Introduction

The commitment of high-income countries to the territories around the world that suffer most from inequality and poverty in its multiple dimensions is manifested through their policy of International Cooperation for the Development of Peoples. Thanks to the coordination of governments and the selfless action of millions of volunteers and associations around the world, it has been possible to act in depressed areas, bringing food, health care, education and various resources for progress. This is precisely the field of action of this 100% online program, which seeks to transfer to the graduates the best strategies to design, monitor and evaluate projects of this type in an effective and guaranteed manner.

“

Would you like to become an expert in International Cooperation for the Development of Peoples? Then bet on a program that will provide you with all the resources you need to achieve it in just 12 months”

The world is experiencing real barbarities caused by social, political and cultural difficulties in different countries. War, hunger, inaccessibility to free quality health care, male chauvinism, poverty, natural disasters, etc. There are dozens of causes that increase the inequality gap between developed and underdeveloped environments, places where cooperation and aid are more necessary than ever. For this reason, the actions carried out by entities such as the Red Cross, UNICEF, Save the Children, WWF, etc., in coordination with governmental entities such as the UN, have made it possible to act in depressed areas, contributing to their recovery to the extent possible, as well as to mitigate the effects through the provision of basic resources such as food, clothing and, if necessary, economic contributions.

However, this is a field that requires meticulous and organized work, in order to make the most of every means (whether physical or collaborative), trying to make it reach its destination in the most effective way. And this is precisely the field of action on which this program is focused. TECH presents the Master's Degree in International Cooperation for the Development of Peoples as an opportunity for all those professionals seeking specialization in the social area for community aid and collaboration. It is a 100% online degree in which professionals can find all the information necessary to carry out the effective design of any collaborative project, its monitoring and evaluation. All this in a sustainable manner and in accordance with current regulations, focusing on the promotion of human rights, above all else.

For this, you will have 1,500 hours of the best theoretical, practical and additional content designed by a team of experts specialized in different fields such as the International Law, Nursing and Education. Among them is the figure of a guest Director, a leading figure in the field of International Cooperation who will contribute to this educational experience with 10 exclusive Masterclasses in video format, speaking on the different topics that are currently in the spotlight of the Development of Peoples.

This **Master's Degree in International Cooperation for the Development of Peoples** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Practical cases presented by experts in International Development Cooperation
- ♦ The graphic, schematic and practical contents of the book provide technical and practical information on those disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will delve into the challenges of People's Development and the most innovative and effective strategies to address them in the current global context"

“

This Master's Degree will give you the keys to undertake your own cooperation project for the promotion of the SDGs from multiple social, political and cultural perspectives”

The program's teaching staff includes professionals in the field who contribute their work experience to this degree as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby professionals must try to solve the different professional practice situations that arise throughout the program. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

A program with which you will be able to work on the knowledge of the best cooperation strategies from wherever and whenever you wish thanks to its 100% online modality.

You will learn how international organizations such as the UN, UNICEF or the Red Cross are working and you will be able to delve into their successful strategies for effective aid.

02 Objectives

Course Management

Not all universities include teacher support in their programs, formed by specialized teams in the field developed in the program. However, TECH does. In addition, this university submits candidates to an exhaustive and demanding analysis, resulting in the formation of the best faculty, made up of experts with a broad and extensive professional experience in the field, as is the case of this Master's Degree.

“

In the Virtual Campus you will find a direct communication tool with the teaching team, so that you can get in touch with its members whenever you need to solve a doubt”

International Guest Director

Piotr Sasin is an international expert with experience in non-profit management, specializing in humanitarian assistance, resilience and international cooperation for the development of peoples. Indeed, he has worked in complex and challenging environments, helping communities affected by conflict, displacement and humanitarian crises. In addition, his focus on social innovations and participatory planning has allowed him to implement long-term solutions in vulnerable areas, significantly improving living conditions.

He has also held key roles as Director of Refugee Crisis Response at CARE, where he has led humanitarian initiatives to support displaced people in various regions. He has also worked as Country Director at People in Need, where he was responsible for coordinating community development and rapid emergency response programs. In turn, his role as Country Representative at the Terre des Hommes Foundation has allowed him to manage projects focused on child protection.

Consequently, at the international level, he has been recognized for his ability to manage large-scale projects in the field of international development cooperation, collaborating with governments, NGOs and multilateral agencies in various regions. Likewise, his leadership has been instrumental in promoting resilience in communities affected by disasters, fostering local empowerment through urban planning and sustainable development. In this way, he has been praised for his focus on conflict mitigation and his ability to build strategic partnerships.

Ultimately, Piotr Sasin has a strong academic background, with a Master's degree in Urban Planning and Regional Development, as well as a Bachelor's degree in Ethnology and Anthropological Culture, both degrees from the University of Warsaw in Poland. Thereby, his research has focused on international cooperation and sustainable planning in humanitarian crisis contexts.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning. Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Case Studies**

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

**Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
