01

Introduction

Greco-Roman religion is diverse and complex and, to teach it, philosophy professionals must acquire a series of core competencies required to teach this subject with a greater degree of success. The structure, developments and characteristics of Greco-Roman religion, as well as its influence on later civilizations, are the basis of the content included in this complete program offered here. Throughout a few weeks of interesting and effective work, TECH offers students the opportunity to prepare as specialists in the subject, with the objective of reaching the highest-quality education.

“

Greco-Roman religion analyzed in all its aspects with a perspective specially designed for philosophy professionals who teach this subject”

This intensive program will provide students with a complete and accurate approach to teaching classical culture, which they can efficiently and conveniently study from their own personal device.

Throughout this complete Postgraduate Certificate, students will be able to acquire the skills required to teach this subject using the most developed and effective methods. A simple way to reach students with the certainty of overcoming all challenges.

Students will also update on the contents and the most developed methodology to create a solvent, current and effective teaching plan.

All this with the guarantee of the most prestigious online university in the world. This Postgraduate Certificate offers students the characteristics of a high-level scientific, teaching and technological program.

The **Postgraduate Certificate in Teaching Greco-Roman Religion** contains the most complete and up-to-date program on the market. Its most notable features are:

- ♦ Case studies presented by experts in Greco-Roman religion
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in teaching Greco-Roman religion
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

A program specially designed for philosophy professionals who want to work as teachers in the area of Greco-Roman religion”

“

This Postgraduate Certificate is a complete and highly efficient program that will allow you to quickly and easily grow as a professional”

Our teaching staff is made up of working professionals. In this way, we ensure that we provide you with the update we are aiming for. A multidisciplinary team of trained and experienced professors in different environments, who will impart the theoretical knowledge in an efficient way, but, above all, who will put at the service of the program the practical knowledge derived from their own experience: one of the differential qualities of this program.

This mastery of the subject is complemented by the effectiveness of the methodology used in the design of this course. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. This way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your studies.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: With the help of an innovative, interactive video system and *Learning from an Expert* students will be able to acquire the knowledge as if they were dealing with the case they are studying in real time. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

A contextual and realistic educational experience that will immerse you in the reality of a profession full of challenges.

Take the opportunity to learn about the latest advances in this field and apply it to your daily practice.

02 Objectives

The objective of this Postgraduate Certificate is to enhance students' skills as excellent classical culture philosophers and teachers, providing them with the most advanced personal and professional tools available in education today. In this way, students will be able to grow professionally as teachers to become highly prestigious professionals in the field, having obtained the tools required to successfully teach related subjects.

“

A few weeks of efficient work will provide you with the knowledge and teaching tools that your subject needs to meet your students' educational challenges”

General Objectives

- ♦ Introduce students to the world of teaching from a global perspective in order to prepare them for future employment
- ♦ Show the different options and methods used in teaching
- ♦ Favor knowledge acquisition of the contents in Classical Culture
- ♦ Know the main elements of the Greco-Latin influence in current societies
- ♦ Encourage continuing education of students and interest in teaching innovation
- ♦ Acquire a responsible civic conscience for a more just society
- ♦ Identify facts, events and other factors born in the Greco-Latin civilization that have survived to this day
- ♦ Interpret and understand current circumstances based on one's own cultural background
- ♦ Identify and value the main contributions of the Greco-Latin civilization
- ♦ Know the main facts of the Greek and Roman past, with special attention placed on the Iberian Peninsula
- ♦ Identify facts, events and other factors born in the Latin civilization and which have survived to the present day
- ♦ Acquire specific skills to teach Classical Culture

Specific Objectives

- ♦ Differentiate and recognize the foundations of ancient religion
- ♦ Understand the impact of religion on society
- ♦ Understand the imprint of religiosity in today's world

“

Make the most of the opportunity and take the step to get up to date on the latest developments in Teaching Greco-Roman Religion”

03

Course Management

This program has been designed and developed by a group of experts in teaching Greco-Roman religion, with extensive experience in education and research. Through their mentorship, this program will become a great learning experience that will raise the level of philosophy training to the highest quality standards. Undoubtedly, the ideal academic support for those seeking a first level specialization.

