01

Introduction

Conservation and Maintenance contracts represent a niche of work that is not subject to ups and downs, since they are tasks that must be performed on a regular basis so that the quality level of the infrastructures is adequate for their use. On this occasion, TECH offers a specialization of the highest level that will enable the student to carry out Conservation and Maintenance tasks, and that will elevate him/her to the forefront of civil engineering. Don't think twice and give your career a boost by joining our alumni community.

“

Continue your training with this Postgraduate Certificate and expand your skills to perform Conservation and Maintenance tasks. Your effort will allow the use of infrastructures with total quality"

This Postgraduate Certificate will study the state of the sector and the type of contracts that this part of civil engineering encompasses, as well as the type of businesses that opt for this type of contract and the differences that must be taken into account when setting up a business to opt for this type of contract.

In this way, the necessary guidelines and knowledge will be provided for the drafting of bids in order to bid for conservation and maintenance contracts. These contracts have a different spirit than works contracts, so specific tools and approaches must be used.

The student will also be trained in the specific work involved in contracts for the conservation and maintenance of road, railroad and port infrastructures. The agenda will focus on the specific machinery for this type of work, as well as its performance and capabilities. This knowledge will allow the professional to optimally calculate the size of the equipment needed to carry out this type of task.

In short, TECH takes the student through theoretical and practical knowledge to a higher level of teaching, and shows him another way of studying and learning, more organic, simpler and more efficient. TECH will work to keep him motivated and to create in him a passion for learning. And it will push you to think and develop critical thinking.

This Postgraduate Certificate is designed to give the student access to the specific knowledge of this discipline in an intensive and practical way. A great value for any professional.

It should be noted that since it is a 100% online Postgraduate Certificate, the student is not conditioned by fixed schedules or the need to move to another physical location, but can access the contents at any time of the day, balancing their work or personal life with their academic life.

This **Postgraduate Certificate in Infrastructure Conservation and Maintenance** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- ♦ The development of case studies presented by experts in infrastructure and civil engineering
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Special emphasis on innovative methodologies in safety, health and PACMA
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

The completion of this Postgraduate Certificate will place civil engineering professionals at the forefront of the latest developments in the sector"

“

This Postgraduate Certificate is the best investment you can make in selecting an up-to-date program in the field of Civil Engineering. We offer you quality and free access to content"

It includes, in its teaching staff, professionals belonging to the field of Civil Engineering, who contribute their work experience in this Postgraduate Diploma, as well as recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Infrastructure Conservation and Maintenance

This training comes with the best didactic material, providing you with a contextual approach that will facilitate your learning"

We offer you a 100% online Postgraduate Certificate that will allow you to combine your study time with the rest of your daily obligations"

02

Objectives

The Postgraduate Certificate in Infrastructure Conservation and Maintenance is aimed at facilitating the professional's performance so that he/she can acquire and know the main novelties in this field, which will allow them to practice there profession with the highest quality and professionalism.

“

Our goal is to make you the best professional in your sector. And for this we have the best methodology and content"

General Objectives

- ◆ Acquire new knowledge in Civil Engineering and Infrastructures
- ◆ Acquire new skills in terms of new technologies, latest machinery and software, knowledge of next steps and recycling
- ◆ Extrapolate this knowledge to other sectors of the industry, focusing on those fields that require more trained and qualified personnel year after year
- ◆ Processing the data generated in Civil Engineering activities, through the BIM environment, a mandatory reality for the drafting, construction, management and operation of infrastructures

“

Improving your skills in the field of civil engineering will allow you to be more competitive. Continue your specialization and give your career a boost"

Specific Objectives

- ◆ Study Conservation and Maintenance contracts in depth
- ◆ Drafting bids for maintenance and conservation contracts, both from a technical and economic point of view
- ◆ Training in the performance of maintenance tasks
- ◆ Coordinate human and machinery teams for the optimal development of the conservation and maintenance contract
- ◆ Know the details in the conservation and maintenance of roads, railroads and ports
- ◆ Have the guidelines for the economic management of the contract
- ◆ Study in depth the specific machinery for road and railroad maintenance and conservation tasks

03

Course Management

TECH has professionals specialized in each area of knowledge, who pour into our specializations the experience of their work. People of recognized prestige in their area of expertise who have joined forces to offer the best specialization in the market.

“

Our university employs the best professionals in all areas who share their knowledge to help you"

Management

Mr. Uriarte Alonso, Mario

- Civil Engineer from the University of Cantabria.
- Professional Master's Degree in Oceanographic Engineering
- 17 years of experience in the field of construction execution, having worked as construction manager in works of highways, airports, ports, canals, railways and hydroelectric works.
- In the engineering field, he is the CEO of Candois Ingenieros Consultores SL., a business dedicated to the drafting of projects and construction management.

