Introduction

Teaching is a field of work where it is essential to constantly update and consolidate knowledge. This is even more important when it comes to Catholic Education, where the knowledge and values represent cultural and ethical content that is extremely significant in the Christian message. In this context, this program is aimed at incorporating the necessary education to the teaching sessions, in order to teach the subject of Catholic religion to a group of students in an adapted and effective way. Hence the importance, as teachers, of receiving a specific teaching and learning experience such as the one offered in this program. Therefore, you will become a true professional in Catholic education through the latest 100% online educational technology.

“

This Postgraduate Diploma is the best investment you can make in choosing a refresher program to deepen your knowledge in the paradigms and traditions of Catholic research”

Any person dedicated to teaching must have in-depth knowledge and an optimal understanding of the concepts in order to be able to transfer this wisdom and passion to their students. Therefore, it is essential to acquire a series of skills in knowledge, teaching and orientation of the teaching itself and to adapt it to the school stage being taught. Constant updating of knowledge is part of continuous personal and professional improvement, and even more so in a vocational field such as Catholic Education teaching. For this reason, TECH has designed a very complete program that covers the needs of the teacher, since it is not always enough to know the fundamentals of Catholic doctrine, but it is essential to incorporate teaching and educational skills when teaching classes.

During this teaching journey, the student will find high quality multimedia materials, as well as complementary readings for each topic in order for the teacher to delve deeper into the teaching of religion, connecting it with the people themselves and their education. All this theoretical content, with the added value provided by the practical content, will make the educator a qualified professional to apply for positions of relevant prestige in their field of work. Consequently, throughout the program, teachers will be able to deepen their knowledge with first-rate material on issues such as the approach to the fundamentals of teaching Catholic religion, religious phenomenology and philosophy, as well as the language of faith, key to building a solid teaching proposal, of special relevance in the work of Catholic education.

For all these reasons, and due to the demand for constant improvement that teaching entails, this program is the best investment that a teacher can make to review all the essential contents, learning to present them from a more dynamic and efficient perspective that will resonate with people of different ages and in different school years. Thanks to the 100% online methodology, students can balance their daily commitments with their studying. Likewise, with supplementary materials, case studies and additional readings, they will acquire skills and competencies that will position them among the elite in their profession.

This **Postgraduate Diploma in Catholic Education Teaching** contains the most complete and up-to-date program on the market. The most important features include:

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort
and better performance, involving you more in
your specialization, developing a critical mindset,
defending arguments, and contrasting opinions: a
direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, students can watch them as many times as they want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".
