Introduction to the Program

Full-Stack Development is one of the most comprehensive and sought-after areas in the tech industry, as it combines front-end and back-end knowledge to create scalable web applications. Mastering stacks such as MEAN and MERN allows you to work with widely used technologies, optimizing performance and ensuring an efficient user experience. State management, authentication, and security are key aspects of modern software architecture, as are testing and deployment in cloud environments. In this context, TECH offers an innovative 100% online university program focused on Full-Stack Development.

“

Master the principles of Software Architecture and design highly efficient solutions”

Full-Stack development has become an essential skill in the tech industry, as it allows for a comprehensive approach to web application creation. The combination of front-end and back-end knowledge provides a complete view of the development cycle, optimizing efficiency in the implementation of digital solutions. Growing digitalization and the need for interactive and secure applications have driven demand for professionals with skills in technologies such as MEAN and MERN, capable of building scalable systems that can be adapted to different environments.

This university program provides advanced knowledge in Full-Stack development, ranging from project configuration to deployment in the cloud. Through mastery of modern tools, it is possible to improve performance optimization, status management, and security in web applications. Acquiring these skills not only facilitates the resolution of complex problems but also allows you to adapt to new technological trends. Mastering these aspects gives you a significant advantage, as the evolution of the sector requires up-to-date technical skills and the ability to create innovative solutions.

The 100% online format of this program guarantees access to high-quality content from anywhere, at any time. The flexibility to advance at your own pace allows for better integration of learning with other responsibilities, optimizing the time and resources available. In addition, the teaching methodology incorporates digital tools that facilitate practice and the development of applied projects, ensuring dynamic learning that is oriented toward the reality of the sector.

This **Postgraduate Certificate in Advanced Full-Stack Development** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Software Development and Technology
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Special emphasis on innovative methodologies in Software Development and Technology
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Learn how to apply advanced design patterns to optimize the performance, maintainability, and flexibility of any type of Software”

“

Develop microservice-based architectures to ensure modularity, scalability, and optimal performance in large-scale projects”

Explore the benefits of cloud computing and deploy applications in environments such as AWS, Azure, and Google Cloud securely and efficiently.

Optimize data management with SQL and NoSQL databases, ensuring speed, integrity, and reliability in every system query.

The teaching staff includes professionals from the field of Software Development and Technology, who bring their work experience to this program, as well as renowned specialists from leading companies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs, available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it has a huge faculty of more than 6,000 professors of the highest international prestige.

“

Study at the largest online university in the world and ensure your professional success. The future begins at TECH”

The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

Forbes

The best online university in the world

The most complete syllabus

The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

TOP
international faculty

The most effective methodology

A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

World's No.1
The World's largest online university

The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

03 Syllabus

This syllabus offers an advanced approach to Full-Stack development, combining front-end and back-end knowledge to enhance the creation of innovative solutions. Through structured modules, topics ranging from project configuration to optimization and deployment in the cloud are covered. In addition, the integration of modern tools ensures an up-to-date education aligned with industry demands, providing the skills necessary to meet the challenges of an ever-evolving digital environment.

“

Implement advanced software security strategies to protect systems against vulnerabilities, cyberattacks, and critical IT risks”

Module 1. Advanced Full-Stack Development for Seniors

- 1.1. MEAN and MERN Stacks
 - 1.1.1. Key Components of Both Stacks
 - 1.1.2. Differences between MEAN and MERN
 - 1.1.3. Use Cases for Each stack
- 1.2. Full-Stack Project Configuration
 - 1.2.1. Initializing Projects with Node.js
 - 1.2.2. Configuring MongoDB and Express
 - 1.2.3. Initial Integration with Angular or React
- 1.3. Backend with Node.js and Express
 - 1.3.1. Creating RESTful Servers
 - 1.3.2. Middleware Management
 - 1.3.3. Implementing Dynamic Routes
- 1.4. Frontend with Angular or React
 - 1.4.1. Structuring Front-End Projects
 - 1.4.2. Creating Reusable Components
 - 1.4.3. Communicating with the Backend via APIs
- 1.5. Front-End State Management
 - 1.5.1. Redux and NgRx
 - 1.5.2. Shared State Management Between Components
 - 1.5.3. Data Persistence in the Frontend
- 1.6. Authentication and Authorization in Full-Stack Projects
 - 1.6.1. Implementation of User Login and Registration
 - 1.6.2. Front-End Route Protection
 - 1.6.3. Role and Permission Validation
- 1.7. Testing in Full Stack Projects
 - 1.7.1. Back-End and Front-End Unit Testing
 - 1.7.2. End-to-end Test Integration
 - 1.7.3. Test Automation with Modern Tools