Mr. Torres Torres, Julián

- Civil Engineer, University of Granada.
- Professional Master's Degree in Structures
- 14 years of experience in the field of construction execution, having worked as construction manager in road, urbanization and WWTP works.
- In the engineering field, he has developed his work as an independent freelance and as technical director at CANDOIS INGENIEROS CONSULTORES SL.

Professors

Mr. Ruíz Megía, Alejandro

- ♦ Civil Engineer, Universidad Alfonso X el Sabio de Madrid.
- ♦ Master's Degree in Occupational Risk Prevention.
- ♦ 15 years of experience in the field of construction execution, having worked as construction manager in highway works, urbanizations, coastal and port works, airports and singular construction.

“

*Specialize in the world's leading
private Spanish-speaking
online university”*

04

Structure and Content

The structure of the contents has been designed by the best professionals in the civil engineering sector, with extensive experience and recognized prestige in the profession, and aware of the benefits that the latest educational technology can bring to higher education.

“

We have the most complete and up-to-date academic program in the market. We strive for excellence and for you to achieve it too"

Module 1. Infrastructure Conservation and Maintenance

- 1.1 Conservation Contracts
 - 1.1.1 Administrations Responsible for the Operation of Infrastructures
 - 1.1.2. Types of Contracts
 - 1.1.3. Businesses for Maintenance and Upkeep
 - 1.1.4. Purpose of Management and Maintenance Contracts
- 1.2. Drafting Bids for Conservation and Maintenance
 - 1.2.1. Objectives of the Bidding Business
 - 1.2.2. Search for a Suitable Contract
 - 1.2.3. Drafting of the Technical Offer
 - 1.2.4. Preparation of the Financial Offer
 - 1.2.5. Management and Maintenance Contracts
- 1.3. Figures within the Conservation and Maintenance Contract
 - 1.3.1. Maintenance Contract Manager
 - 1.3.2. Maintenance Manager
 - 1.3.3. Maintenance Technician
 - 1.3.4. Maintenance Personnel
- 1.4. Road Maintenance and Upkeep
 - 1.4.1. Analysis of the Initial Situation
 - 1.4.2. Customer Needs Analysis
 - 1.4.3. Analysis of Routine and Special Tasks
 - 1.4.4. Economic Monitoring of the Contract
- 1.5. Railroad Maintenance and Upkeep
 - 1.5.1. Analysis of the Initial Situation
 - 1.5.2. Customer Needs Analysis
 - 1.5.3. Analysis of Routine and Special Tasks
 - 1.5.4. Economic Monitoring of the Contract
- 1.6. Port Operation
 - 1.6.1. Figures Involved in the Operation of Ports
 - 1.6.2. Conservation Tasks
 - 1.6.3. Maintenance Tasks
 - 1.6.4. Engineering Works
 - 1.6.5. Commercial Management of the Port

- 1.7. Port Conservation and Maintenance
 - 1.7.1. Maintenance and Upkeep of Roads
 - 1.7.2. Maintenance and Upkeep of Docks
 - 1.7.3. Conservation and Maintenance of Port Facilities
 - 1.7.4. Maintenance and Upkeep of Office Buildings
- 1.8. Economics of the Conservation and Maintenance Contract
 - 1.8.1. Economic studies of Public Services
 - 1.8.2. Economic Engineering Applied to Public Services
 - 1.8.3. Regulation of the Service Fee
 - 1.8.4. Economic Planning of Conservation and Maintenance Works
- 1.9. Specific Machinery and Personnel for Road Maintenance and Upkeep
 - 1.9.1. Sizing of the Human Resources Team
 - 1.9.2. Dimensioning of the Necessary Machinery
 - 1.9.3. Specific Machinery Requirements
 - 1.9.4. New Technologies Applied to Conservation and Maintenance
- 1.10. Machinery and Specific Personnel in Railway Maintenance and Upkeep
 - 1.10.1. Sizing of the Human Resources Team
 - 1.10.2. Dimensioning of the Necessary Machinery
 - 1.10.3. Specific Machinery Requirements
 - 1.10.4. New Technologies Applied to Conservation and Maintenance

A comprehensive and multidisciplinary program that will allow you to excel in your career, following the latest advances in the field of Civil Engineering"

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“Our program prepares you to face new challenges in uncertain environments and achieve success in your career”

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Case Studies**

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

**Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The **Postgraduate Certificate in Infrastructure Conservation and Maintenance** guarantees, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this
master's and receive your
university degree without
travel or laborious paperwork"*

This **Postgraduate Certificate in Infrastructure Conservation and Maintenance** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** certificate issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the **Postgraduate Certificate** and meets the requirements commonly demanded by job markets, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Infrastructure Conservation And Maintenance**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
