tech 06 | Introduction

Chemistry is the science that studies the composition, properties and changes that matter undergoes or, in other words, it is the discipline that analyzes and understands how substances are composed and how they are transformed, based on the scientific method to achieve its objectives.

In this course we will apply this science to water, to acquire the knowledge of the importance of its existence from various points of view. Therefore, this course focuses on its properties, both physical and chemical, its structure and types of bonds, addressing the chemical reactions in which it plays an essential role in the life cycle.

In addition, the course goes into the different water purification processes, as well as the components that can influence the composition and quality of drinking water.

Upon completion of this course, the student will have acquired the necessary knowledge to understand, from a chemical point of view, the morphology, structure and properties of this molecule, as well as its importance in many essential chemical reactions from the life cycle to the most modern industrial applications. You will also gain knowledge about the composition of water that determines water quality and about the most important purification processes.

It should be noted that as this is a 100% online course, the student is not conditioned by fixed schedules or the need to move to another physical location, but can access the contents at any time of the day, balancing their work or personal life with their academic life.

This **Postgraduate certificate in Water Chemistry** contains the most complete and up to date educational program on the market. The most important features of the program include:

- » The development of case studies presented by Water Chemistry experts.
- » The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- » Practical exercises where the self-assessment process can be carried out to improve learning
- » Special emphasis on innovative methodologies in water chemistry.
- » Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- » Access to content from any fixed or portable device with an Internet connection.

Do not miss the opportunity to take this course in Water Chemistry with us. It's the perfect opportunity to advance your career"

This course is the best investment you can make in selecting a refresher program to update your knowledge in Water Chemistry"

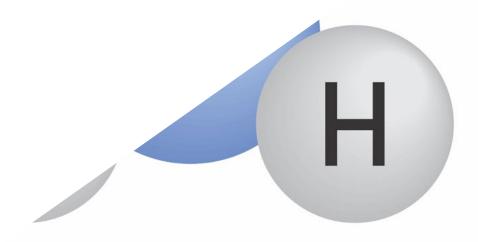

Its teaching staff includes professionals belonging to the field of water engineering, who bring to this training the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