- 1.8. Full-Stack Application Deployment
 - 1.8.1. Server Configuration for Deployment
 - 1.8.2. Use of Docker for Containers
 - 1.8.3. Deployment on Cloud Services such as AWS or Heroku
- 1.9. Performance Optimization
 - 1.9.1. Back-End and Front-End Caching
 - 1.9.2. Load Time Reduction
 - 1.9.3. Production Monitoring and Profiling
- 1.10. Full-Stack Theoretical Final Project
 - 1.10.1. Project Planning and Theoretical Design
 - 1.10.2. Theoretical Component Implementation
 - 1.10.3. Project Presentation and Documentation

“ You will adopt best practices in security, testing, and continuous deployment in collaborative environments ”

04

Teaching Objectives

This program aims to provide advanced knowledge in Full-Stack Development, covering both dynamic interface design and the implementation of efficient and scalable servers. Through a practical approach, it seeks to develop skills for test automation, cloud deployment, and the integration of emerging technologies, ensuring solid preparation to face the challenges of the sector.

“

Hone your skills in automated testing and guarantee software quality with unit, integration, and performance testing”

General Objectives

- ♦ Provide in-depth knowledge of advanced software architectures and their applicability in professional environments
- ♦ Provide a comprehensive overview of modern back-end development, covering architectures, tools, and best practices
- ♦ Develop efficient and scalable front-end applications with modern technologies
- ♦ Apply advanced data science and machine learning techniques
- ♦ Understand the fundamentals of cybersecurity and its importance in software development
- ♦ Master the fundamental principles of DevOps and its impact on software development
- ♦ Implement the principles of the agile manifesto in development environments
- ♦ Manage the differences and benefits of native and cross-platform mobile development
- ♦ Analyze the fundamental concepts of cloud computing and its impact on application development and operation

Specific Objectives

- ♦ Set up Full-Stack development environments with Node.js, MongoDB, and Express
- ♦ Develop RESTful servers and manage middleware in backend applications
- ♦ Implement frontend with Angular or React and establish communication with APIs
- ♦ Manage application status using Redux or NgRx

“

*Integrate DevOps into your projects
and automate processes for
continuous delivery”*

