01

Introduction

This program will provide a complete and accurate approach to the philosophy of knowledge, from a distinctly practical standpoint, which will allow the student to learn to systematically explore the main philosophical issues concerning human value and truth. All this, with the reassurance provided by the most prestigious online university in the world.

“

Profound knowledge of the human being with a systematic analysis that the contemporary philosopher will be able to apply to the fundamental questions of everyday life"

The in-depth study of human knowledge is the working focus of the philosophy of knowledge. On this course the student will acquire the necessary knowledge to recognize the different types of knowledge, their interactions and complimentary factors.

A qualitative step that will allow the students of this course to develop their ability to critically assess this area of philosophy in the contemporary environment.

A complete compendium of knowledge and overview of developments that will propel you to the highest standards of professional competence, increasing your competitiveness in this field of work.

This Postgraduate Certificate will also teach students the most effective study methods for this subject.

If you seek self-improvement, to achieve a positive change at a personal level, to interact with the best and belong to a new generation of professionals capable of performing their work anywhere in the world, this may be the path for you.

A Postgraduate Certificate fully compatible with other work, personal, teaching or study commitments. Its system and teaching approach will flexibly adjust to student needs throughout the course. Consequently, the results are much more efficient, since study will not become an unbearable burden, but rather, a stimulating and easy challenge to undertake and bring to fruition.

This **Postgraduate Certificate in Philosophy of Knowledge** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ Case studies to apply the theoretical content to real life situations
- ◆ Graphic, schematic, and practical contents which provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ The inclusion of practical exercises where the self-evaluation process can be carried out to improve learning
- ◆ An algorithm-based interactive learning system for decision-making in the situations that are presented to the student.
- ◆ Special emphasis on practical learning
- ◆ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an internet connection

An exceptional Postgraduate Certificate that will allow you to advance in your career in a secure and steady way, with the quality of a serious and robust course"

“

This Postgraduate Certificate will allow you to grow as a philosophy professional and as a humanist, significantly expanding your capacity for analysis and philosophical understanding”

This Postgraduate Certificate is created to ensure you can study in a simple, efficient and flexible way, with the superior quality of an advanced academic program.

Study with the technical and human excellence of the world's largest 100% online university.

TECH Technological University offers the most innovative, creative and unique offering, in a dynamic, adept and internationally recognized institution. With a space to exchange ideas, experience and reflections. Students will be able to share their learning experience, through forums and other collaborative tools, all 100% online.

TECH supports its students at all times thanks to an involved and committed teaching team. The teaching team transmits their expertise in their professional performance, working from a real, lively and dynamic context. TECH explores the student's critical side, their ability to the field things, their problem-solving skills, as well as their interpersonal skills.

02 Objectives

With this Postgraduate Certificate, students will be walked through the essential contents to approach this discipline effectively, learning to undertake analyses, dissertations, presentations, debates or publications related to the subject matter, with the support of the most comprehensive knowledge with which you will learn and enjoy the benefits of a course designed to optimize your work time to the maximum.

TRAINING

“

The best Postgraduate Certificate in Philosophy of Knowledge on the online education market. An essential step to achieving excellence in your career"

General Objectives

- ◆ Acquire a rigorous philosophical method, shaped by ordered thought and the capacity for dialog, putting this into practice
- ◆ Possess adequate tools to study philosophical subjects
- ◆ Conduct fruitful scientific work
- ◆ Structure the diverse philosophical contents that will become evident in daily work environments
- ◆ Develop a mental structure and appropriate conceptual frameworks that forge philosophical criteria rooted in Christian tradition, including principles, methods and contents
- ◆ Shape students' unique identity as Christian thinkers

The profile of the humanistic professional has reached the highest levels of professionalism. Activate a growth in your competence and don't get left behind"

Specific Objectives

- ◆ Understand why knowledge is both a scientific and a philosophical subject
- ◆ Explain the constituent lines of the philosophy of knowledge
- ◆ Present the history of the philosophical problem of knowledge in its main exponents
- ◆ Critically analyze the fundamental epistemological perspectives
- ◆ Reflect on the experiences acquired as learners in daily life
- ◆ Systematically expose the main philosophical problems concerning human knowledge and its truth value
- ◆ Discern and distinguish between scientific and non-scientific knowledge
- ◆ Understand the difference between perceptual knowledge and intellectual knowledge
- ◆ Understand the complementary nature between perceptual knowledge and intellectual knowledge
- ◆ Critically evaluate contemporary positions based on the main philosophical problems concerning human knowledge

03

Structure and Content

This complete course will lead students to acquire the most comprehensive knowledge available, allowing them to achieve excellence in the humanistic field. The syllabus has been designed to meet the criteria of high academic impact of this Postgraduate Certificate, and features new teaching approaches that aim to maintain motivation and interest, which are essential to achieving the learning objectives. A high-quality teaching model that sets us apart.

