Introduction

The concept of sentence has several uses. In grammar, the term "sentence" manages to contain two qualifiers, differentiating between simple and compound, where they confer a set of words with syntactic autonomy. It is a unit of meaning that expresses a complete grammatical coherence. In accordance with the importance of grammar in speech and writing, this educational program has been developed with a guided approach to teachers with the purpose of providing them with advanced material related to recognizing and translating specific syntactic constructions. All this, with the support of audiovisual resources that offer greater ease in learning, in addition to the flexibility with the 100% online modality.

“

This Postgraduate Certificate will provide you with strengths and skills in deponent verbs, semi-deponent verbs and periphrastic voice"

Currently, there are more than 20 Romance languages, some of which are considered regional varieties that are endangered. In fact, only 6 of them are in general use and have several million speakers worldwide. One of the most important differences between Romance languages and Latin is that Latin used cases to mark syntactic functions. This is how teaching professionals come into action, since from the history where they integrate Romulus and Remus, being them a starting point in the composition and transformation of the languages that are currently spoken, the bases are formed from the simple and compound sentence with their respective constituents.

In this sense, research in this field has progressed over the years, answering multiple questions and confirming that teaching professionals will have to remain at the forefront in this area of knowledge. Therefore, this Postgraduate Certificate will provide the expert with a variety of novelties in the teaching of the Simple and Compound Sentence in Latin.

Students will increase their skills and knowledge in essential aspects related to the use of the fundamental rules of phonetic evolution, which are a current object of study, exploring and delving further into concepts such as the preterite perfect and pluperfect subjunctive. A program that has a specialized teaching team accompanied by high quality multimedia content that offers dynamism and comfort with the online modality.

“

This qualification can be taken without any problem with the Relearning system of which TECH is a pioneer"

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.
