tech 06 | Introduction

New technologies, gamification or project-based learning are just some of the didactic resources that teaching professionals currently have at their disposal to teach their subject. These are fundamental tools when it comes to promoting learning in High School Education students.

Therefore, in the subject of Philosophy and Ethical Values there are many innovative materials and learning strategies that bring the thinking of philosophers such as Plato, Socrates, Kant, Marx or Nietzsche in an attractive way. In this sense, TECH has developed a 100% online Postgraduate Certificate that provides future teachers with the most current didactics.

A program of 150 teaching hours, where students will go through an advanced syllabus that will focus on the new paradigm of philosophy in a globalized world, learning techniques or the promotion of research in this area. All through video summaries, videos in detail or essential readings.

In addition, thanks to the case studies provided by the professors who teach this program, students will be able to obtain a practical and direct vision of the design of a teaching unit oriented to Philosophy and Ethical Values.

The teaching professional is thereby presented with a unique opportunity to advance through a flexible university program that is compatible with the most demanding responsibilities. You only need an electronic device with an Internet connection (cell phone, tablet or computer) to access the content of this program. An unparalleled opportunity to take a Postgraduate Certificate that is at the academic forefront.

This **Postgraduate Certificate in Philosophy and Ethical Values Teaching in High School Education** contains the most complete and up-to-date educational program on the market. Its most notable features are:

- The development of case studies presented by experts in teaching in High School Education
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Thanks to the Relearning method, you will be able to reduce your study hours and balance this Postgraduate Certificate with your daily activities"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

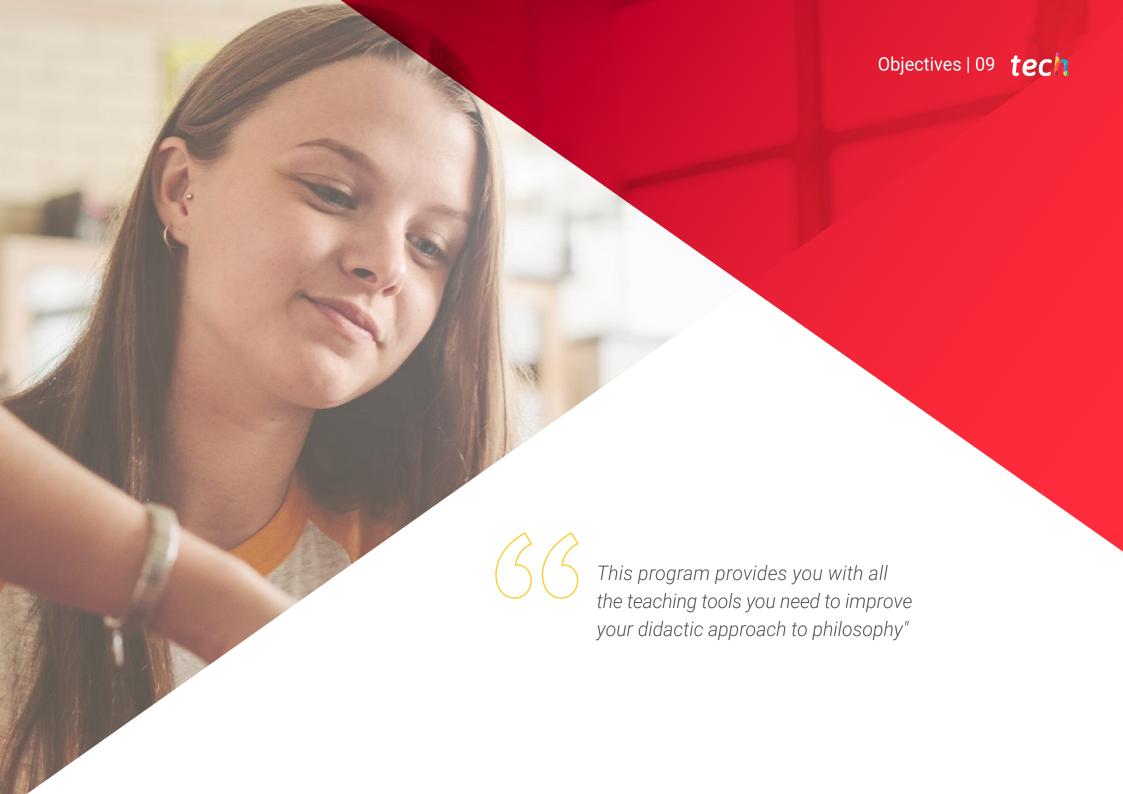

The design of this program focuses on Problem-Based Learning, in which the professional will have to try to solve the different professional practice situations that will arise throughout the academic course. This will be done with the help of an innovative system of interactive videos made by renowned experts.

In just 6 weeks you will be aware of the most effective teaching resources to bring Plato, Socrates or Kant to your students.