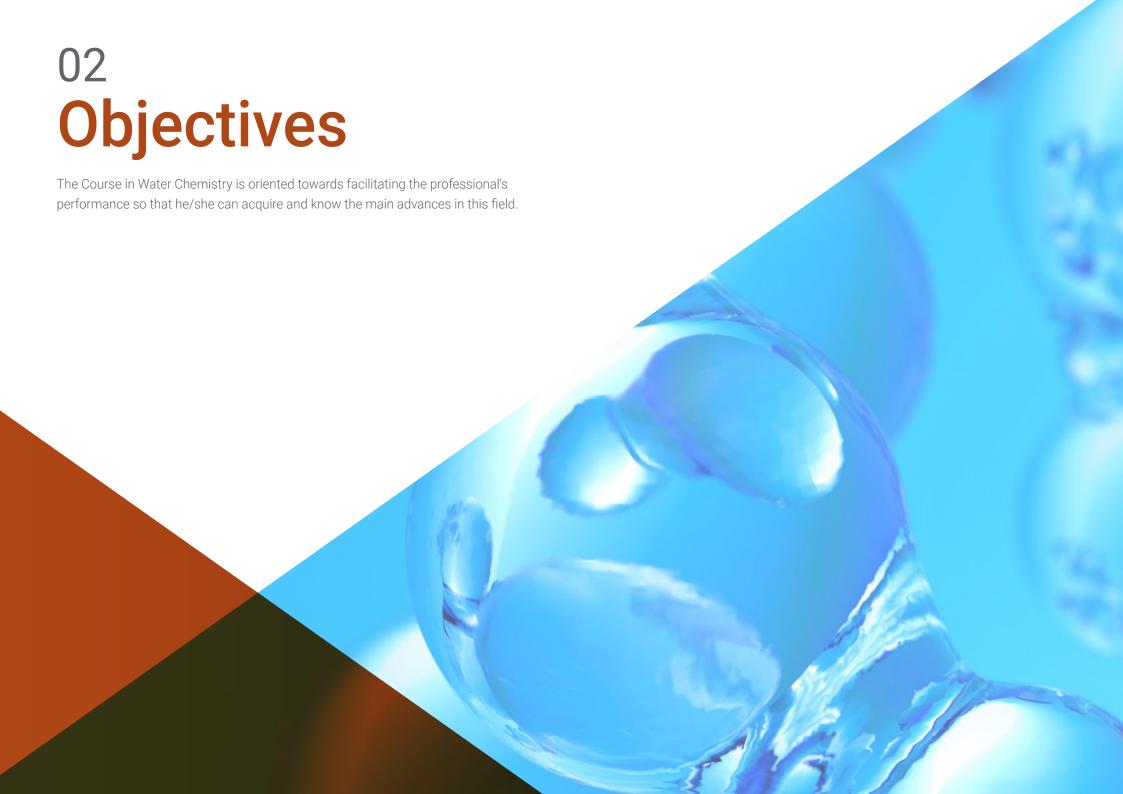

This program is designed around Problem Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the professional will be assisted by an innovative interactive video system developed by renowned and experienced water chemistry experts.

This training is provided with the best didactic material, which will allow for contextual study to facilitate your learning.

This 100% online course will allow you to combine your studies with your professional work. You choose where and when to train.

WATER (H₂0)

tech 10 | Objectives

General Objectives

» Acquire the knowledge of chemistry related to its function, composition, structure and reactivity, in order to understand its importance in the life cycle and in other fields related to it.

Take the step to get up to date on the latest developments in Water Chemistry"

Specific Objectives

- » Discuss in detail the water molecule, structure, states of aggregation, chemical bonds, and physical and chemical properties.
- » Study the reactivity of the water molecule in organic and inorganic reactions
- » Addressing the great importance of this molecule as a universal solvent in the life cycle, dealing also with the main thermodynamic laws
- » Learn more about the different water purification processes and the components that determine its quality as drinking water.

tech 14 | Course Management

Management

Mr. David Nieto-Sandoval González-Nicolás.

- Industrial Technical Engineer by the E.U.P. of Málaga.
- Industrial Engineer by E.T.S.I.I.
- Master's Degree in Integral Management of Quality, Environment and Health and Safety at Work from the University of the Balearic Islands
- Working for more than 11 years as a consultant in engineering, project management, energy saving and circularity in organizations, he has been working both for companies and on his own account for clients in the private agri-food industry and the institutional sector for more than 11 years.
- Professor certified by the EOI in the areas of Industry, Entrepreneurship, Human Resources, Energy, New Technologies, and Technological Innovation.
- Trainer of the European INDUCE project
- Trainer in institutions such as COGITI and COIIM.

Professors

Castillejo de Tena, Nerea

- » Graduate in Chemical Engineering from the University of Castilla-La Mancha.
- » Master's Degree in Environmental Engineering and Management at the Institute of Chemical and Environmental Technology of the University of Castilla La Mancha.
- » Author of projects such as "Hysys Simulation, Optimization and Energy Analysis in the Waste Water Treatment Unit of the Urea Plant (PAR)" at Fertiberia Puertollano.
- » Co-author of "Methodology for calculating energy efficiency in waste-to-energy facilities"
- » Member of ACMIQ

