01

Introduction to the Program

According to the United Nations, software development is one of the fastest growing and most promising areas within the technology sector, driven by digitalization and the need for secure and scalable infrastructure. With the expansion of e-commerce and cloud services, companies are looking for professionals with advanced knowledge of databases, modern architectures, and IT security. That is why TECH is presenting an innovative university program focused on Advanced Back-End Development. It is also based on a convenient, fully online format.

```

“

Thanks to this 100% online Postgraduate Certificate, you will design scalable, secure, and maintainable Software”

In the current context of Software Engineering, Back-End Development has evolved significantly, incorporating distributed architectures, microservices, and cloud services. These transformations require professionals to acquire advanced skills to design scalable, secure, and efficient systems. Only then will they be able to successfully meet the challenges posed by modern applications, which require high availability, minimal response times, and seamless integration with multiple services.

This TECH Postgraduate Certificate provides in-depth knowledge of the most widely used technologies and tools in backend development, enabling students to develop strategic skills that drive professional growth. Mastering advanced programming languages, databases, and modern architectures opens doors to new job opportunities, from innovative projects to key positions in leading technology companies. Specialization in this field not only improves competitiveness in the market but also provides access to better-paid roles with greater long-term prospects.

The 100% online format of this program provides the flexibility to learn from anywhere, adapting to different paces and responsibilities. With no schedule restrictions or the need to travel, you will have access to up-to-date content and interactive tools that enhance the learning experience. In addition, it facilitates the balance between professional development and other commitments, ensuring a dynamic and efficient process.

This **Postgraduate Certificate in Advanced Back-End Development** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Technology and IT
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in Technology and IT Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Master Advanced Back-End Development by exploring in depth the roles, responsibilities, and key technologies that enable you to build efficient and scalable systems"

“

Ensure authentication and authorization in backend applications using technologies such as JWT and OAuth2, guaranteeing secure session management and applying effective control strategies”

The teaching staff includes professionals from the field of IT and technology, who bring their work experience to this program, as well as renowned specialists from leading companies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

Enhance the management and optimization of advanced databases by implementing indexing, partitioning, and SQL query optimization strategies.

Improve the scalability and performance of your developments with advanced caching, load balancing, and real-time monitoring techniques.

02

Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs, available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it has a huge faculty of more than 6,000 professors of the highest international prestige.

“

Study at the largest online university in the world and ensure your professional success. The future begins at TECH”

The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

03

Syllabus

The development of efficient and secure digital infrastructures is essential in a world increasingly driven by technology. This syllabus provides in-depth coverage of the most advanced programming languages, database management, and scalable architectures, which are key elements for optimizing the performance of systems and applications. It also incorporates agile methodologies and automation tools to ensure more efficient processes. With a practical and innovation-oriented approach, this program allows students to acquire highly sought-after skills in the sector, facilitating access to new opportunities in high-level technological environments.

“

Guarantee code quality by applying automated testing at different levels, from unit testing to end-to-end testing”

odif

Module 1. Advanced Back-End Development for Seniors

- 1.1. Advanced Back-End Development
 - 1.1.1. Backend Roles and Responsibilities
 - 1.1.2. Key Technologies in Back-End Environments
 - 1.1.3. Examples of Successful Back-End Applications
- 1.2. REST and GraphQL APIs
 - 1.2.1. RESTful API Design and Consumption
 - 1.2.2. GraphQL: Advantages
 - 1.2.3. Integration Case Studies
- 1.3. Advanced Databases
 - 1.3.1. SQL Query Optimization
 - 1.3.2. Indexing and Partitioning
 - 1.3.3. NoSQL Databases
- 1.4. Back-End Authentication and Authorization
 - 1.4.1. Use of JWT and OAuth2
 - 1.4.2. Secure Session Management
 - 1.4.3. Access Control Strategies
- 1.5. Back-End Scalability and Performance
 - 1.5.1. Caching with Redis
 - 1.5.2. Load Balancing in Back-End Applications
 - 1.5.3. Monitoring and Key Metrics
- 1.6. Back-End Testing and Code Quality
 - 1.6.1. Types of Tests: Unit, Integration, E2E
 - 1.6.2. Automation Tools
 - 1.6.3. Code Coverage and Analysis
- 1.7. Back-End Service Integration
 - 1.7.1. Connecting to External Services
 - 1.7.2. Error Handling in Integrations
 - 1.7.3. Retry and Timeout Strategies

- 1.8. Asynchronous Task Management in Backend
 - 1.8.1. Background Tasks
 - 1.8.2. Tools such as Celery and RabbitMQ
 - 1.8.3. Common Use Cases
- 1.9. Microservices in Backend
 - 1.9.1. Design and Communication between Microservices
 - 1.9.2. Orchestration and Monitoring
 - 1.9.3. Practical Implementation with Frameworks
- 1.10. Deployment and Maintenance in Backend
 - 1.10.1. Deployment Automation
 - 1.10.2. Version Management and Rollback
 - 1.10.3. Production Monitoring

You will delve into the principles of modern Back-End Development, including distributed architectures”

04

Teaching Objectives

Through this Postgraduate Certificate, professionals will develop key skills in building modern, robust, and scalable Back-End systems. Students will also master the creation of advanced APIs, complex database management, and integration with cloud services. In addition, they will acquire skills in security, testing, and optimization, preparing them to confidently face the technical challenges of high-demand environments.

