01 Introduction

The complexity of International Development Cooperation projects is manifested. Not only do they involve collaboration between different actors, but they also entail the implementation of long-term development strategies in contexts with multiple and constantly changing variables. This is why professionals fully specialized in the management of these initiatives are needed, and this program is a great opportunity. Through it, the student will obtain advanced skills in the design of effective strategies that promote social transformations, as well as the adoption of public policies that guarantee Human Rights in vulnerable communities. All this based on a convenient online format that contains an extensive catalog of resources on this subject.

tech 06 | Introduction

There are well known cases of International Development Cooperation projects that have encountered cultural, social and political challenges, affecting their viability and acceptance by the local community. In this sense, the lack of understanding of the needs, customs and ways of life of these cultures can lead to the implementation of solutions that are not appropriate for their specific context, which reduces the impact of the initiative.

In this context, it is essential that the strategies developed within these projects be truly effective, based on a thorough study of the cultural, religious or political context. For this reason, programs such as this Postgraduate Diploma are essential, which provides the Humanities professional with everything they need for the diligent management of Cooperation projects based on criteria of effectiveness, to the benefit of the target communities.

Through it, he will develop a comprehensive specialization with which they will undertake a journey through the evolution and current state of the debates on development programs, as well as the techniques, trends and projects that are required in International Cooperation. Likewise, they will delve into the importance of Social Communication or the varied and challenging areas of work of NGOs.

Of course, a complete updating opportunity that will boost the graduate's professional career. They will only need a device with Internet connection, with which they will be able to consult the advanced academic materials that TECH has prepared for them at any time of the day

This **Postgraduate Diploma in Cooperation Project and NGO Management for Development** contains the most complete and up-to-date educational program on the market. The most important features include:

- Practical cases presented by experts in Health Cooperation Project and NGO Management for Development
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Get to know the functioning of an NGO to analyze how to maximize its results in its different areas of work"

Get updated on Social Communication strategies that strengthen the Right to Information or Freedom of Expression in developing countries"

The program includes in its teaching staff professionals of the field who pour into this training the experience of their work, in addition to recognized specialists from reference societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, in which the professional will have to try to solve the different professional practice situations that will arise throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Lead the management of projects carried out by any type of NGO after only 600 hours of specialization in which you will deepen in an extensive catalog of interactive resources.

Specialize from anywhere thanks to content designed by teachers with extensive experience in the Cooperation Project and NGO Management for Development.

tech 10 | Objectives

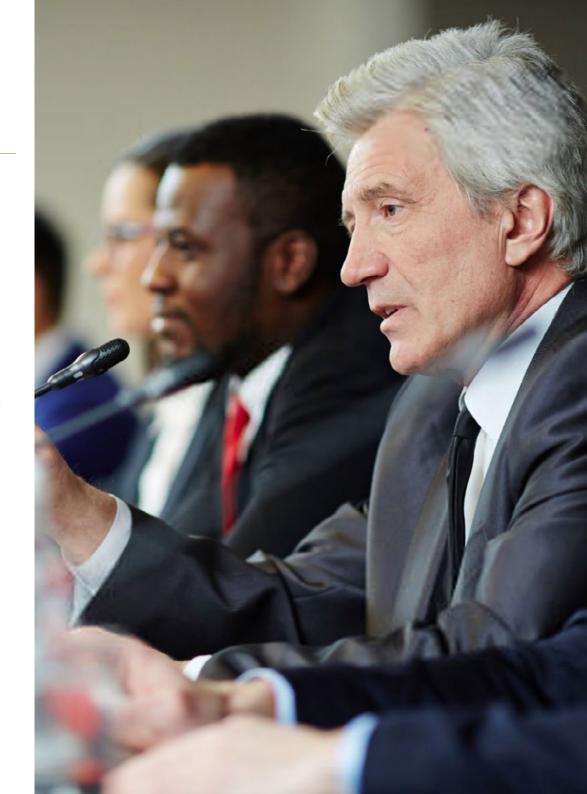

General Objectives

- Provide students with advanced training in International Cooperation,
 of a specialized nature and based on theoretical and instrumental knowledge
 that will allow them to acquire and develop the competencies and skills necessary
 to obtain a qualification as a solidarity professional
- Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- Improve professional performance and develop strategies for adapting and solving the problems of today's world, by means of scientific research in cooperation and development processes
- Disseminate the bases of the current system and develop the critical and entrepreneurial spirit necessary to adapt to political changes, within the framework of international law

