Introduction

Religion, examined through the lens of philosophical inquiry, is the focus of this highly specialized Postgraduate Certificate. This program aims to guide you through an analysis of the fundamental elements that constitute religion and its true essence. Through comprehensive training, you will learn effectively and comfortably. All with the assurance of studying at the world's most prestigious online university.

“

This Postgraduate Certificate in Philosophy of Religion will provide you with the specialized training your career needs. Don't miss this opportunity—start preparing for your future today”

TECH Global University offers you the opportunity to integrate the knowledge from this Postgraduate Certificate in Philosophy of Religion into your academic development through a fully online learning experience. But, in addition, with this course you will learn with the most effective systems for the study of this subject.

If you aspire to surpass yourself, achieve positive personal growth, connect with leading professionals, and become part of a new generation capable of excelling anywhere in the world, this is your path.

A program fully compatible with your professional, personal, academic, or teaching commitments. Its system and teaching approach will flexibly adjust to student needs from beginning to end throughout the course. Consequently, the results are much more efficient since the study will not become an unbearable burden, but rather, a stimulating and easy challenge to undertake and bring to fruition.

This **Postgraduate Certificate in Philosophy of Religion** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Practical cases to apply the theoretical content to real life situations
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Algorithm-based interactive learning system for decision making in the situations that are presented to the student
- ♦ Special emphasis on practical learning
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

With TECH's innovative teaching system, you will experience a new way of approaching your specialization, supported by the most advanced technological developments. The training of the future, today"

“

Through this Postgraduate Certificate, you will not only acquire the theoretical knowledge of the discipline, but you will also embark on a journey of professional and personal growth—an essential part of TECH's mission for all our students”

At TECH Global University, we offer you the most innovative, creative, and distinctive academic experience within a dynamic institution recognized internationally for its excellence. Our pedagogical model has been acknowledged as a **“Microsoft Europe Success Story”** for integrating the pioneering interactive multi-video system into our programs. Moreover, our team was awarded the **“Entrepreneurship Award”** at the World Expo e-Learning Congress 2010, the most prestigious e-learning event in the Spanish-speaking world.

With a space to exchange ideas, experience and reflections. Students will be able to share their learning experience through forums and other collaborative tools in a 100% online format.

We support you at all times thanks to an involved and committed teaching staff. The teaching team transmits their expertise of their professional performance, working from a real, lively and dynamic context. But above all, TECH explores students' critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Study your own way, organizing your time and effort as you see fit and with the support of the best quality teaching systems and programs on the market.

The most technologically developed university in the area of eLearning, offers you the technical and human solvency of the largest Spanish-speaking, 100% online university in the world.

02 Objectives

With this Postgraduate Certificate in Philosophy of Religion, you will train through the essential content required to approach this discipline, benefiting from a program specifically designed to make the most efficient use of your time.

“

Make the best use of your time by setting academic goals that this course will help you achieve. Studying comfortably from home or anywhere you choose. At your own pace”

General Objectives

- ♦ Acquire a rigorous philosophical method, shaped by the order in thought and the capacity for dialog, as well as putting it into practice
- ♦ Possess the adequate tools to study philosophical subjects
- ♦ Conduct fruitful scientific work
- ♦ Structure the various philosophical contents that will become evident in daily work environments
- ♦ Develop a mental structure and an appropriate conceptual background that forges a philosophical criterion rooted in the Christian tradition, with its own principles, methods and contents
- ♦ Shape students' specific identity as Christian thinkers

Specific Objectives

- ♦ Explain the constitutive elements of the religious phenomenon
- ♦ Explain the different dimensions of the sacred
- ♦ Explain the subjectivity of faith
- ♦ Compare the various interpretations of religious experience in the history of philosophy
- ♦ Clarify the essence of religion: what is and what is not religion

Advance to the highest levels of humanistic knowledge by integrating the insights from our courses into your professional strengths—don't miss this opportunity to take your expertise to the next level"

04

Structure and Content

The Postgraduate Certificate in Philosophy of Religion offers a structured exploration of the foundations of this branch of philosophy throughout a comprehensive and well-organized program. These are the essential competencies you will need to achieve excellence in the field of the humanities. The teaching program responds to their needs through innovative content based on the latest trends in philosophy. A teaching staff who has an absolute mastery of the subject will become the essential guide to learn, in a fluent and consolidated manner, the routines of this subject.

“

From the origins of the religious phenomenon to the very definition of religion, this course will guide you through the fundamental milestones in the study of the Philosophy of Religion”

 - 1.5.3. The Fundamental Acts of Religious Experience
 - 1.5.4. The Corporeal and Communal Dimensions of Religion
- 1.6. The Essence of Religion
 - 1.6.1. A Retrospective View
 - 1.6.2. What Religion Is Not
 - 1.6.3. What Religion Is
 - 1.6.4. Conclusions

“

The reality of religion and its philosophical analysis, explored through a syllabus of great relevance for the Christian humanist”

04

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06 Certificate

The Postgraduate Certificate in Philosophy of Religion guarantees students, in addition to the most rigorous and up-to-date knowledge, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Philosophy of Religion** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
