01
Introduction

By incorporating a Gender Perspective into the sociological investigations, it is possible to unravel how gender roles, norms and values influence people's experiences and opportunities. That is why this Postgraduate Certificate is essential for any person interested in mastering how gender inequalities affect societies. Through this program, students will examine how the gender perspective can be applied in various contexts, including Economics, Politics and Culture. The degree is designed to provide a solid overview of the Gender Perspective, aimed at students from different levels and disciplines. In addition, the program is delivered 100% online, which means that students can complete it from anywhere in the world.

Get updated on the latest advances in Gender Perspective with this Diploma"

The Gender Perspective is an essential topic in the study of Sociology, since it allows us to understand the complex social relations that exist between men and women, and how these relations influence people's lives in all areas. Not for nothing, sociology has shown that Gender is a constructed social category, which is related to other aspects such as race, social class, sexual orientation and age. Despite the fact that in many countries progress has been made in the fight for Gender Equality, the reality is that there are still profound inequalities in access to opportunities and resources for men and women. In many cases, these inequalities have been normalized through cultural practices and norms that perpetuate stereotypes and gender roles, often limiting the development of individuals.

That is why the Postgraduate Certificate in Gender Perspective is presented as an essential tool for anyone interested in mastering how gender inequalities affect societies around the world. Through a series of modules, students will be able to delve into topics such as gender as an analytical category, Socialization and Gender Roles, Sexuality and Human Rights, and Gender Equality in Work and Politics.

The program is delivered 100% online, which means that students can complete it from anywhere in the world. Relearning's pedagogical methodology ensures that students specialize in an active and participatory way, and also focuses on the development of practical skills. In addition, the degree is flexible, which means that students can arrange academic resources according to their own pace and schedule.

This **Postgraduate Certificate in Gender Perspective** contains the most complete and up-to-date program on the market. The most important features include:

- Practical case studies are presented by experts in Gender Perspective
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Excel in the analysis of Socialization and gender roles"

Get up to date on how to promote equal participation in politics.

Determine the types of Gender Violence against women.

"*Position yourself as a prestigious sociologist through a unique specialization in the market*"

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. This will be done with the help of an innovative system of interactive videos made by renowned experts.

02
Objectives

Given the increasing complexity in the analysis of impactful social processes and changes, the main objective of this Postgraduate Certificate is to provide sociologists and specialists with the most effective tools to thoroughly examine everything related to the Gender Perspective in different spheres of society. In this sense, the program's curriculum is specifically designed to focus on the most important modules regarding Equality in Politics or Work.

" *Launch your career by analyzing the social and cultural factors involved in the construction of gender"*

General Objectives

- To analyze current social processes from both a classical and contemporary perspective
- To understand the contemporary sociology of communication, education, family and culture
- To study the growing relevance of the gender perspective and diversity in today's societies

Specific Objectives

- To assume an ethical commitment against gender inequality
- To know the social and cultural factors involved in the construction of gender
- To recognize the main theoretical currents of feminist thought
- To know how to analyze gender inequalities, their causes and the indicators for their measurement

Reach all your professional goals in Sociology by mastering the fundamentals of the Gender Perspective"

03
Structure and Content

TECH has adopted the Relearning methodology to maximize the teaching effectiveness of the curriculum. This methodology means that key concepts and terminology on Gender Perspective are repeated throughout the syllabus, which translates into a more natural and efficient specialization. Thanks to this, students will not have to dedicate a great amount of study hours to master the contents, since they also have a wide variety of complementary material, including high quality audiovisual resources that will reinforce the acquired knowledge.

"

*A curriculum to address the
Sex-Gender System"*

Module 1. Sociological Analysis from a Gender Perspective

1.1. Sex-Gender System
    1.1.1. Gender as an Analytical Category
    1.1.2. Gender as a Basic Organizing Principle of Societies
    1.1.3. Associated Concepts (Sexism, Patriarchy, Androcentrism, Production-Reproduction, Work-Employment, etc.)
    1.1.4. Intersectionality

1.2. Socialization and Gender Roles
    1.2.1. The Differential Socialization of Men and Women
    1.2.2. The School Language as a Differentiation Vehicle
    1.2.3. The Image of Women in the Media
    1.2.4. Study of Masculinities
    1.2.5. The Private Sphere and Motherhood
    1.2.6. Sexuality as a Vehicle for Inequality

1.3. Paid and Unpaid Labor
    1.3.1. Sexual Division of Labor
    1.3.2. Labor force participation of women
    1.3.3. Care work and its Social Assessment
    1.3.4. Uses of Time
    1.3.5. Poverty and Social Exclusion

1.4. Gender and Politics
    1.4.1. The Participation of Men and Women in Political Life
    1.4.2. The power of decision and representation
    1.4.3. Equality Policies
    1.4.4. Intervention and Evaluation from a Gender Perspective
    1.4.5. Gender Mainstreaming
    1.4.6. Actions of International Organizations

1.5. Gender-Based Violence Against Women
    1.5.1. Definition and Keys of Violence
    1.5.2. Types of Violence
    1.5.3. Causes and Consecuences on the Victim
    1.5.4. Intervention and Legal Framework

A highly comprehensive program with which you will specialize in Gender in Crisis"

04
Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

" *Our program prepares you to face new challenges in uncertain environments and achieve success in your career"*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.
Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

30%

10%

8%

20%

25%

3%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Certificate

The Postgraduate Certificate in Gender Perspective guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

" *Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"*

This **Postgraduate Certificate in Gender Perspective** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate diploma** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