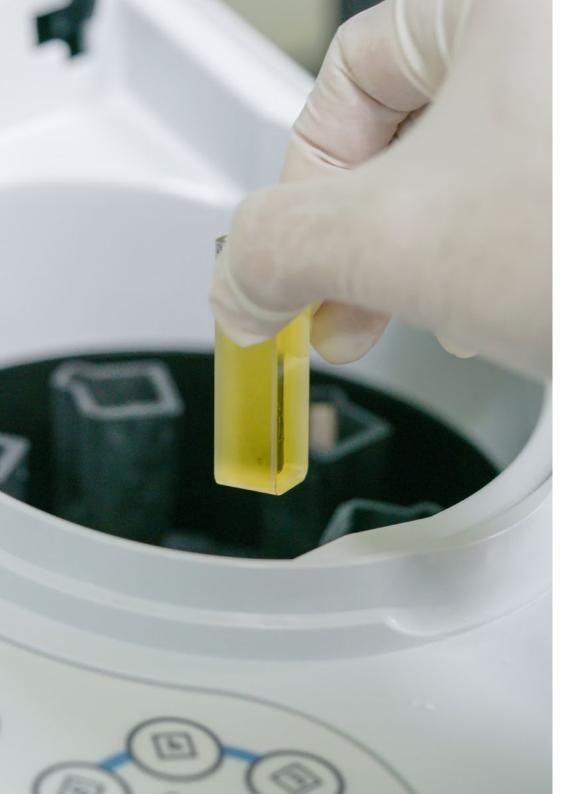

tech 18 | Structure and Content

Module 1. Water Chemistry

- 1.1. Water Chemistry
 - 1.1.1. Alchemy
 - 1.1.2. Evolution of Chemistry
- 1.2. The Water Molecule
 - 1.2.1. Crystallography
 - 1.2.2. Crystalline Structure of Water
 - 1.2.3. Aggregation States
 - 1.2.4. Links and Properties
- 1.3. Physical and Chemical Properties of Water
 - 1.3.1. Physical Properties of Water
 - 1.3.2. Chemical Properties of Water
- 1.4. Water as a Solvent
 - 1.4.1. Ion Solubility
 - 1.4.2. Solubility of Neutral Molecules
 - 1.4.3. Hydrophilic and Hydrophobic Interactions
- 1.5. Organic Water Chemistry
 - 1.5.1. The Water Molecule in Organic Reactions
 - 1.5.2. Hydration Reactions
 - 1.5.3. Hydrolysis Reactions
 - 1.5.4. Hydrolysis of Amides and Esters
 - 1.5.5. Other Water Reactions. Enzymatic Hydrolysis

Structure and Content | 19 tech

1 (1.0000000000	1110+00	Olasiatini
1.6.	inordanic	vvater	Chemistry

- 1.6.1. Hydrogen Reactions
- 1.6.2. Oxygen Reactions
- 1.6.3. Reactions to Obtain Hydroxides
- 1.6.4. Reactions to Obtain Acids
- 1.6.5. Reactions to Obtain Salts

1.7. Analytical Chemistry of Water

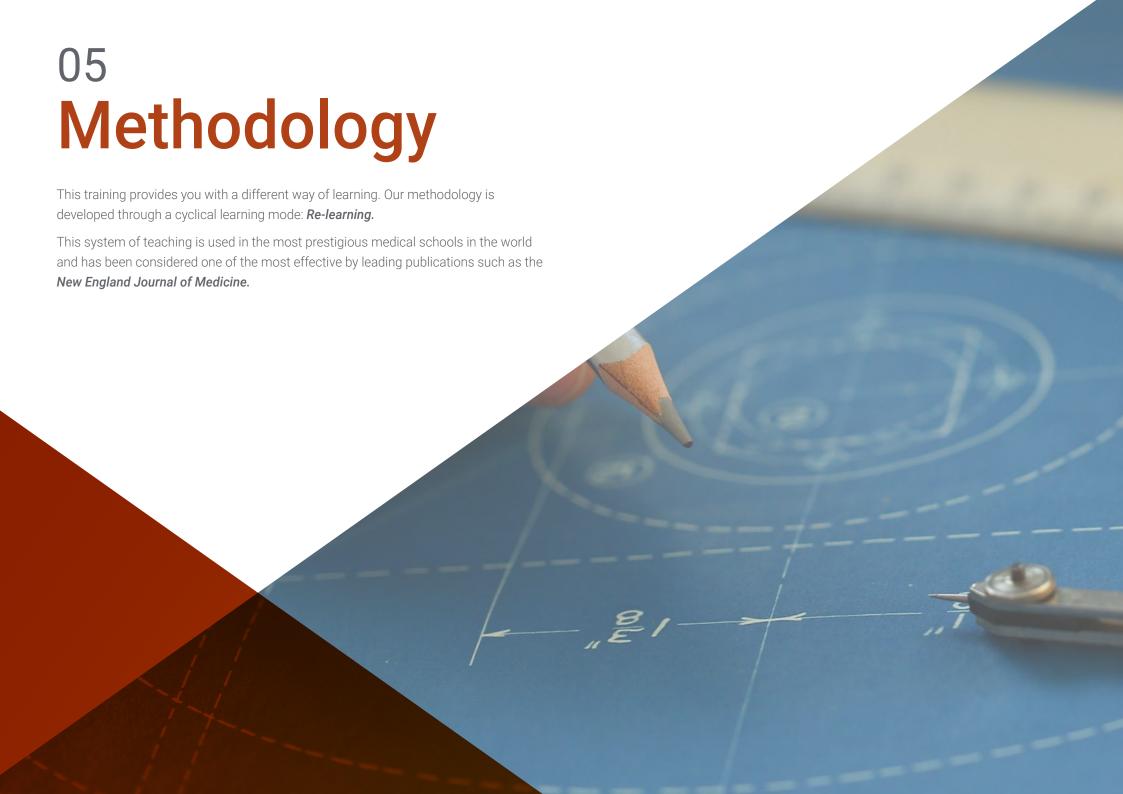

- 1.7.1. Analytical Techniques
- 1.7.2. Water Analysis
- .8. Thermodynamics of Water Phases
 - 1.8.1. Laws of Thermodynamics
 - 1.8.2. Phase Diagram. Phase Equilibrium
 - 1.8.3. Water Triple Point

