Certificate

р. 28

01 Introduction

Computer science students specializing in Post-processing Techniques, Validation and Application in CFD have unique skills to design and develop more accurate and efficient systems, as they can understand how to analyze and validate simulations to ensure the accuracy and reliability of the results. For this reason, TECH Technological University has designed a degree that allows students to increase their knowledge to the maximum on aspects such as Surface Post-processing, Mesh Convergence, Model Validation, the Thermal Case or Errors in Simulation, among others. All this, thanks to a 100% online modality and with the most dynamic and practical multimedia materials available in the academic market.

Improve your skills and competences in the field of Computational Fluid Mechanics, thanks to the best online university in the world according to Forbes, thanks to TECH Technological University"

tech 06 | Introduction

Training in Post-processing Techniques, Validation and Application in CFD is essential to ensure the accuracy and reliability of fluid simulations in different sectors, to advance scientific knowledge and for competitiveness in the labor market. Computer science students trained in these techniques have the opportunity to apply their skills in diverse and exciting fields, as well as contribute to the development of advanced technologies.

For this reason, TECH Technological University has designed a Postgraduate Certificate Course on Post-processing Techniques, Validation and Application in CFD with the aim of providing students with the skills and competences with which to carry out their work as specialists, with the highest possible efficiency and quality. Thus, throughout this program, aspects such as Numerical Convergence, Volumetric Post-processing or Multiphase Cases are dealt with.

All this, thanks to a 100% online mode that allows students to organize their timetables and studies, combining them with their other day-to-day work and interests. In addition, this degree has the most Complete theoretical and practical materials on the market, which facilitates the student's study process and allows them to achieve their objectives quickly and effective. This **Postgraduate Certificate Course on Post-processing Techniques, Validation and Application in CFD** contains the most complete and up-to-date program on the market. The most important features include:

- The development of practical cases presented by experts in in Post-processing Techniques, Validation and applied in CFD
- The graphic, schematic and practical contents of the program provide Rehabilitation and practical information on those disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection work
- Content that is accessible from any fixed or portable device with an Internet connection

66

Become an expert in the latest trends in CFD Simulation in only 6 weeks and with total freedom of organization"

Introduction | 07 tech

Access all the content on Errors in Simulation or Method Classification from any device with an internet connection"

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. This will be done with the help of an innovative system of interactive videos made by renowned experts. Enrol now and learn more about Free CFD Post-processing Software, from the comfort of your home and at any time of the day.

Enhance your professional profile in one of the most promising areas in the field of IT, thanks to TECH Technological University and the most innovative multimedia materials.

ИО

02 **Objectives**

The objective Final Assessment of this Postgraduate Certificate Course on Postprocessing Techniques, Validation and Application in CFD is that the student acquires a precise update of his knowledge in this area. The acquisition of skills that will enable students to work with the highest possible quality and efficiency. All this, thanks to TECH Technological University and a 100% online modality that gives total freedom of organization and schedules to the student.

Delve into all the essentials of Free CFD Post-processing Software, from the comfort of your own home, at any time of the day"

tech 10 | Objectives

General Objectives

- Establish the basis for the study of turbulence
- Develop CFD statistical concepts
- Determine the main computational techniques in turbulence research
- Generate specialized knowledge in the method of Finite Volumes
- Acquire specialized knowledge in fluid mechanics calculation techniques
- Examine the wall units and the different regions of a turbulent wall flow
- Determine the characteristics of compressible flows
- Examine multiple models and multiphase methods
- Develop expertise on the multiple models and methods in multi-physics and thermal analysis
- Interpret the results obtained by correct post-processing

Objectives | 11 tech

rm-control description" style="clumps" bettyle="clumps" a> @)

; margin-left: **Spx;** ></dim

Specific Objectives

- Determine the types of post-processing according to the results to be analyzed: purely numerical, visual or a mixture of both
- Analyzing the convergence of a CFD simulation
- Establish the need for CFD validation and basic examples of CFD validation
- Examine the different tools available on the market
- To provide a foundation for the current context of CFD simulation

Exceed your highest expectations, thanks to a unique program with the most complete theoretical and practical materials on the academic market"

03 Course Management

With the aim of providing teaching of the highest quality and usefulness, TECH Technological University has selected professionals specialized in Post-processing Techniques, Validation and Application in CFD as part of this teaching staff, who have been in charge of designing the most advanced contents. In this way, students will learn from the best the keys to their professional development.

