# Introduction

The beginning of philosophical thought was a revolution in the way of analyzing the world and the human being and laid the foundations for all subsequent developments in this field. For this reason, it is one of the pillars of the extensive knowledge that the humanist and philosopher must have in order to face their work with the accreditation of a good educational base. It is impossible to understand the present of philosophy without understanding its origin. This program is designed to provide you with the theoretical knowledge and analytical tools necessary to acquire the skills of a specialist in this field.

*The fundamental knowledge bases for any humanist or philosopher compiled in a high-level training will allow you to understand and learn everything you need to know about Ancient and Medieval Philosophy"*

Since the emergence of philosophical thought, the philosopher's gaze has been laying the analytical foundations of the reality of the human being, of their interaction with the world, of their entity as a social being. In this journey it is of vital importance for the philosopher to acquire the necessary discernment to understand first of all, and to describe, expose or develop any kind of work on the historical evolutions of philosophical thought.

In this Postgraduate Diploma we will study in more detail two moments of exceptional relevance in the history of philosophy: the ancient and the medieval. With the influence of a social moment of high convulsion, these two historical moments represent a historical moment of essential knowledge for the humanist.

In this Postgraduate Diploma, a journey will be made through the different developments that occurred in these periods, in a contextual and deep way, so that the student can convert them into a tool for professional and personal growth of maximum utility for the work as a philosopher in any of its areas.

A complete compendium of knowledge and developments that will propel you to the highest standards of professional training, with the competitiveness of a Postgraduate Diploma in this field of work.

But, in addition, with this program you will learn with the most effective systems for the study of this subject.

If you want to improve yourself, make a positive change on a personal level, interact with the best and belong to the new generation of professionals capable of developing their work anywhere in the world, this may be the way to go.

A Postgraduate Diploma fully compatible with other work, personal, teaching or study occupations. From its beginning, in its teaching approaches, to its end, in its evaluation, the system will be flexibly adjusted to your needs. In this way, the results are much more efficient since the study will not become an unbearable burden but rather a stimulus and an easy challenge to undertake and bring to completion.

The **Postgraduate Diploma in Ancient and Medieval Philosophy History** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- The development of practical cases of application of the theoretical part by means of real cases.
- The graphic, schematic and eminently practical contents with which they have been conceived, include a scientific and assistance specialization on those disciplines that are essential for professional practice
- Practical exercises where the self-evaluation process can be carried out to improve learning
- Algorithm-based interactive learning system for decision-making in the situations with which the students are presented
- With special emphasis on hands-on learning
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

*This Postgraduate Diploma will allow you to grow as a professional in philosophy and as a humanist, significantly expanding your capacity for analysis and philosophical understanding"*

*Study with the largest university of the technological era and you will be part of an entity with a vocation of service, aware of the current needs of society, globally, and of the individual, in particular"*

*This Postgraduate Diploma is created to make studying simple, efficient and flexible, with the maximum quality of a high-level educational program.*

*Study with the technical and human solvency of the largest Spanish-speaking, 100% online university in the world.*

TECH Technological University makes the most innovative, creative and different proposal, in a dynamic institution with talent and international recognition.

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**
This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

## A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

> *Our program prepares you to face new challenges in uncertain environments and achieve success in your career"*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

