06 Certificate

p. 32

01 Introduction

Stress, anxiety or depression are triggers, in many cases, of speech development difficulties in children. The approach to these problems from a speech therapy point of view requires knowledge in psychology to optimize the efficiency of the interventions performed with the patient and preserve their welfare. Because of this, TECH has designed this program, with which the student will become a leading professional by mastering the main manifestations of disorders such as different phobias or OCD and assimilate the techniques to reduce inappropriate behaviors in patients with behavioral problems or jealousy. Additionally, they will achieve this through a 100% online methodology that will enable them to enhance their learning without depending on tight schedules.

tech 06 | Introduction

In the field of Speech Therapy, adapting to the psychological needs and particularities of children is essential to achieve success in the therapies applied to correct or moderate different language disorders. Therefore, there are children with attention deficit, hyperactivity or phobias that act as a barrier in their cognitive development, limiting both their learning and the efficient intervention of the speech therapist. Therefore, this professional must have the appropriate skills to work with young people suffering from different psychological problems, modifying their work methodology based on the circumstances of the patient to maximize the performance of the interventionist strategies used with them.

For this reason, TECH has created this Postgraduate Certificate, which will enable the student to learn the characteristics of different psychological disorders and acquire cutting-edge techniques to deal with children suffering from them in the speech therapy practice. Throughout this academic itinerary, they will learn to apply specific strategies to promote attention in young people who suffer from attention deficit or implement techniques such as positive reinforcement to increase the motivation of children in the office. Likewise, they will identify the root causes of sleep problems or jealousy to address them more rigorously.

Given the 100% online methodology in which this program is developed, students will be able to achieve effective learning by managing their own study time as they wish. Likewise, they will access a program directed and taught by the best professionals in the field of Speech Therapy and Psychology, which guarantees the applicability of the knowledge acquired during the program.

This Postgraduate Certificate in Psychology Applied to Speech Therapy Intervention contains the most complete and up-to-date educational program on the market. The most important features include:

- Practical cases presented by experts in Speech Therapy and Psychology
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- The practical exercises where the self-evaluation process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Thanks to this TECH program, apply the most advanced strategies in the logopedic approach to children with attention deficit or speech disorders"

Without leaving your own home and enjoying the contents of this program 24 hours a day, you will obtain an excellent learning in this subject"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, in which the professional will have to try to solve the different professional practice situations that will arise throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Take this program and assimilate a series of skills that will allow you to access the best job opportunities in your sector.

In only 150 hours, you will increase your skills in the psychological management of the youngest patient to perfect your interventions in different language disorders.