“

A comprehensive and effective Postgraduate Certificate that will allow you to achieve all your goals easily and confidently”

Module 1. Philosophy of Knowledge I

- 1.1. Introduction
 - 1.1.1. Contemporary Cultural Challenge: Relativism and Distrust in the Human Capacity to Know the Truth
 - 1.1.2. Nature of the Philosophy of Knowledge and Stating the Critical Problem
 - 1.1.3. The Matter of Method in Epistemology
 - 1.1.4. The Place of Epistemology in Philosophical Knowledge
 - 1.1.5. Epistemology and Science
- 1.2. History of the Knowledge Problem
 - 1.2.1. Ancient History: Dogmatism, Socrates and the Sophists, Plato, Aristotle and Hellenism
 - 1.2.2. Medieval Patristic Period: Augustine, Dialecticians and Anti-Dialecticians, Thomas Aquinas, Bonaventure
 - 1.2.3. Modern History: Nominalism, Rationalism, Empiricism, Critical Idealism, Fichte and Schelling
 - 1.2.4. Contemporary History: Absolute Idealism, Phenomenology, Existentialism, Analytical Philosophy, Hermeneutics, Weak Thought
- 1.3. Fundamental Perspectives in Epistemology
 - 1.3.1. Scepticism: Doctrine and Discussion
 - 1.3.2. Empiricism: Doctrine and Discussion
 - 1.3.3. Rationalism: Doctrine and Discussion
 - 1.3.4. Idealism: Doctrine and Discussion
 - 1.3.5. Realism: Doctrine and Discussion

The highest quality in online education delivered by the best professionals in the sector"

Module 2. Philosophy of Knowledge II

- 2.1. Knowledge
 - 2.1.1. Human Knowledge: Possibility and Fact; Scope and Limitations
 - 2.1.2. Humans' Fundamental Openness to Being in Knowledge: First Principles
 - 2.1.3. Objective Value, Intentional Dynamics, Relational Structure and Immediacy of Human Knowledge
 - 2.1.4. Interpersonal Dimension of Human Knowledge
 - 2.1.5. Dynamism of Human Knowledge
 - 2.1.6. Objectification of Knowledge in Language
- 2.2. Perceptual Knowledge
 - 2.2.1. Approach: Conflicting Experiential Data and Theoretical Questions
 - 2.2.2. Historical Views
 - 2.2.3. Theory of the Senses and Perception
 - 2.2.4. Truth Value in Perceptual Knowledge: Scope and Limitations
 - 2.2.5. Perceptual Knowledge as the Basis for Intellectual Knowledge
- 2.3. Intellectual Knowledge
 - 2.3.1. Approach: Experience of Intellectual Knowledge and Theoretical Questions
 - 2.3.2. Historical Views
 - 2.3.3. Nature of Rational Knowledge
 - 2.3.4. Truth Value in Rational Knowledge: Scope and Limitations
 - 2.3.5. The Process of Intellectual Knowledge
- 2.4. Intellectual Knowledge in Its Functions, Acts and Scope
 - 2.4.1. Intelligence Functions: Intuitive, Discursive, Memory and Consciousness
 - 2.4.2. Fundamental Intelligence Acts: Veracious Value of the Concept, Judgment and Discursive Activity
 - 2.4.3. Spheres and Levels: Knowledge of Being, of Perceivable Material Reality, of the Self, of the Interpersonal Order, of the Moral Order, and of the Transcendent Order
 - 2.4.4. Scientific Knowledge
- 2.5. The Truth of Knowledge and Its Discernment
 - 2.5.1. The Debate Surrounding the Essence of Truth
 - 2.5.2. The Nature of Truth
 - 2.5.3. Evidence and Discerning the Truth
 - 2.5.4. Humans' Situation in the Face of Truth: Ignorance, Doubt, Opinion, Error, Faith, Certainty

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05 Certificate

The Postgraduate Certificate in Philosophy of Knowledge guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

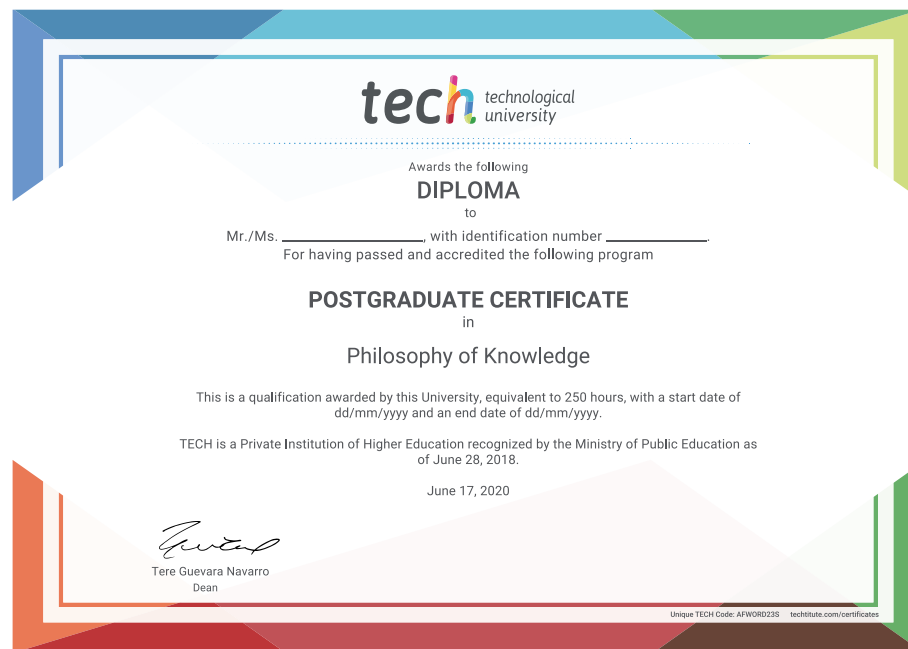

This **Postgraduate Certificate in Philosophy of Knowledge** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained through the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Philosophy of Knowledge**

Official N° of hours: **250 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
