01

Introduction

This course will address the requirements of ISO 14001 Environmental Management Systems, describing the points of the reference standard and analyzing the high-level structure. This knowledge will enable companies to meet the environmental objectives of any project, including the integration of sustainable development parameters and the performance of audits, with the control of options involving the different usable energy sources and adaptation to climate change.

“

A complete update on the regulation and application of Environmental Management Systems in Organizations”

A detailed analysis of the principles and requirements for the implementation and application of Environmental Management Systems in Organizations established in ISO 14001 will be carried out.

The more specific aspects and requirements of the ISO 14001 standard will be analyzed in detail, such as the study of the company's context, identification of interested parties, analysis of risks and opportunities and study of actions to address them, always within the framework of environmental management.

Criteria for the identification, evaluation and treatment of significant environmental aspects and the setting of environmental objectives aimed at the continuous improvement of the environmental management system will be highlighted. Concrete examples of communication methodologies and environmental consideration, integrated within the System, are presented.

Finally, focus on the basic requirements of EMAS, analyzing the main differences with ISO 14001 and achieving a precise knowledge of the guidelines for an optimal transition between the two systems.

By completing and passing the evaluations of this program, the student will obtain a solid knowledge of the rules and regulations to be applied in relation to environmental and energy management in organizations. A complete, high-intensity program, which will allow students to incorporate into practice the most up-to-date knowledge in this field of work. A highly interesting subject due to its current relevance and the mandatory integration of the standards that will be studied in the program.

With an approach focused on efficiency, this program has been created to allow students to optimize their efforts and achieve the best learning results in the shortest possible time. Additionally, as it is a 100% online program, the student is not constrained by fixed timetables or the need to move to another physical location, but can access the contents at any time of the day, balancing their professional or personal life with their academic life.

This **Postgraduate Certificate in Environmental Management Systems in Organizations** contains the most complete and up-to-date educational program on the market. The most important features of the specialization are:

- ◆ Practical cases presented by experts in Environmental and Energy Management in Organizations
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where the self-assessment process can be carried out to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Access to content from any fixed or portable device with an Internet connection

A highly effective program that will boost your professional practice in the environmental and energy management sector"

“

The most comprehensive teaching material and the best audiovisual systems on the educational market, to provide you with an immersive learning experience”

Supported by excellent multimedia content, developed with the latest educational technology, this program will provide the professional with situated and contextual learning, i.e., study in a simulated environment that will provide immersive learning programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, which means the student must try to solve the different real-life situations of that arise throughout the academic program. For this purpose, the professional will be assisted by an innovative interactive video system, developed by renowned and experienced experts in Environmental Management Systems in Organizations

Integrate the requirements that current environmental management standards demand in any project or organization into your way of working, with the control of ISO 14001.

A 100% online program that will allow you to combine your studies with your professional work with maximum organizational flexibility.

02

Objectives

The general objective of this Postgraduate Certificate is to promote the professional's capacity to act in this field so that they can incorporate the main advances in this field of work and intervention.

“

Get up to speed by incorporating all the latest environmental management innovations that are being implemented in organizations with a high-impact preparatory program”

General Objectives

- ◆ Develop a solid understanding of energy and environmental certifications
- ◆ Develop and implement an ISO 14001 environmental management system

“

Professional growth that will give you the upgrade boost you've been looking for"

Specific Objectives

- ◆ Master the application and development of the environmental management system in organizations
- ◆ Analyze and implement the requirements and specifications of the ISO 14001 standard: 2015
- ◆ Identify and assess the significant environmental aspects, environmental impacts, and environmental risks and opportunities for organizations
- ◆ Identify non-conformities and corrective actions of an environmental management system
- ◆ Establish in detail the differences between ISO 14001 and EMAS and study how to transition the management system from ISO 14001 to EMAS

03

Course Management

A multidisciplinary teaching staff will offer the most up-to-date and comprehensive knowledge in this field, accompanying the professional during the learning process and making available their experience and real vision of the profession. A unique opportunity to learn directly from experts in this field of work.

“

You will learn from experts in this sector, who will provide you with a specific and direct vision of the reality of this field of work"

Management

Mr. Abreu Acosta, Guzmán

- ◆ Technician in the area of Territorial Planning and Management at Gestión y Planeamiento Territorial y Medioambiental de Canarias S.A.
- ◆ Degree in Law
- ◆ Occupational Health and Safety Auditor, Specialization in OSHAS 18001
- ◆ Degree in Environmental Sciences. UNIVERSITY OF HUELVA
- ◆ Lawyer in his own law firm, specialized in Urban Development and Environmental Law.
- ◆ Freelance consultant specializing in Risk Prevention, Quality and Environment.

Professors

Mr. Espinosa, César

- ◆ Head of the Environment Service of Arona City Council
- ◆ Degree in Law
- ◆ Recipient of the IV Felipe González Vicent Prize, Faculty of Law ULL in 1994.
- ◆ UNESCO Global Geopark El Hierro Technical Manager
- ◆ Technical Manager El Hierro World Biosphere Reserve
- ◆ Legal Coordinator of the Department of Rural and Marine Affairs and the Environment of the Island Council of El Hierro (2011-2015).
- ◆ Technical Project Manager

Mr. Palanco, César

- ◆ Director - Manager INTENSA PROMILAB
- ◆ Industrial Engineer. Mechanical Intensification
- ◆ Industrial Technical Engineer. Industrial Electronics Specialty
- ◆ Construction Manager
- ◆ Installation and testing technician
- ◆ Purchasing Manager TOGOGAS Huelva S.L.
- ◆ Installation technician TOGOGAS Huelva S.L.
- ◆ Commercial Delegate TOGOGAS Huelva S.L.