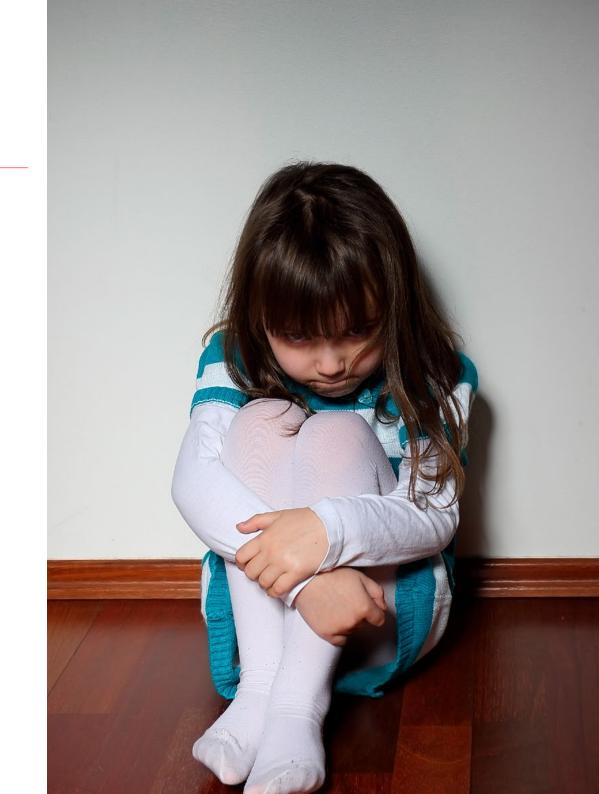

tech 10 | Objectives

General Objectives

- Provide a specialized education based on theoretical and instrumental knowledge that will enable the student to obtain skills in detection, prevention, assessment and intervention in the logopathies treated
- Consolidate basic knowledge of the intervention process in the classroom and other spaces based on the latest technological advances that facilitate access to information and the syllabus for these students.
- Update and develop specific knowledge on the characteristics of these disorders in order to refine the differential and proactive diagnosis that sets the guidelines for intervention
- Raise awareness in the educational community about the need for educational inclusion and holistic intervention models with the participation of all members of the community
- Learn about educational experiences and good practices in speech therapy and psychosocial intervention that promote the personal, socio-family and educational adaptation of students with these educational needs

Specific Objectives

- Understand the area of knowledge and work of child and adolescent psychology: object of study, areas of action, etc.
- Become aware of the characteristics that a professional working with children and adolescents should have or enhance
- Acquire the basic knowledge necessary for the detection and referral of possible Psychological Problems in children and adolescents that may disturb the child's well-being and interfere in the Speech Therapy rehabilitation, and to reflect on them
- Learn the possible implications that different psychological problems (emotional, cognitive, and behavioral) may have on speech therapy rehabilitation
- Acquire knowledge related to attentional processes, as well as their influence on language and intervention strategies to be carried out at the speech therapy level together with other professionals
- Delve into the subject of executive functions and know their in the area of language, as well as to acquire strategies to intervene on them at a speech therapy level together with other professionals

- Acquire knowledge on how to intervene at the level of social skills in children and adolescents, as well as to deepen in some concepts related to them, and to obtain specific strategies to enhance them
- Know different behavior modification strategies that are useful in consultation to achieve both the initiation, development, and generalization of appropriate behaviors, as well as the reduction or elimination of inappropriate behaviors
- Delve into the concept of motivation and acquire strategies to promote it in consultation
- Acquire knowledge related to school failure in children and adolescents
- Know the main study habits and techniques that can help to improve the performance of children and adolescents from a speech therapy and psychological point of view

Achieve your professional goals through the didactic tools that TECH puts at your service to improve your learning"

International Guest Director

Dr. Elizabeth Anne Rosenzweig is an internationally renowned specialist dedicated to the care of children with hearing loss. As a Speech Language Expert and Certified Therapist, she has pioneered several telepractice-based early assistance strategies of broad benefit to patients and their families.

Dr. Rosenzweig's research interests have also focused on trauma support, culturally sensitive auditory-verbal practice and personal coaching. Her active scholarly work in these areas has earned her numerous awards, including Columbia University's Diversity Research Award.

Thanks to her advanced skills, she has taken on professional challenges such as the leadership of the Edward D. Mysak Communication Disorders Clinic at Columbia University. She is also known for her academic career, having served as a professor at Columbia's Teachers College and as a collaborator with the General Institute of Health Professions. On the other hand, she is an official reviewer of publications with a high impact in the scientific community such as The Journal of Early Hearing Detection and Intervention and The Journal of Deaf Studies and Deaf Education.

In addition, Dr. Rosenzweig manages and directs the AuditoryVerbalTherapy.net project, from where she offers remote therapy services to patients located in different parts of the world. She is also a speech and audiology consultant for other specialized centers located in different parts of the world. She has also focused on developing non-profit work and participating in the Listening Without Limits Project for children and professionals in Latin America. At the same time, the Alexander Graham Bell Association for the Deaf and Hard of Hearing relies on her as its vice-president.

