tech 06 | Introduction

This program journeys through Africa, America, Europe, Asia and Oceania, their morphology and activity, to update student knowledge based on the latest scientific evidence provided by the age of satellites and technological precision instruments.

Urban environments, sustainability or migratory movements, are flows of human development that are circumscribed to their regions in specific ways, thus affecting the morphology of the territories themselves. Cultural geography, sensitive to the technology mentioned above, is key at a time when digital technologies permeate all spheres of our lives and substantially change our communication and geographical positioning in the world.

Update your knowledge and obtain a Postgraduate Diploma to continue growing both personally and professionally.

This **Postgraduate Diploma in Spanish, European and World Geography** contains the most complete and up-to-date program on the market. The most important features include:

- 100 simulated scenarios presented by experts in geography
- The graphic, schematic, and practical contents provide students with scientific and practical information on the disciplines that are essential
- The latest advances in physical geographic concreteness and the current situation of human geography in different territories
- It contains practical exercises where the self-assessment process can be carried out to improve learning
- Interactive learning system based on the case method and its application to real practice
- Complementary theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

This program is perfect for you to learn about the geographic reality of the world and human behavior in its distribution and organization"

The teaching staff includes professionals in geography and history, who pour into this program the experience of their work, in addition to recognized specialists belonging to reference societies and prestigious universities.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to train in real situations.

The program design is based on Problem-Based Learning, whereby students must try to solve the different professional practice situations that arise throughout the course. To that end, they will be assisted by an innovative, interactive video system created by renowned experts in geography who have extensive teaching experience.

Take advantage of the latest educational technology to update on geography from the comfort of your home.

You will have the best teaching resources, taught by geography experts.

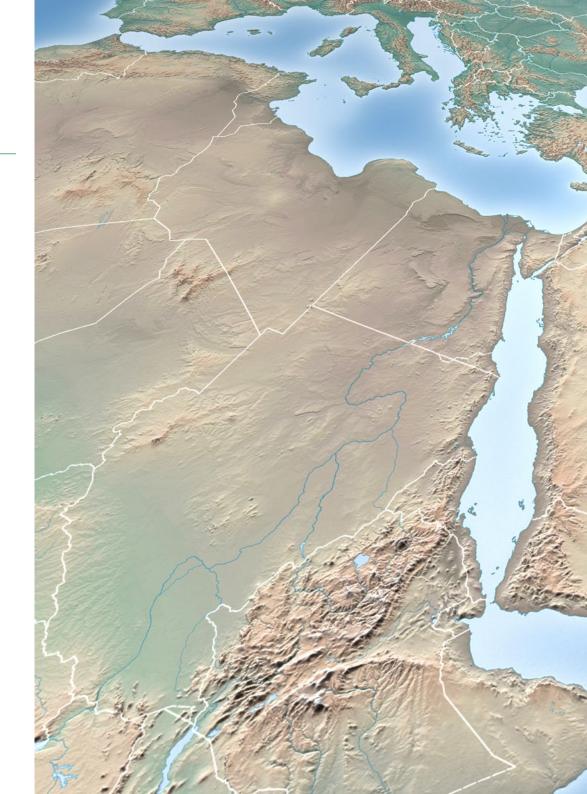

tech 10 | Objectives

General Objective

◆ Attain the level of knowledge required to master world geography at the physical and human levels from a global perspective, with special emphasis on the European context and a vision of the urban organization of territories

Specific Objectives

Module 1. World Regional Geography

- Analyze and interpret the geographic reality of the world today
- Explain the importance of the physical environment in the configuration and development of a country and in the configuration of a regional demographic
- Discuss past dynamics and processes that affect the current configuration of large regional demographics
- Characterize the geographical peculiarities of regional spaces of underdeveloped and emerging countries