05

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

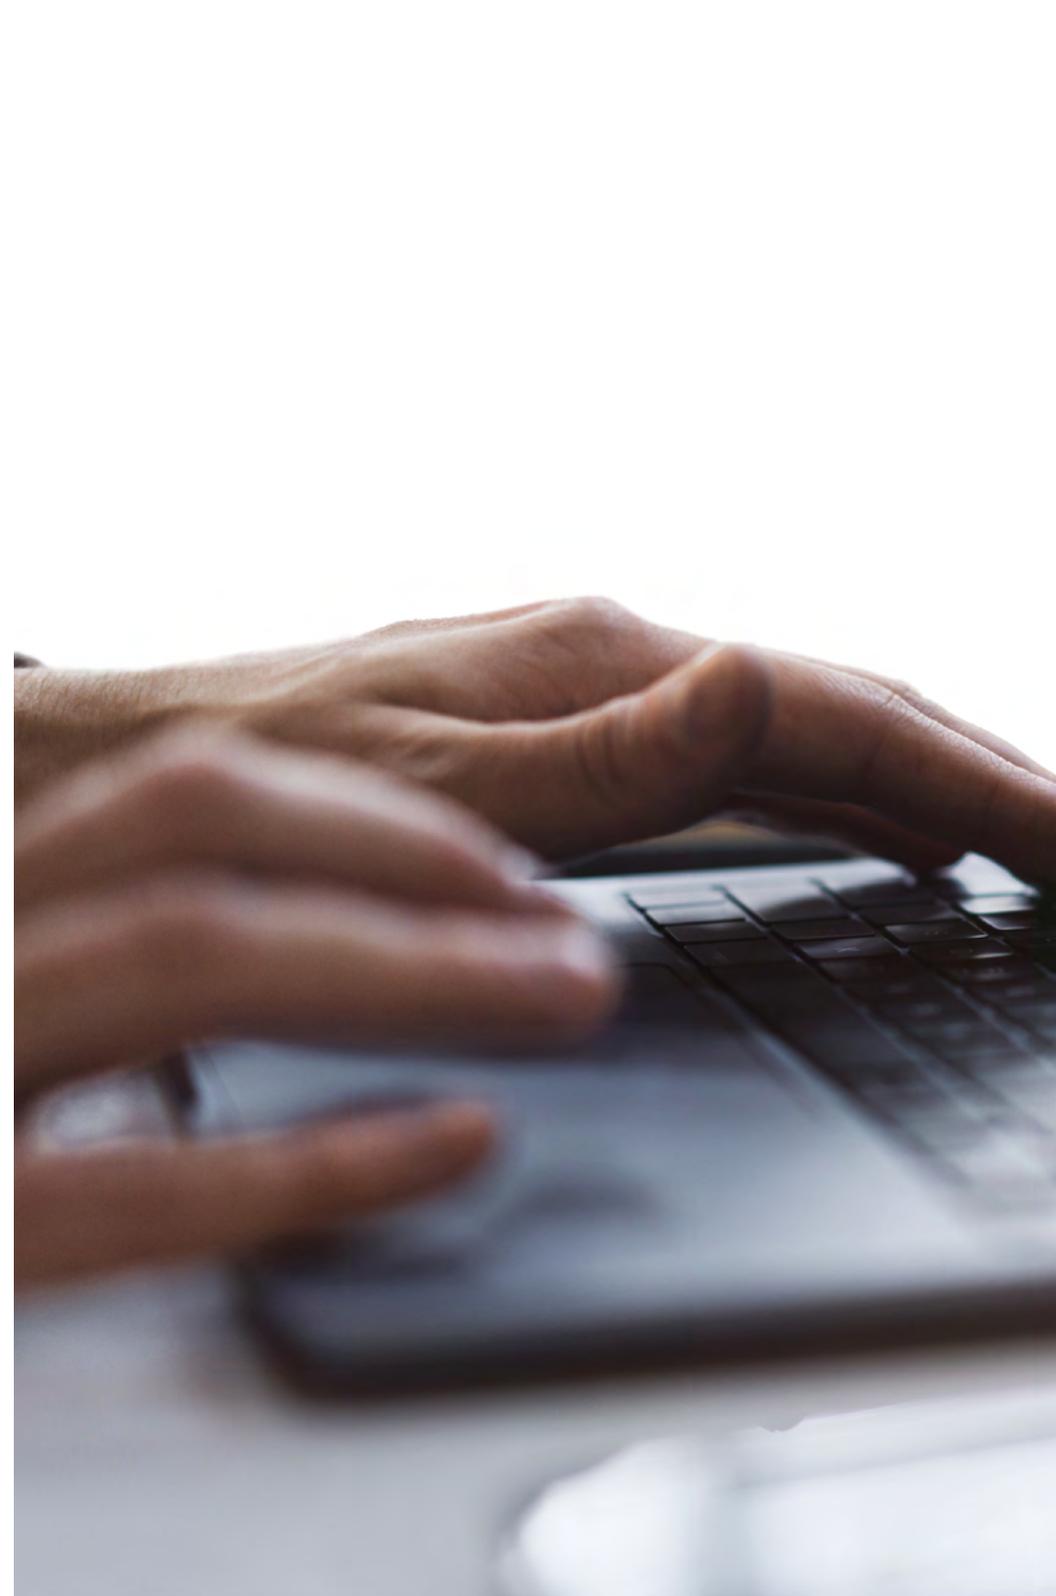

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

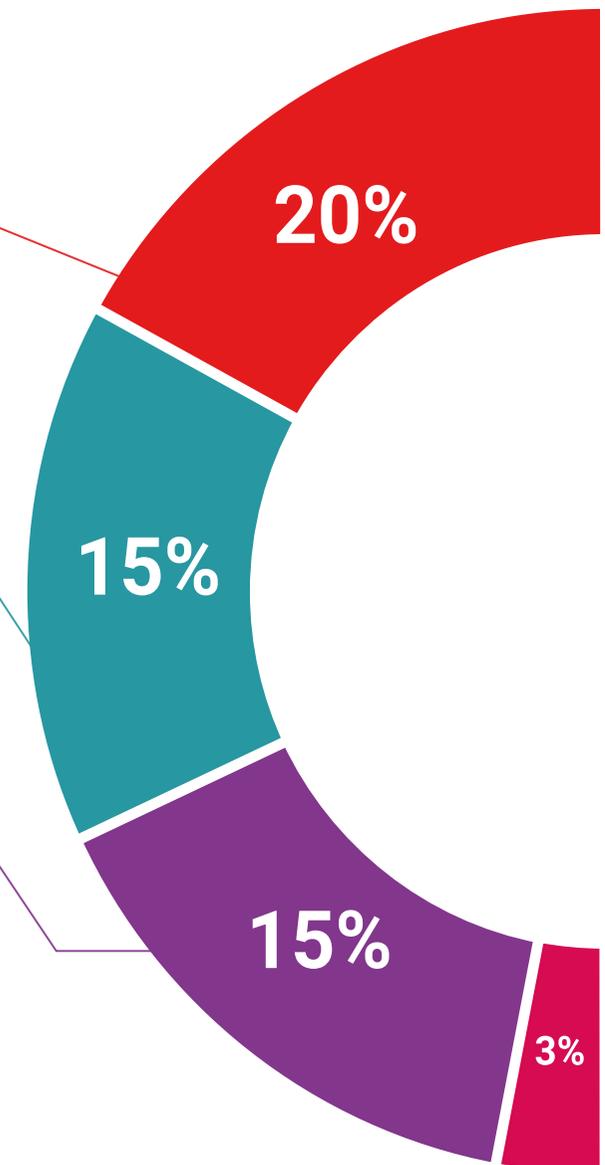

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

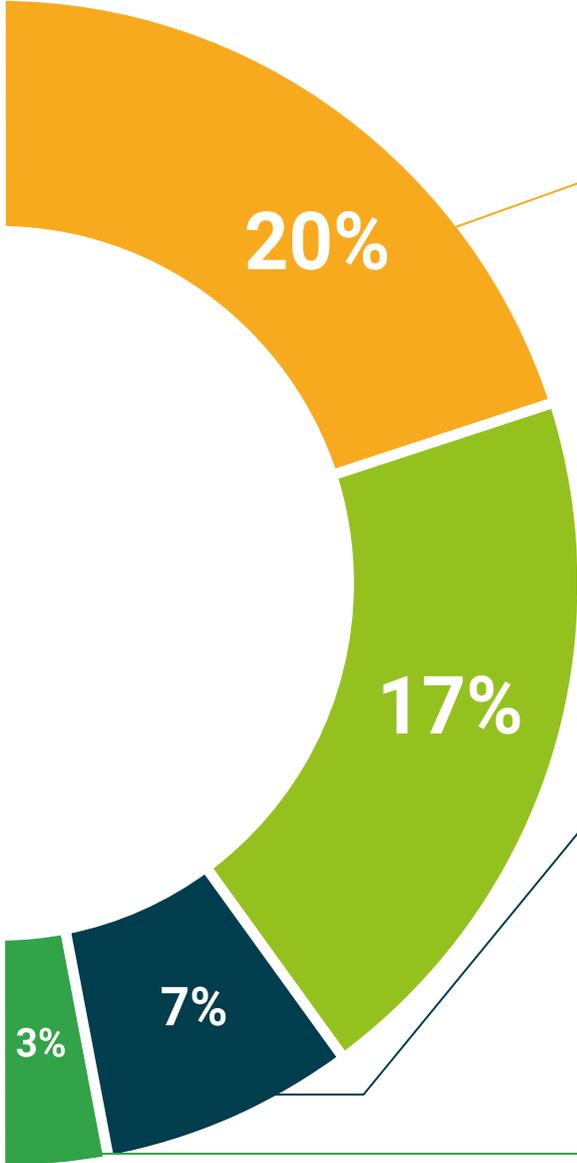

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

Case Studies

Students will complete a selection of the best case studies in the field. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Testing & Retesting

We periodically assess and re-assess your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an expert strengthens knowledge and memory, and generates confidence for future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

06

Teaching Staff

The teaching staff for this program is made up of experts in Full-Stack development with extensive experience in the technology industry. Thanks to their experience in high-impact projects, they bring a practical approach based on real-world cases, allowing for a deep understanding of the challenges and solutions in web application development. In addition, they have participated in successful implementations in various sectors, from e-commerce platforms to large-scale business systems. Their up-to-date knowledge and ability to convey innovative strategies ensure that teaching is aligned with market demands and the latest technological trends.

“

You will enjoy the guidance of the teaching team, made up of renowned experts in Advanced Full-Stack Development”

Management

Mr. Utrilla Utrilla, Rubén

- Technology Project Manager at Serquo
- Fullstack Developer at ESSP
- Junior Fullstack Developer at Sinis Technology S.L
- Junior Fullstack Developer at Cantoblanco Polytechnic School Campus
- Master's Degree in AI and Innovation by Founderz
- Degree in Computer Engineering from the Autonomous University of Madrid
- Google Cloud Developer course in Google Academic Program

Professors

Ms. Jiménez Monar, Angélica Liceth

- Software Developer at Serquo
- Technical Support Specialist at Tecnom
- Degree in Computer Engineering from the Autonomous University of Madrid
- Superior Degree in Network Computer Systems Administration

07 Certificate

This Postgraduate Certificate in Advanced Full-Stack Development guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Advanced Full-Stack Development** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
