Master's Degree
Teaching Mathematics in Pre-School and Primary School

- Modality: **online**
- Duration: **12 months**
- Certificate: **TECH Global University**
- Credits: **60 ECTS**
- Schedule: **at your own pace**
- Exams: **online**

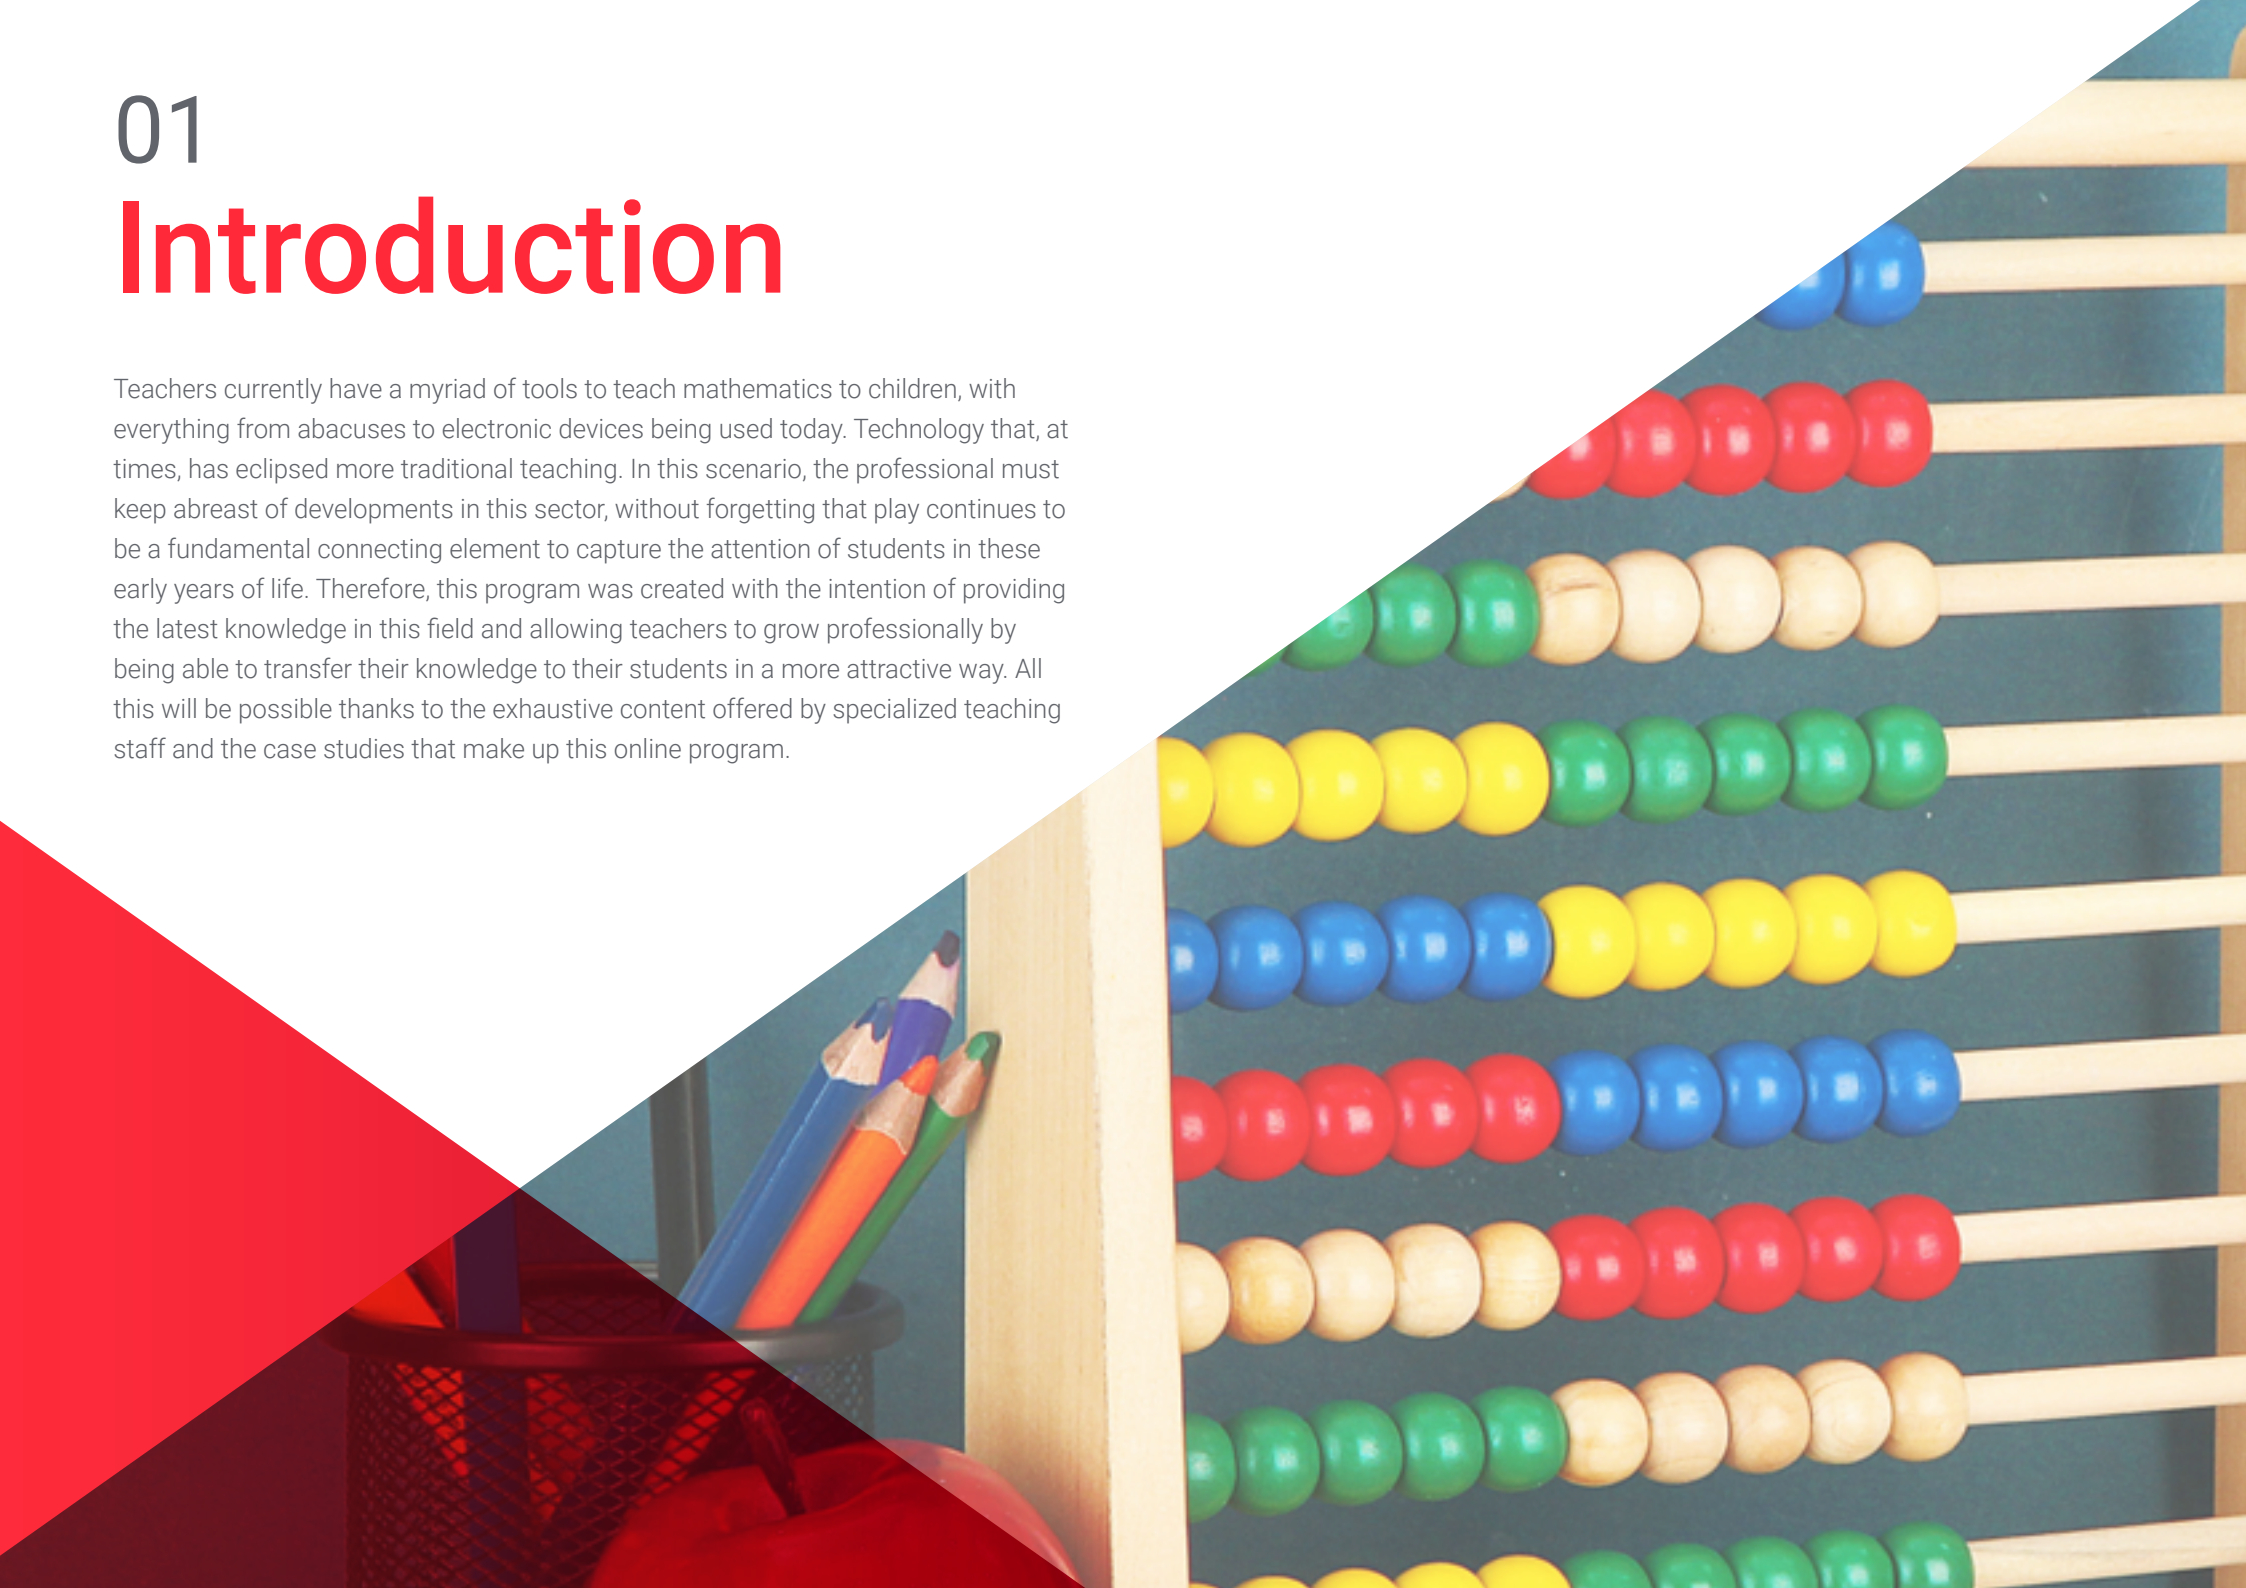
Website: **www.techtitute.com/us/education/master-degree/master-teaching-mathematics-pre-school-primary-school**

Index

01

Introduction

Teachers currently have a myriad of tools to teach mathematics to children, with everything from abacuses to electronic devices being used today. Technology that, at times, has eclipsed more traditional teaching. In this scenario, the professional must keep abreast of developments in this sector, without forgetting that play continues to be a fundamental connecting element to capture the attention of students in these early years of life. Therefore, this program was created with the intention of providing the latest knowledge in this field and allowing teachers to grow professionally by being able to transfer their knowledge to their students in a more attractive way. All this will be possible thanks to the exhaustive content offered by specialized teaching staff and the case studies that make up this online program.



Thanks to this 100% online Master's Degree you will gain advanced and flexible knowledge about teaching mathematics through gamification"

Mathematics is key for human beings in their understanding of the environment that surrounds them and how to develop in it. In addition, the new professional opportunities associated with this subject highlight it as the most important in order to be able to perform jobs in the digital and industrial fields. Furthermore, technological advances are also occurring in the classroom, so today's teachers must not only have extensive knowledge of the subject to be taught, but of all the educational tools and techniques available to them.