Module 2. European Geography

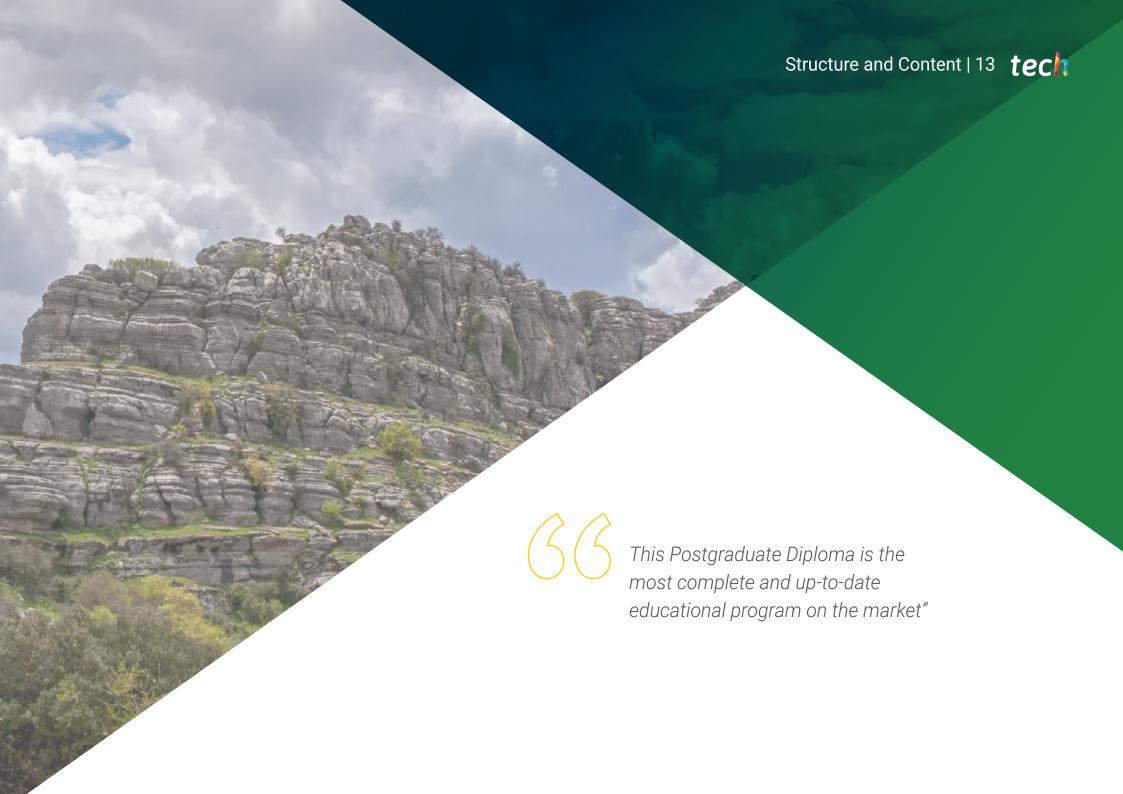

- Become familiar with the geographical, physical and human diversity in Europe
- Know the regional, political and administrative structure of the European continent
- Understand the recent demographic transformations and their impact on societies and economies
- Understand the interaction between the different geographical elements on the European continent

A boost to your CV that will give you the competitiveness of the best prepared professionals in the labor market"