The most experienced teaching team will provide you with the most up-to-date knowledge on Postprocessing Techniques, Validation and Application in CFD, preparing you to face the most demanding challenges in this area"

tech 14 | Course Management

Management

Dr. García Galache, José Pedro

- XFlow Development Engineer at Dassault Systèmes
- Doctor in Aeronautical Engineering from the Polytechnic University of Valencia
- Degree in Aeronautical Engineering from the Polytechnic University of Valencia
- Research Master's Degree in Fluid Mechanics by the Von Kármán Institute for Fluid Dynamics
- Programa de formación breve en el Instituto Von Kármán de Dinámica de Fluidos

Professors

Mr. Mata Bueso, Enrique

- Senior Engineer for Thermal Conditioning and Aerodynamics at Siemens Gamesa
- Application Engineer and CFD R&D Manager at Dassault Systèmes
- Thermal Conditioning and Aerodynamics Engineer in Gamesa-Altran
- Fatigue and Damage Tolerance Engineer at Airbus-Atos
- R&D CFD Engineer at UPM
- Aeronautical Technical Engineer with specialization in Aircraft by UPM
- Master's Degree in Aerospace Engineering from Royal Institute of Technology of Stockholm

04 Structure and Content

The structure and contents of this syllabus have been designed by the renowned professionals who make up the TECH Technological University team of experts. These specialists have drawn on their extensive experience and specialist knowledge to create practical and fully up-to-date content. All this, based Besides on the most efficient pedagogical methodology, TECH Technological University Relearning, which allows students to essential concepts assimilation of navigate quickly.

Structure and Content | 17 tech

Expand your knowledge with a wide range of additional material available on the Virtual Campus"

tech 18 | Structure and Content

Module 1. Post-processing, validation and application in CFD

1.1. Post-processing in CFD I

- 1.1.1. Post-processing on planes and surfaces
- 1.1.1. Post-Process in the Plane
- 1.1.2. Post-processing on surfaces
- 1.2. Post-processing in CFD II
 - 1.2.1. Post-processing Volumetric
 - 1.2.1.1. Post-processing Volumetric I
 - 1.2.1.2. Post-processing Volumetric II
- 1.3. Free CFD post-processing software
 - 1.3.1. Free Post-processing Software
 - 1.3.2. Paraview
 - 1.3.3. Example of the use of ParaView
- 1.4. Convergence of simulations
 - 1.4.1. Convergence
 - 1.4.2. Mesh convergence
 - 1.4.3. Numerical convergence
- 1.5. Classification of Methods
 - 1.5.1. Applications
 - 1.5.2. Types of Fluid
 - 1.5.3. Scales
 - 1.5.4. Calculation machines
- 1.6. Model validation
 - 1.6.1. Need for Validation
 - 1.6.2. Simulation vs. Experiments
 - 1.6.3. Examples of validation
- 1.7. Simulation methods. Advantages and Disadvantages
 - 1.7.1. RANS
 - 1.7.2. LES, DES and DNS
 - 1.7.3. Other Methods
 - 1.7.4. Advantages and Disadvantages

Structure and Content | 19 tech

- 1.8. Examples of methods and applications
 - 1.8.1. Case of a body subjected to aerodynamic forces
 - 1.8.2. Thermal case
 - 1.8.3. Multiphase case
- 1.9. Good Simulation Practices
 - 1.9.1. Importance of Best Practices
 - 1.9.2. Good Practices
 - 1.9.3. Simulation errors
- 1.10. Free and commercial software
 - 1.10.1. FVM Software
 - 1.10.2. Software for other methods
 - 1.10.3. Advantages and Disadvantages
 - 1.10.4. Future of CFD simulation

Thanks to the most efficient teaching methodology, TECH Technological University Relearning, you will be able to acquire new skills and competences that will ensure you a promising future in this area"

05 **Methodology**

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

tech 22 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

Methodology | 23 tech

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Information Technology schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 24 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

30%

10%

8%

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Methodology | 27 tech

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

20%

06 **Certificate**

The Postgraduate Certificate Course on Post-processing Techniques, Validation and Application in CFD guarantees, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

66

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

tech 30 | Certificate

This **Postgraduate Certificate Course on Post-processing Techniques, Validation and Application in CFD** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