The use of ICT in schools, even at an early age, goes hand in hand with an increasingly digitized society. In this scenario, the professional must be able to design and implement traditional and interactive programs that enhance logical-mathematical thinking or facilitate the acquisition of basic concepts of algebra, arithmetic or mental arithmetic.

This Master's Degree provides 12 months of the most advanced and up-to-date information in Teaching Mathematics in Pre-School and Primary School, with the main objective of ensuring that students obtain the knowledge required to boost their professional careers in the educational field. For this purpose, the specialized teaching team of this program has prepared a syllabus where the main methodologies and educational resources for teaching the basic and initial concepts of mathematics will be studied in depth from a theoretical and practical approach.

A program where, in addition, the Relearning system, based on the repetition of content, will facilitate the acquisition of knowledge in a much more natural and progressive way. In addition, thanks to this method, students will be able to reduce the number of hours of study that are so common in other methodologies.

For this reason, teachers have an excellent opportunity to pursue a university program that is flexible and compatible with their professional and work responsibilities. To access the course content, you only need a computer or tablet from which you can access the materials at any time of the day. With no classroom attendance or fixed class schedules, students also have the freedom to distribute the course load according to their needs. All this makes this program an ideal option for people who wish to study a university degree without putting aside other areas of their life.

This **Master's Degree in Teaching Mathematics in Pre-School and Primary School** contains the most complete and up-to-date program on the market. Its most notable features are:

- More than 75 case studies presented by experts in Teaching Mathematics in Pre-School and Primary School
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Latest developments in the Teaching Mathematics in Pre-School and Primary School
- Practical exercises where the self-evaluation process can be carried out to improve learning
- Special emphasis on innovative methodologies in Teaching Mathematics in Pre-School and Primary School
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

If you want to grow professionally, this Master's Degree offers you all the teaching resources that you need to be able to apply them in your classes. Enroll now"

You are looking at an academic opportunity that will show you the most commonly used board games to work on mathematical problems with children in pre-school and primary school"

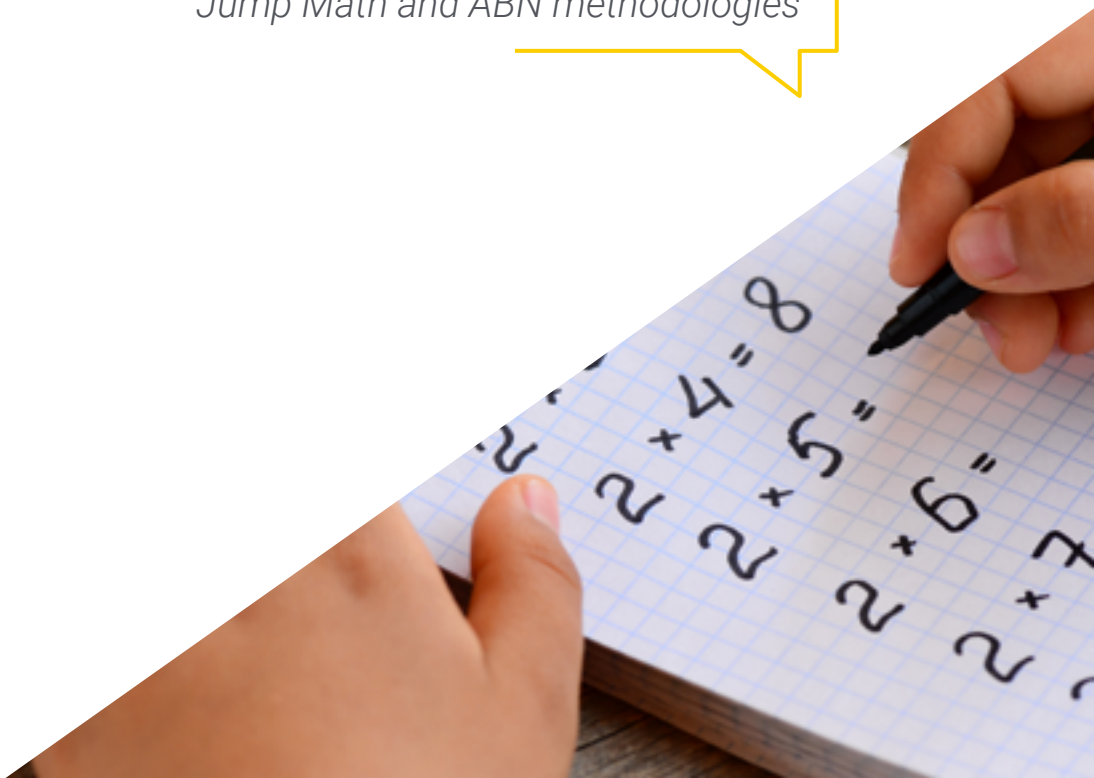
A university program that will allow you to delve in a more dynamic way into the principles of counting based on the theory of Piaget, Gelman and Gallistel

Gain 24-hour access to the most up-to-date information on Core Standards, EntusiasMat, Jump Math and ABN methodologies

The program's teaching staff includes professionals from the sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive learning programmed to study in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.



02

Objectives

Once they have finished this Master's Degree, students will have acquired a more advanced knowledge of the main methodologies applied in teaching mathematics in the early childhood school stage. Therefore, students will be able to use different learning techniques, plan play situations and activities to learn arithmetic, algebra or geometry, and get their students to solve problems by applying different tools. To this end, the teaching team that makes up this program will help students to achieve their objectives.

Do you want to design really attractive sessions for your students? This Master's Degree shows you how to achieve this with the many possibilities that exist today. Enroll now"

General Objectives

- Provide students with theoretical and instrumental knowledge that will allow them to acquire and develop the necessary competencies and skills to perform their teaching work
- Design educational games for learning mathematics
- Gamify the classroom, a new resource for motivation and learning applied to mathematics

This is a program that will allow you to learn about the different contents and interactive resources that you can use to teach logical-mathematical thinking"

Specific Objectives

Module 1. Logical-Mathematical Thinking in Pre-School Education

- Understand the development of logical-mathematical thinking within the pre-school and primary education syllabus
- Ensure that the children learn to deduce logically, to argue and to draw conclusions from the situations they are presented with
- Learn to work with different learning techniques
- Learn mathematical concepts and vocabulary appropriate for a teaching unit

Module 2. Methodology and Classroom-Based Learning in Pre-School Education

- Know the basic concepts for the teaching of mental arithmetic in the classroom
- Develop materials and games to work on mental arithmetic in the classroom
- Learn about other resources available for the development of mental arithmetic in pre-school and primary school classrooms
- Know and implement cooperative work in the mathematics classroom
- Identify the properties of objects and discover the relationships established between them through comparisons, classifications, serialization and sequencing

Module 3. Arithmetic, Algebra, Geometry and Measurement Games with Numbers

- Have the ability to plan different games and activities in different situations
- Participate with pleasure in different types of games and regulate their behavior and excitement towards the action
- Learn to count, to become familiar with numbers, to distinguish cardinal and ordinal
- Work with and learn the cardinal numbers in series, through the manipulation of the appropriate material, to know their composition and decomposition into lower ones

Module 4. Problem Solving and Mental Calculation

- Recognize situations in their usual environment for which the use of numbers is required
- Ensure that the children learn to deduce logically, to argue and to draw conclusions from the situations they are presented with
- Get the child to read and understand the problem statements
- Appreciate the usefulness of performing mediations to solve small everyday problems and become familiar with units of measurement of space and time

Module 5. Logical-Mathematical Thinking in Primary Education

- Know about logical-mathematical thinking and the contributions of psychology and teaching
- Learn about problem solving through the development of logical-mathematical thinking
- Learn to use logical-mathematical material resources

Module 6. Arithmetic, Algebra and Measurement Play

- Initiation in the concept of quantity, numerical expression and arithmetic operations, through manipulation and experimentation
- Design materials adapted to the learning of number, arithmetic, operations and algebra
- Know the natural number and the decimal numbering system
- Understand the additive, multiplicative and division structure and the possible difficulties and errors in applying it
- Understand the concept of decimal numbers within the primary education syllabus, as well as their arrangement, comparison and basic operations
- Become aware of the measurement of quantities and its difficulties in the measurement process

Module 7. Methodology and Classroom-Based Learning in the Primary Education Classroom Students with Adaptations

- Be able to use evaluation criteria
- Develop materials and resources to work on the problems in the classroom
- Integrate knowledge on the different types of methodologies such as Core Standards, EntusiasMat, Jump Math and ABN

Module 8. Mental Calculation and Problem Solving

- Know the concept of mental arithmetic and its importance in teaching mathematics
- Establish strategies for teaching mental calculation
- Apply problem solving methodologies through mental calculation

Module 9. Design and Development of Teaching Materials: Mathematics Workshop/Mathematics Games

- Know the basic principles for the elaboration of resources and teaching materials
- Design materials adapted to the learning of measurement quantities
- Design materials adapted to the learning of probability and statistics
- Design materials adapted to the learning of geometry
- Relate the teaching of mathematics with other disciplines
- Create audiovisual resources for teaching mathematics
- Use comics as an educational resource in the teaching of mathematics
- Create and implement practical workshops for the consolidation of mathematical concepts
- Design teaching games for learning mathematics
- Understand geometry within the curricular framework of pre-school and primary education
- Know the contributions of Piaget, Duval and the Van Hiele couple to the field of geometry

Module 10. ICT in Pre-School and Primary Education. Development of Interactive Materials for the Classroom: Workshops

- Understand the importance of the use of ICT in the pre-school and primary education classroom and the previous considerations to take into account
- Take into account the needs when implementing ICT in the classroom, both personal and material
- Become familiar with Bloom's Taxonomy, as well as its up-to-date and digital application
- Create and design interactive content and resources for later use in the classroom

03

Skills

This Master's Degree provides mathematics teachers with the competencies and skills required to teach this subject in a much more fun and agile way, thanks to the use of the multiple traditional and technological tools available. Therefore, at the end of this degree, students will have acquired extensive knowledge that will allow them to use and connect everyday situations where the use of numbers and basic operations are used to interpret information. The video summaries and interactive diagrams in this program will be very useful for acquiring this knowledge.

This Master's Degree will allow you to enhance your skills in order to transfer mathematical language and everyday situations to your classroom"

General Skills

- Spontaneously use, both personally and socially, mathematical elements and reasoning to interpret mathematical concepts and solve problems
- Integrate mathematical knowledge and language with other types of knowledge to better respond to life situations
- Be able to use and relate geometric shapes and contents both to produce and interpret different types of information and to expand knowledge about spatial aspects of reality and the possibility of intervening in it
- Identify everyday situations in which the use of numbers and basic operations serve both to produce and interpret different types of information
- Incorporate the essentials of mathematical language into habitual expression and the appropriate precision in its use

Improve your skills and abilities in the use of ICT in the classroom to teach geometry and algebra to children"

Specific Skills

- Acquire higher level skills to use and relate numbers, their basic operations, symbols and forms of expression and mathematical reasoning
- Understand logical texts that include mathematical language and be able to develop them in a mathematical context
- Be able to use mathematical thinking in its different forms, interpreting and describing reality and extrapolating information to apply it to everyday situations in daily life
- Develop skills in the use of numbers, as well as the incorporation of technological tools as educational resources for the improvement of learning and problem solving
- Know how to relate the different types of mathematical language in order to link it to information processing
- Use the tools that mathematics provides us with to understand the information provided by mathematical supports and apply them to life in the classroom and in everyday life
- Be capable of solving problems as a way of promoting the development of autonomy and personal initiative through planning, management of available resources and their optimization and evaluating processes and results, which allows student to learn how to face new problems or situations

04

Course Management

TECH remains committed to offering all its students an education that meets their needs and maintains the quality of an institution that is at the academic forefront. For this reason, it carefully selects all the teaching staff that make up each of its degrees. On this occasion it has brought together management and teaching staff with extensive experience in the teaching sector, and whose knowledge is reflected in the syllabus that makes up this degree. In addition, this specialized team is available to students to answer any questions they may have about the content of this online program.

Achieve progress in your professional career with a specialized and experienced team in the educational field"

International Guest Director

Doctor Noah Heller is a leading professional in the field of **Education**, specializing in the teaching of **Mathematics** and **Science**. With a focus on **teaching innovation,** he has dedicated his career to improving **educational practices in the K-12 system**. In addition, his main interests include the **professional development of teachers** and the creation of **teaching strategies** to improve the understanding of **Mathematics**, in **Primary** and **High School** students, through **innovative didactic approaches**.

Throughout his career, he has held positions of great relevance, for example, as **Faculty Chair** of the **Leadership Institute** at the Harvard **Graduate School of Education**. He has also directed the **"Master Math for America" Teacher Fellowship Program**, where he has overseen the instruction and expansion of a program that has impacted over 700 math and **science** teachers in **New York** City, working closely with senior **mathematics and science professionals.**

At the same time, he has collaborated as a researcher in several publications on the **teaching of mathematics** and **new didactics** applied to **primary education**. He has also given conferences and seminars in which he has promoted **pedagogical approaches** that encourage critical thinking in students, making mathematics teaching a dynamic and accessible process.

Internationally, Dr. Noah Heller has been recognized for his ability to implement innovative strategies in **STEM education.** In fact, his leadership in **"Master Math for America"** has positioned him as a key figure in teacher training, receiving accolades for his ability to connect academia with classroom practice. His work has also been instrumental in the creation of one of the most prestigious **professional development programs in education.**

Dr. Heller, Noah

- Faculty Chair at the Harvard Graduate School of Education, Cambridge, United Kingdom
- Director of the "Master Math for America" Teacher Fellowship Program
- Doctor of Philosophy from New York University
- B.S. in Science, Physics and Mathematics from The Evergreen State College

Thanks to TECH, you will be able to learn with the best professionals in the world"

Management

Ms. Delgado Pérez, María José

- Secondary and High School Teacher of Mathematics, Technology, Programming, Robotics, Biology, Plastic Arts, Physics And Chemistry
- Master's Degree in Educational Center Management and Administration
- Management and Administration in Primary, Secondary and High School Education
- Diploma in Teaching with a Specialization in English
- Industrial Engineer

Professors

Ms. Hitos, María

- Pre-School and Primary School Teacher, with experience in Mathematics
- Pre-School English Coordinator
- Language qualification in English from the Community of Madrid

Ms. Iglesias Serranilla, Elena

- Pre-School and Primary Education Teacher, specialization in Music
- Primary School Education First Cycle Coordinator
- Training in New Learning Methodologies

Mr. López Pajarón, Juan

- Secondary and High School Science Teacher
- Second Cycle Secondary School Coordinator and responsible for the center's projects
- Master's Degree in Educational Center Management and Administration
- Biologist with experience in the field of environmental conservation

Ms. Soriano de Antonio, Nuria

- Language and Literature Teacher for Secondary Education and High School at Colegio Montesclaros (Cerceda, Madrid)
- Philology in the Spanish Language

Ms. Vega, Isabel

- Primary School Education teacher specialized in Special Education and Teaching Mathematics
- Primary School Education Cycle Coordinator

05

Structure and Content

TECH uses the latest technology applied to academic teaching in its programs. Therefore, in the syllabus of this degree, students will find educational resources such as video summaries, detailed videos or interactive diagrams. These tools are complemented by specialized readings and simulations of real cases, which will allow students to broaden their knowledge and bring them closer to situations that can be directly applied in the classroom. With all this, the professional will be able to deepen their knowledge in logical-mathematical thinking in pre-school education and the different methodologies and ICT tools applied to the teaching of mathematics.

This online program shows you how to apply the Japanese Abacus, the Flash Method or Geogebra to teach mental arithmetic to children in pre-school and primary school"

Module 1. Logical-Mathematical Thinking in Pre-School Education

1.1. Logical-Mathematical Thinking
- 1.1.1. What is Mathematical Logic?
- 1.1.2. How is Mathematical Knowledge Acquired?
- 1.1.3. The Formation of Logical-Mathematical Concepts at an Early Age
- 1.1.4. Mathematical Concepts
- 1.1.5. Characteristics of Logical-Mathematical Thinking

1.2. Training of Skills Related to Logical-Mathematical Development
- 1.2.1. Cognitive Development (Piaget)
- 1.2.2. Evolutionary Stages
- 1.2.3. Division of Thought in Knowledge (Piaget)
- 1.2.4. Evolution of Logical-Mathematical Knowledge
- 1.2.5. Physical Knowledge vs. Logical-Mathematical Knowledge
- 1.2.6. Knowledge of Space and Time

1.3. Development of Logical-Mathematical Thinking
- 1.3.1. Introduction
- 1.3.2. Knowledge and Reality
- 1.3.3. Development of Mathematical Knowledge
- 1.3.4. Development of Logical Thinking by Age
- 1.3.5. Components of Logical Development
- 1.3.6. Mathematical Language
- 1.3.7. Logical-Mathematical Development and Core Syllabus

1.4. Psychopedagogical Foundations in the Construction of Mathematical Knowledge
- 1.4.1. Sensorimotor Intelligence
- 1.4.2. Formation of Objective Symbolic Thinking
- 1.4.3. Formation of Concrete-Logical Thinking
- 1.4.4. Reasoning and its Types
- 1.4.5. Bloom's Taxonomy in the Development of Logical-Mathematical Thinking

1.5. Logical-Mathematical Learning (I)
- 1.5.1. Introduction
- 1.5.2. Structuring of the Body Scheme
  - 1.5.2.1. Body Concept
  - 1.5.2.2. Body image
  - 1.5.2.3. Postural Adjustment
  - 1.5.2.4. Coordination

1.6. Notions of Order
- 1.6.1. Comparison
- 1.6.2. Correspondence
- 1.6.3. Quantifiers
- 1.6.4. Quantity Conservation
- 1.6.5. Sets or Groupings
- 1.6.6. Formation of Sets
- 1.6.7. Numerical Cardinality
- 1.6.8. The Number Concept
- 1.6.9. Comparison of Sets
- 1.6.10. Set Equivalence
- 1.6.11. Recognition of Natural Numbers
- 1.6.12. Ordinal Numbers
- 1.6.13. Mathematical Operations: Addition and Subtraction

1.7. Prenumerical Knowledge: Classification
- 1.7.1. What is Classification?
- 1.7.2. Processes
- 1.7.3. Types of Classification
- 1.7.4. Cross Classifications
- 1.7.5. Classification Games

1.8. Seriation Games
- 1.8.1. Importance of Making Series
- 1.8.2. Logical Operations in the Construction of Series
- 1.8.3. Types of Series
- 1.8.4. Seriation in Pre-School Education
- 1.8.5. Seriation Games

1.9. Prenumerical Knowledge: Enumeration
- 1.9.1. Conceptualization and Function of Enumeration
- 1.9.2. Logical Operations Involved in Enumeration
- 1.9.3. Enumeration in Pre-School Education Design of Activities
- 1.9.4. Design of Activities
- 1.9.5. Task-Based Achievements

1.10. Representation and Manipulative Mathematics
- 1.10.1. Development of Logical-Mathematical Thinking Through the Senses
- 1.10.2. Representation, Visualization and Reasoning
- 1.10.3. Design of Activities Supported by Representation
- 1.10.4. Manipulative Mathematics: Functions and Resources
- 1.10.5. Design of Activities that Rely on Manipulation

Module 2. Methodology and Classroom-Based Learning in Pre-School Education

2.1. Globalized Teaching in Pre-School Education
- 2.1.1. Cooperative Learning
- 2.1.2. Project Method
- 2.1.3. Play
- 2.1.4. Mathematics Corner
- 2.1.5. Daily Activities (Routines)
- 2.1.6. Workshops
- 2.1.7. Large Regulated Group Activities

2.2. Construction of Mathematical Knowledge in Pre-School Education
- 2.2.1. Introduction
- 2.2.2. Models in the Teaching-Learning of Mathematics
- 2.2.3. Specificity and Significance of Mathematical Knowledge
- 2.2.4. Learning and Management of Teaching Variables
- 2.2.5. Errors and Obstacles in Mathematical Learning

2.3. Mathematics Syllabus in Pre-School Education
- 2.3.1. Introduction
- 2.3.2. Teaching Transposition
- 2.3.3. General Considerations of the Mathematics Syllabus in Pre-School Education
- 2.3.4. NCTM Considerations
- 2.3.5. Syllabus and Inferential Relationships in Pre-School Education
- 2.3.6. Inferential Elements in Pre-School Education
- 2.3.7. School Mathematics Syllabus and Relationship Building
- 2.3.8. Argument and Mathematical Discourse in Pre-School Education

2.4. Creativity in Mathematics Intelligence Bits Method
- 2.4.1. Introduction
- 2.4.2 Main Creativity Theories
- 2.4.3. Principles of School Mathematics
- 2.4.4. Mathematics Standards
- 2.4.5. Intelligence Bits Method

2.5. Methodological Proposals for Students with Educational Needs
- 2.5.1. Introduction
- 2.5.2. Create a Learning Environment to Include Children's Diversity
- 2.5.3. Diversity of the Classroom in Today's Society
- 2.5.4. Inclusive Classroom Climate as an Educational Response to Diversity
- 2.5.5. Methodological Change
- 2.5.6. Mathematical Knowledge is Built From One's Own Experience
- 2.5.7. Teaching Mathematics
- 2.5.8. Fundamental Principles
- 2.5.9. Description of the Method

2.6. Principles of Teaching Methodology for the Teaching-Learning of Mathematics in Pre-School Education
- 2.6.1. Methodology
- 2.6.2. Basic Methodological Lines
- 2.6.3. Child Stimulation
- 2.6.4. Sequence of Learning
- 2.6.5. Characteristics of Learning Assessment
- 2.6.6. Assessment Tools

2.7. Theory of Educational Situations
- 2.7.1. Introduction
- 2.7.2. Teaching Contract
- 2.7.3. TDS-Based Learning
- 2.7.4. Analysis of Real Situations
- 2.7.5. Variables and their Management

2.8. Teaching Resources and Activities
- 2.8.1. Main Principles of Mathematical Learning
- 2.8.2. Strategies that Create a Favorable Predisposition Toward Mathematics
- 2.8.3 Logical-Mathematical Materials and Resources Utilities
- 2.8.4. Non-Material Resources
- 2.8.5. Mathematical Activities Suitable for Pre-School
- 2.8.6. Constructive Logical-Mathematical Activities

2.9. Analysis of Objectives, Contents and Evaluation Criteria
- 2.9.1. Analysis of Objectives (First Cycle)
- 2.9.2. Analysis of Objectives (Second Cycle)
- 2.9.3. Content Analysis
- 2.9.4. Evaluation Criteria (First Cycle)
- 2.9.5. Criteria of Evaluation (Second Cycle)

2.10. Evaluation in Pre-School Education
- 2.10.1. Introduction
- 2.10.2. Characteristics of Pre-School Evaluation
- 2.10.3. Evaluation of Teaching in Pre-School Education
- 2.10.4. Evaluation of Learning in Pre-School Education
- 2.10.5. Regulatory Framework
- 2.10.6. Headings

Module 3. Arithmetic, Algebra, Geometry and Measurement Games with Numbers

3.1. Initiation to Number
- 3.1.1. Number Concept
- 3.1.2. Construction of the Number Structure
- 3.1.3. Numerical Development: Counting
  - 3.1.3.1. Phases in Learning the Numerical Sequence
    - 3.1.3.1.1. Rope or String Level
    - 3.1.3.1.2. Unbreakable Chain Level
    - 3.1.3.1.3. Breakable Chain Level
    - 3.1.3.1.4. Numerable Chain Level
    - 3.1.3.1.5. Bidirectional Chain Level

3.1.4. Counting Principles
- 3.1.4.1. One-to-One Correspondence Principle
- 3.1.4.2. Stable Order Principle
- 3.1.4.3. Cardinality Principle
- 3.1.4.4. Abstraction Principle
- 3.1.4.5. Irrelevance of Order Principle

3.1.5. Procedures used by the Child in Counting
- 3.1.5.1. Term to Term Correspondence
- 3.1.5.2. Subset to Subset Correspondence
- 3.1.5.3. Purely Visual Estimation
- 3.1.5.4. Subitizing
- 3.1.5.5. Count the Elements of a Collection
- 3.1.5.6. Recount
- 3.1.5.7. Discount
- 3.1.5.8. Overcount
- 3.1.5.9. Calculation Procedures

3.1.6. Fundamental Cardinal and Ordinal Situations

3.1.7. The Importance of Zero

3.1.8. Strategies to Enhance the Concept and Use of Number

3.2. Number Acquisition Process

3.2.1. Introduction

3.2.2. Number Concept
- 3.2.2.1. Perception of General Quantities
- 3.2.2.2. Distinguishing and Comparing Quantities of Objects
- 3.2.2.3. Uniqueness Principle
- 3.2.2.4. Generalization
- 3.2.2.5. Summative Action
- 3.2.2.6. Capture of Named Quantities
  - 3.2.2.6.1. Oral Numeric Series
  - 3.2.2.6.2. Counting Objects
  - 3.2.2.6.3. Cardinal Representation
  - 3.2.2.6.4. Compare Magnitudes
- 3.2.2.7. Identification of the Name with its Representation
- 3.2.2.8. Invariance of Named Quantities

