tech 06 | Introduction

The study of the Metaphysics of Being is at the heart of the knowledge and developments of philosophy. This Postgraduate Certificate compiles the most important developments in this subject to offer the professional a wealth of information and, above all, its application to the analysis and examination of reality.

In addition, with this Postgraduate Certificate you will learn with the most effective systems for the study of this subject.

If the goal is to improve oneself, achieve a positive change on a personal level, interact with the best and belong to the new generation of professionals capable of developing their work anywhere in the world, this may be the way to go.

A Postgraduate Certificate fully compatible with other work, personal, teaching or study commitments. From the start, in its teaching approaches, to the end, in its assessments, the system will be flexible to the student's needs. Consequently, the results are much more efficient, since the study will not become an unbearable burden, but rather, a stimulating and easy challenge to undertake and bring to fruition.

This **Postgraduate Certificate in Metaphysics of Being** contains the most complete and up-to-date program on the market. The most important features include:

- Practical cases to apply the theoretical content to real life situations
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- It contains practical exercises where the self-assessment process can be carried out to improve learning
- Algorithm-based interactive learning system for decision-making in the situations that are presented to the student.
- · Special emphasis on practical learning
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

This Postgraduate Certificate will allow you to grow as a philosophy professional and as a humanist, significantly expanding your capacity for philosophical analysis and understanding"

Study with the greatest university of the technological era and live a new experience of professional growth preparing you in the philosophy of law"

At TECH Technological University we offer you the most innovative, creative and different proposal, in a dynamic institution with talent and international recognition. With a space to exchange ideas, experience and reflections. The professional will be able to share the experience in the study, through forums and other collaborative tools 100% online.

TECH Technological University accompanies the student at all times thanks to an involved and committed faculty. The university's teaching staff transmits what they do in their professional performance, working from a real, lively and dynamic context. But, above all, the critical side of the student is explored, their ability to question things, their competence in problem solving, their interpersonal skills.

This Postgraduate Certificate is created to ensure you can study in a simple, efficient and flexible way, with the superior quality of an advanced academic program.

Learn the fundamentals of this way of observing reality, with this high quality study.

tech 10 | Objectives

General Objectives

- Break down the constitutive dimensions of humans, applying the main contributions
 of philosophical anthropology to the knowledge and understanding of oneself and
 one's fellow humans
- Explain the constitutive dimensions of humans, applying the main contributions of philosophical anthropology to the knowledge and understanding of oneself and one's fellow human beings
- Know the origin and meaning of the anthropological notion of the concept of person
- Raise human problems and discuss their implications in everyday life
- Identify anthropological conceptions diffused in cultural expressions

Objetives | 11 tech

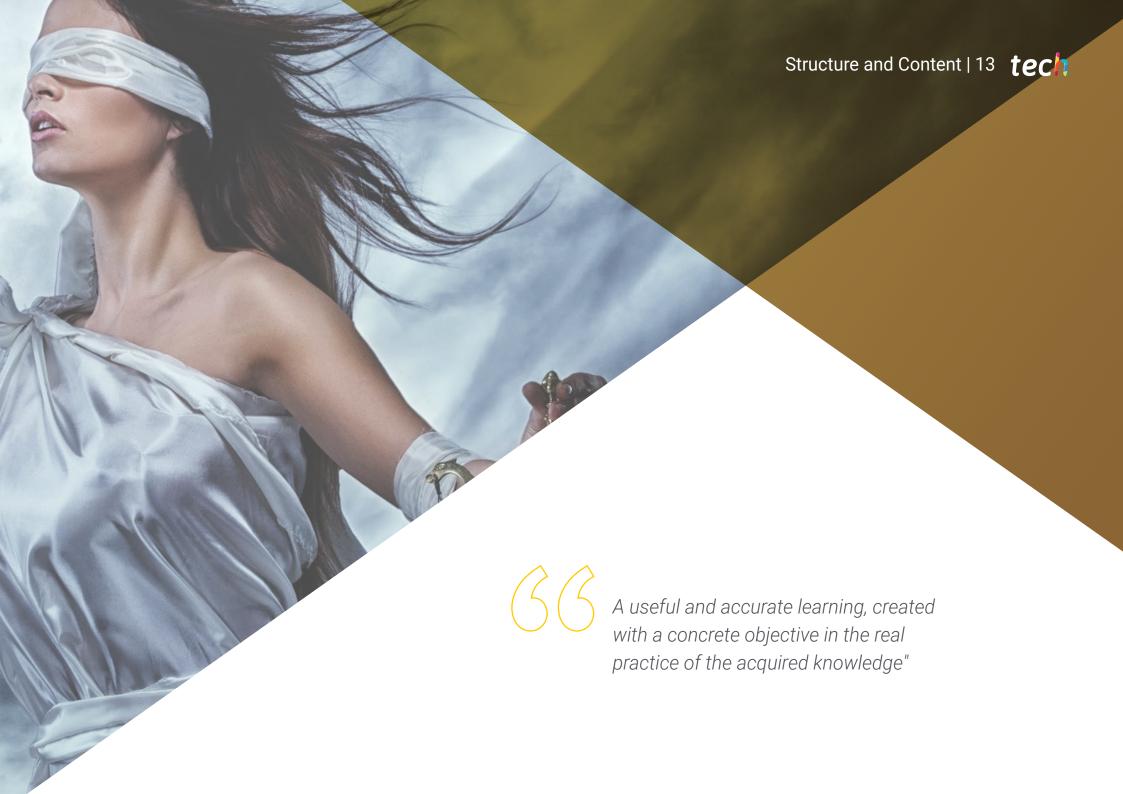

Specific Objectives

- Explain the constitutive metaphysical principles of being in the static sense
- Explain the transcendental properties of being
- Explain the categories of being by pointing out their operative nature in examples of everyday experience
- Explain the analogy of being, pointing out its operative nature in examples of everyday experience
- Analyze everyday reality to highlight metaphysical principles