1.9. Water Quality

- 1.9.1. Organoleptic Characters
- 1.9.2. Physical-chemical Characters
- 1.9.3. Anions and Cations
- 1.9.4. Undesirable Components
- 1.9.5. Toxic Components
- 1.9.6. Radioactivity

1.10. Chemical Water Purification Processes

- 1.10.1. Water Demineralization
- 1.10.2. Reverse Osmosis
- 1.10.3. Decalcification
- 1.10.4. Distillation
- 1.10.5. Ozone and UV Disinfection
- 1.10.6. Filtration

tech 22 | Methodology

At TECH we use the Case Method

Our program offers you a revolutionary approach to developing your skills and knowledge. Our goal is to strengthen your skills in a changing, competitive, and highly demanding environment.

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative.

This Hazardous Waste course is an intensive program that prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH Technological University you will use Harvard case studies, with which we have a strategic agreement that allows us to offer you material from the best university in the world.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

In a given situation, what would you do? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, you will be presented with multiple real cases. You will have to combine all your knowledge, and research, argue, and defend your ideas and decisions.

tech 24 | Methodology

Re-learning Methodology

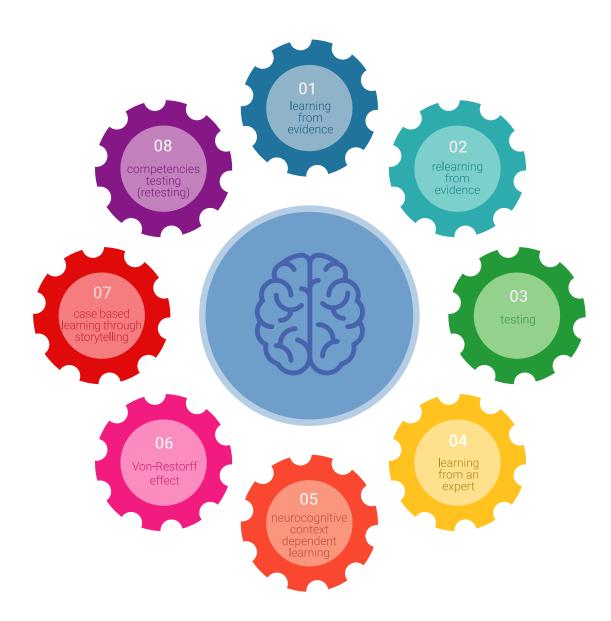

Our University is the first in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Re-learning.

In 2019 we obtained the best learning results of all Spanish-language online universities in the world.

At TECH you will learn with an innovative methodology designed to train the managers of the future. This method, at the forefront of international teaching, is called Re-learning.

Our University is the only one in Spanish-speaking countries licensed to incorporate this successful method. In 2019 we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best Spanish online university indicators.

Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success. In fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

Based on the latest evidence in neuroscience, not only do we know how to organize information, ideas, images, memories, but we also know that the place and context where we have learned something is crucial for us to be able to remember it and store it in the hippocampus, and retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 26 | Methodology

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Classes

There is scientific evidence on the usefulness of third-party expert observation.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

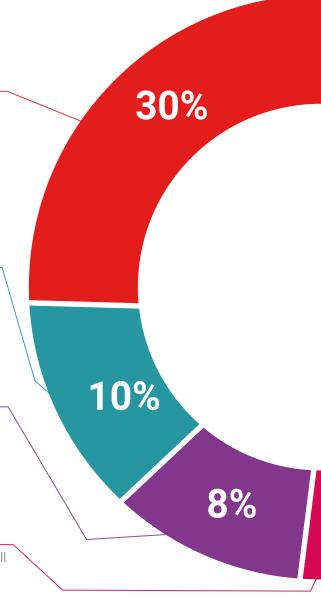

Practising Skills and Abilities

You will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

You will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story"

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

tech 30 | Certificate

This **Postgraduate Certificate in Water Chemistry** contains the most complete and up to date scientific program on the market.

After the student has passed the evaluations, they will receive their corresponding Postgraduate Certificate issued by **TECH Technological University.**

The diploma issued by **TECH Technological University** will express the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by job exchanges, competitive examinations and professional career evaluation committees.

Title: Postgraduate Certificate in Water Chemistry

ECTS: 6

Official Number of Hours: 150

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