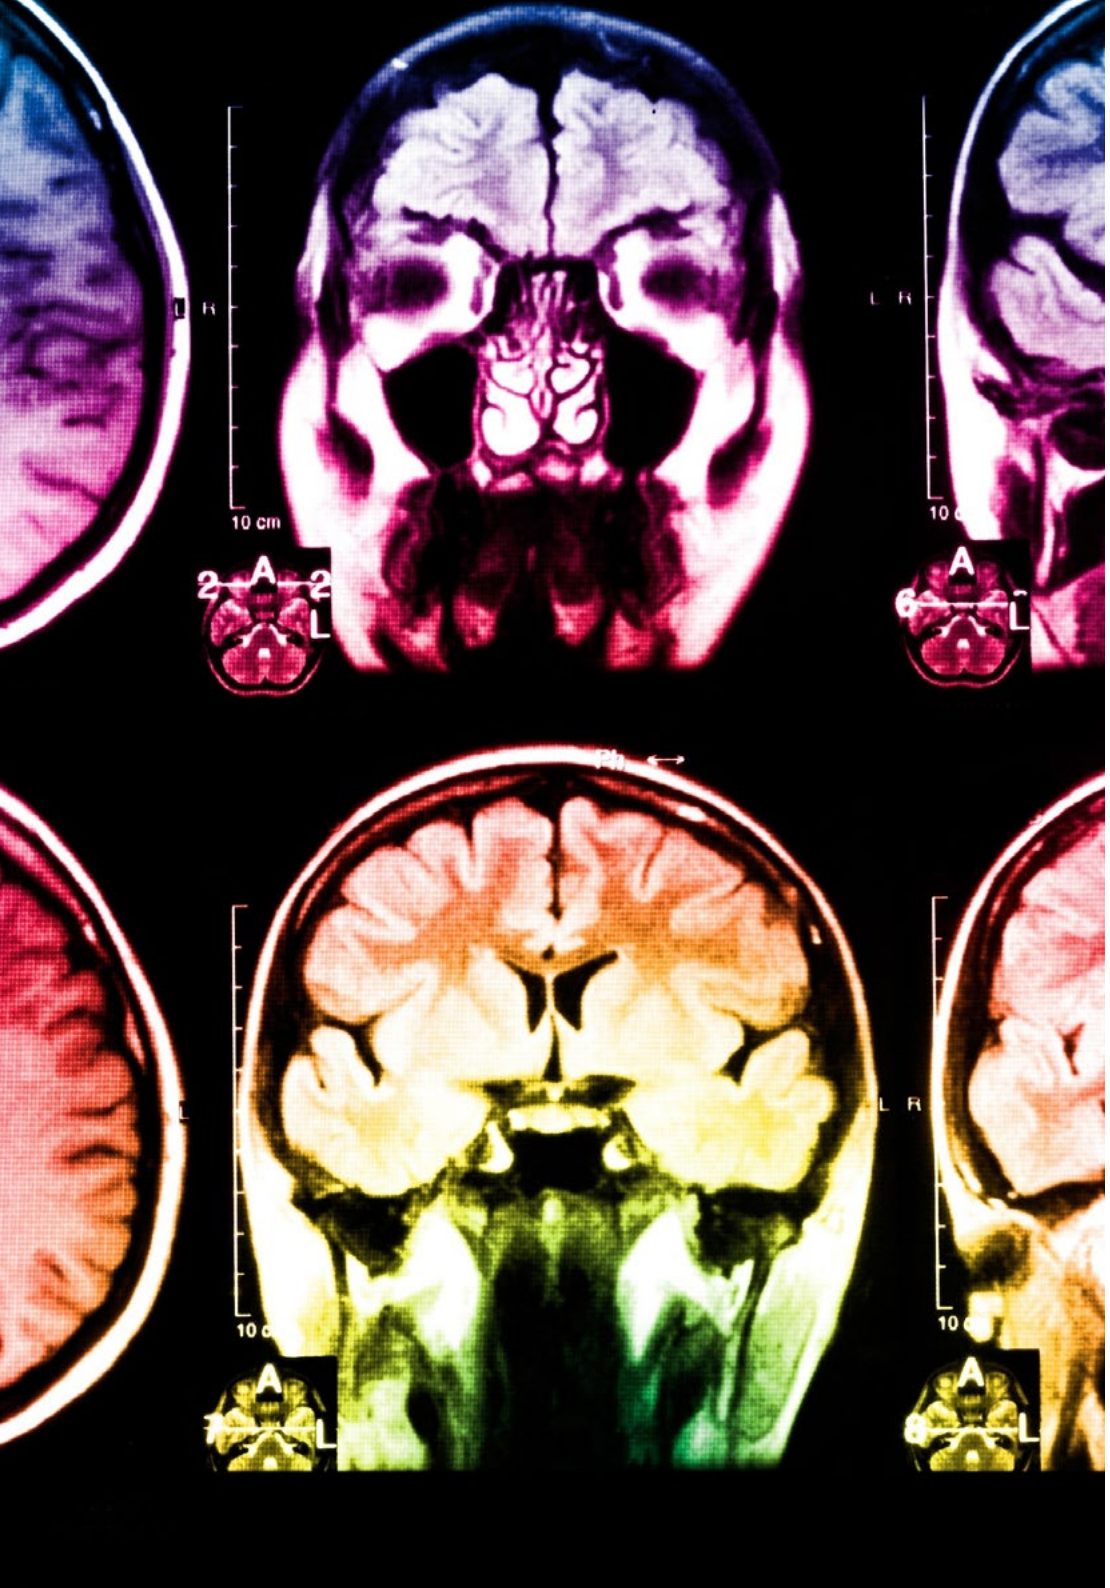
TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.