3.2.3. From Experimental Psychology
- 3.2.3.1. Distance Effect
- 3.2.3.2. Size Effect
- 3.2.3.3. Numerical Spatial Arrangement

3.2.4. From Developmental Psychology
- 3.2.4.1. Behavioral, Cognitive and Constructivist Theory
  - 3.2.4.1.1. Exercise Law
  - 3.2.4.1.2. Law of Effect

3.2.5. Theories on the Process of Number Acquisition

3.2.6. Piaget
- 3.2.6.1. Stages
- 3.2.6.2. Requirements for the Understanding of the Notion of Number

3.2.7. Dienes
- 3.2.7.1. Principles
  - 3.2.7.1.1. Dynamic Principle
  - 3.2.7.1.2. Constructive Principle
  - 3.2.7.1.3. Economic Variability Principle
  - 3.2.7.1.4. Constructive Variability Principle
- 3.2.7.2. Stages
  - 3.2.7.2.1. Free Play
  - 3.2.7.2.2. Game with Rules
  - 3.2.7.2.3. Isomorphic Games
  - 3.2.7.2.4. Representation
  - 3.2.7.2.5. Description
  - 3.2.7.2.6. Deduction

3.2.8. Mialaret
- 3.2.8.1. Stages
  - 3.2.8.1.1. Action Itself
  - 3.2.8.1.2. Action Accompanied by Language
  - 3.2.8.1.3. Conduct of the Narrative
  - 3.2.8.1.4. Application of the Story to real Situations
  - 3.2.8.1.5. Graphical Expression of the Actions already Reported and Represented
  - 3.2.8.1.6. Symbolic Translation of the Studied Problem

3.2.9. Information Processing
3.2.9.1. Numerical Apprehension Model
3.2.9.2. Pre-linguistic Numerical Skills
3.2.10. Counting Principles (Gelman and Gallistel)
3.2.10.1. Biunivocal Correspondence Principle
3.2.10.2. Stable Order Principle
3.2.10.3. Cardinality Principle
3.2.10.4. Abstraction Principle
3.2.10.5. Inconsequence of Order Principle
3.2.11. Comparison of Counting Principles between Piaget's, Gelman's and Gallistel's Theory
3.3. Informal Arithmetic I
3.3.1. Introduction
3.3.2. Towards an Informal and Intuitive Arithmetic in Pre-School Education
3.3.2.1. Recognize Quantities
3.3.2.2. Relate Quantities
3.3.2.3. Operate Quantities
3.3.3. Objectives
3.3.4. Early Arithmetic Skills
3.3.4.1. Preservation of Inequality
3.3.5. Arithmetic Skills and Chants
3.3.5.1. Preliminary Considerations
3.3.5.1.1. Socio-Cognitive Conflict
3.3.5.1.2. Role of the Language
3.3.5.1.3. Creation of Contexts
3.3.5.2. Procedures and Mastery of the Chants
3.4. Informal Arithmetic II
3.4.1. Memorization of Numerical Facts
3.4.1.1. Activities to Work on Memorization
3.4.1.2. Domino
3.4.1.3. Hopscotch
3.4.2. Teaching Situations for the Introduction of Addition
3.4.2.1. Dialed Number Game
3.4.2.2. Race to 10
3.4.2.3. Christmas Greeting
3.5. Basic Arithmetic Operations
3.5.1. Introduction
3.5.2. Additive Structure
3.5.2.1. Phases of Mialaret
3.5.2.1.1. Approach Through Manipulation
3.5.2.1.2. Action Accompanied by Language
3.5.2.1.3. Mental Work Supported by Verbalization
3.5.2.1.4. Purely Mental Work
3.5.2.2. Strategies to Add
3.5.2.3. Initiation to Subtraction
3.5.2.4. Addition and Subtraction
3.5.2.4.1. Direct and Object Modeling
3.5.2.4.2. Counting Sequences
3.5.2.4.3. Recalled Numeric Data
3.5.2.4.4. Strategies to Add
3.5.2.4.5. Subtraction Strategies
3.5.3. Multiplication and Division
3.5.4. Arithmetic Problem Solving
3.5.4.1. Addition and Subtraction
3.5.4.2. Multiplications and Divisions
3.6. Space and Geometry in Pre-School Education
3.6.1. Introduction
3.6.2. Objectives Proposed by the NCTM
3.6.3. Psychopedagogical Considerations
3.6.4. Recommendations for Teaching Geometry
3.6.5. Piaget and his Contribution to Geometry
3.6.6. Van Hiele Model
3.6.6.1. Levels
3.6.6.1.1. Visualization or Recognition
3.6.6.1.2. Analysis
3.6.6.1.3. Sorting and Classification
3.6.6.1.4. Rigor

3.6.6.2. Learning Phases
3.6.6.2.1. Phase 1: Consultancy
3.6.6.2.2. Phase 2: Directed Guidance
3.6.6.2.3. Phase 3: Explication
3.6.6.2.4. Phase 4: Guidance
3.6.6.2.5. Phase 5: Integration
3.6.7. Geometry Types
3.6.7.1. Topological
3.6.7.2. Projective
3.6.7.3. Metrics
3.6.8. Visualization and Reasoning
3.6.8.1. Spatial Orientation
3.6.8.2. Spatial Structuring
3.6.8.3. Gálvez y Brousseau
3.6.8.3.1. Microspace
3.6.8.3.2. Mesospace
3.6.8.3.3. Macrospace
3.7. Magnitudes and their Measurement
3.7.1. Introduction
3.7.2. Construction of the Notion of Magnitude in the Child
3.7.2.1. Piagetian Phases in the Construction of Magnitudes
3.7.2.1.1. Consideration and Perception of a Magnitude
3.7.2.1.2. Conservation of Magnitude
3.7.2.1.3. Ordering with Respect to Magnitude
3.7.2.1.4. Correspondence of Numbers to Quantities of Magnitude
3.7.2.2. Stages in the Construction of the Measure
3.7.2.2.1. Direct Perceptual Comparison
3.7.2.2.2. Displacement of Objects
3.7.2.2.3. Operability of the Transitive Property

3.7.2.3. Stages in the Teaching-Learning of Magnitudes
3.7.2.3.1. Sensory Stimulation
3.7.2.3.2. Direct Comparison
3.7.2.3.3. Indirect Comparison
3.7.2.3.4. Choice of Unit
3.7.2.3.5. Irregular Measurement System
3.7.2.3.6. Regular Measurement System
3.7.3. Measuring Magnitudes
3.7.4. Length Measurement
3.7.5. Length Measurement
3.7.6. Measurement of Capacity and Volume
3.7.7. Measurement of Time
3.7.8. Phases of the Different Magnitudes
3.7.8.1. Preparation Phase
3.7.8.2. Measurement Practice Phase
3.7.8.3. Consolidation Phase of Techniques and Concepts
3.8. Play in Pre-School Education
3.8.1. Introduction
3.8.2. Objectives
3.8.3. Features of Play
3.8.4. Evolution of Play
3.8.4.1. Types of Play
3.8.4.1.1. Functional Play
3.8.4.1.2. Imitation or Symbolic Play
3.8.4.1.3. Play with Rules
3.8.4.1.4. Construction Play
3.8.5. Chance and Strategy
3.8.6. Competition in the Games
3.8.7. Teaching Considerations of Play
3.9. Teaching Resources of Play
3.9.1. Games and Logical Thinking
3.9.1.1. Three in a Row
3.9.1.2. The Fourth
3.9.1.3. Portrait Games
3.9.2. Quantitative Games
3.9.2.1. Number to Compare
3.9.2.1.1. Let's Go Home!!
3.9.2.2. Number to Calculate
3.9.2.2.1. Couples
3.9.2.2.2. It's Over!!
3.9.2.2.3. Cat and Mouse
3.9.3. Games and the Structure of Space
3.9.3.1. Puzzles
3.9.3.1.1. Two-Color Paintings
3.9.3.1.2. The Hex
3.10. Games in Different Spaces
3.10.1. Introduction
3.10.2. Games in the Classroom
3.10.2.1. The Butterfly Game
3.10.2.2. The Partitioning Game
3.10.2.3. Image Trains
3.10.2.4. The Newspaper
3.10.2.5. Flat Figures
3.10.2.6. The Containers
3.10.3. Games in Psychomotor Skills
3.10.3.1. Working with Sizes
3.10.3.2. Classify
3.10.3.3. We Play with the Hoops
3.10.4. Outdoor Games
3.10.5. Mathematical Games with ICT
3.10.5.1. Playing with the Turtle's Mind
3.10.5.2. Geometric Figures
3.10.5.3. For 3-Year-Old Students
3.10.5.4. Variety of Activities
3.10.5.5. Teaching Unit

Module 4. Problem Solving and Mental Calculation

4.1. Problem in Pre-School Education
- 4.1.1. Methodological Considerations
- 4.1.2. Psychopedagogical Considerations of the Initiation of Problem Idea Representation
- 4.1.3. What is a Problem?
- 4.1.4. Psychopedagogical Considerations of the Initiation of Problem Idea Representation
- 4.1.5. How to Pose Problems in Pre-School

4.2. Idea of a Problem to be Introduced in Pre-School Education
- 4.2.1. Why do We Solve Problems?
- 4.2.2. Perspectives for the Inclusion of Comprehension and Problem Solving in Pre-School Education
- 4.2.3. Specific Teaching Contract for Problem Solving in Pre-School Education
- 4.2.4. Most Appropriate Models for Introducing the idea of Problem in Pre-School Education
- 4.2.5. Reading and Understanding Statements
  - 4.2.5.1. Factors of Understanding Statements
- 4.2.6. Teaching Variables of the Statements

4.3. Towards a Teaching Approach to the Introduction to the Idea of Problem in Pre-School Education
- 4.3.1. Factors to be Taken into Consideration in the Approach and Resolution of Problems in Pre-School
- 4.3.2. Learning Logical-Mathematical Concepts Through Problem Solving
  - 4.3.2.1. Heuristic Strategies
  - 4.3.2.2. Technique Most Commonly Used at These Ages for Problem Solving
  - 4.3.2.3. Numerical Strategies
- 4.3.3. Various Situations for Teaching Proposition and Problem Solving
- 4.3.4. Problem Solving Constituent Elements of a Problem
  - 4.3.4.1. Problems that Serve to Exercise in the Practice of the Problem Idea
- 4.3.5. Main Recommendations for Approaching the Problem Idea in Pre-School Education

4.4. Mathematical Value of Stories
- 4.4.1. Pre-School Learning and Mathematics
- 4.4.2. Stories and Mathematics
- 4.4.3. Examples of Stories and Mathematical Learning
  - 4.4.3.1. Logical Development
  - 4.4.3.2. Numerical Development
  - 4.4.3.3. Development of Magnitudes and their Measurement
  - 4.4.3.4. Development of Geometric Thinking
  - 4.4.3.5. Problem Solving

