# Introduction

The new teaching-learning methodologies, which include all kinds of pedagogical resources, are currently a powerful weapon for teachers who are looking for an attractive approach to their subjects. In this sense, the subject of Philosophy can be taught according to the current times, continuing with the development of critical thinking, moral decision making and ethical learning. In order to further facilitate the work of professionals in this area, TECH has designed this program that will allow them to carry out from start to finish the programming of this subject and incorporate the methods and activities required for its teaching and evaluation. All this, through multimedia resources that can be 100% online easily accessed 24 hours a day , from any electronic device with an Internet connection.

“

*With this Postgraduate Diploma you will develop a complete program in Philosophy and Ethical Values in High School Education”*

Nowadays, bringing the philosophy of Plato, Socrates, or Aristotle to High School Education students can be, at first sight, quite a challenge for teaching professionals. However, the multiple teaching resources, technological tools, and new methodologies favor a much more effective and attractive learning process.

To be successful in the teaching of this subject, teachers require not only a thorough knowledge of philosophy, but also of the curricular structure, assessment procedures, and the different strategies for teaching it. In this line, TECH has created this Postgraduate Diploma taught in 100% online mode.

An advanced program, where the high school students will learn for 6 months in the main concepts, theories and authors to be treated in this subject, the syllabus design, programming and teaching unit, in this way the teaching of philosophy in the new paradigm. This exhaustive content is complemented by multimedia material (video summaries of each topic, videos in detail), specialized readings, and case studies, which make up the multimedia resource library.

In addition, thanks to the Relearning system, based on the repetition of content, the graduate will be able to advance naturally and progressively through the syllabus of the program and reduce the long hours of study and memorization.

The teaching professional is, in this way, facing an excellent opportunity to make significant progress in the educational sector through a flexible university program. Students only need an electronic device with an Internet connection to be able to visualize, at any time, the contents hosted on the virtual platform. In this way, without fixed schedules and distributing the course load according to their needs, graduates will be able to combine this Postgraduate Diploma with their most demanding responsibilities.

This **Postgraduate Diploma in Philosophy and Ethical Values Teacher Training in High School Education** contains the most complete and up-to-date educational program on the market. The most important features include:

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

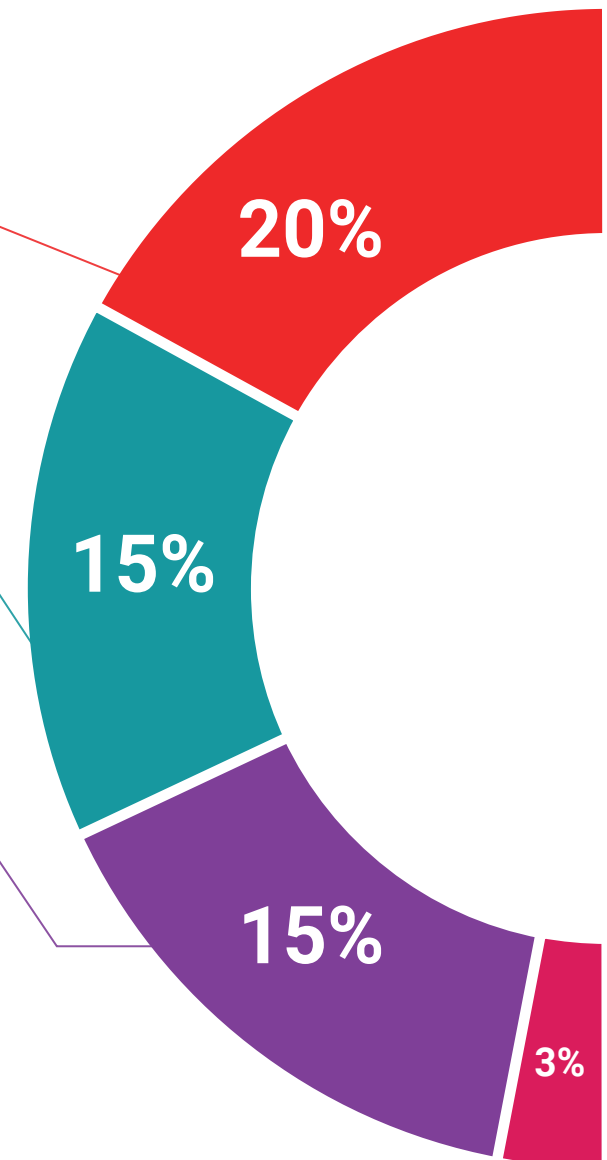

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

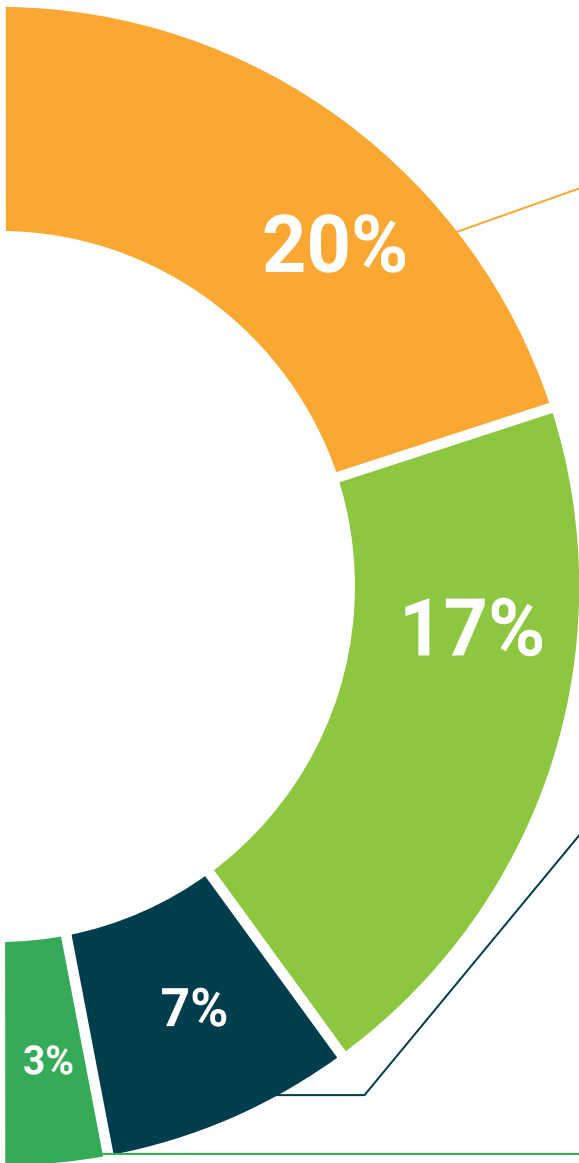

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

**Classes**

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

**Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
