# Introduction

Neurological bases have recently revealed that they are the origin of the behavioral regulation in humans. This groundbreaking knowledge represents an advancement in neuropsychology, offering nursing professionals a new perspective on mental illness—a fresh understanding of the patient and their situation. This Postgraduate Certificate will guide you through the most interesting advancements in this area of knowledge.

“

*A Postgraduate Certificate created to boost your understanding of mental illness, with the latest advances in neuropsychology regarding the neurological bases of behavior”*

Understanding the neurological bases of behavior and their implication in the normal maturation of the human being is essential knowledge for educators who seek an approach to child psychology or clinical and psychotherapeutic intervention. Any difficulty in this ongoing process affects the student's ability to communicate, evolve, and learn.

The new tools in brain imaging studies, along with knowledge about the interrelation of different structures, have led to a complex understanding where linear or horizontal theories are no longer valid. It is the transversal, vertical, and interactive knowledge that helps us better understand how it works.

A comprehensive learning experience that will provide you with the answers your work needs when organizing educational interventions on any issues related to behavior.

*Gain a new perspective on student behavior through this Postgraduate Certificate in Neurological Bases of Behavior for Teachers, in a practical and personalized way to suit your needs"*

This **Postgraduate Certificate in Neurological Bases of Behavior for Teachers** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Development of more than 75 clinical cases presented by experts
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ New diagnostic and therapeutic developments in the assessment, diagnosis and intervention of the biological and neurological processes that explain mental illness
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve learning
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ♦ With special emphasis on evidence-based psychology and research methodologies in psychology
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

*The work methods of a top-level training program that will provide you with the most advanced distance learning systems available today”*

*A Postgraduate Certificate that will become a process of professional growth of the highest interest for education professionals.*

*Intensive, comprehensive, interesting, and effective. This is the Postgraduate Certificate you were looking for.*

The program includes faculty members from the field of Psychology, who bring their professional experience into this Postgraduate Certificate, alongside recognized specialists from leading scientific societies.

Thanks to its multimedia content, developed with the latest educational technology, professionals will benefit from situated and contextual learning—simulated environments designed to provide immersive learning experiences that prepare them for real-life situations.

The design of this program is based on Problem-Based Learning, in which the professional will need to address and resolve various practical situations that arise throughout the Postgraduate Certificate. To assist with this, the professional will have the support of an innovative interactive video system created by recognized experts in the field of clinical neuropsychology, with extensive teaching experience.

# 02

## Objectives

The goal of this program is to train education professionals in the field of clinical neuropsychology. This specialization will allow you to intervene using neuropsychology within the education field in the most comprehensive way possible. An opportunity for growth with the support of the best professionals in the teaching market.

“

*Learn how human behavior is determined and develop, from this knowledge, the response to the behavioral difficulties that students may present”*

## General Objectives

---

- ♦ Describe the brain-mind relationship
- ♦ Develop technologies that induce changes in the brain to overcome mental illness
- ♦ Describe the most common neurological disorders in psychological consultations
- ♦ Describe the knowledge of the relationships between the central nervous system, the endocrine system, and the immune system

*A Postgraduate Certificate that is essential for teachers in inclusive and future-oriented schools”*

### Specific Objectives

- ♦ Develop models that encompass brain activity, mental health, and mental illness
- ♦ Understand and master the specific biochemical and anatomical activity in each mental disorder
- ♦ Master the biochemical antagonists and agonists of overall brain function
- ♦ Acquire pharmacological knowledge in the treatment of mental illness
- ♦ Train in the development of psychological models that improve biochemical and anatomical imbalances
- ♦ Engage in multidisciplinary intervention in mental disorders
- ♦ Learn the impact of respiration, body temperature, and heart rate on illness and health
- ♦ Manage the ascending reticular system with psychological procedures
- ♦ Discover how psychosocial elements translate into brain activity, leading to intervention in mental illness

03

# Course Management

The program includes a faculty of leading specialists in Neurological Bases of Behavior for Teachers, who bring their professional experience into this Postgraduate Certificate. Additionally, other recognized specialists participate in its design and preparation, which means that the program is developed in an interdisciplinary manner.

“

*Learn from leading professionals about the latest advancements in procedures within the field of Neurological Bases of Behavior for Teachers”*

## Management

### **Dr. Martínez Lorca, Alberto**

- Specialist in Nuclear Medicine. Rey Juan Carlos University Hospital - Quirón. Madrid. Spain

## Coordinator

### **Dr. Aguado Romo, Roberto**

- Psychologist specialized in clinical psychology
- European specialist psychologist in psychotherapy
- Managing Director of evaluation and psychotherapy centers in Madrid, Bilbao, and Talavera de la Reina
- Author of Time-Limited Psychotherapy
- Researcher at CerNet, Emotional Network, and European Institute for Time-Limited Psychotherapies

## Teachers

### Dr. Fernandez, Angel

- ♦ European specialist psychologist in Psychotherapy from the EFPA
- ♦ Health Psychologist. Master's Degree in Clinical and Health Psychology
- ♦ Director of the Evaluation and Psychotherapy Center of Madrid
- ♦ Tutor in charge of the Psychodiagnosis and Psychological Intervention area of the CEP
- ♦ Author of the T.E.N. technique
- ♦ Head of studies on the Master's Degree in Time-Limited Psychotherapy and Health Psychology
- ♦ Specialist in Clinical Hypnosis and Relaxation

### Dr. González Agüero, Mónica

- ♦ Psychologist in charge of the Department of Child and Adolescent Psychology in the Quirón Hospital and Avatar Psychologists in Marbella
- ♦ Master's Degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapy
- ♦ Kaisser, Carlos. M.D. Otolaryngologist
- ♦ Head of the Otolaryngology department at Segovia General Hospital
- ♦ Member of the Royal Academy of Medicine of Salamanca
- ♦ Master's Degree in Time-Limited Psychotherapy and Health Psychology
- ♦ Expert in Psychosomatic Medicine

### Dr. Martínez-Lorca, Manuela

- ♦ Doctorate in Psychology from the University of Castilla-La Mancha
- ♦ Health Psychologist
- ♦ Lecturer in the Department of Psychology at the UCLM. Master's Degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapies
- ♦ Specialist in Clinical Hypnosis and Relaxation

### Dr. Roldan, Lucia

- ♦ Health Psychologist
- ♦ Cognitive-behavioral intervention specialist
- ♦ Master's Degree in Time-Limited Psychotherapy and Health Psychology
- ♦ Expert in energy therapy intervention

# 04

## Structure and Content

The approach to this training has been designed with the excellence criteria of our university in mind. With a stimulating and comprehensive development, this specialized journey will allow you to learn dynamically and consistently, guiding you to achieve your goals with ease and efficiency.

“

*A comprehensive syllabus tailored to the needs of education professionals, in the context of understanding human behavior and the neurological bases that determine it”*

## Module 1. Neurological Bases of Behavior

- 1.1. Reticular System
  - 1.1.1. Parts
  - 1.1.2. Functions
- 1.2. Brainstem
  - 1.2.1. Brain Biochemistry
  - 1.2.2. Influence of Biochemistry on Musculature
- 1.3. Activation of Limbic Structures
  - 1.3.1. Action Platform
  - 1.3.2. Motivation
- 1.4. Felt Sensation
  - 1.4.1. Emotion
  - 1.4.2. Basic Emotions
- 1.5. Pre-cortical Structures
  - 1.5.1. Feelings
  - 1.5.2. Unconscious Thinking
  - 1.5.3. Fantasy
- 1.6. Cortical Structures
  - 1.6.1. Motor Activity
  - 1.6.2. Sensory
- 1.7. Orbital Frontal Lobe
  - 1.7.1. Reflection
  - 1.7.2. Execution
  - 1.7.3. Planning

“

*A unique, essential, and decisive  
experience to boost your  
professional development”*

05

# Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

*TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”*

## The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes  
(which you might not be able to attend)”*

### The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

## Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

## Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

## A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

*The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”*

### The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

### The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

*Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.*

*You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.*

As such, the best educational materials, thoroughly prepared, will be available in this program:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

#### Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

#### Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06

# Certificate

The Postgraduate Certificate in Neurological Bases of Behavior for Teachers guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”*

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Neurological Bases of Behavior for Teachers** endorsed by TECH Global University, the world's largest online university.

**TECH Global University**, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