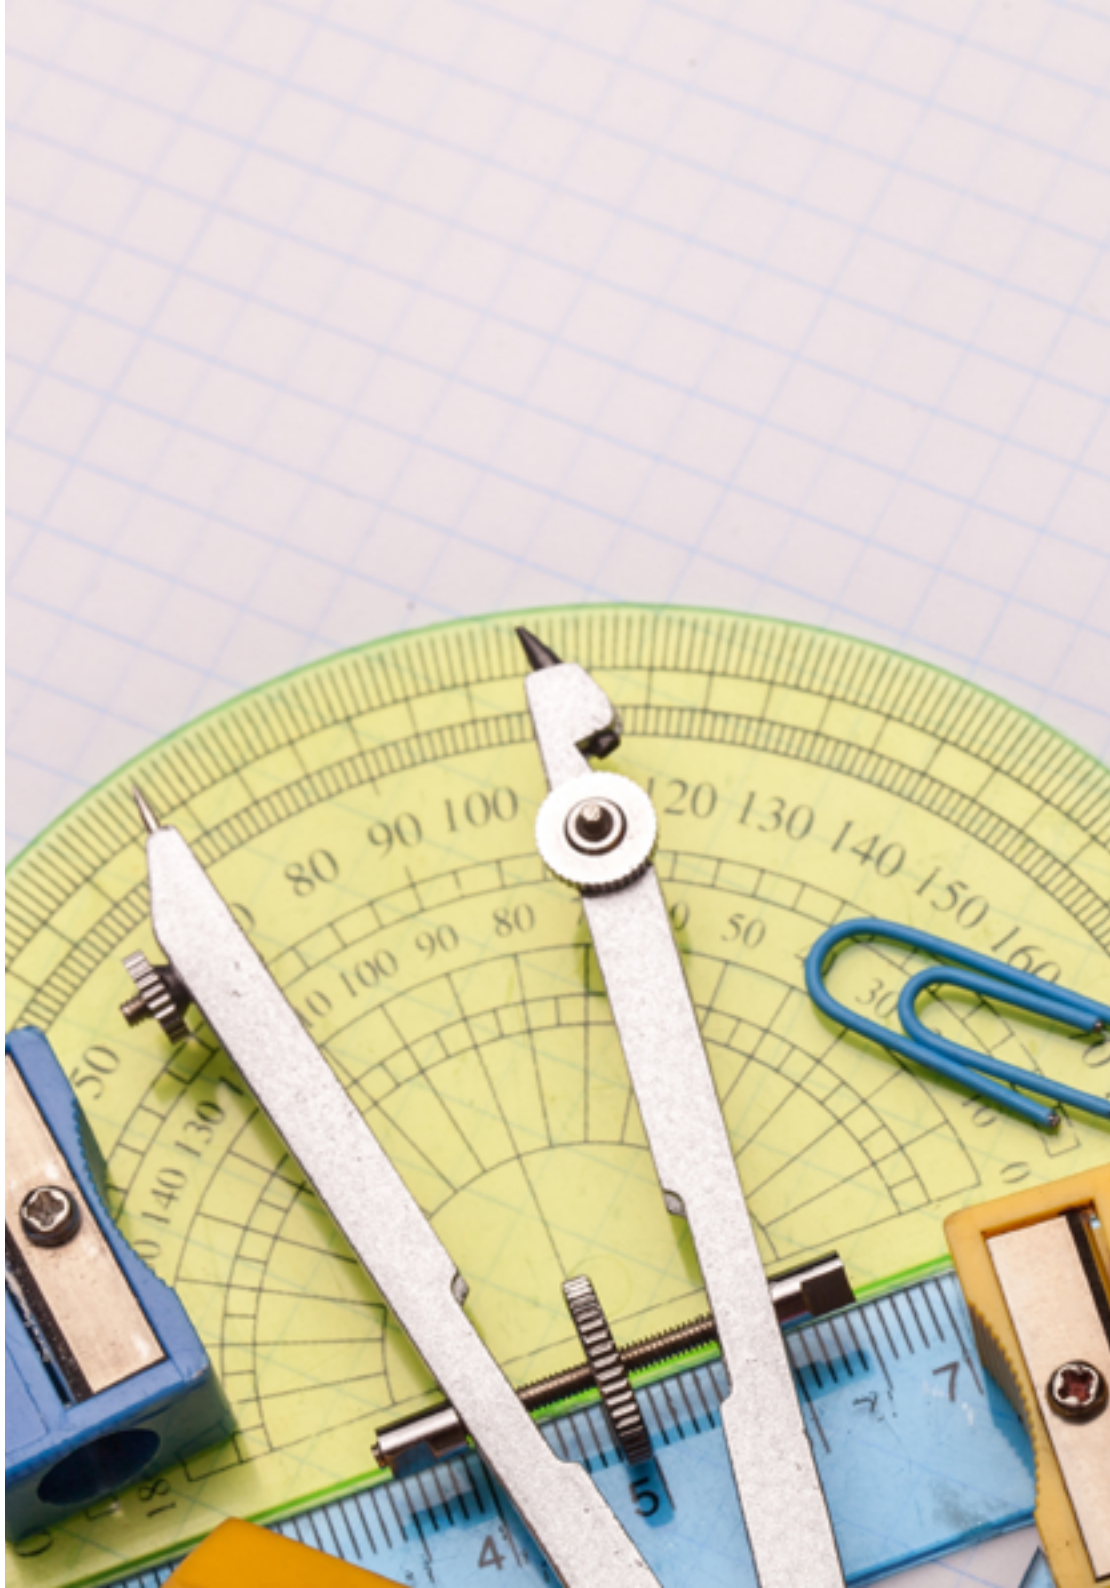
4.5. Logical Basis of Mental Calculation in Pre-School Education
- 4.5.1. Logical Operations
  - 4.5.1.1. Classifications
  - 4.5.1.2. Relationships of Order
- 4.5.2. Mental Calculation, Written Calculation and Estimated Calculation
- 4.5.3. Counting Process
- 4.5.4. Phases for Learning the Counting Activity

4.6. Informal Arithmetic
- 4.6.1. Calculation Strategy
- 4.6.2. Comparison and Equivalence
- 4.6.3. Composition and Decomposition
- 4.6.4. Initiation to Operational Activity: Adding, Subtracting, Folding and Distributing

4.7. Mental Calculation in Pre-School Education
- 4.7.1. Calculation Examples for Pre-School Education
- 4.7.2. Perform Calculation by Manipulating Material
- 4.7.3. Calculation Without Material Handling
- 4.7.4. Proposal for Mental Calculation in Pre-School Education
  - 4.7.4.1. Guessing Game
  - 4.7.4.2. It is Learned by Heart
- 4.7.5. Mechanics Acquired at the End of Pre-School Education
- 4.7.6. Resources to Achieve Apprenticeships
- 4.7.7. Practical Issues

4.8. Resource Bank for Calculation in Pre-School Education
- 4.8.1. Abacus
  - 4.8.1.1. Description
  - 4.8.1.2. Possibilities for Educational Use
  - 4.8.1.3. Classroom Teaching Situations
- 4.8.2. Multibase Blocks
  - 4.8.2.1. Description
  - 4.8.2.2. Possibilities for Educational Use
  - 4.8.2.3. Classroom Teaching Situations
- 4.8.3. Cuisenaire Strips
  - 4.8.3.1. Description
  - 4.8.3.2. Possibilities for Educational Use
  - 4.8.3.3. Classroom Educational Situations
- 4.8.4. Domino
  - 4.8.4.1. Description
  - 4.8.4.2. Possibilities for Didactic Use
  - 4.8.4.3. Classroom Didactic Situations
- 4.8.5. Battle Game
  - 4.8.5.1. Description
  - 4.8.5.2. Possibilities for Didactic Use
  - 4.8.5.3. Classroom Didactic Situations

4.9. Open Calculation Method based on ABN Numbers
- 4.9.1. What is the ABN Algorithm Method?
  - 4.9.1.1. Quantity and Cardinality of Sets
  - 4.9.1.2. Number Structure and Set Comparison
    - 4.9.1.2.1. Figurative Representation
    - 4.9.1.2.2. Symbolic Representation
    - 4.9.1.2.3. Symbol-Sign Representation
    - 4.9.1.2.4. Representation by Signs
  - 4.9.1.3. Counting Well Over Ten
  - 4.9.1.4. Number Transformations First Operations
- 4.9.2. Background of the ABN Method
- 4.9.3. Intuitionistic Approach vs. Traditional Approach



4.10. ABN Method Activities Proposal
- 4.10.1. Block 1: Numerical and Cardinal
  - 4.10.1.1. Search for Equivalent Sets
  - 4.10.1.2. Establishment of a Physical Pattern
  - 4.10.1.3. Pattern Sorting
  - 4.10.1.4. Numeric String Start of Counting
  - 4.10.1.5. Subitizing
  - 4.10.1.6. Estimate
- 4.10.2. Block 2: Number Structure and Comparison
  - 4.10.2.1. Introduction to the Ten
  - 4.10.2.2. Ordering, but not Counting
  - 4.10.2.3. Arrangement of Disordered Sets
  - 4.10.2.4. Interaction of Missing Elements
  - 4.10.2.5. Arrangement with Non-Manipulable Material
  - 4.10.2.6. Comparison of Real Objects
  - 4.10.2.7. Comparison of Figurative Elements
- 4.10.3. Block 3: Number Transformations
  - 4.10.3.1. Number Transformations
  - 4.10.3.2. Addition with the Number Line
  - 4.10.3.3. Subtraction with Toothpicks
  - 4.10.3.4. Finding the Double with Grid
  - 4.10.3.5. Finding Half with the Number Line
- 4.10.4. Assessment

Module 5. Logical-Mathematical Thinking in Primary Education

5.1. Nature and Development of Logical-Mathematical Thinking
- 5.1.1. Conceptualization
- 5.1.2. Piaget and Logical-Mathematical Thinking
- 5.1.3. Definition of Basic Concepts of Piaget's Theories
- 5.1.4. Logical-Mathematical Thinking in the Pre-School Education Syllabus
- 5.1.5. Logical-Mathematical Thinking in the Primary Education Syllabus
- 5.1.6. Logical-Mathematical Thinking in the NCTM
- 5.1.7. Ausubel's Significant Learning
- 5.1.8. Logical-Mathematical Relationships in the Montessori Method

5.2. Bloom's Taxonomy in the Development of Logical-Mathematical Thinking
- 5.2.1. Benjamin Bloom
- 5.2.2. Concept
- 5.2.3. Dimensions
- 5.2.4. Cognitive Domain Development
- 5.2.5. Renewal of the Theory
- 5.2.6. Digital Application
- 5.2.7. Digital Applications
- 5.2.8. Criticism

5.3. Prenumerical Knowledge
- 5.3.1. Introduction
- 5.3.2. Logical-Mathematical Contents in Pre-School Education
- 5.3.3. Classification
- 5.3.4. Centration and Decanting Processes
- 5.3.5. The Series
- 5.3.6. Enumeration
- 5.3.7. Correspondence
- 5.3.8. Quantity Conservation

5.4. Numerical Knowledge
- 5.4.1. Number Concept
- 5.4.2. Numbering Systems
- 5.4.3. Concept of Number from the Psychology of Development
- 5.4.4. Concept of Number from the Experimental Psychology
- 5.4.5. Current Situation in the Teaching of Arithmetic and the Concept of Number
- 5.4.6. Counting Skills
- 5.4.7. Classroom Application
- 5.4.8. The Spelling

5.5. Development of Logical-Mathematical Thinking Through Problem Solving
- 5.5.1. What is a Problem? Problem Definition
- 5.5.2. Typology
- 5.5.3. Problem Solving in Curricular Proposals
- 5.5.4. Problem Solving Difficulties
- 5.5.5. Problem-Based Learning

5.6. Difficulties in Learning Mathematics
- 5.6.1. Learning Difficulties in Primary Education
- 5.6.2. Difficulties in the Field of Mathematics
- 5.6.3. Dyscalculia
- 5.6.4. Classification
- 5.6.5. Symptoms
- 5.6.6. Affected Functions
- 5.6.7. Suggestions for Working with Children with Dyscalculia
- 5.6.8. Methods and Instruments to Detect Mathematics Difficulties

5.7. Flipped Classroom and Gamification
- 5.7.1. Flipped Classroom
- 5.7.2. Methodology
- 5.7.3. Phases
- 5.7.4. Advantages and Disadvantages
- 5.7.5. Guidelines
- 5.7.6. Conclusions
- 5.7.7. Gamification in the Classroom
- 5.7.8. Gamification and Motivation
- 5.7.9. Classroom Application

5.8. Cooperative Learning
- 5.8.1. Cooperative Learning
- 5.8.2. Methodology
- 5.8.3. Outline of the Classroom Work
- 5.8.4. Cooperative Work Groups
- 5.8.5. Internal Organization of the Groups
- 5.8.6. Simple Learning Structures 1st and 2nd Grades
- 5.8.7. Simple Learning Structures 3rd and 4th Grades
- 5.8.8. Simple Learning Structures 5th and 6th Grades

5.9. Montessori Pedagogy, Reggio Emilia, Waldorf
- 5.9.1. Alternative Pedagogies
- 5.9.2. Montessori Pedagogy
- 5.9.3. Montessori Method
- 5.9.4. Syllabus
- 5.9.5. Reggio Emilia Pedagogy
- 5.9.6. Advantages and Disadvantages of Reggio Emilia Pedagogy
- 5.9.7. Waldorf Pedagogy
- 5.9.8. Difference Between Waldorf Education and Traditional Education

5.10. Multiple Intelligences, Entusiasmat, ABN
- 5.10.1. Theoretical Framework
- 5.10.2. Linguistic-Verbal Intelligence
- 5.10.3. Logical-mathematical Intelligence
- 5.10.4. Spatial or Visual Intelligence
- 5.10.5. Musical Intelligence
- 5.10.6. Body-Kinesthetic Intelligence
- 5.10.7. Intrapersonal Intelligence
- 5.10.8. Interpersonal Intelligence
- 5.10.9. Naturalistic Intelligence