“

Integrate external services efficiently by understanding the best strategies for error handling, retry implementation, and timeout control”

General Objectives

- ♦ Provide in-depth knowledge of advanced software architectures and their applicability in professional environments
- ♦ Provide a comprehensive overview of modern back-end development, covering architectures, tools, and best practices
- ♦ Develop efficient and scalable front-end applications with modern technologies
- ♦ Apply advanced data science and machine learning techniques
- ♦ Understand the fundamentals of cybersecurity and its importance in software development
- ♦ Master the fundamental principles of DevOps and its impact on software development
- ♦ Implement the principles of the agile manifesto in development environments
- ♦ Manage the differences and benefits of native and cross-platform mobile development
- ♦ Analyze the fundamental concepts of cloud computing and its impact on application development and operation

Specific Objectives

- ♦ Design efficient and scalable RESTful and GraphQL APIs
- ♦ Optimize SQL queries and manage high-performance NoSQL databases
- ♦ Implement secure authentication using JWT and OAuth2
- ♦ Configure cache strategies with Redis and load balancing on back-end servers

Manage asynchronous tasks with tools such as Celery and RabbitMQ, enabling efficient execution of background processes"

05 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06

Teaching Staff

The teaching staff for this program is made up of experts in Digital Architecture Development, process automation, and database management. Their experience in high-level technology projects allows them to offer teaching based on the real-world application of each concept. In addition, they incorporate agile methodologies and advanced strategies to optimize the performance of complex systems. Through a practical and innovation-oriented approach, they provide a comprehensive overview of the sector, ensuring that all knowledge acquired meets market demands and contributes to the advancement of efficient and secure digital infrastructures.

“

You will have the support of the teaching team, made up of true specialists in Advanced Back-End Development”

Management

Mr. Utrilla Utrilla, Rubén

- Technology Project Manager at Serquo
- Fullstack Developer at ESSP
- Junior Fullstack Developer at Sinis Technology S.L
- Junior Fullstack Developer at Escuela Politécnica Cantoblanco Campus
- Master's Degree in AI and Innovation by Founderz
- Degree in Computer Engineering from the Autonomous University of Madrid
- Google Cloud Developer course in Google Academic Program

Mr. Pradilla Pórtolles, Adrián

- ♦ Head of Digital Transformation Project for Public Services in the Canary Islands Government
- ♦ Forensic Expert in Information Technology at Juan Antonio Rodríguez
- ♦ Project Manager at Aguas y Estructuras S.A.
- ♦ Senior Technology Consultant at Plexus Tecnologías
- ♦ Analyst at Novasoft Soluciones Canarias S.A
- ♦ Bachelor's Degree in Computer Engineering from the University of La Laguna
- ♦ Technical Degree in Management Computer Engineering from the University of La Laguna
- ♦ Expert in Big Data in Public Administration (R.FD.14.IN.24) from the Canary Islands Institute of Public Administration
- ♦ Expert in European Project Management (R.FD.62.AB.24) from the Canary Islands Institute of Public Administration
- ♦ Specialist in Power BI Data Visualization Tool for Decision Making by Structuralia
- ♦ Expert in Scrum Manager – eLearning by Scrum Master
- ♦ Expert in Management and Marketing of Innovative Products by Human Development Human Resources and Training Consulting
- ♦ Expert in the Use of the AVIP Tool for Teachers-Tutors by INTECCA

07 Certificate

This Postgraduate Certificate in Advanced Back-End Development guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Advanced Back-End Development** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([*official bulletin*](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
