Introduction

The word Theology comes from Greek and can be defined as the science in charge of the study of the word of God. Throughout history, new theologies have emerged from different cultural contexts. Therefore, it is important for professors of Fundamental Theology to be constantly up-to-date in order to achieve excellence in their professional practice and to incorporate the latest pedagogical methodology in the field of theological teaching. Faced with this situation, TECH has designed a program that will delve into the reflections of faith and Theology, as well as magisterial teaching and theological reflection on the transmission of Revelation. In addition, its 100% online methodology will allow you to acquire the best skills from your own home.

“

This exclusive program will allow you to take the teaching of religion to a higher level, developing a critical spirit, preparing you to defend arguments, and contrast opinions”

As a science that studies the divine nature and everything related to God, theology is based on him and his relationship with living beings. The mystery of God, in all its complexity, has generated diverse thoughts and positions throughout human history. The mission of Fundamental Theology is to express the characteristics and foundations of the Christian faith, developing and analyzing all the essential existential differences in relation to other religious visions. In this way, it is the teacher's job not only to train in depth to obtain exhaustive knowledge, but also to learn how to transmit this information with the wisdom and critical spirit of an expert.

For this purpose, TECH has designed, together with a team of professionals specialized in Theology, this program full of valuable information. An cutting-edge and dynamic program that adapts to the current educational environment. In this way, in only 6 weeks the graduate will be able to delve into the keys for specialized instruction in theological reflection on revelation and will enter into the knowledge of faith as man's response to revelation. In addition, you will be able to broaden your skills with knowledge of Christianity and religions.

TECH offers an excellent opportunity for teachers seeking to advance their professional careers through education offered in a 100% online format. The student only needs a device with an Internet connection to be able to connect and consult the syllabus of this Postgraduate Certificate. This content will be available in its entirety from the beginning of this program and can be downloaded and consulted once it has been completed. In this way, with no attendance or fixed schedules, the students will have total freedom to access the virtual classroom at any time and place, allowing them to distribute their teaching load and other aspects of their personal lives.

This **Postgraduate Certificate in Fundamental Theology for Teachers** contains the most complete and up-to-date educational program on the market. The most important features include:

Become a successful professional through a program that allows you to boost your career and push your limits"

04

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