In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

**This program offers the best educational material, prepared with professionals in mind:**

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

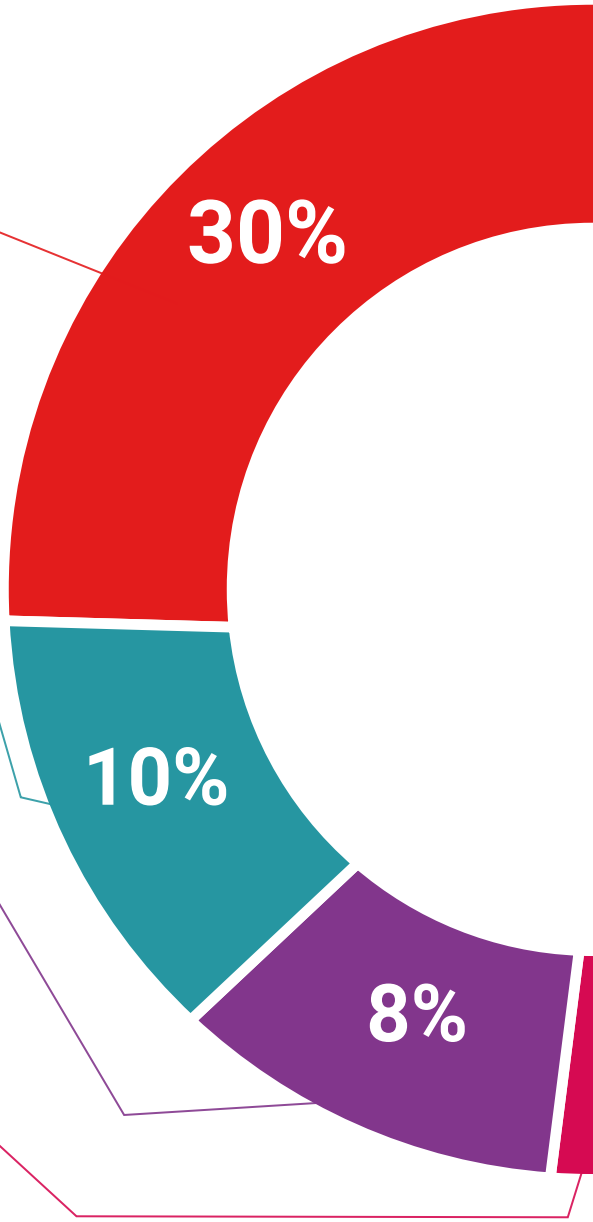
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

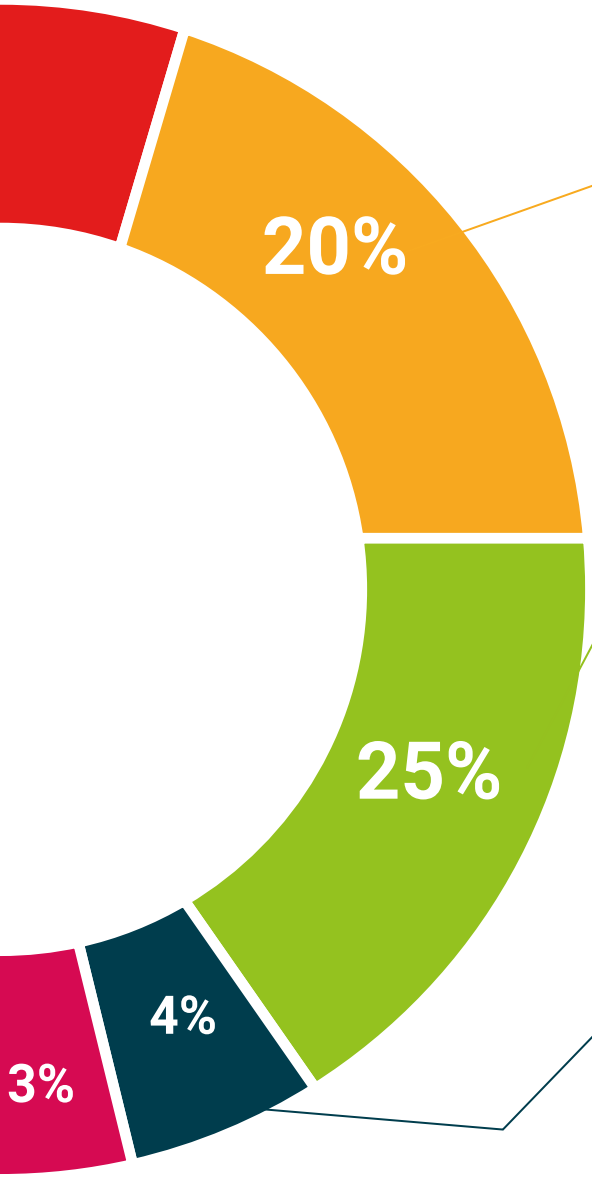
### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.





### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