Develop advanced skills as a social communicator, acting at different levels of development projects"

Module 1. International Development Cooperation

- Know different methods of research in International Development Cooperation
- Gain knowledge on methodologies for public policy advocacy, social communication, political change, etc
- Know the evolution and status of current debates on development
- Become familiar with the instruments of international cooperation for development, as well as the types of projects and existing NGOs
- Develop skills to work with the main vulnerable subjects involved in development cooperation actions and programs
- Understand the international cooperation system and the different members that make it up

Module 2. Design, Monitoring and Assessment of International Development Cooperation Projects

- Know the management cycle of a development project
- Know the techniques, trends and projects of international development cooperation
- Understand the main problems of the different regional and international environments
- Know the different systems, modalities and basic actors of International Development Cooperation
- Know the regional particularities of development and cooperation

Module 3. Social and Transformative Communication

- Prepare social communicators who can apply their knowledge at the different levels
- Identify, understand and know how to use sources, statistical techniques and computer tools to organize selected information and plan development and cooperation reports, analyses and actions
- Conduct an ethical reflection on cooperation, information, images and their applicability in specific contexts and information sources

Module 4. NGDOs and Local, Regional and International Solidarity

- Understand the concepts and definitions of NGOs
- Know the diversity of NGOs and their field or work
- Learn the broad outlines of NGO management
- Identify, understand and know how to use sources and tools to identify international development cooperation projects

Guest Director

Ms. Rodríguez Arteaga, Carmen

- Liaison Advisor for the 2030 Agenda in AECID
- Director of the Studies Office of the INFM Directorate
- Head of Education, Strategic Planning and Coordinator of Knowledge Networks in AECID
- Degree in Philosophy and Educational Sciences at UCM
- Specialist in Knowledge Managemen
- · Expert in Educational Evaluation at OEI
- Expert in Educational Indicators and Statistics at UNED
- Expert in Development Cooperation in Education at the University of Barcelona

Management

Ms. Romero Mateos, María del Pilar

- · Social Educator Specialized in Child Empowerment
- Employment training teacher
- Gender Equality Agen
- Author and collaborator in educational projects at Abile Educativa
- Co-Author of the book: 'Principeso Cara de Beso
- Postgraduate Diploma in International Development Cooperation

Professors

Ms. Sánchez Garrido, Araceli

- Deputy Head of the Department of Cultural Cooperation and Promotion of the DRCC
- Responsible for the application of AECID's Cultural Diversity Mainstreaming Guide
- Professor of the Master in Cultural Management at the Carlos III University of Madrid
- Degree in Geography and History, specializing in Anthropology and Ethnology of America, Complutense University of Madrid
- Member of the Faculty of Museum Curators assigned to the Museo de América de Madrid

Mr. Cano Corcuera, Carlos

- Specialist in Planning and Management of Cooperation Development Interventions
- General Coordinator of the Spanish Cooperation in the Dominican Republic
- General Coordinator of the Spanish Cooperation in Mexico
- Degree in Biology with a major in Zoology and a minor in Animal Ecology
- Specialization courses in the following areas: International Cooperation;
 Identification, Formulation and Monitoring of Cooperation Projects; Humanitarian
 Aid; Equal Opportunities; International Negotiations; Planning with a Gender
 Perspective; Results-Oriented Management for Development; Disability Approach
 in Cooperation Projects; European Union Delegated Cooperation, etc

Ms. Córdoba, Cristina

- International Cooperation Nurse Specialist
- Training and experience in International Development Cooperation Projects
- · Co-founder and participant of PalSpain project
- Founder of the Youth Association APUMAK

