01

Introduction

The social sciences aim to study human beings in their entirety, and this requires knowledge shaped by many other areas of understanding derived from the various disciplines that make up the social sciences: geography, history, politics, economics, anthropology, demography, sociology, and others.

This Postgraduate Certificate in the Role of the Teacher in Geography and History in Primary Education will instill a sense of confidence in your professional performance, helping you grow both personally and professionally"

While it is important for students to understand past social realities, ways of thinking, and lifestyles, it is equally essential that they learn about the current social situation, its components, and the mechanisms that allow them to function within it.

In this regard, current primary education curricula adapt the concepts to be taught according to the educational level. For instance, in the early stages of primary education, students are introduced to concepts related to social relationships and structures such as family, school, and friends. As they advance, these notions expand to include communities, cities, territorial organization, the State, the European Union, and its institutions, among others.

Ultimately, all these elements provide students with knowledge that helps them understand the social reality in which they live and how it is structured. They also equip them with tools that enable them to navigate the world with ease.

This program offers competencies in the disciplines of Geography and History for Primary Education students from a heritage-based perspective—that is, teaching the importance of cultural heritage, its preservation, and its appreciation through the learning of social sciences taught in the early school years. The goal is not only to train participants in the didactics of both subjects but also to prepare them to educate others about cultural heritage, transmitting the values it represents and contributing to the child's cognitive, sensory, social, and cultural development.

In addition, it includes valuable resources and strategies for preparing lesson content, facilitating the teaching–learning process for students enrolled in the program and supporting the practical application of what they have learned.

This **Postgraduate Certificate in The Role of the Teacher in Geography and History in Primary Education** contains the most complete and up-to-date program on the market.

The most important features include:

- ♦ Development of more than 75 practical case studies presented by experts in the role of the teacher in Geography and History in Primary Education
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Advances in the role of the teacher in Geography and History in Primary Education
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve learning
- ♦ With a special focus on innovative methodologies in the role of the teacher in Geography and History in Primary Education
- ♦ Content that is accessible from any fixed or portable device with an internet connection

Update your knowledge through the Postgraduate Certificate in the Role of the Teacher in Geography and History in Primary Education"

“

This Postgraduate Certificate may be the best investment you can make when choosing a professional development program for two key reasons: in addition to updating your knowledge of the role of the teacher in Geography and History in Primary Education, you will also earn a diploma for the Postgraduate Certificate awarded by TECH Global University”

Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.

Take this opportunity to discover the latest advances in the role of the teacher in Geography and History in Primary Education and enhance the way you support your students.

The teaching staff of this program includes professionals from the field of Geography and History education, who bring to this training the experience of their professional practice, as well as renowned specialists from leading academic institutions and prestigious universities.

Thanks to its multimedia content, developed with the latest educational technology, professionals will benefit from situated and contextual learning—simulated environments designed to provide immersive learning experiences that prepare them for real-life situations.

This program is designed around Problem-Based Learning, whereby the teacher must try to solve the different professional practice situations that arise during the course. To this end, educators will have access to an innovative interactive video system developed by renowned experts in the field of the teacher’s role in Geography and History in Primary Education, all with extensive teaching experience.

02 Objectives

The Postgraduate Certificate in the Role of the Teacher in Geography and History in Primary Education is designed to facilitate the work of professionals who teach students in primary education.

“

This Postgraduate Certificate aims to help you update your knowledge of the teacher's role in Geography and History in Primary Education through the use of cutting-edge educational technology, enabling you to make decisions and monitor your students' progress with confidence and quality”

General Objectives

- ♦ Define the curriculum of Social Sciences
- ♦ Acquire knowledge and skills in teaching Geography and History addressed to Primary School students, from an integrative and ethical perspective whereby Cultural Heritage is the common link between the branches that encompass the Social Sciences
- ♦ Use the necessary tools to put into practice the knowledge learned, and elaborate and defend well-substantiated solutions to potential educational problems
- ♦ Design and plan teaching and learning processes through the use of a method that integrates the subjects of History and Geography from an instructive and cultural perspective
- ♦ Define the value of Cultural Heritage and its role in understanding, educating and developing today's society through the subjects of Geography and History
- ♦ Promote democratic, critical and diverse education in the classroom, taking into account gender equality, equity and the value and importance of human rights, among others
- ♦ Explain the educational dimension of teachers with respect to the functions they perform and their role in the cognitive development of students
- ♦ Use information and communication technologies (ICT) that can benefit proper classroom dynamics and student learning
- ♦ Acquire competencies that enable the student of the Postgraduate Certificate to interconnect the subjects of Geography and History with other disciplines, in order to innovate and enrich the teaching-learning process in the classroom
- ♦ Know the main facts of the Greek and Roman past, with special attention placed on the Iberian Peninsula
- ♦ Identify facts, events and other factors born in the Latin civilization and which have survived to the present day
- ♦ Acquire specific skills to teach Latin and Classical Culture
- ♦ Understand the origin and evolution of romance languages
- ♦ Use the fundamental rules governing the phonetic evolution of Latin