Module 6. Arithmetic, Algebra and Measurement Play

6.1. Teaching Natural Numbers
- 6.1.1. Natural Numbers and Decimal Numbering Systems in the School Syllabus
- 6.1.2. Correspondence
- 6.1.3. Natural Number
- 6.1.4. Use of Number
- 6.1.5. Numbering Systems
- 6.1.6. Decimal Numbering System
- 6.1.7. Difficulties and Errors
- 6.1.8. Teaching Stages and Strategies
- 6.1.9. Materials

6.2. Arithmetic of a Natural Number
- 6.2.1. Additive Structure
- 6.2.2. Difficulties and Errors in the Process and Learning of Additive Operations
- 6.2.3. Structure of Multiplication and Division
- 6.2.4. Difficulties and Errors in the Learning of Multiplicative Operations
- 6.2.5. Properties

6.2.6. Additive Problems
6.2.7. Classification of Multiplicative Problems
6.2.8. School Syllabus
6.2.9. Mental Calculation Techniques
6.3. Teaching and Learning Rational Numbers
6.3.1. Rational Number and the Syllabus
6.3.2. Fractions
6.3.3. Operations with Fractions
6.3.4. Equivalence
6.3.5 Fraction Comparisons
6.3.6. Teaching
6.3.7. Materials
6.4. Teaching and Learning Decimal Numbers
6.4.1. Decimal Numbers in the Official Syllabus
6.4.2. History of Decimal Notation
6.4.3. Decimal Numbers
6.4.4. Expanding the Numbering System
6.4.5. Operations with Decimal Numbers
6.4.6. Decimal Approximation
6.4.7. How Many Decimal Places Does a Fraction Have?
6.4.8. The Introduction of Decimal Places from the Measurement
6.5. Teaching Measurements of Magnitude
6.5.1. Context and History
6.5.2 Magnitudes and Measurement Direct Measures
6.5.3. Objectives of the Teaching of Magnitudes and their Measurement in Primary Education
6.5.4. Learning to Measure Quantities
6.5.5. Difficulties and Errors in the Learning of Magnitudes and their Measurement
6.5.6. Unit of Measure
6.5.7. Direct Measurement Measurement Procedures
6.5.8. Indirect Measurement and Proportionality
6.5.9. Arithmetic Proportionality
6.6. Geometry in the Plane
6.6.1. Geometry in the Syllabus
6.6.2. Beginning of Geometry
6.6.3. Elements of Geometry
6.6.4. Polygonal
6.6.5. Polygons
6.6.6. Triangles
6.6.7. Quadrilaterals
6.6.8. Curvilinear Figures
6.7. Geometry in Space and Geometric Movements in the Plane
6.7.1. Curricular Considerations
6.7.2. Object Recognition Geometric Objects
6.7.3. Angles in Space
6.7.4. Polyhedra
6.7.5. Round Bodies
6.7.6. Isometries in the Syllabus
6.7.7. What is Symmetry?
6.7.8. Geometric Transformations
6.8. The Contributions of Piaget and the Van Hiele Couple to the Field of Geometry
6.8.1. Piaget's Research on the Development of Geometrical Concepts
6.8.2. The Van Hiele Couple
6.8.3. Level 0 Recognition Display
6.8.4. Level 1 Analysis
6.8.5. Level 2 Informal Deduction
6.8.6. Level 3 Formal Deduction

6.8.7. Level 4 Rigor
6.8.8. Duval's Cognitive Theory
6.9. Statistics and Probability
6.9.1. Statistics and Probability in the School Syllabus
6.9.2. Statistics and its Applications
6.9.3. Basic Concepts
6.9.4. Tables and Graphs
6.9.5. The Language of Probability Calculation
6.9.6. Teaching Statistics and Probability
6.9.7. Stages in Learning Statistics and Probability
6.9.8. Errors and Difficulties in the Learning of Statistics and Probability
6.10. Learning Mathematics Through Play
6.10.1. Introduction
6.10.2. Play as a Resource for Learning
6.10.3. Games as a Strategy for Logical-Mathematical Learning
6.10.4. Importance of the Corners in Pre-School Education
6.10.5. LEGO as a Resource
6.10.6. Geometry and Fractions with LEGO Pieces
6.10.7. EntusiasMat
6.10.8. ABN

Module 7. Methodology and Classroom-Based Learning in the Primary Education Classroom Students with Adaptations

7.1. Teaching Methodology in Primary Education
7.1.1. Introduction to Teaching Methodology in Primary Education
7.1.2. Teaching Methodology for Teaching Mathematics in Primary Education
7.1.3. Teaching Methodologies of the XXI Century, Education 3.0
7.1.4. Methods: Which One to Choose
7.1.5. State - Memorize - Understand vs. Understand - State - Memorize - Apply
7.1.6. Metalanguage and Object Language
7.1.7. Competencies of the Mathematics Teacher
7.1.8. Educational Practice
7.2. Assessment in the Mathematics Classroom
7.2.1. What is Assessment?
7.2.2. Assessment in the Mathematics Syllabus
7.2.3. Learning Assessment
7.2.4. Assessment of the Acquisition of Key Concepts
7.2.5. Assessment of the Teaching Methodology
7.2.6. Mathematics Test Design
7.2.7. Correction of Mathematics Exams
7.2.8. Headings
7.2.9. Student Self-Assessment
7.3. Errors, Difficulties and Blockages in the Teaching and Learning of Mathematics
7.3.1. Visual Memory
7.3.2. Understanding of Concepts about Magnitudes
7.3.3. Understanding Abstract Concepts
7.3.4. Reading and Interpreting Statements
7.3.5. Basic Operations
7.3.6. Multiplication Tables
7.3.7. Fractions
7.3.8. Problem Solving
7.3.9. Rushing
7.4. Materials and Resources for the Teaching and Learning of Mathematics
7.4.1. Introduction to Materials and Resources
7.4.2. Sense and Purpose of its Use for Learning Enhancement
7.4.3. Classification of Materials
7.4.4. Math Book
7.4.5. Mathematics Books for the General Public
7.4.6. Manipulative Materials vs. Digital Materials
7.4.7. Materials
7.4.8. Discussion on the Use of a Calculator
7.4.9. Audiovisual Materials

7.5. Globalized Teaching: Learning Through Projects
- 7.5.1. Brief Conceptualization
- 7.5.2. Introduction to Project-Based Learning
- 7.5.3. Requirements for Working with Mathematics from a Project Based Learning Approach
- 7.5.4. A Model Applicable to the Classroom
- 7.5.5. Project Sheets
- 7.5.6. Description of Project Objectives
- 7.5.7. Timing
- 7.5.8. Implementation
- 7.5.9. Assessment

7.6. Cooperative Work in the Mathematics Classroom
- 7.6.1. Brief Conceptualization
- 7.6.2. Requirements for Working with Mathematics through Cooperative Work
- 7.6.3. Advantages and Disadvantages in the Mathematics Classroom
- 7.6.4. Teacher facing Cooperative Work
- 7.6.5. A Model Applicable to the Classroom
- 7.6.6. Mathematics Classroom to Develop Cooperative Work
- 7.6.7. Cooperative Learning Models
- 7.6.8. Implementation of Cooperative Work
- 7.6.9. Assessment of Cooperative Work

7.7. Other Methodologies
- 7.7.1. Singapore Method
- 7.7.2. Common Core Standards Method
- 7.7.3. EntusiasMat
- 7.7.4. Jump Math
- 7.7.5. NBL
- 7.7.6. Dialogic Learning
- 7.7.7. Learning Communities: Reggio Emilia
- 7.7.8. Learning Communities: Montessori
- 7.7.9. Analysis of Methodologies

7.8. Attention to Diversity
- 7.8.1. General Principles of Attention to Diversity
- 7.8.2. Concept of Curricular Adaptation
- 7.8.3. Characteristics of Curricular Adaptations
- 7.8.4. Phases and Components of the Adaptation Process
- 7.8.5. Responding to Diversity: A Collaborative Effort
- 7.8.6. Strategies
- 7.8.7. Resources
- 7.8.8. Specific Teaching Materials
- 7.8.9. Technical Resources

7.9. Methodological Proposals for Students with Special Educational Needs
- 7.9.1. SEN in Mathematics Education
- 7.9.2. Dyscalculia
- 7.9.3. ADHD
- 7.9.4. High Abilities
- 7.9.5. Guidelines when Difficulties are due to the Nature of Mathematics Itself
- 7.9.6. Recommended Guidelines when Difficulties are due to the Methodological Organization of Mathematics
- 7.9.7. Recommended Guidelines when Difficulties are Due to Internal Student Factors
- 7.9.8. ICT for the Teaching of SEN Students
- 7.9.9. Recommended Guidelines for Algorithm Implementation

Module 8. Mental Calculation and Problem Solving

8.1. Mental Calculation
- 8.1.1. What is Mental Calculation?
  - 8.1.1.1. Definition
  - 8.1.1.2. Mechanical or Stimulus-Response Calculation
  - 8.1.1.3. Reflective or Thoughtful Calculation
  - 8.1.1.4. Skills

8.1.2. Authors' Contribution
- 8.1.2.1. María Ortiz
- 8.1.2.2. Jiménez Ibáñez
- 8.1.2.3. Hope
- 8.1.2.4. Dickson
- 8.1.2.5. Carrol and Porter
- 8.1.2.6. Alistair McIntosh

8.1.3. Justification
- 8.1.3.1. MC Classroom Implementation
- 8.1.3.2. 6 Reasons why Mental Calculation is Important

8.1.4. Mental Calculation in the Basic Syllabus of Primary Education
- 8.1.4.1. Contents
- 8.1.4.2. Assessment Criteria
- 8.1.4.3. Assessable Learning Standards

8.1.5. Advantages of Mental Calculation
- 8.1.5.1. Bernardo Gómez
- 8.1.5.2. María Ortiz

8.1.6. Disadvantages of Mental Calculation
- 8.1.6.1. Definition
- 8.1.6.2. Four Areas of Difficulty
- 8.1.6.3. Causes

8.1.7. Approximate Calculation
- 8.1.7.1. Definition
- 8.1.7.2. Algorithmic Thinking
- 8.1.7.3. Onset

8.1.8. Mental Arithmetic
- 8.1.8.1. Definition
- 8.1.8.2. Elementary Forms
- 8.1.8.3. Levels of Use

8.1.9. Keys to Teaching Mental Calculation
- 8.1.9.1. Uses
- 8.1.9.2. Strategies
- 8.1.9.3. Practice
- 8.1.9.4. Decision
- 8.1.9.5. Mentality

8.2. Teaching Mental Calculation

8.2.1. Contents and Activities for the M.C.
- 8.2.1.1. Basic Concepts of Number and Properties Related to Operations
- 8.2.1.2. The Tables
- 8.2.1.3. Strategies
- 8.2.1.4. Oral Problems
- 8.2.1.5. Games and Educational Material

8.2.2. General Teaching Guidelines
- 8.2.2.1. Strategies to be Proposed
- 8.2.2.2. Sequencing
- 8.2.2.3. Level of the Student Body
- 8.2.2.4. Playful Activity
- 8.2.2.5. Constancy
- 8.2.2.6. M.C Programming

8.2.3. Mental Calculation Strategies
- 8.2.3.1. Definition
- 8.2.3.2. Simpler Strategies

8.2.4. Strategies for Addition
- 8.2.4.1. Counting
- 8.2.4.2. Double
- 8.2.4.3. Commutative Property
- 8.2.4.4. Associative Property
- 8.2.4.5. Decomposition

8.2.5. Subtraction Strategies
- 8.2.5.1. Counting
- 8.2.5.2. Decomposition
- 8.2.5.3. Completing Numbers

8.2.6. Strategies for Multiplication
- 8.2.6.1. Sum Reduction
- 8.2.6.2. Distributive Property

8.2.6.3. Commutative Property
8.2.6.4. Factorization and Association
8.2.6.5. Basic Multiplications
8.2.7. Division Strategies
8.2.7.1. Division Test
8.2.7.2. Divide by 2 and 3
8.2.7.3. Basic Divisions
8.2.8. Approximation