A high quality Postgraduate Certificate created to boost the professionals in their philosophical activity"

tech 14 | Structure and Content

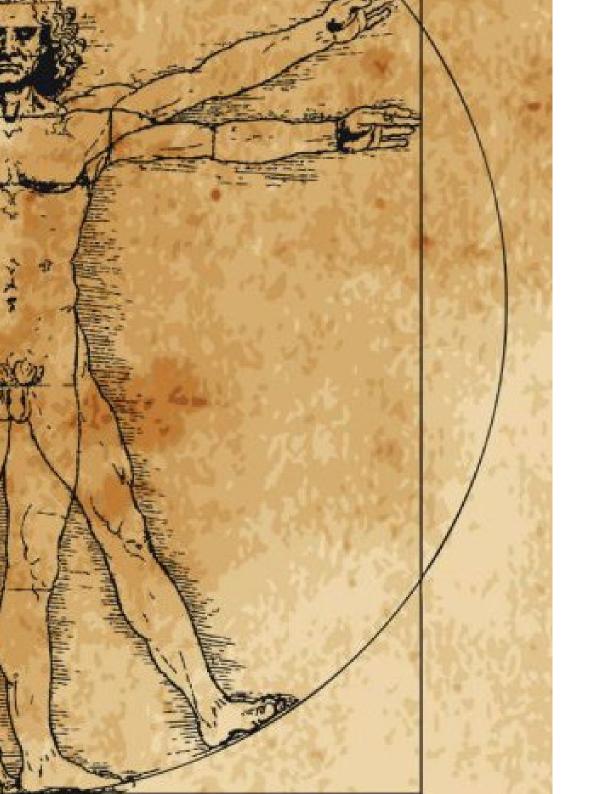

Module 1. Metaphysics of Being

- 1.1. Metaphysics in the Static Sense: Being and Entity
 - 1.1.1. Reflection on the Entity and Its Divisions: The Concept of Being Its Properties
 - 1.1.2. Entity Structure: Essence and Existence
 - 1.1.3. First Metaphysical and Logical Principles: History of the Links between Logic and Metaphysics
 - 1.1.4. Reality Denial, Metaphysical Opposition and Logical Implications of Non-Being
- 1.2. The Transcendental Properties of Being
 - 1.2.1. Unity and Truth
 - 1.2.2. Beauty and Kindness
 - 1.2.3. The Matter of Relativism
- 1.3. The Classification of Being
 - 1.3.1. Predicaments
 - 1.3.2. Substance
 - 1.3.3. Accidents in General
 - 1.3.4. Relation Particulars
 - 1.3.5. Quality Particulars
 - 1.3.6. Ontological Density of the Personal Being
- 1.4. The Participation and Analogy of Being
 - 1.4.1. Historical Background of the Doctrine of Participation
 - 1.4.2. Philosophical Classification of Analogy: Proportionality Attribution
 - 1.4.3. Logical and Mathematical Senses of Analogy

The most intensive and complete Postgraduate Certificate in Metaphysics of Being that you will find in the online teaching market"

tech 18 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

Methodology | 19 tech

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 20 | Methodology

Relearning Methodology

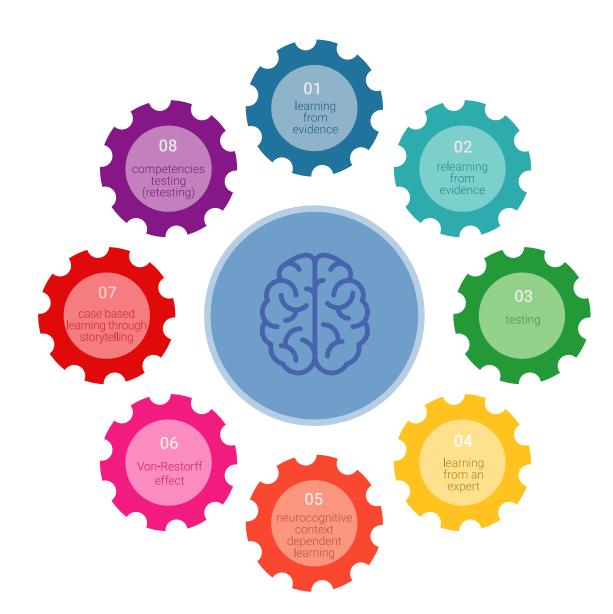

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 21 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 22 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

4%

tech 26 | Certificate

This **Postgraduate Certificate in Metaphysics of Being** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Certificate in Metaphysics of Being Official N° of Hours: 125 h.
