Introduction

This intensive Postgraduate Certificate will provide teachers with the oral and written skills that will later be transmitted to their students in Spanish as a foreign language classrooms.

A speaker relies on communicative proficiency as a basis for developing other skills in relation to Spanish classroom knowledge. Therefore, the program in Oral and Written Skills deepens knowledge in the teaching of these linguistic, sociolinguistic and pragmatic competencies.

“

Update your knowledge on the teaching of Oral and Written Skills in Teaching Spanish as a Foreign Language, with a high-quality and prestigious program”

Any attempt at communication requires the speaker to have a complete command of their communicative abilities. In order to teach Spanish as a foreign language, it is essential to know all the skills that students must develop and their different learning stages, in order to develop different methodologies adapted to their educational needs.

This Postgraduate Certificate will pay special attention to the skills linked to the communicative process: reading comprehension/writing and listening comprehension/speaking, and the relationship between them. The classification that defines them is stipulated by the CEFR, showing the ways of working in the classroom and the strategies to develop them in the classroom environment.

Over the course of 2 months, students will also delve into non-verbal communication, as it is a form of communication involved in the process of gathering information.

In addition, this course will provide teachers with the tools and knowledge they require to practice the profession with confidence and efficiency, enabling them to help their students to understand and analyze messages effectively, and to develop non-verbal communication.

The teacher will be able to explain and resolve confusing questions regarding grammar or the evaluation process for their students. The teacher will have access to a comprehensive methodology for teaching vocabulary and the different techniques and teaching materials available, all taught by acclaimed experts in the field with extensive experience in the educational sector.

This **Postgraduate Certificate in Oral and Written Skills: Teaching Strategies** contains the most complete and up-to-date program on the market. The most important features include:

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort
and better performance, involving you more in
your specialization, developing a critical mindset,
defending arguments, and contrasting opinions:
a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.