“

The best teaching team available in education today at your disposal”

Management

 - 1.7.4. Penates
 - 1.7.5. Manes and the Genuis
 - 1.7.6. The Pater Families and Specific Gods

“Give your CV a boost with this specific training for teachers that will enable you to work confidently and efficiently in this area of teaching”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

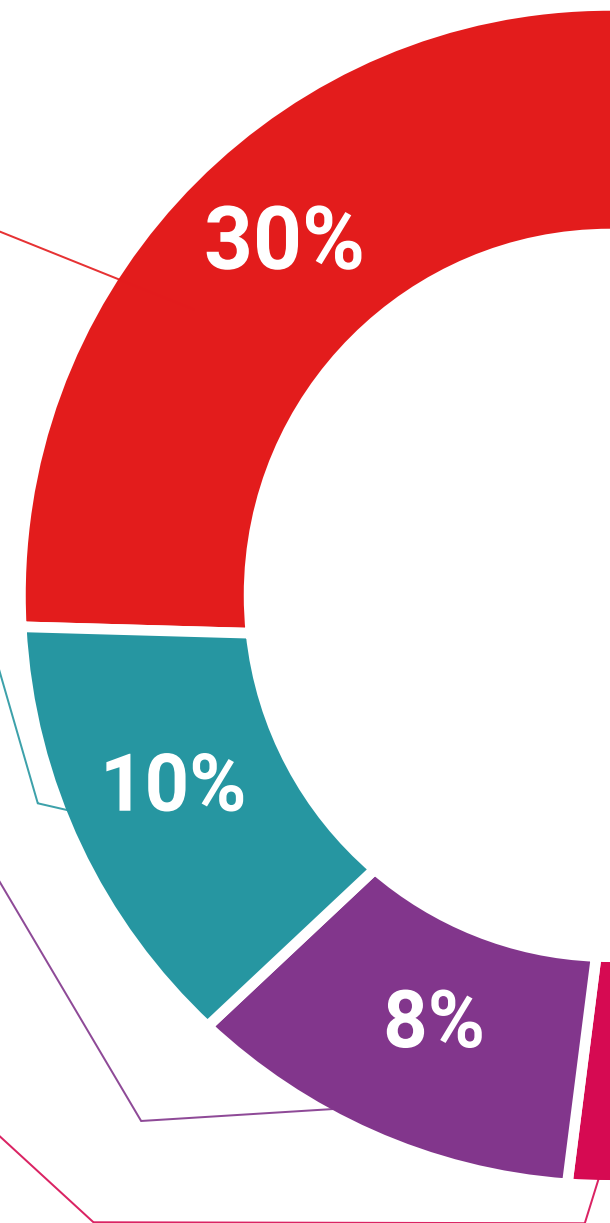

Practising Skills and Abilities

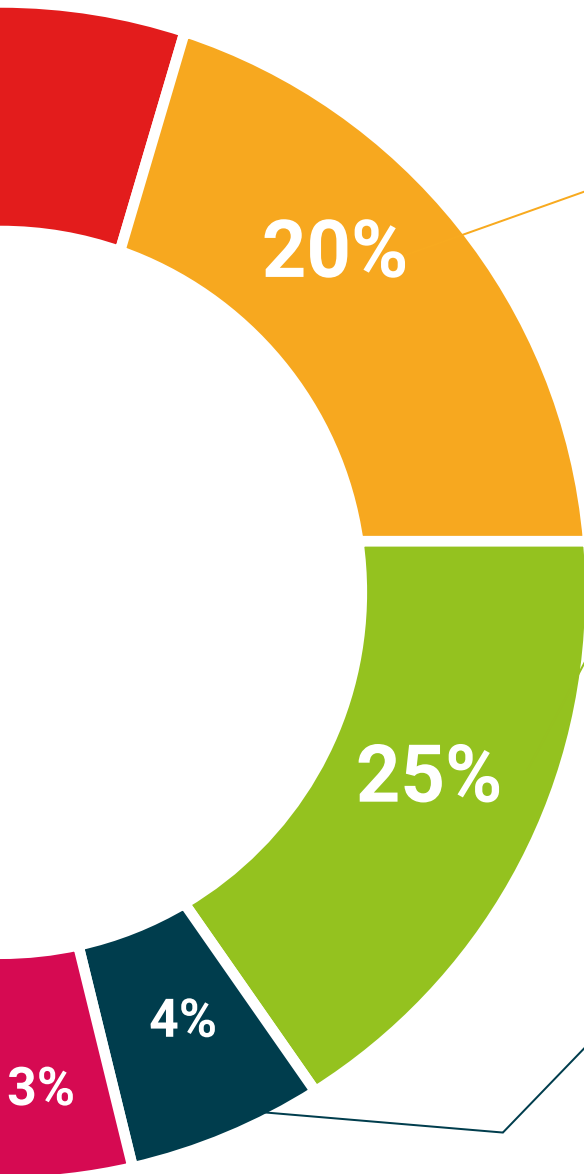

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Certificate in Teaching Greco-Roman Religion guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

The **Postgraduate Certificate in Teaching Greco-Roman Religion** contains the most complete and up-to-date program the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained through the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Teaching Greco-Roman Religion**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
