Introduction

Social Communication plays a fundamental role in International Development Cooperation. However, it presents a series of challenges in this area, such as the lack of access to information or the digital divide in developing countries. That is why NGOs and different humanitarian projects require professionals who are up to date in the field of Communication, being this program an unique opportunity to update their knowledge. Through it, students will analyze in detail the actors involved in the development of impoverished regions and how to ensure the Right to Information or Freedom of Speech. All this through an online modality and with prestigious teachers at your disposal.

“

Thanks to this Postgraduate Certificate you will contribute to ensure the Right to Information or Freedom of Speech in developing countries”

Social Communication faces a significant challenge in developing countries: the need to adapt messages and communication channels to local specificities and cultures. In this sense, many initiatives are designed and implemented from a Western perspective, without taking into account the cultural and linguistic differences that exist in the recipient countries. This can lead to inappropriate messages or a lack of understanding by the local population, which in turn is likely to undermine the effectiveness of projects.

It is all the more necessary to have a qualification that meets the current requirements of specialization in Social Communication in view of the diversification and revaluation of Communication. Therefore, this program is the opportunity that Humanities professionals were looking for to specialize in this area, with which they will work as social communicators facilitating the operation of primary organizations, government agencies or NGOs.

This will be achieved by starting from the basics of International Development Cooperation, examining the sociological theories on the subject or the work to consolidate a democracy. Then, students will explore the implications of communication in this cooperation, analyzing the role of social movements or the tensions between professional and activist journalism.

All this complete specialization will be within your reach without the need to attend a single day at an on-site center. Likewise, students will be able to manage their own academic deadlines so that they can combine the Postgraduate Certificate with their professional obligations.

This **Postgraduate Certificate in International Cooperation and Social Communication** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in International Cooperation and Social Communication
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

This qualification is a must if you intend to develop your professional activity in line with the Sustainable Development Goals and the Millennium Development Goals

“

In this Postgraduate Certificate you will benefit from an online educational methodology to examine Communication and Cooperation in times of crisis with dynamic academic resources”

Do you want to have a good mastery of the types of communication carried out from NGDOs? With TECH you will do it in only 300 hours.

You will have expert precision in analyzing the structure and objectives of social movements.

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

02 Objectives

Thanks to the achievement of the objectives set by the postgraduate certificate, the students will have advanced competences that will allow them to develop as social communicators in the field of International Cooperation for Development. In this sense, they will have the skills to develop with solvency in specific contexts such as local cultures, promoting the rights related to Communication and Information. With all this, they will be able to design innovative Social Communication plans.

A very complete syllabus with which you will delve into the Communication plans within the framework of International Cooperation"

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:
