, and lack of sexual desire and difficulty reaching orgasm being the most frequent in women.

Given this problem, TECH's Postgraduate Certificate in Erotic Difficulties is presented as a unique opportunity for those professionals in the educational sector who want to acquire specialized knowledge in this area. The syllabus of this program focuses on the human sexual response, addressing aspects such as desire, arousal, orgasm and resolution. In addition, the different sexual difficulties that may occur are studied, such as lack of desire, difficulty in maintaining erection, premature ejaculation, inability to reach orgasm, among others. For each of these difficulties, its definition, etiology and intervention proposal are analyzed.

Likewise, interdisciplinary intervention in sexology is addressed, analyzing the importance of interdisciplinary work and related professionals. Definitely, this is a complete course that provides the student with specialized training in the field of sexology and the treatment of erotic difficulties.

In addition, the use of audiovisual resources, complementary readings and real cases make this program an enriching and practical experience, which will allow students to apply the knowledge acquired in their daily practice. In addition, its 100% online format will allow you to organize your study time in a flexible way and adapt to your personal and professional needs.

This **Postgraduate Certificate in Erotic Difficulties** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Sexology

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.