8.3.6.1. What Are They?
8.3.7. Magic Squares
8.3.7.1. What Are They?
8.3.8. Mathematical Games
8.3.8.1. What Are They?
8.3.9. Other Games
8.3.9.1. What Are They?
8.4. Materials for Working on Mental Calculation
8.4.1. Japanese Abacus
8.4.2. Flash Method
8.4.3. Smartick
8.4.4. Supertic
8.4.5. Geogebra
8.4.6. Mothmatic
8.4.7. Arcademics
8.4.8. Kahn Academy
8.4.9. Gauss Project
8.5. Problem-Based Learning (PBL)
8.5.1. General aspects of the PBL
8.5.2. Features of a PBL
8.5.3. Planning of a PBL
8.5.4. Role of the Teacher
8.5.5. Role of the Students
8.5.6. Design of the PBL
8.5.7. Implementation of the PBL
8.5.8. Evaluation of PBL
8.5.9. Benefits of PBL
8.6. Logic
8.6.1. Study and Scientific Basis of Logic Principles
8.6.2. Statements
8.6.3. Conditional Expressions
8.6.4. Explanation, Argumentation and Demonstration
8.6.5. Reasoning: Deduction, Induction and Abduction
8.6.6. Reduction to Absurdity

8.6.7. Logic for Learning, Logic for Teaching
8.6.8. Educational Intervention-Teaching Procedures
8.6.9. Resources for Mathematical Logic
8.7. Mathematical Problems
8.7.1. Concept of Problem
8.7.2. Teaching Methodology for Educational Intervention
8.7.3. Variables:
8.7.4. Constants
8.7.5. Elaboration of Problems
8.7.6. Interpretation of Problems
8.7.7. Oral Problems
8.7.8. Practical Procedures to Avoid Difficulties and Blockages in Mathematical Problem Solving
8.7.9. Adaptation of the Statements
8.8. Metamodels and Models for the Generation of Problem-Solving Strategies
8.8.1. Introduction to Metamodels and Models
8.8.2. What are Metamodels for?
8.8.3. Generative Metamodels
8.8.4. Structuring Metamodels
8.8.5. Link Metamodels
8.8.6. Transformation Metamodels
8.8.7. Composition Metamodels
8.8.8. Interconnection Metamodels
8.8.9. ICT Metamodels
8.9. The Mathematical Task in Problem Solving
8.9.1. Mathematical Work
8.9.2. Factors Involved in Problem-Solving Learning
8.9.3. Problem Solving, the First Approach
8.9.4. Resolution Strategies
8.9.5. Problem Solving Phases
8.9.6. Problem Solving Guidelines
8.9.7. Obstacles and Problem-Solving Difficulties
8.9.8. Overcoming Obstacles
8.9.9. Resolution Check
8.10. Materials and Games to Work on the Problems
8.10.1. Manipulative Resources
8.10.2. Non-Manipulative Resources
8.10.3. Playful Resources
8.10.4. Design of Activities
8.10.5. Learning Problems in relation to other Areas of Knowledge
8.10.6. Everyday Problems
8.10.7. Board Games to Work on Problems
8.10.8. Geoplane
8.10.9. Pentominoes

Module 9. Design and Development of Teaching Materials: Mathematics Workshop/Mathematics Games

9.1. Teaching Materials in Mathematics Education
9.1.1. Introduction
9.1.2. Teaching Resources
9.1.3. Disadvantages of Teaching Materials
9.1.4. Advantages of Teaching Materials
9.1.5. Factors for the Use of Teaching Material
9.1.6. Functions of Teaching Materials
9.1.7. Educational Material in the Teaching-Learning Process
9.1.8. Types of Material
9.2. Introduction to the Design and Development of Teaching Materials
9.2.1. Introduction
9.2.2. Introduction to the Design of Teaching Materials
9.2.3. Establishing an Educational Situation
9.2.4. Design and Development of Educational Material
9.2.5. Educational Material to Support the Teaching-Learning Process
9.2.6. Adequacy of the Material for Teaching Purposes

9.2.7. Assessment of Teaching Material
9.2.8. Self-Evaluation
9.3. Manipulative Materials
9.3.1. Introduction
9.3.2. Logic Blocks
9.3.3. The Abacus
9.3.4. Multibase Blocks
9.3.5. Cuisenaire Strips
9.3.6. The Geoplane
9.3.7. Tangram
9.3.8. Meters, Scales and Graduated Glasses
9.3.9. Other Materials
9.4. Use of Manipulative Materials in the Classroom
9.4.1. Active and Participative Methodology
9.4.2. Manipulative Materials
9.4.3. Introducing Manipulative Materials in the Classroom through Challenges
9.4.4. Criteria for Manipulative Materials
9.4.5. Development of the Students
9.4.6. The Teacher as Project Guide
9.4.7. The Mathematical Contents for the Elaboration of Manipulative Materials
9.4.8. Classroom Work Project
9.4.9. The Teacher and Teaching Materials
9.5. Numerical Learning Materials
9.5.1. Introduction
9.5.2. Types of Numbers: Natural, Integer, Fractional and Decimal Numbers
9.5.3. Contents
9.5.4. Logical-Mathematical Thinking
9.5.5. Materials for Working with Integers
9.5.6. Materials for Working with Fractions
9.5.7. Materials for Working with Decimals
9.5.8. Materials for Working with Operations
9.5.9 Crafts for Learning Numbers
9.6. Materials for Learning to Measure
9.6.1. Introduction
9.6.2. Units and Instruments for the Measurement of Magnitudes
9.6.3. Contents of the Measurement Block
9.6.4. Educational Resources
9.6.5. Materials for Working with Units of Length
9.6.6. Materials for Working with Units of Mass
9.6.7. Materials to Work with Capacity or Volume Units
9.6.8. Materials to Work with Surface Units
9.6.9. Materials to Work with Time and Money Units
9.7. Geometric Learning Materials
9.7.1. Block 3: Geometry
9.7.2. Importance of Geometry
9.7.3. Puzzle of the Blind Hen
9.7.4. Square Geoplane
9.7.5. Orient Yourself
9.7.6. The Boat Game
9.7.7. Chinese Tangram
9.7.8. Memory Game
9.8. Comic Books for Learning Mathematics
9.8.1. Introduction
9.8.2. Comic Concept
9.8.3. Comic Structure
9.8.4. Educational Uses of Digital Comics
9.8.5. Objectives Achieved According to Experiences Developed
9.8.6. Proposed Method of Use

9.8.7. How to Use it According to the Teaching Cycles
9.8.8. Proposed Activities
9.8.9. Comics, ICT and Mathematics
9.9. Audiovisual Resources in the Teaching-Learning of Mathematics
9.9.1. Audiovisual Language: A New Language, A New Method
9.9.2. Benefits of Audiovisual Language in Education
9.9.3. Audiovisual Competence in the Classroom
9.9.4. 10 Principles for the Use of Audiovisuals in the Classroom
9.9.5. Audiovisual Resources and the Teaching of Mathematics
9.9.6. Importance of the Use of New Technologies in Mathematics
9.9.7. Video in Mathematics
9.9.8. Mathematical Photography
9.10. Games in Teaching Mathematics
9.10.1. Introduction
9.10.2. Game Concept
9.10.3. The Importance of the Game
9.10.4. The Importance of the Game in Mathematics
9.10.5. Advantages of the Game
9.10.6. Disadvantages of the Game
9.10.7. Phases of the Game
9.10.8. Strategies
9.10.9. Mathematical Games

Module 10. ICT in Pre-School and Primary Education. Development of Interactive Materials for the Classroom: Workshops

10.1. Information and Communication Technologies
10.1.1. What are ICTs?
10.1.2. Theoretical Framework
10.1.3. General Characteristics of ICTs
10.1.4. ICT Issues in Education
10.1.5. Need for the Use of ICTs in Educational Institutions
10.1.6. Use of ICT in Educational Centers
10.1.7. ICT Integration Plan
10.2. Needs for the Implementation of ICT in the Classroom
10.2.1. Equipment
10.2.2. Training
10.2.3. Role of the Coordinator
10.2.4. The Teacher and ICT
10.2.5. ICT in Pre-School Classrooms
10.2.6. ICT Projects
10.2.7. ICT in Primary Education
10.2.8. ICT in Education: Disadvantages
10.2.9. ICT Assessment
10.3. ICT in Pre-School Education
10.3.1. ICT in Pre-School Classrooms
10.3.2. ICTs in the Legal Framework of Pre-School Education
10.3.3. ICT and Gardner's Multiple Intelligences
10.3.4. Some Possibilities for the Use of ICTs in Pre-School
10.3.5. The Computer Corner
10.3.6. Approach to the Potential of ICTs in Pre-School Education
10.3.7. Teaching Mathematics in Pre-School
10.3.8. ICT Resources for Pre-School Education
10.4. ICT in Primary Education
10.4.1. Impacts of ICT on Primary Education
10.4.2. Incorporation of ICTs in Education: Possibilities and Challenges
10.4.3. Advantages and Disadvantages of ICT Incorporation
10.4.4. New Teaching Methodologies Supported by ICTs: an Active and Constructive Pedagogy
10.4.5. Inclusion of Virtual Platforms in the Teaching-Learning Process
10.4.6. Adaptation of a New Methodology Online and Virtual Teaching

10.4.7. Educational Applications
10.5. Use of ICTs and Active Methodologies
10.5.1. Active Methodologies
10.5.2. Advantages
10.5.3. Educational Principles of Active Methodologies
10.5.4. Active Methodologies with the use of ICT
10.5.5. Project-Based Learning
10.5.6. Collaborative and Cooperative Learning
10.5.7. Service Learning in the use of ICT
10.5.8. Flipped Classroom
10.5.9. Problem-Based Learning
10.6. Computer Resources for the Mathematics Classroom
10.6.1. Tablets in Education
10.6.2. ICT in Primary Education, a Formative Proposal
10.6.3. Best Tools for your Math Class according to AulaPlaneta
10.6.4. ICT Resources for Pre-School Education
10.7. Computer and Internet in Education
10.7.1. Computer-Assisted Learning
10.7.2. Internet
10.7.3. Internet and the Expansion of the Educational Framework
10.7.4. Benefits of the Internet in Education
10.7.5. Disadvantages of the Internet on Education
10.7.6. Mathematics on the Internet
10.7.7. Websites to Work on Mathematics
10.8. Gamification in the Classroom
10.8.1. What is Gamification and Why Is It Important?
10.8.2. Elements of Gamification
10.8.3. Gamification Objectives
10.8.4. Fundamentals of Gamification in the Teaching-Learning Process
10.8.5. How to Gamify in Education
10.8.6. Gamification in Pre-School Education
10.8.7. Rewards Classification
10.8.8. Gamification. Ludification
10.8.9. Negative Aspects of Gamification
10.8.10. ICT Use in Gamification
10.9. ICT Tools and Resources for Assessment
10.9.1. Evaluation
10.9.2. ICT as a Means of Assessment
10.9.3. ICT Assessment Tools
10.9.4. Other Tools to Assess in a Different Way
10.10. ICT in the Attention to Special Needs Education
10.10.1. How ICT Supports Students with SEN
10.10.2. ICT for Students with Physical Disabilities
10.10.3. ICT in students with Mental Disabilities
10.10.4. ICT for Students with Auditory Disabilities
10.10.5. ICT for Students with Visual Disabilities
10.10.6. Pervasive Developmental Disorders
10.10.7. ICT Resources for SEN

