tech 06 | Introduction

From a holistic and comparative perspective, Social Anthropology is key to the study of human societies. That is why it is so useful to apply it to contemporary problems and challenges, such as poverty, discrimination, violence or climate change, among others. And it is in this context that the Postgraduate Certificate in Applied Social Anthropology arises, which seeks to prepare Humanities professionals who are able to apply anthropological knowledge for the analysis and solution of social problems.

Throughout the course, topics such as social anthropological evolution, sociological methodology when undertaking research or the role of women in development are addressed. In the same way, students will examine the role of indigenous peoples in the new ecological movements.

The study program lasts 6 weeks and it is taught 100% online, which allows students to organize themselves flexibly and adapt the pace of study to their needs. In addition, it uses the Relearning pedagogical methodology, so students will be able to internalize each and every one of the concepts more quickly.

This **Postgraduate Certificate in Applied Social Anthropology** contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in Applied Social Anthropology
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Take a very complete tour through the social anthropological evolution thanks to TECH"

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

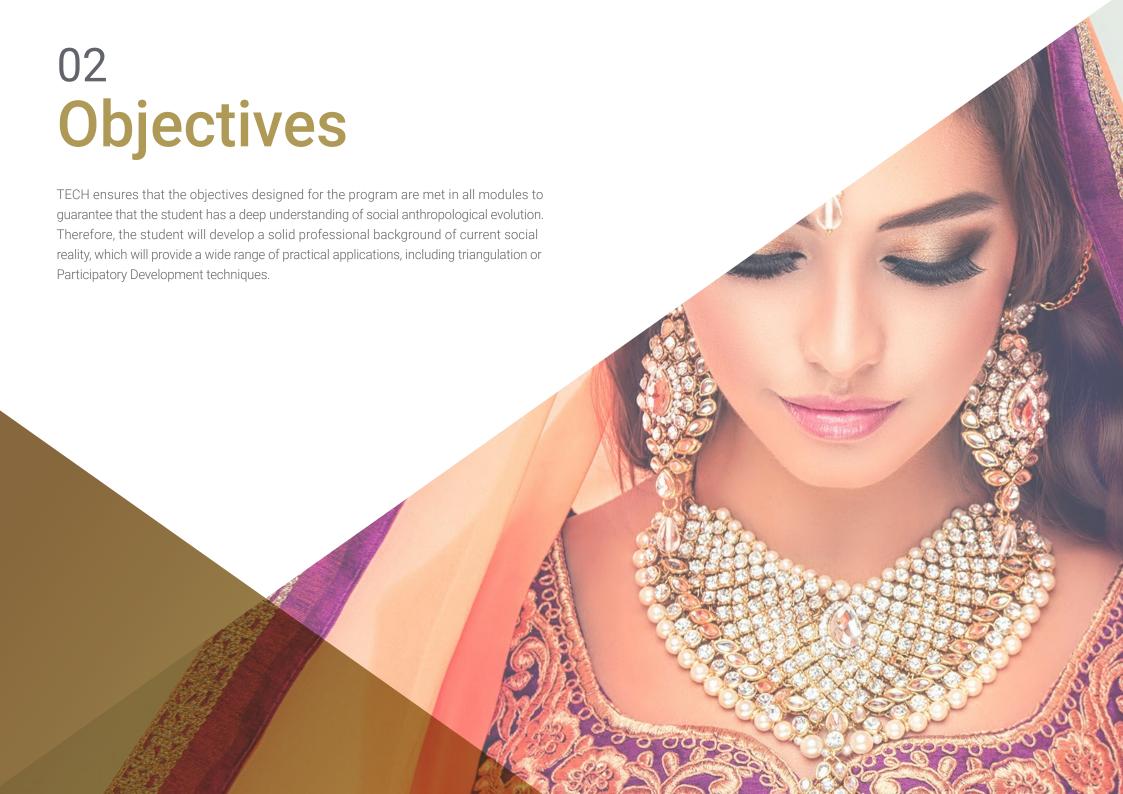

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

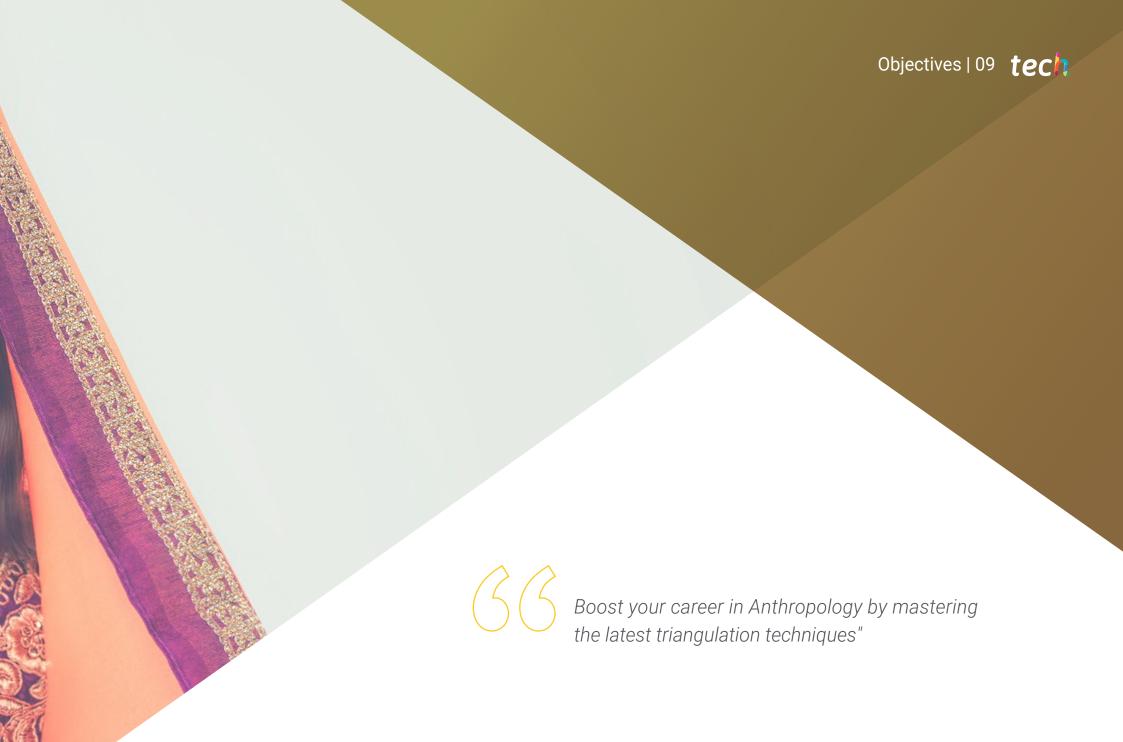

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

It undertakes the most advanced research thanks to an extensive review of sociological methodology.

See the benefits of specializing from home and launch your career in Sociology and Anthropology to new heights.

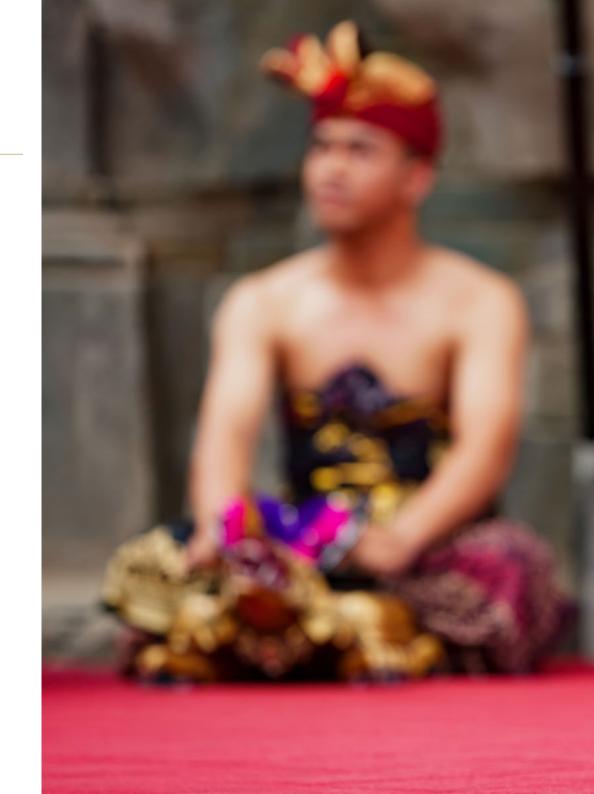

tech 10 | Objectives

- Study the phenomenon of Gentrification and how it affects contemporary societies
- Analyze the migratory and tourist processes from a modern sociological perspective
- Understand the role of sociologists in the face of new developments in communities, with a diverse and pluralistic approach

Achieve the objectives proposed by TECH and enhances Participatory Research"

Objectives | 11 tech

- Examine social anthropological developments
- Review sociological methodology in undertaking research, as well as the ethics underlying it
- Assess the role of women in development, as well as the role of indigenous peoples in new ecological movements

