Introduction

Sexologist consultation emerges as a tool to comprehensively address sexual and couple problems, and to provide advice and appropriate treatment to those who need it. In this context and due to its enormous importance, TECH has designed a program that aims to train professionals in the educational field to provide advice and treatment in the area of sexuality. Through a pedagogical methodology based on Relearning, students will learn the biological, psychological and social aspects of sexuality, and will acquire the necessary tools to address the deontological aspects of therapy, individual and couple sexological counseling, as well as their own self-care.

“

Master the keys to provide quality care in the area of human sexuality and become an expert in Sexologist Consultation”

Sexuality is an area of great importance in people's lives, and can have a significant impact on their emotional and physical well-being. However, there are still taboos and prejudices surrounding the subject, which can difficult access to information and adequate treatment. Therefore, the training of professionals in the area of Sexological Consultation is essential to ensure quality care free of stigma.

A clear example is sexual dysfunctions, a common problem in both men and women, affecting approximately 31% of men and 43% of women according to a study published in the Journal of the American Medical Association. These dysfunctions include problems such as erectile dysfunction, premature ejaculation, female orgasmic disorder and vaginismus. The Sexologist Consultation plays a crucial role in the diagnosis, treatment and support of people affected by these dysfunctions, promoting the quality of sexual life and the emotional wellbeing of patients.

In response to the great demand for professionals in this area, TECH has designed this Postgraduate Certificate that will provide students with the necessary knowledge to address the biological, psychological and social aspects of human sexuality. Through a pedagogical methodology based on Relearning, students will be able to delve into topics such as sexological counseling, the therapeutic alliance, the specific characteristics of sex and couple therapy, and in the same way, they will develop different skills for the management of the consultation.

In addition, the course is taught in 100% online format, which allows students to access the content from anywhere and at any time, without having to travel to a physical classroom. Furthermore, the flexibility in organizing academic resources allows them to adapt their learning pace to their needs and availability.

This **Postgraduate Certificate in Sexologist Consultation** contains the most complete and up-to-date educational program on the market. The most important features include:

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.
