01

Introduction

This high-level program takes an in-depth look at the design and execution of road works. Throughout these weeks of training the student will acquire in-depth knowledge of the layout and earthworks as a basis for the design and execution of works that do not include structures themselves.

“

Acquire in-depth knowledge in the design and layout of roads, understanding the importance of the different phases and stages for the realization of the same”

Highways are an indispensable part of the transportation network, both for people and goods. These transportation routes have been indispensable since the origins of civilization, since they encourage the progress of peoples. The global pandemic caused by COVID19 has once again highlighted the importance of roads as a means of communication for supplying the population.

In this program, the student will initially analyze how roads have evolved, with special attention to their materials, and how there are currently pre-project phases in the planning of a new infrastructure.

In the following, the layout and earthworks will be discussed as a basis for the design and execution of works that do not include structures per se.

The project ends with an extensive pavement execution program. The course will cover the sizing of pavements, the different types of pavements, and finally the laying of the pavement. Here, the student will find a new topic in this type of training related to the management of an asphalt plant.

As main tools, the topics that make up the module have updated technical information, real case studies and of great interest. Always without losing sight of the digital transformation that everyone is going through and in which the road world is no exception.

In addition, as it is a 100% online course, it provides the student with the ease of being able to take it comfortably, wherever and whenever they want. All you need is a device with internet access to take your career one step further. A modality in accordance with the current times with all the guarantees to position the professional in a highly demanded area such as road construction.

This **Postgraduate Certificate in Pavement Layout, Grading and Execution** contains the most complete and up-to-date syllabus on the market. The most important features of the program include:

- ◆ Case studies presented by experts in Highway Engineering
- ◆ A deeper understanding of the management of resources for highway projects
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning.
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Be able to accurately understand the day-to-day operation of a bituminous mix manufacturing facility. From the dosing and quality marking of the different mixtures, to the study of manufacturing costs and their maintenance"

“

Detailed knowledge of the factors that affect the safety and comfort of the road, the parameters that measure it and the possible actions for its correction”

The program's teaching staff includes professionals from sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program designed to train in real situations.

The design of this Program focuses on Problem-Based Learning, by means of which the professional will have to try to solve the different situations of Professional Practice, which will be posed throughout the Program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

A high-level program that will allow you to gain in-depth knowledge of everything related to Pavement Layout, Grading and Execution.

As it is an online program, you can study wherever and whenever you want. You will only need an electronic device with internet access.

02 Objectives

The Postgraduate Certificate in Pavement Layout, Grading and Execution is aimed at providing students with the in-depth skills necessary to undertake various functions related to the management and design of projects in the area of highways. To this end, we offer a comprehensive syllabus with quality content and highly qualified management that will seek to help the professional achieve all their objectives, therefore, improving not only their qualifications, but also their rank in the sector.

“

An intensive and highly effective program that will allow professionals to make a qualitative leap in their professional practice in the sector”

General objectives

- ♦ Master the different life phases of a highway, and the associated contracts and administrative procedures, both at national and international level
- ♦ Develop detailed knowledge of how a company is managed and the most important management systems
- ♦ Analyze the different phases in the construction of a highway and the different types of bituminous mixes
- ♦ Detailed knowledge of the factors that affect the safety and comfort of the road, the parameters that measure it and the possible actions for its correction
- ♦ Gain an in-depth understanding of the different tunnel construction methods, the most frequent pathologies, and how to establish a maintenance plan
- ♦ Analyze the singularities of each type of structure, and how to optimize its inspection and maintenance
- ♦ Gain in-depth knowledge of the different electromechanical and traffic installations in tunnels, their function, operation and the importance of preventive and corrective maintenance
- ♦ Analyze the assets that comprise a road, what factors should be taken into account in inspections, and what are the actions associated with each one of them
- ♦ Accurately understand the life cycle of the road and associated assets
- ♦ In-depth breakdown of the factors that affect occupational risk prevention
- ♦ Know the fundamental aspects of the operation of a road in detail: applicable regulations, processing of files or authorizations
- ♦ Understand how a predictive traffic model is performed and its applications.
- ♦ Mastering the fundamental factors that affect Road Safety
- ♦ Understand precisely how winter maintenance is organized and managed
- ♦ Analyze the operation of a Tunnel Control Center and how the different incidents are managed
- ♦ Know in detail the structure of the Operation Manual and the actors involved in tunnel operation
- ♦ Break down the conditions for defining the minimum conditions under which a tunnel can be operated, and how to establish the associated methodology for fault resolution
- ♦ In-depth understanding of BIM methodology and how to apply it to each phase: design, construction and maintenance and operation
- ♦ Make a comprehensive analysis of the most current trends in terms of society, environment and technology: connected vehicle, autonomous vehicle, Smart Roads
- ♦ Have a firm grasp on the possibilities that some technologies are offering. In this way, combined with the student's experience, it can be the perfect alliance when designing the actual application or improving existing processes