Incorporate the latest ICT tools into your lessons and teach philosophy in an attractive way to your teenage students.

tech 10 | Objectives

General Objectives

- Introduce students to the world of teaching, from a broad perspective that provides them with the necessary skills for the performance of their work
- Get to know the new tools and technologies applied to teaching

 - 1.2.1. Philosophy as a Subject in the Teacher's Curriculum
 - 1.2.2. Pedagogy Applied to Philosophy or Philosophy Applied to Pedagogy
- 1.3. Teaching and Learning
 - 1.3.1. Teaching to Learn
 - 1.3.2. Learning Philosophy
- 1.4. Teaching Philosophy
 - 1.4.1. How to Plant the Learning of Philosophy in the Classroom
 - 1.4.2. Philosophy, a Subject with Appeal
- 1.5. Philosophy in Schools
 - 1.5.1. Teaching Approach to Philosophy
 - 1.5.2. Philosophy as a Vehicle for Other Learning Processes
- 1.6. Philosophy of Philosophy and Teaching Philosophy
 - 1.6.1. Definition and Concepts
 - 1.6.2. Organization of the Subject
- 1.7. Introduction to Philosophy Research
 - 1.7.1. Research Value
 - 1.7.2. Research Objective
 - 1.7.3. Roles: Student, Advisor, Research
 - 1.7.4. Job Tracking Resources
- 1.8. The Didactic Unit
 - 1.8.1. Introduction
 - 1.8.2. The Didactic Unit
 - 1.8.3. Classroom Work Tools
- 1.9. Why Educate?
 - 1.9.1. The Social Value of Education
 - 1.9.2. Education and Philosophy
- 1.10. Strategy for Teaching Philosophy
 - 1.10.1. Initial Approach
 - 1.10.2. Development

You will be able to apply the latest trends in learning strategies with High School Education students in your Philosophy and Ethical Values classes"

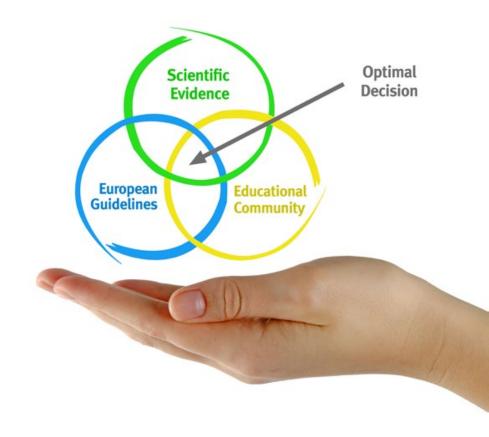

tech 22 | Methodology

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
- **3.** Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

tech 24 | Methodology

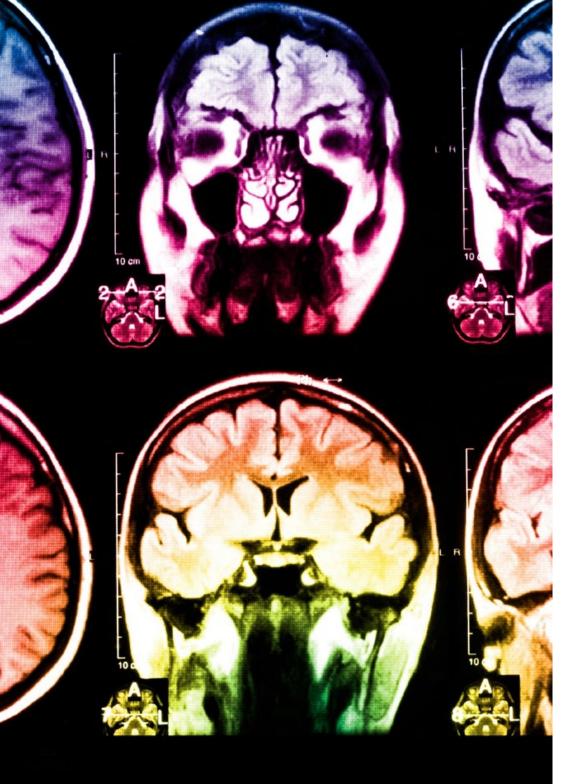

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

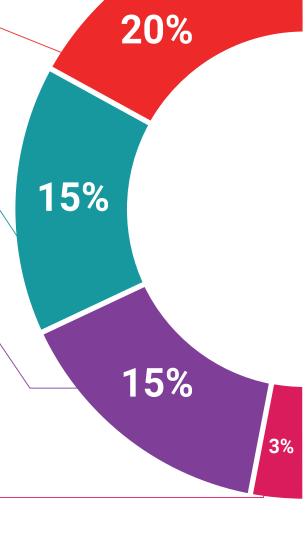

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Effective learning ought to be contextual. Therefore, TECH presents real cases in

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

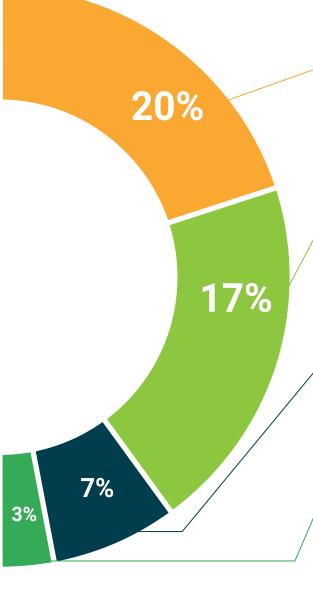

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 30 | Certificate

This Postgraduate Certificate in Philosophy and Ethical Values Teaching in High School Education contains the most complete and up-to-date educational program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