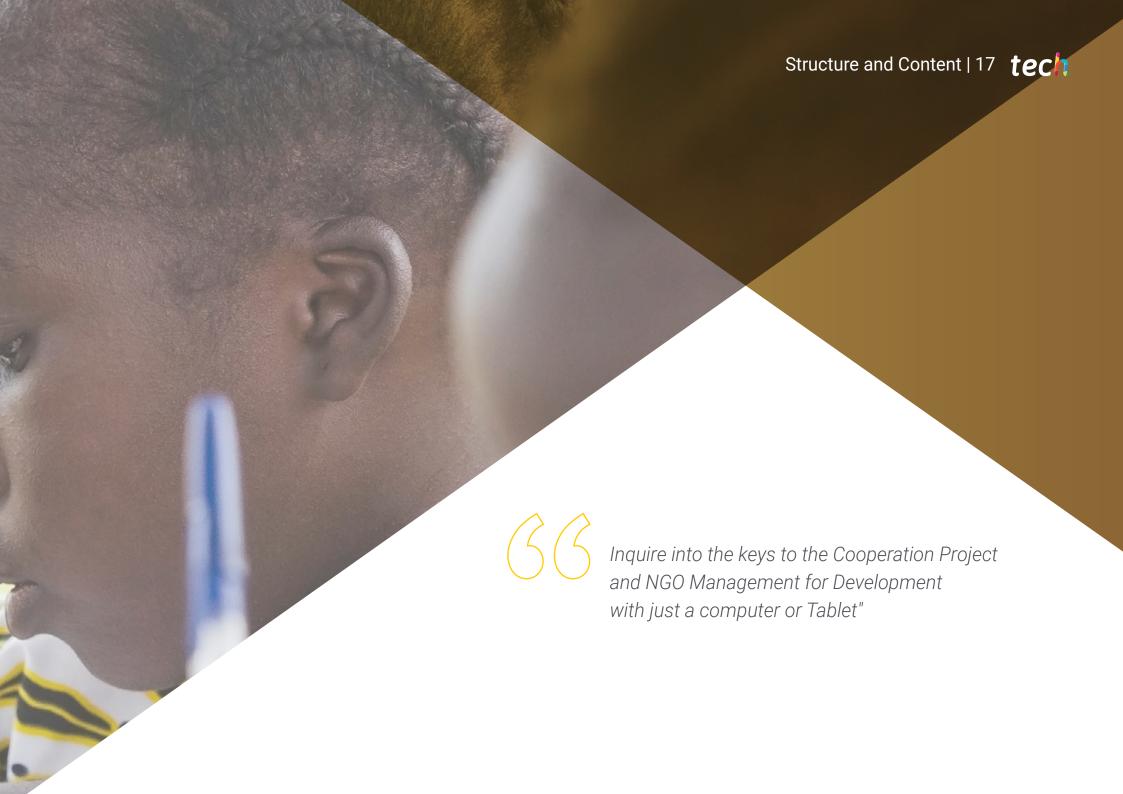

Ms. Flórez Gómez, Mercedes

- · Specialist in International Cooperation in Iberoamerica
- Director of the CFCE in Montevideo
- Degree in Geography and History from the Complutense University of Madrid
- Advanced Diploma in South Cooperation
- Diploma in Humanitarian Action Institute of Studies on Conflict and Humanitarian Action
- MSc in Corporate Social Responsibility from the Pontifical University of Salamanca
- MSc in Information and Documentation from the Antonio de Nebrija University
- Specialist in Inequality, Cooperation and Development, Instituto Universitario de Desarrollo y Cooperación, Complutense University of Madrid
- Specialist in Planning and Management of Development Cooperation Projects in Education, Science and Culture (OEI)

Dr. Ramos Rollon, Marisa

- Specialist on public policies and institutions in Latin America and on the issues of democratic governance and development policies
- Coordinator of the department of Democratic Governance in the Eurosocial program
- Full Professor of Political Science at UCM
- Responsible for the Democratic Governance sector at the Spanish Agency for International Cooperation
- Professor of Political Science at the University of Salamanca
- Development Cooperation Advisor to the Vice Rector of International Relations and Cooperation of the Complutense University of Madrid
- Doctor of Political Science from the Complutense University of Madrid in the Contemporary Latin America program
- Bachelor's Degree in Political Science with a major in International Relations and Latin American Studies from UCM

tech 30 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 32 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 33 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

25%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

Testing & Retesting

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

tech 38 | Certificate

This **Postgraduate Diploma in Cooperation Project and NGO Management for Development** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Diploma in Cooperation Project and NGO Management for Development

Official No of Hours: 600 h.

^{*}Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