Dra. Rosenzweig, Elizabeth Anne

- Director of the Communication Disorders Clinic at Columbia University, New York, United States
- Professor, General Hospital Institute of Health Professions, New York, United States
- Director of Private Practice AuditoryVerbalTherapy.net
- Department Head, Yeshiva University
- Attending Specialist at Teachers College, Columbia University
- Reviewer for The Journal of Deaf Studies and Deaf Education and The Journal of Early
- Hearing Detection and Intervention
- Vice-President, Alexander Graham Bell Association for the Deaf and Hard of Hearing
- Ph.D. in Education from Columbia University
- Master's Degree in Speech Therapy from Fontbonne University
- B.S. in Communication Sciences and Communication Disorders from Texas Christian University
- Member of:
- American Speech and Language Association

- American Cochlear Implant Alliance
- National Consortium for Leadership in Sensory Impairment

Thanks to TECH you will be able to learn with the best professionals in the world"

tech 14 | Course Management

Management

Ms. Vázquez Pérez, María Asunción

- Speech Therapist Specialist in Neurologopedia
- Speech therapist at Neurosens
- Speech therapist in Rehabilitation Clinic Rehasalud
- Speech Therapist at Sendas Psychology Office
- Graduate in Speech Therapy from the University of A Coruña
- Master's Degree in Neurology Therapy

Professors

Ms. Berbel, Fina Mari

- Speech Therapist Specialist in Clinical Audiology and Hearing Therapy
- Speech therapist at the Federation of Deaf People of Alicante
- Degree in Speech Therapy from the University of Murcia
- Master's Degree in Clinical Audiology and Hearing Therapy from the University of Murcia
- Training in Spanish Sign Language Interpretation (LSE)

Ms. Rico Sánchez, Rosana

- Director and Speech Therapist at Palabras y Más Center for Speech Therapy and Pedagogy
- Speech therapist at OrientaMedia
- Speaker at specialized conferences
- Diploma in Speech Therapy from the University of Valladolid
- Degree in Psychology from UNED
- Specialist in Alternative and/or Augmentative Communication Systems (SAAC)

Ms. Mata Ares, Sandra María

- Speech Therapist Specialized in Speech Therapy Intervention in Children and Adolescents
- Speech Therapist at Sandra Comunicate Speech Therapist
- Speech therapist at Fisiosaúde
- Speech therapist at Ana Parada Multi-Purpose Center
- Speech Therapist at Psychology and Family Speech Therapist Health Center
- Graduate in Speech Therapy from the University of A Coruña
- Master's Degree in Speech Therapy Intervention in Childhood and Adolescence from the University of A Coruña

Ms. Plana González, Andrea

- Founder of Logrospedia
- Speech therapist at ClínicActiva and Amaco Salud
- Graduate in Speech Therapy from the University of Valladolid
- Master's Degree in Orofacial Motricity and Myofunctional Therapy from the Pontifical University of Salamanca
- Master's Degree in Vocal Therapy from the CEU Cardenal Herrera University
- Postgraduate Diploma in Neurorehabilitation and Early Care by CEU Cardenal Herrera University