During the course, innovative contents will be addressed regarding Pavement Layout, Grading and Execution, which will provide the student with in-depth knowledge in this sector"

Specific objectives

- ◆ Acquire in-depth knowledge in the design and layout of roads, understanding the importance of the different phases and stages for the realization of the same
- ◆ Acquire the necessary knowledge regarding the different operations related to earth moving. Developing the different existing types, with a practical approach, which allows to know their costs, performance, etc. depending on the different terrains and typology of the works to be executed
- ◆ Know, in detail, from a current and practical point of view, the constituent elements of bituminous pavements
- ◆ Develop, in a comprehensive manner, the different types of existing pavements, with special emphasis on which situations to use each one of them. All this from an objective vision based on experience, without forgetting to strengthen the knowledge from the point of view of the design of each of the different types of pavement
- ◆ Able to accurately understand the day-to-day operation of a bituminous mix manufacturing facility From the dosing and quality marking of the different mixtures, to the study of manufacturing costs and their maintenance
- ◆ Deepen in the day-to-day work of laying bituminous mixes, identifying the essential aspects and the most common difficulties in transport, paving and compacting operations

03

Course Management

The management and teaching staff that TECH has assembled for this Postgraduate Certificate is made up of renowned professionals who bring their years of experience in this field to the program. This way, and acquiring the knowledge of professionals with so much experience, the student will have the guarantees that learning from recognized experts offers when it comes to specializing in a sector that is constantly being updated.

“

The best specialists in this sector will give you first-hand experience of the reality of this field of work"

Management

Mr. Barbero Miguel, Héctor

- ♦ Head of Safety, Operations and Maintenance at Empresa Mantenimiento y Explotación M30, (API Conservación, Dragados-IRIDIUM and Ferroviaal Servicios)
- ♦ Somport Bi-national Tunnel Operations Manager
- ♦ Head of COEX in one of the Areas of the Provincial Council of Bizkaia
- ♦ COEX technician in Salamanca for the maintenance of the roads of the Junta de Castilla y León
- ♦ Civil Engineer, Alfonso X el Sabio University
- ♦ Technical Engineer in Public Works from the University of Salamanca
- ♦ Professional Certificate in Spanish in Digital Transformation by MIT. Partner of EJE&CON
- ♦ He has held various positions in the road maintenance sector under the jurisdiction of the different Administrations

Professors

Ms. Hernández Rodríguez, Lara

- ◆ Specialist in international railway tenders. In the International Contracting Department of OHL Construction, Barcelona
- ◆ Production Manager at Nuevos Accesos Ampliación Sur. Phase 1A. Port of Barcelona
- ◆ Production Manager. Work on the abutments of the Barranco de Pallaresos viaduct on the Madrid-French border high-speed railway line
- ◆ Degree in Civil Engineering from the Polytechnic University of Madrid. Madrid
- ◆ Expert in Port and Coastal Engineering from the University of Las Palmas de Gran Canaria