tech 14 | Structure and Content

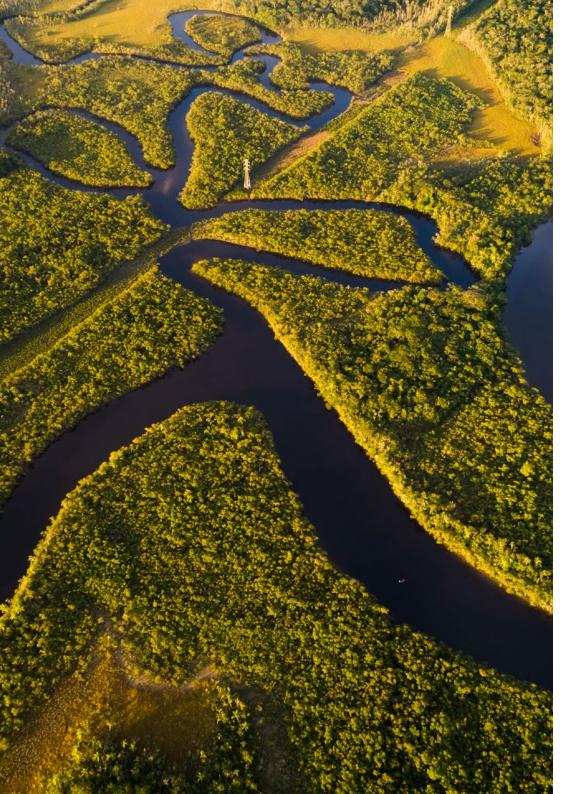

Module 1. World Regional Geography

- 1.1. The Evolution of Geographical Space
 - 1.1.1. The Conception of Geographical Space
 - 1.1.2. Types of Space
 - 1.1.3. The Complexity and Diversity of a Constantly Evolving Terrestrial Space
- 1.2. Structural Developmental Characteristics
 - 1.2.1. Developing Countries
 - 1.2.2. Characteristics of Developing Countries
- 1.3. North America
 - 1.3.1. Political-Territorial Reality
 - 1.3.2. Economic Reality
- 1.4. Underdeveloped Countries
 - 1.4.1. Concept of Underdevelopment
 - 1.4.2. Characteristics of Underdeveloped Countries
- 1.5. Russia and the Commonwealth of Independent States (CIS)
 - 1.5.1. The Role of the CIS
 - 1.5.2. CEI Organization
- 1.6. China
 - 1.6.1. Territorial Organization of the People's Republic of China
 - 1.6.2. From Socialism to Capitalism
 - L63 China in the New Economic World Order
- 1.7. Latin America
 - 1.7.1. Introduction to the Economic Reality in Latin America
 - 1.7.2. Characteristics of the Expansionary Stage Growth Model
 - 1.7.3. Crisis, Adjustment and Structural Reforms in the 1980s
 - 1.7.4. Difficulties in Achieving Stable Economic Growth
- 1.8. Sub-Saharan Africa
 - 1.8.1. Subregions in Sub-Saharan Africa
 - 1.8.2. Countries Most in Need

- 1.9. Arab-Islamic Countries
 - 1.9.1. States and Territories
 - 1.9.2. Institutional Shortcomings
 - 1.9.3. Islam and Market Economy
- 1.10. Current Geographical Reality
 - 1.10.1. Spatial Imbalances and Inequalities

Module 2. European Geography

- 2.1. European Space
 - 2.1.1. Definition of European Space
 - 2.1.2. Identity marks
 - 2.1.3. The Problem of Limits
- 2.2. The European Union
 - 2.2.1. The Institutional Framework
 - 2.2.2. Management Tools
- 2.3. Topography
 - 2.3.1. Relief Configuration
 - 2.3.2. Geological History
 - 2.3.3. Major Morpho-Structural Units
- 2.4. Climate
 - 2.4.1. Climate Conditions
 - 2.4.2. Climate Regionalization
- 2.5. Biogeographic Areas and Natural Regions
 - 2.5.1. Biogeographic Areas and Natural Regions
 - 2.5.2. Environmental Problems
- 2.6. The Economy
 - 2.6.1. Economic and Social Development of European Peoples
 - 2.6.2. Economic Activity and Labor Markets
 - 2.6.3. The Welfare State: Education and Health