06

Methodology

This program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

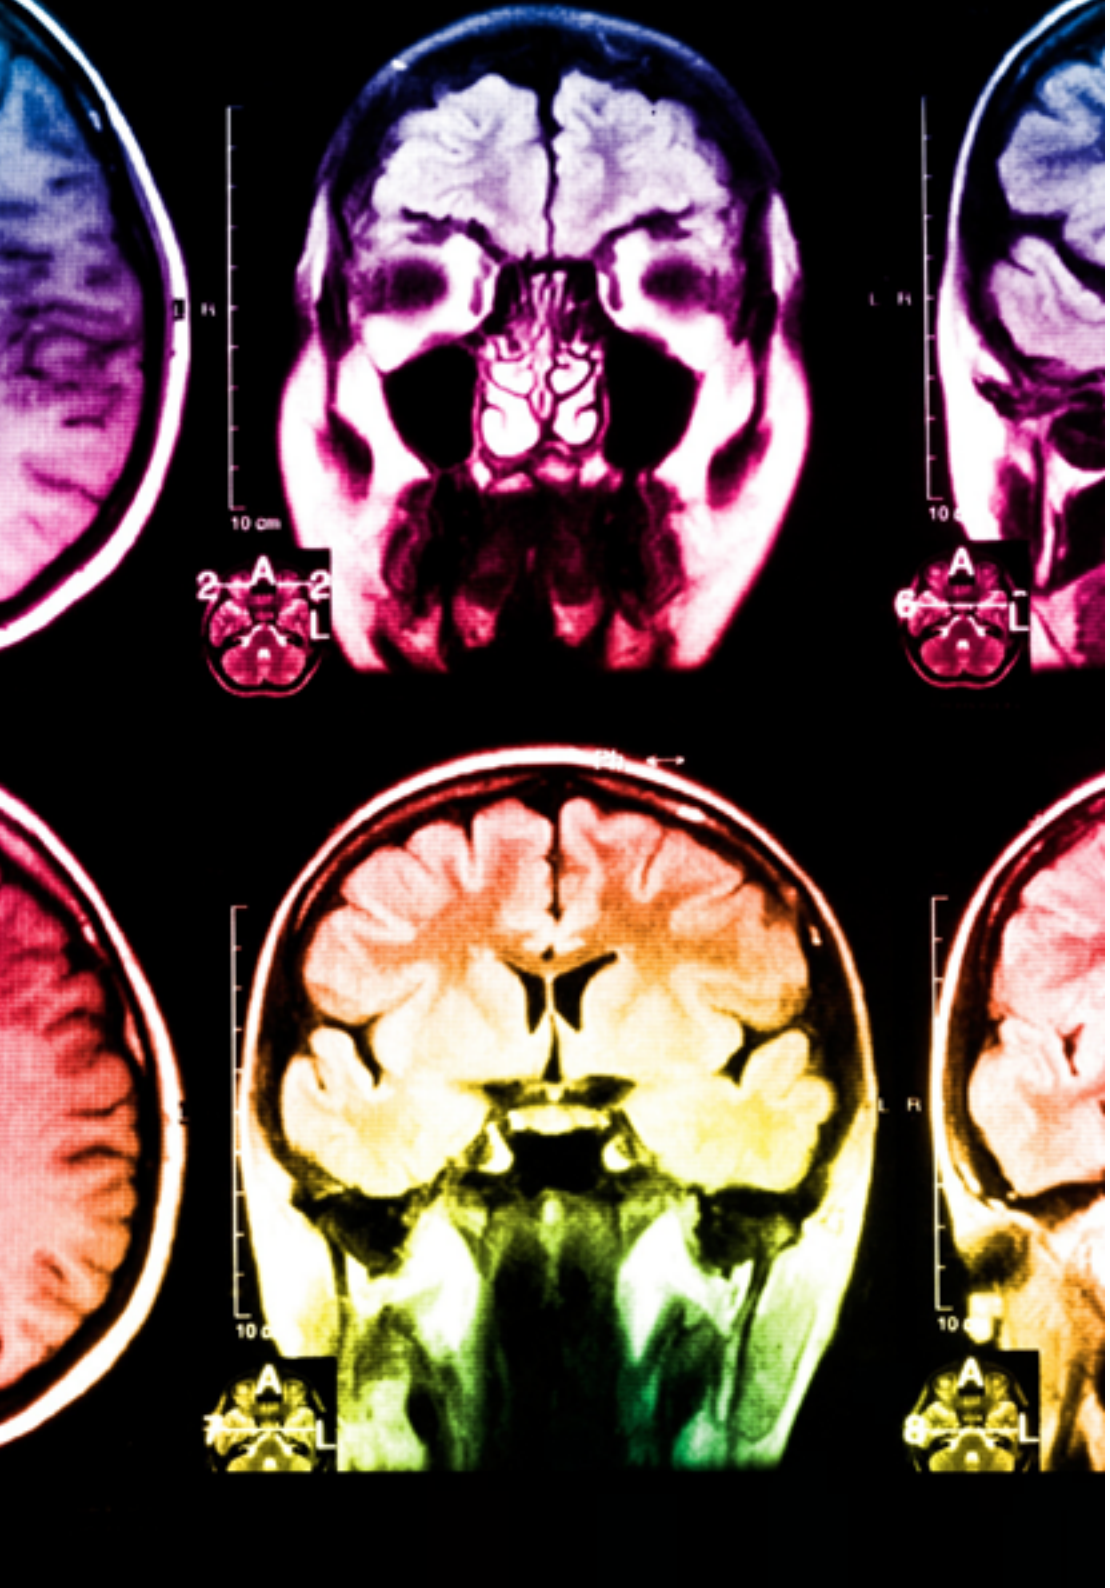
1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning



At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

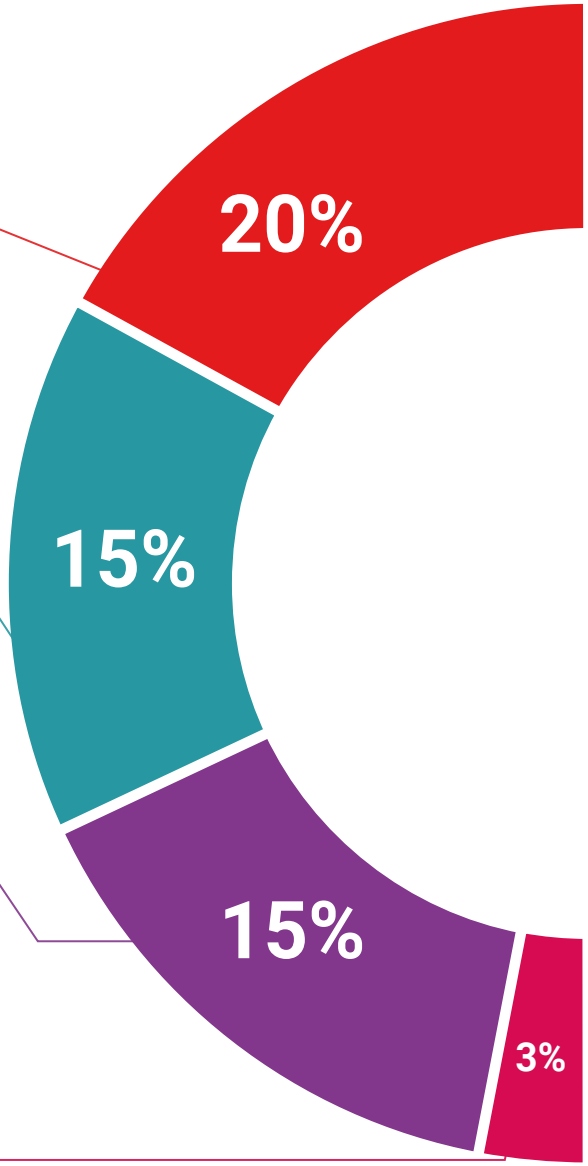
Interactive Summaries

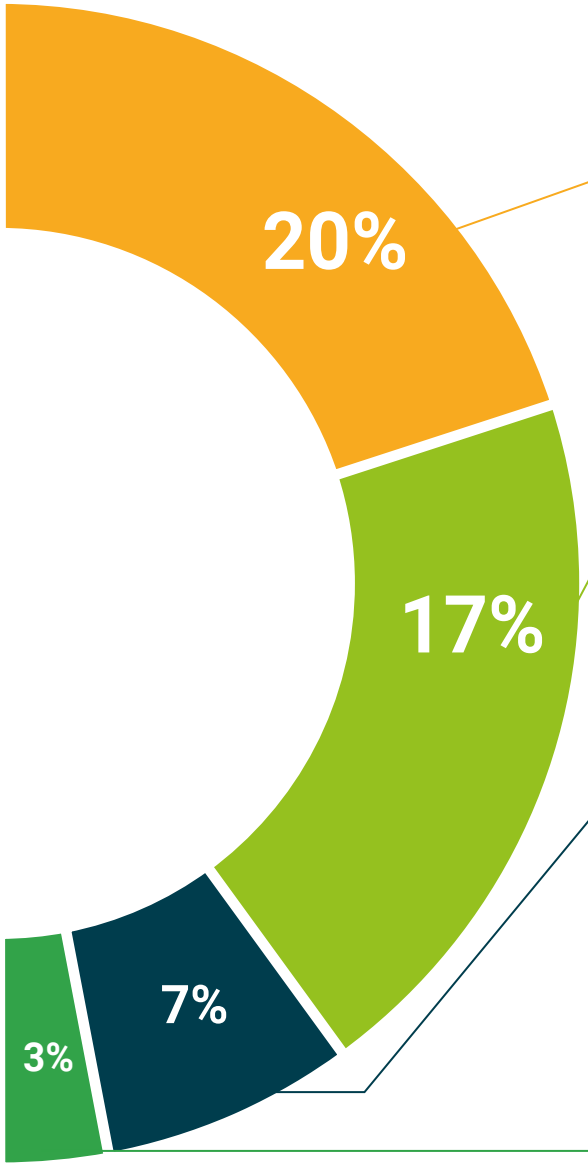
The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.





Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

07

Certificate

The Master's Degree in Teaching Mathematics in Pre-School and Primary School guarantees students, in addition to the most rigorous and up-to-date education, access to a Master's Degree issued by TECH Global University.

Successfully complete this program and receive your university qualification without travel or laborious paperwork"

This private qualification will allow you to obtain your **Master's Degree diploma in Teaching Mathematics in Pre-School and Primary School** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (***official bulletin***). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Master's Degree in Teaching Mathematics in Pre-School and Primary School**

Modality: **online**

Duration: **12 months**

Accreditation: **60 ECTS**

tech global university

Mr./Ms. _____, with identification document _____
has successfully passed and obtained the title of:

Master's Degree in Teaching Mathematics in Pre-School and Primary School

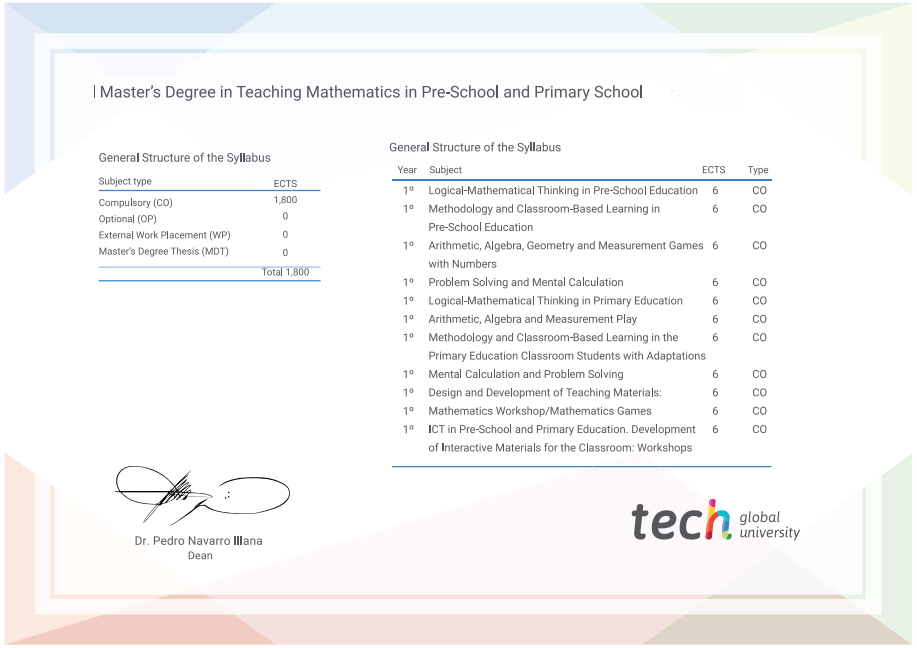
This is a program of 1,500 hours of duration equivalent to 60 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

Dr. Pedro Navarro Illana
Rector

Unique TECH Code: AFWORD23S techtitute.com/certificates



Master's Degree in Teaching Mathematics in Pre-School and Primary School

General Structure of the Syllabus

Subject type	ECTS
Compulsory (CO)	1,800
Optional (OP)	0
External Work Placement (WP)	0
Master's Degree Thesis (MDT)	0
	Total 1,800

General Structure of the Syllabus

Year	Subject	ECTS	Type
1º	Logical-Mathematical Thinking in Pre-School Education	6	CO
1º	Methodology and Classroom-Based Learning in Pre-School Education	6	CO
1º	Arithmetic, Algebra, Geometry and Measurement Games with Numbers	6	CO
1º	Problem Solving and Mental Calculation	6	CO
1º	Logical-Mathematical Thinking in Primary Education	6	CO
1º	Arithmetic, Algebra and Measurement Play	6	CO
1º	Methodology and Classroom-Based Learning in the Primary Education Classroom Students with Adaptations	6	CO
1º	Mental Calculation and Problem Solving	6	CO
1º	Design and Development of Teaching Materials:	6	CO
1º	Mathematics Workshop/Mathematics Games	6	CO
1º	ICT in Pre-School and Primary Education. Development of Interactive Materials for the Classroom: Workshops	6	CO

Dr. Pedro Navarro Illana
Dean

tech global university

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