Specific Objective

- ♦ Develop appropriate public speaking and behavioral skills and techniques to create a conducive teaching environment in the classroom and to improve and enhance students' learning ability

“ a

03

Course Management

The program features a distinguished faculty of leading experts in the field of the teacher's role in Geography and History in Primary Education, who bring to this training the wealth of their professional experience. In addition, other experts of renowned prestige participate in its design and planning completing the program in an interdisciplinary manner.

“

Learn from leading professionals about the latest advancements and methodologies in the role of the teacher in Geography and History in Primary Education”

Management

Ms. Belso Delgado, Marina

- ♦ Art Historian and Researcher
- ♦ Master's Degree in Research and Management of Historical and Artistic Heritage, University of Murcia

Ms. Antón López, Estefanía

- ♦ Humanist
- ♦ Master's Degree in The Protection of Historical and Artistic Heritage
- ♦ The Legacy of Al-Andalus (University of Granada)

Ms. Carbonell Andreu, Andrea

- ♦ Art Historian
- ♦ Master's Degree in Cultural Heritage: Identification
- ♦ Analysis, and Management (University of Valencia)
- ♦ Student of Bachelor's Degree in Geography and History

Mr. Gálvez Ruiz, Antonio

- ♦ Architect
- ♦ Master's Degree in Architecture, Antonio de Nebrija University
- ♦ Master's Degree in Secondary Compulsory Teacher Education
- ♦ High School and Vocational Training (Polytechnic University of Madrid)

Mr. Pueyo García, Luis

- ♦ Historian and Professor of Social Sciences,
- ♦ Geography, History, and Art History
- ♦ Head of the Didactic Department (La Torreta High School, Elche)
- ♦ Master's Degree in History and Hispanic Identities in the Western Mediterranean

04

Structure and Content

The structure of the contents has been designed by a team of professionals from the best educational institutions and universities worldwide, who are aware of the relevance of up-to-date, innovative education and are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in the Role of the Teacher in Geography and History in Primary Education contains the most complete and up-to-date scientific program on the market”

Module 1. The Role of the Teacher

- 1.1. Teaching and Learning Styles
 - 1.1.1. Theoretical Foundation: Introduction
 - 1.1.2. Teaching Styles
- 1.2. Teachers' General Methodological System
 - 1.2.1. Teaching Methodology
 - 1.2.2. Impact of Teaching Styles on Students' Cognitive, Social, Emotional, and Attitudinal Outcomes
- 1.3. Expository Technique: Behaviors and Skills
 - 1.3.1. What Attitude Should Teachers Adopt in Class
 - 1.3.2. Techniques to Improve Presenting the Syllabus in Class
 - 1.3.3. Tools to Support the Lesson
- 1.4. How to Stimulate the Students Application to the Subjects of Geography and History
 - 1.4.1. Link Student Interests to the Subject
 - 1.4.2. Variety in Organization and Structure
 - 1.4.3. Students as Protagonists
- 1.5. Teaching Work
 - 1.5.1. Educational Components in Teaching Work
 - 1.5.2. Orienting Students' Independent Work
- 1.6. Elaborating Objective Tests for Primary School
 - 1.6.1. Selecting the Content of the Test
 - 1.6.2. Drafting Questions or Items
 - 1.6.3. Correcting and Grading
 - 1.6.4. Presentation

- 1.7. Supplementary Classroom Support: Use of ICT
 - 1.7.1. ICT as Support for Knowledge Transmission
 - 1.7.2. How to Integrate ICT into the Lesson
 - 1.7.3. Personal Development and ICT: Encouraging Responsibility and Autonomy
 - 1.7.4. ICT as a Generator of New Teaching Methodologies for Teachers
- 1.8. Teaching Children with Special Needs: Introduction
 - 1.8.1. Basic Principles and Current Legislation
 - 1.8.2. Teacher Training in Disabilities. Current Status
 - 1.8.3. Special Education in Regular Schools. Support Services Available
- 1.9. Methodologies and Strategies for Geography and History Education Adapted for Children with Special Needs
 - 1.9.1. Educational Services for Children with Disabilities
 - 1.9.2. Strategies to Integrate Them into the Geography and History Classroom. Significant Examples

“*A unique, essential and decisive learning experience to boost your professional development*”

05 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06 Certificate

The Postgraduate Certificate in the Role of the Teacher in Geography and History in Primary Education guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in The Role of the Teacher in Geography and History in Primary Education** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