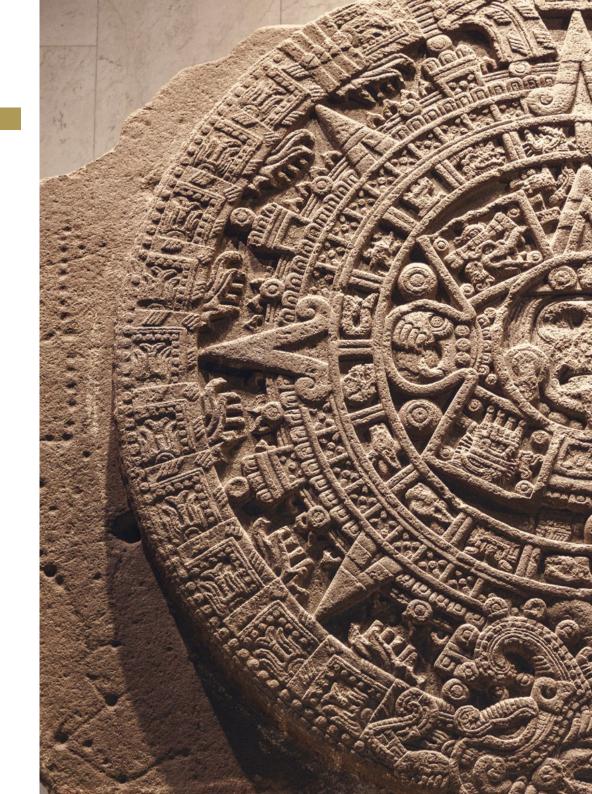

tech 14 | Structure and Content

Module 1. Social Anthropology Applied

- 1.1. Evolution of Applied Anthropology
 - 1.1.1. The Role of the Anthropologists
 - 1.1.2. Historical Development
 - 1.1.3. Phases of Applied Anthropology
- 1.2. Anthropology and Social Planning
 - 1.2.1. Importance of the Anthropology in the Social Context
 - 1.2.2. Applied Anthropology
 - 1.2.3 Practical Anthropology
- 1.3. Methods and Ethics of Applied Research
 - 1.3.1. Ethnography and Participant Observation
 - 1.3.2. Interview with Key Informants
 - 1.3.3. Quantification through Social Indicators
 - 1.3.4. Triangulation Techniques
 - 1.3.5. Participatory Research
 - 1.3.6. Ethics in Applied Research
- 1.4. Concept of Development and its Institutionalization
 - 1.4.1. Institutionalization and Development
 - 1.4.2. Anthropological Perspective
 - 1.4.3. Sustainable Development: Concepts, Limitations, Ecological Basis
- 1.5. Theories and Ways of Measuring Development
 - 1.5.1. Theories about Economic Development
 - 1.5.2. Development as Modernization
 - 1.5.3. Development through Dependency
 - 1.5.4. Latin American Structuralism
- 1.6. Ecology and Rural Development in the Third World
 - 1.6.1. Green Revolution vs. Agroecology
 - 1.6.2. Local Knowledge: Technological Ethnocentrism
 - 1.6.3. The Community Development Process
 - 1.6.4. Rediscovering Local Initiative

Structure and Content | 15 tech

- 1.7. Poverty Measurement Methods and Indicators
 - 1.7.1. Contributions and Critiques from Anthropology
 - 1.7.2. Measuring Methods: Traditional and Modern Indexes and Their Indicators
 - 1.7.3. Anthropological Reflections on the Forms of Measurement and the Conceptualization of Poverty and Development
- 1.8. Anthropology Applied to Participatory Development
 - 1.8.1. Acculturation, Modernization and Induced Sociocultural Change
 - 1.8.2. Directed Sociocultural Change and Modernization (1960-1970s)
 - 1.8.3. Participatory Development
- 1.9. Women in Development
 - 1.9.1. Women, Gender and Development
 - 1.9.2. The Visibility of Women in Development
 - 1.9.3. The "Women in Development" (WID) Approach
- 1.10. Indigenous Peoples and New Social Movements
 - 1.10.1. Sustainable Development
 - 1.10.2. Political ecology: Objectives and syllabus
 - 1.10.3. The Political Ecology of Extractivism in Latin America
 - 1.10.4. Indigenous Peoples and Development

Don't miss the opportunity to enroll in a degree that will help you rediscover local initiative in the ecological field"

tech 18 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

Methodology | 19 tech

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 20 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 21 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 22 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

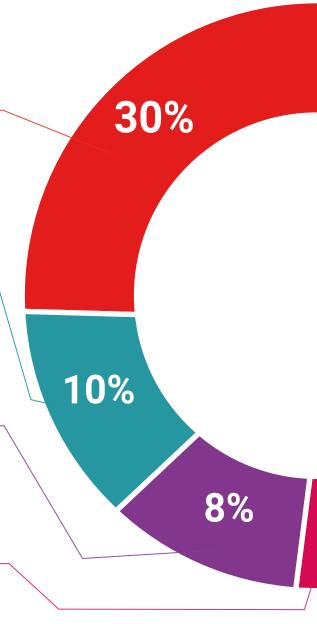

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

4%

tech 26 | Certificate

This **Postgraduate Certificate in Applied Social Anthropology** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Certificate in Applied Social Anthropology Official N° of Hours: 150 h.

^{*}Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