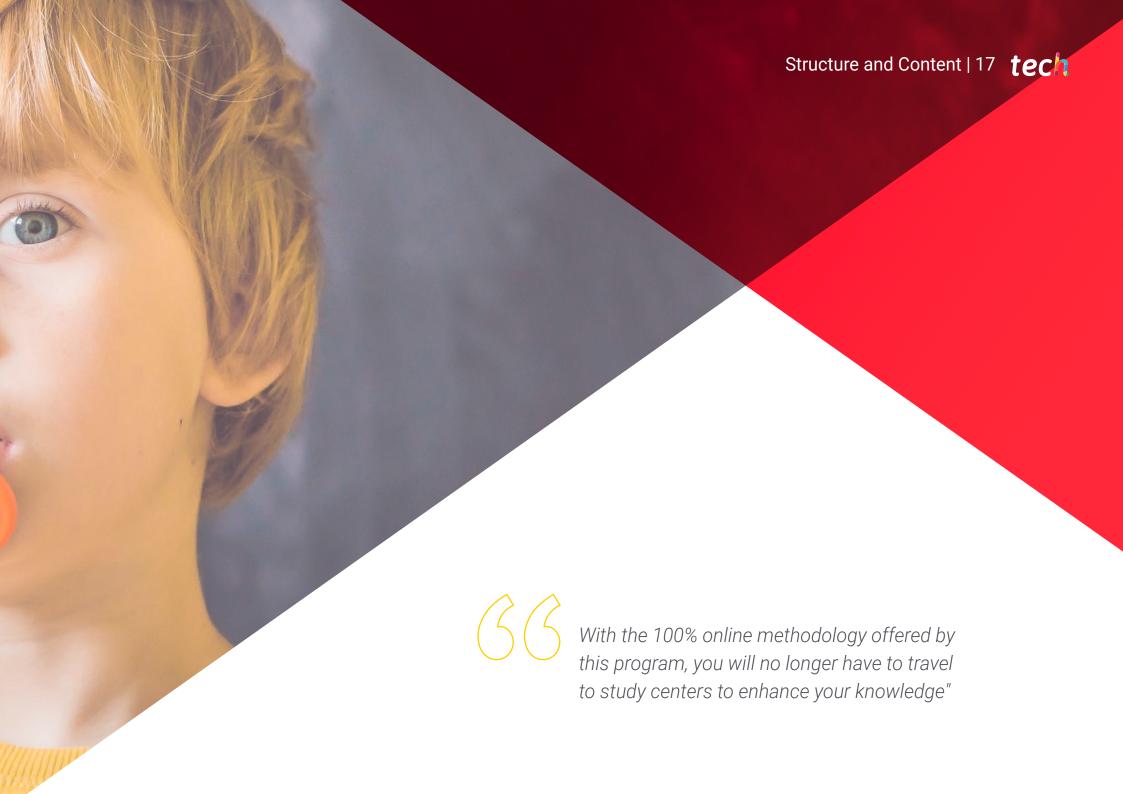

Ms. Cerezo Fernández, Ester

- Speech Therapist at the Neurorehabilitation Clinic
- Speech therapist at the San Jeronimo Residence
- Editor of Zona Hospitalaria Magazine
- Graduate in Speech Therapy from the University of Castilla-La Mancha
- Master's Degree in Clinical Neuropsychology by ITEAP Institute
- Expert in Myofunctional Therapy by Euroinnova Business School
- Expert in Early Childhood Care by Euroinnova Business School
- Expert in Music Therapy by Euroinnova Business School

Ms. López Mouriz, Patricia

- Psychologist at FÍSICO Fisioterapia y Salud
- Psychologist Mediator at ADAFAD Association
- Psychologist at Centro Orienta
- Psychologist in Psychotécnico Abrente
- Degree in Psychology from the University of Santiago de Compostela (USC)
- Master's Degree in General Health Psychology from the University of Santiago de Compostela (USC)
- Training in Equality, Brief Therapy and Learning Difficulties in Children

tech 18 | Structure and Content

Module 1. Psychological knowledge of interest in the Speech-Language Pathology Field

- 1.1. Child and Adolescent Psychology
 - 1.1.1. First Approach to Child and Adolescent Psychology
 - 1.1.1.1. What Does the Area of Knowledge of Child and Adolescent Psychology Study?
 - 1.1.1.2. How has it evolved over the years?
 - 1.1.1.3. What are the different theoretical orientations that a Psychologist can follow?
 - 1.1.1.4. The Cognitive-Behavioral Model
 - 1.1.2. Psychological Symptoms and Mental Disorders in Childhood and Adolescence
 - 1.1.2.1. Difference between Sign, Symptom, and Syndrome
 - 1.1.2.2. Definition of Mental Disorder
 - 1.1.2.3. Classification of Mental Disorders: DSM 5 and ICD-1
 - 1.1.2.4. Difference between Psychological Problem or Difficulty and Mental Disorder
 - 1.1.2.5. Comorbidity
 - 1.1.2.6. Frequent problems object of Psychological Attention
 - 1.1.3. Skills of the Professional working with children and adolescents
 - 1.1.3.1. Essential Knowledge
 - 1.1.3.2. Main Ethical and Legal issues in Working with Children and Adolescents
 - 1133 Personal Characteristics and Skills of the Professional
 - 1.1.3.4. Communication Skills
 - 1.1.3.5. The Game in Consultation
 - 1.1.4. Main Procedures in Psychological Assessment and Intervention in Childhood and Adolescence
 - 1.1.4.1. Decision Making and Help Seeking in Children and Adolescents
 - 1.1.4.2. Interview
 - 1.1.4.3. Establishment of Hypotheses and Assessment Tools
 - 1.1.4.4. Functional Analysis and Explanatory Hypotheses of the Difficulties
 - 1.1.4.5. Establishment of Objectives
 - 1.1.4.6. Psychological Intervention
 - 1.1.4.7. Monitoring
 - 1.1.4.8. The Psychological Report: Key Aspects