Mr. Navascués Rojo, Maximiliano

- ◆ Works Group Leader at the multinational company DRAGADOS
- ◆ Civil Engineer by the Polytechnic University of Madrid and Master in Tunnels and Underground Works by the Spanish Association of Tunnels and Underground Works
- ◆ Master's Degree in E-business and E-Commerce from the Comillas Pontificia University ICAI-ÍCADE
- ◆ Executive-MBA from Business School
- ◆ PMP (Project Management Professional) certificate by the Project Management Institute

Mr. Fernández Díaz, Álvaro

- ◆ Area delegate at trabajos Bituminosos SLU
- ◆ Civil Engineering at the E.T.S.I. de Caminos, C y E of the Polytechnic University of Madrid
- ◆ Course on occupational risk prevention for managers of construction companies. Taught by the Construction Labor Foundation
- ◆ Motivation, teamwork and leadership course. Delivered by Fluxá Training and Development

Take a leap in your labor skills and compete among the best in the industry"

04

Structure and Content

The structure of the contents of this program has been designed by a team of professionals in the field of highway engineering, who have contributed their years of experience into this Postgraduate Certificate. So, from 1 module that has valuable, unique and innovative information on the design and construction of roads, the student will be able to acquire knowledge, tools and skills to practice in a booming sector with total success.

“TECH puts the most comprehensive collection of content on the market at your fingertips. You only have to bring your enthusiasm to study”

Module 1. Layout, Grading and Execution of Pavements

- 1.1. Road Planning and Design
 - 1.1.1. Development and Evolution of Materials
 - 1.1.2. Preliminary Study and Preliminary Design
 - 1.1.3. The Project
- 1.2. The Layout
 - 1.2.1. Plan Layout
 - 1.2.2. Elevation Plotting
 - 1.2.3. Cross Section
 - 1.2.4. Drainages
- 1.3. Earth Moving, Excavation and Blasting
 - 1.3.1. Earthwork
 - 1.3.2. Excavations
 - 1.3.3. Ripping and Blasting
 - 1.3.4. Singular Actions
- 1.4. Pavement Sizing
 - 1.4.1. Esplanade
 - 1.4.2. Road Surface Sections
 - 1.4.3. Analytical Calculation
- 1.5. Constituent Elements of Bituminous Pavements
 - 1.5.1. Aggregates
 - 1.5.2. Bitumens and Binders
 - 1.5.3. Filler
 - 1.5.4. Additives
- 1.6. Hot Mix Asphalt
 - 1.6.1. Conventional Bituminous Mixes
 - 1.6.2. Discontinuous Bituminous Mixtures
 - 1.6.3. Bituminous Mixes type SMA

- 1.7. Management of an Asphalt Plant
 - 1.7.1. Plant Organization
 - 1.7.2. Dosing of Mixtures: Working Formulas
 - 1.7.3. Quality Control: CE Marking
 - 1.7.4. Site maintenance
- 1.8. Cold Asphalt Mixtures
 - 1.8.1. Bituminous Slurries
 - 1.8.2. Gravel Irrigation
 - 1.8.3. Cold Agglomerate
 - 1.8.4. Complementary Techniques: Crack Sealing, etc
- 1.9. Rigid Sidewalks
 - 1.9.1. Design
 - 1.9.2. On-site Installation
 - 1.9.3. Maintenance of Rigid Pavements
- 1.10. On-site Installation
 - 1.10.1. Transportation and Paving
 - 1.10.2. Compaction
 - 1.10.3. Good Practices

“

This TECH Postgraduate Certificate in Pavement Layout, Grading and Execution will make you stand out professionally, boosting your career path towards excellence in the sector”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world”

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This intensive Engineering program at TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH Technological University you will use Harvard case studies, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method is the most widely used learning system by the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases.

They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH is the first university in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

06

Certificate

The Postgraduate Certificate in Pavement Layout, Grading and Execution guarantees you, in addition to the most rigorous and updated training, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this training and receive your university degree without travel or laborious paperwork”

This **Postgraduate Certificate in Pavement Layout, Grading and Execution** contains the most complete and updated program on the market.

After the student has passed the evaluations, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** by tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Pavement Layout, Grading and Execution**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
