tech 06 | Introduction

It is necessary to prepare qualified professionals who know, in addition to the subject of Classical Culture, the key elements to teach it correctly within our educational model, while also considering the use of new teaching methodologies.

This Postgraduate Diploma offers a broad and complete vision of the contents taught in the subjects of Latin and Classical Culture, with the aim of training professionals capable of effectively developing the teaching-learning process of a vital subject for the humanistic development of their students.

Special attention will be paid to philosophical work in these subjects, from an eminently practical point of view and emphasizing the most innovative facets of the discipline.

Likewise, TECH takes great interest in providing students who enroll in this

Postgraduate Diploma with access to the knowledge of teaching work both at a
theoretical and applied level, so it will be useful for their present or future professional
performance, thus offering a qualitative advantage over other professionals in the field.

It will also facilitate their incorporation into or promotion in the labor market, with extensive theoretical and practical knowledge that will improve their skills in their daily work, paying special attention to educational innovation in teaching philosophy.

This **Postgraduate Diploma in Teaching Classical Culture** contains the most complete and up-to-date program on the market. Its most notable features are:

- Case studies presented by experts in philosophy
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Special emphasis on innovative methodologies in teaching philosophy
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Don't miss this great opportunity to increase your skills as a philosopher and teacher and catapult your career towards excellence"

The teaching staff includes professionals bilingual education and teaching, who bring their experience to this training program, as well as renowned specialists from leading prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive experience designed to prepare for real-life situations.

The design of this program focuses on Problem-Based Learning, by means of which students must try to solve the different professional practice situations that arise throughout the program. For that purpose, teachers will be assisted by an innovative, interactive video system developed by renowned experts in the field of bilingual education who also have extensive teaching experience.

Study with the confidence that a high quality educational institution provides, benefiting from the experience of the best experts and the convenience of a training program that adapts to your needs.

Study with the technical and human solvency of the largest Spanish-speaking, 100% online university in the world.

tech 10 | Objectives

General Objectives

- Introduce philosophers to the world of teaching from a global perspective in order to prepare them for future employment
- Show the different options and methods used in philosophy work
- Favor knowledge acquisition of the contents of the subject of Classical Culture
- Know the main elements of the Greco-Latin influence in current societies
- Encourage continuing education of students and interest in teaching innovation
- Acquire a responsible civic conscience for a more just society
- Identify facts, events and other factors born in the Greco-Latin civilization that have survived to this day
- Interpret and understand current circumstances based on one's own cultural background
- Know and use the phonological, morphological, syntactic and lexical foundations of Latin
- Reflect on the substantial elements that make up languages
- Recognize elements in Latin that have evolved or remain in our language
- Identify and value the main contributions of the Greco-Latin civilization
- Know the main facts of the Greek and Roman past, with special attention placed on the Iberian Peninsula
- Identify facts, events and other factors born in the Latin civilization and which have survived to the present day
- Acquire specific skills to teach Classical Culture

Specific Objectives

Module 1. Ancient Greek and Roman History

- Differentiate and recognize the different stages of Antiquity
- Know the most important processes in the historical construction of Greece and Rome
- Understand the legacy of these two cultures in the present

Module 2. Greco-Roman Religion

- Differentiate and recognize the foundations of ancient religion
- Understand the impact of religion on society
- · Understand the imprint of religiosity in today's world

Module 3. Politics and Society

- Differentiate and recognize the different political forms in Ancient Greece and Rome
- Understand their society and its impact on culture and how it is conveyed
- Understand the relevance of the political conception of Ancient Greece and Rome in the 21st century

Today more than ever theologians need the endorsement of a solid and updated body of knowledge to confront their experience with the real world with guarantees of success"

 - 3.4.3. The Army in Sparta
 - 3.4.4. The Army in Boecio
 - 3.4.5. The Formation of the Ancient Roman Army
 - 3.4.6. The Organization of the Ancient Roman Army

- 3.5. Public Shows
 - 3.5.1. Athletic Competitions
 - 3.5.2. The Ancient Greek Theater
 - 3.5.3. The Circus
 - 3.5.4. The Amphitheater
 - 3.5.5. The Ancient Roman Theater
 - 3.5.6. Other Shows
- 3.6. Greco-Roman Science and Literature
 - 3.6.1. Science in Ancient Greece and Rome
 - 3.6.2. Astronomy, Mathematics and Physics
 - 3.6.3. Medicine
 - 3.6.4. Representatives of Greco-Roman Literature
 - 3.6.5. Latin Poetry
 - 3.6.6. Latin Comedy
- 3.7. Women in Greco-Roman Society
 - 3.7.1. Women in Ancient Greece and Rome
 - 3.7.2. Women's Rights in Antiquity
 - 3.7.3. Daily Life
 - 3.7.4. Women's Role in the Family
 - 3.7.5. Religious Life
 - 3.7.6. Significant Women in Ancient Greece and Rome

66

A curriculum optimized to provide you with a high-impact program that will turn your effort into results"

tech 24 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 26 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 27 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

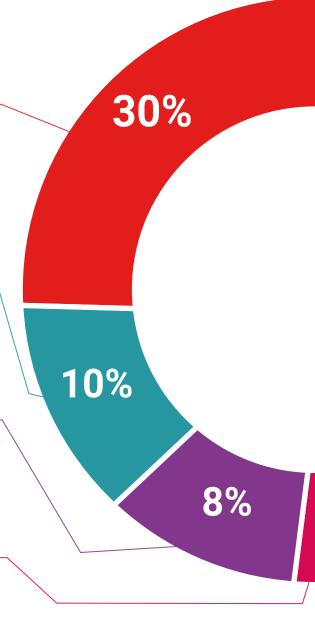

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