Ms. Granell García, Lilia

- ◆ Manager and Administrator of Recap Canarias Finance
- ◆ Degree in Physical Sciences, specializing in Fundamental Physics.
- ◆ Recap ibérica Financa, ltd.
- ◆ Technical and commercial director SOTEC group
- ◆ Technical and commercial director SEIFERMANN
- ◆ CEO of CERCAN

Mr. Contreras Acuña, Manuel

- ◆ Teacher (Secondary, Vocational Training)
- ◆ Doctor in Chemical Sciences Faculty of Experimental Sciences, University of Huelva
- ◆ Master's Degree in Instrumental Techniques in Chemistry, Faculty of Experimental Sciences, University of Huelva.
- ◆ Triple Master's Degree in Occupational Health and Safety, Quality and Environmental Management
- ◆ Interim Substitute Professor Department: Chemistry and Materials Science
- ◆ Contract Researcher Department: Chemistry and Materials Science

Mr. Toscano, Manuel

- ◆ Professor of the Department of Earth Sciences of the University of Huelva.
- ◆ Degree in Geological Sciences from the University of Granada.
- ◆ Technical Engineer in Drilling and Mining Prospecting
- ◆ Technical Engineer in Energy, Fuels and Explosives Resources
- ◆ Degree in Mine Exploitation from the University of Huelva
- ◆ Author and/or co-author of more than ninety national and international contributions.
- ◆ National and international projects financed by the Andalusia Council, the Spanish government and the European Union.

Mr. Bueno Márquez, Pedro

- ◆ Technician of the Directorate General of Vocational Training, Ministry of Education and Sports
- ◆ Chemical Engineering 1997 - 2002 University of Huelva
- ◆ Postgraduate Course on Renewable Energy Management and Development, Catholic University of Avila
- ◆ Technical Teacher of Vocational Training. Department of Education and Sports
- ◆ Andalusian Energy Agency Technician
- ◆ Project Engineer. Aldesa Engineering & Services
- ◆ Project Engineer. Andalusian Studies Group (Grande S.L.)

04

Structure and Content

The syllabus of this program includes all the necessary contents to achieve a broad and up-to-date knowledge of all the aspects involved in proper of the environmental impact management, in relation to the new existing requirements. A program specifically created to provide our students with a continuous process of skills improvement that will boost their real capacity for intervention.

**RADIOACTIVE
WASTE**

**RADIOACTIVE
WASTE**

“

This stimulating and flexible program will allow you to cover all the areas of knowledge you need to intervene as an expert in environmental management”

Module 1. Environmental Management systems

- 1.1. Management Systems: ISO 14001
 - 1.1.1. Environmental Management Systems
 - 1.1.2. Benefits of the Environmental Management System
 - 1.1.3. Phases in the Implementation of an EMS
- 1.2. Organizational Context and Leadership
 - 1.2.1. Understanding of the Organization, its Context and Stakeholders
 - 1.2.2. Scope of the System
 - 1.2.3. Environmental Policy
 - 1.2.4. Roles and Responsibilities
- 1.3. Planning: Environmental Aspects and Impacts
 - 1.3.1. Environmental Aspects and Impacts: Cause-Effect Relationship
 - 1.3.2. Identification of Environmental Aspects
 - 1.3.3. Evaluation of Environmental Aspects
- 1.4. Planning: Objectives, Risks and Opportunities
 - 1.4.1. Actions to Address Risks and Opportunities
 - 1.4.2. Legal Requirements
 - 1.4.3. Environmental Objectives and Planning to Achieve Them
- 1.5. Support: Resources, Competence and Awareness
 - 1.5.1. Resources
 - 1.5.2. Competence.
 - 1.5.3. Awareness
- 1.6. Support: Documented Communication and Information
 - 1.6.1. Internal and External Environmental Communication
 - 1.6.2. Documented Information
 - 1.6.3. Documentation Control

- 1.7. Operation
 - 1.7.1. Operational Planning and Control
 - 1.7.2. Life Cycle Analysis Perspective
 - 1.7.3. Emergency Preparation and Response
- 1.8. Performance Evaluation
 - 1.8.1. Monitoring, Measurement, Analysis and Evaluation
 - 1.8.2. Internal Audit
 - 1.8.3. Management Review
- 1.9. Improvement
 - 1.9.1. Non-Conformities and Corrective Actions
 - 1.9.2. Continuous Improvement of the EMS
 - 1.9.3. Continuous Improvement of Environmental Performance
- 1.10. Transition from 14001 to EMAS
 - 1.10.1. The EMAS Regulation
 - 1.10.2. Transition from ISO 14001 to EMAS
 - 1.10.3. ISO 14001 vs. EMAS

Advance your skills with the most interesting study systems on the online teaching scene"

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world”

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This intensive Engineering program at TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH Technological University you will use Harvard case studies, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career”

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method is the most widely used learning system by the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases.

They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH is the first university in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

06

Certificate

The Postgraduate Certificate in Environmental Management Systems in Organizations guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this training program
and receive your university certificate
without travel or laborious paperwork”*

This **Postgraduate Certificate in Environmental Management Systems in Organizations** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by job markets, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Environmental Management Systems in Organizations**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