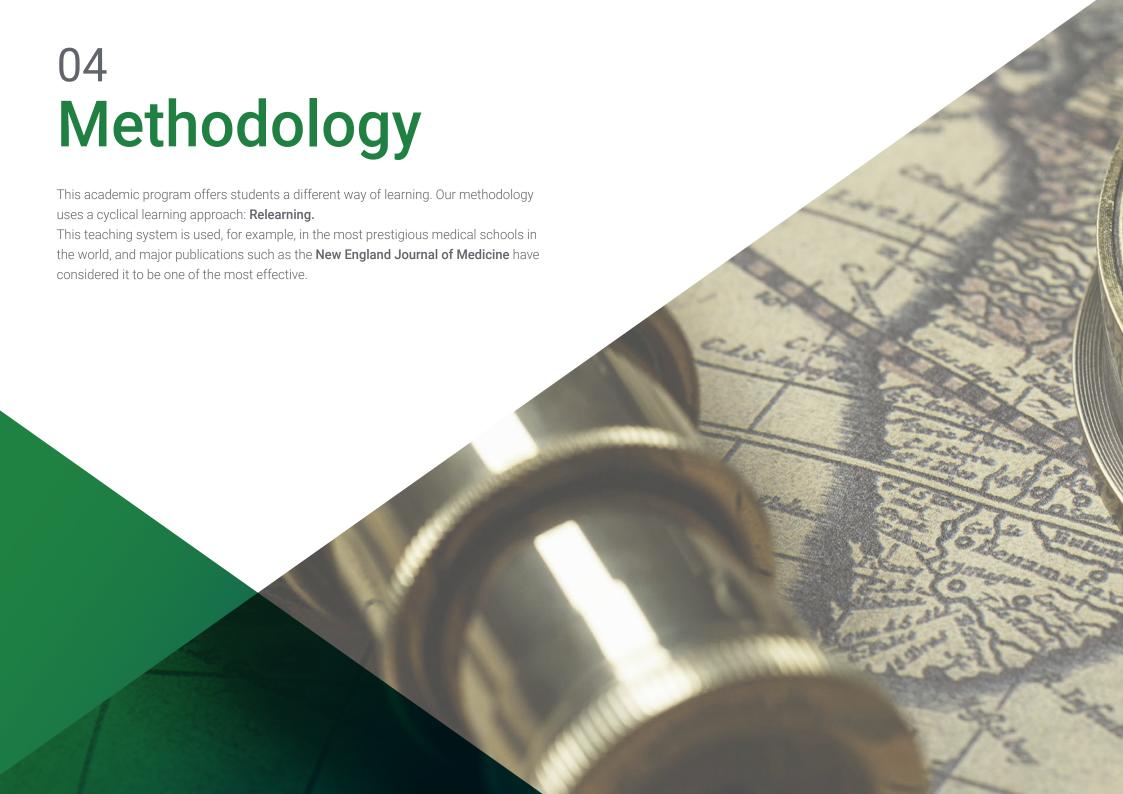

Structure and Content | 15 tech

- 2.7. Population and Human Settlements
 - 2.7.1. Density and Spatial Distribution of the European Population
 - 2.7.2. Natural and Migratory Dynamics
- 2.8. Agriculture
 - 2.8.1. European Agriculture and Rural Areas
- 2.9. Industry in Europe
 - 2.9.1. Industry in Europe
 - 2.9.2. Globalization and Industrial Relocation
 - 2.9.3. Industrial Politics in the European Union
- 2.10. Urban Systems in Europe
 - 2.10.1. History of Urban Development in Europe
 - 2.10.2. Organization of Urban Systems in Europe
- 2.11. Financing in the European Union
 - 2.11.1. How Does Financing Work in the European Union?
 - 2.11.2. Management Methods
 - 2.11.3. Types of Financing

A unique, key, and decisive educational experience to boost your professional development"

tech 18 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Geography and History schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

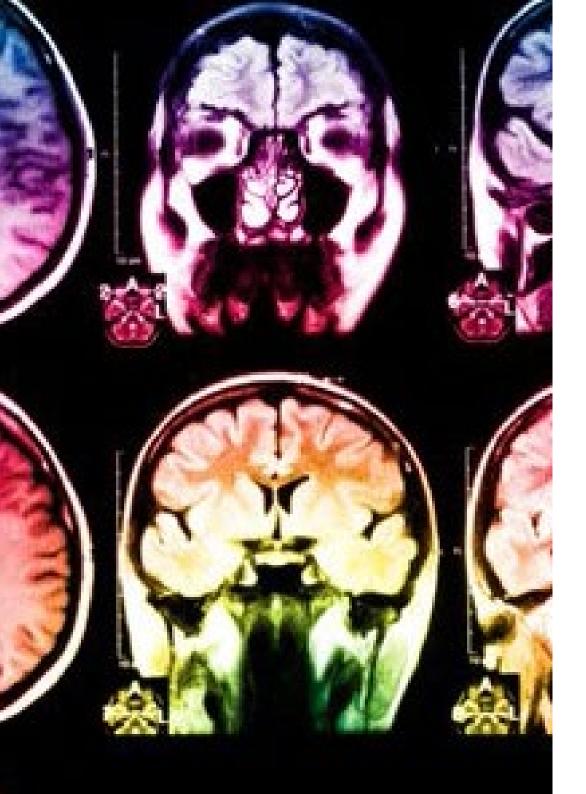

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 21 tech

In our program learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology, we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

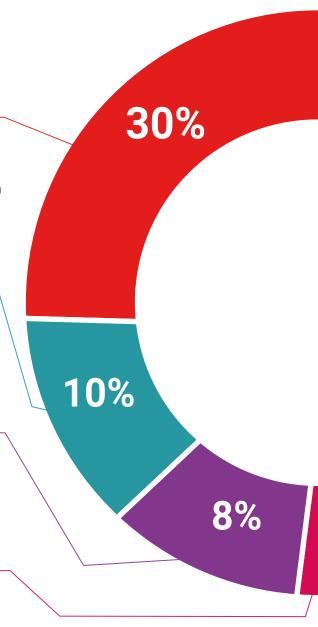

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in

Interactive Summaries

Case Studies

the world.

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

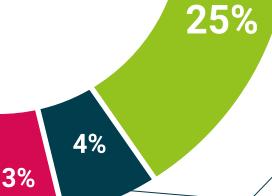

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

 $\langle \rangle$

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

tech 26 | Certificate

This **Postgraduate Diploma in Spanish, European and World Geography** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma**, issued by **TECH Technological University** via tracked delivery*.

The diploma issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