- .1.5. Benefits of Working with Other Persons Related to the Child
 - 1.1.5.1. Fathers and Mothers
 - 1.1.5.2. Education Professionals
 - 1.1.5.3. Speech Therapist
 - 1.1.5.4. The Psychologist
 - 1.1.5.5. Other Professionals
- 1.1.6. The Interest of Psychology from the Point of View of a Speech Therapist
 - 1.1.6.1. The Importance of Prevention
 - 1.1.6.2. The Influence of Psychological Symptoms on Speech Therapy Rehabilitation
 - 1.1.6.3. The relevance of knowing how to detect possible Psychological Symptoms
 - 1.1.6.4. Referral to the appropriate Professional
- 1.2. Internalizing problems: Anxiety
 - 1.2.1. Concept of Anxiety
 - 1.2.2. Detection: Main Manifestations
 - 1.2.2.1. Emotional Dimension
 - 1.2.2.2. Cognitive Dimension
 - 1.2.2.3. Psychophysiological Dimension
 - 1.2.2.4. Behavioral Dimension
 - 1.2.3. Anxiety Risk Factors
 - 1.2.3.1. Individual
 - 1.2.3.2. Contextual
 - 1.2.4. Conceptual Differences
 - 1.2.4.1. Anxiety and Stress
 - 1.2.4.2. Anxiety and Fear
 - 1.2.4.3. Anxiety and Phobia
 - 1.2.5. Fears in childhood and adolescence
 - 1.2.5.1. Difference between Developmental Fears and Pathological Fears
 - 1.2.5.2. Developmental Fears in infants
 - 1.2.5.3. Developmental Fears in the Preschool stage.
 - 1.2.5.4. Developmental Fears in the School stage
 - 1.2.5.5. The main Fears and Worries in the adolescent stage

Through didactic materials in a wide range of textual and multimedia formats, you will achieve an excellent knowledge in Psychology Applied to Speech Therapy Intervention"

tech 28 | Methodology

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
- **3.** Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 31 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 32 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

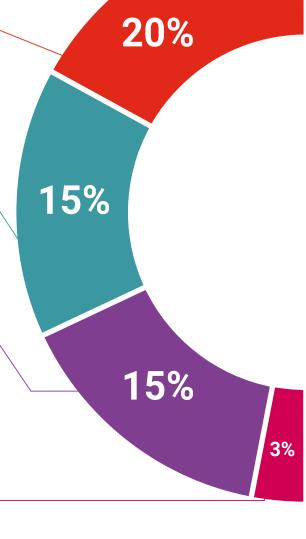

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

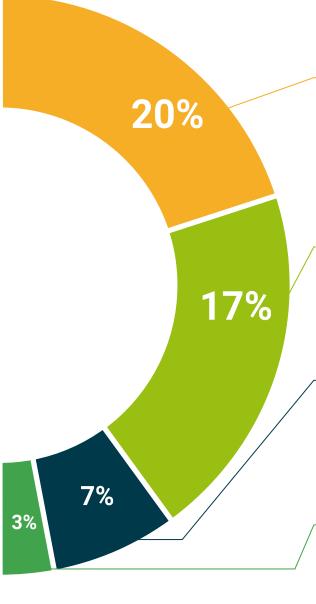

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 36 | Certificate

This **Postgraduate Certificate in Psychology Applied to Speech Therapy Intervention** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: Postgraduate Certificate in Psychology Applied to Speech Therapy Intervention

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.

Postgraduate Certificate Psychology Applied to Speech Therapy Intervention

- » Modality: online
- » Duration: 6 weeks
- » Certificate: TECH Technological University
- » Schedule: at your own pace
- » Exams: online
