Introduction

This intensive program will develop the characteristics that mark the child's learning, and the guidelines to know in order to teach immigrants and adolescents in the same line of work as the one taught in the infant stage. Over 6 weeks, there will be an analysis of the characteristics of the methodology for the learning process, behavioral patterns, and even the acculturation processes to which immigrants are exposed.

“

Specialize and stand out from other teachers with this Postgraduate Certificate in Teaching Spanish as a Foreign Language to Immigrant Children and Adolescents”

Any attempt at communication requires the speaker to have a complete command of their communicative abilities. Any child, native or immigrant, will have the same capacity for development; it will be the environment and the means that welcome them that will enhance or diminish the child's capacity. That is why the child, whatever their origin, will be the reflection of the context in which they are cared for and of the support and attention they receive.

This Postgraduate Certificate will provide teachers with the tools and knowledge they require to practice the profession with confidence and efficiency, enabling them to help their students to understand and analyze messages effectively, and to develop non-verbal communication. In order to teach Spanish as a foreign language, it is essential to know all the skills that students must develop and their different learning stages, with the purpose of developing different methodologies adapted to their educational needs.

The teacher will be able to explain and resolve confusing grammar issues or questions regarding their student's assessment process. It will include a complete vocabulary teaching methodology and different techniques and educational material, taught by leading experts in the field with extensive experience in the educational sector.

This program will allow students to develop and expand their knowledge and skills related to Spanish lexical proficiency in teaching. At the end of the Postgraduate Certificate, you will be able to detect common errors in Spanish teaching and will have acquired the necessary tools to prevent and correct them, so that you have the skills to work as a teacher of Spanish as a foreign language.

This **Postgraduate Certificate in Teaching Spanish as a Foreign Language to Immigrant Children and Adolescents** offers the characteristics of a high-level teaching and technological program. These are some of its most notable features:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand

04

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.
